**The Last Lecture** Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

**Achieve the College Dream** Maria Carla  
Chicuen, 2016-05-19 Students with few resources rarely apply to top colleges. Even when they have the academic and extracurricular merits to be admitted to institutions like Harvard, Yale and Princeton, these students usually opt for less selective universities. Many ignore that top colleges are actively seeking outstanding candidates regardless of their economic background. What's more, a great number of colleges offers generous financial aid to make sure every student can afford to attend. This book is the definitive resource to help high-achieving, low-income students access the best possible college. The author draws from her extensive experience in education to provide advice on important aspects of the path to college such as pursuing a strong high school curriculum, preparing for standardized exams, complementing learning at school, developing leadership, and finding expert help and role models—all through affordable strategies. In the book, the author also guides students through the college application and selection processes, as well as the steps to obtain enough financial aid. From the very first page, the author sheds light on her own journey to college through deeply personal vignettes, demonstrating by example that students with few resources can reach and succeed at the top universities in the United States.

The Redress Movement refers to efforts to obtain the restitution of civil rights, an apology, and/or monetary compensation from the U.S. government during the six decades that followed the World War II mass removal and confinement of Japanese Americans. Early campaigns emphasized the violation of constitutional rights, lost property, and the repeal of anti-Japanese legislation. 1960s activists linked the wartime detention camps to contemporary racist and colonial policies. In the late 1970s three organizations pursued redress in court and in Congress, culminating in the passage of the Civil Liberties Act of 1988, providing a national apology and individual payments of \$20,000 to surviving detainees.

*Won't Lose This Dream* Andrew Gumbel, 2020-08-25  
The extraordinary story of how Georgia State University tore up the rulebook for educating lower-income students Georgia State . . . has been reimagined—amid a moral awakening and a raft of data-driven experimentation—as one of the South's more innovative engines of social mobility. —The New York Times *Won't Lose This Dream* is the inspiring story of a public university that has blazed an extraordinary trail for lower-income and first-generation students in downtown Atlanta, the birthplace of the civil rights movement. Over the past decade Georgia State University has upended the conventional wisdom that large numbers of

students are doomed to fail simply because of their economic background or the color of their skin. Instead, it has harnessed the power of big data to identify and remove the obstacles that previously stopped them from graduating and completely transformed their prospects. A student from a mediocre high school working two jobs to make ends meet is now no less likely to succeed than a child of wealth and privilege—an earth-shaking achievement that is reverberating across every college campus in the country. With unique access to the key players and drawing on his skills as an investigative reporter, Andrew Gumbel delivers a thrilling, blow-by-blow account of a long battle to determine whether universities exist for their students or vice versa. The story is told through the visionary leaders who overcame fierce resistance to tear up the rules of their own institution and through the many remarkable students whose resilience and determination, often against daunting odds, inspired the work at every stage. Their success shows how the promise of social advancement through talent and hard work, the essence of the American dream, can be rekindled even in an age of deep inequalities and divisive politics.

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it

like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, Between the World and Me clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward.
