Caucasian Albania Jost Gippert,Jasmine Dum-Tragut,2023-06-19 By consequence of the Karabakh War in 2020 and due to Azerbaijanian revisionism concerning the history, culture and cultural monuments of the region, the discussion on Caucasian Albania, which is little known in the West in both academic and public circles, has been reignited. The handbook provides an overview of the current state of research on the Caucasian Albanians in an objective, scientifically sound manner. The contributions are not necessarily intended to reveal new scientific findings but rather to summarise approved knowledge. The volume brings together internationally renowned scholars, researchers and practitioners from various fields of studies reporting on and reviewing the state of research concerning the Caucasian Albanians, their history and archaeology, their language and written monuments, their religion, church history and their art, including their relation to the Udi people of today. The companion is intended to neutrally introduce the readership to the subject of Caucasian Albania from various perspectives.

Linguistic Decision Making Yucheng Dong,Jiuping Xu,2018-12-11 This book proposes a novel CWW model to personalize individual semantics in linguistic decision making, based on two new concepts: numerical scale and consistency-driven methodology. The numerical scale model provides a unified framework to connect different linguistic symbolic computational models for CWW, and the consistency-driven methodology customizes individuals' semantics to support linguistic group decision making by setting personalized numerical scales. The book is a valuable resource for researchers and postgraduates who are interested in CWW in linguistic decision making.

Size, Structure, And The Changing Face Of American Agriculture Arne Hallam,2019-09-05 Presents the latest findings on past changes in structure, the factors that lead to structural change, its effect on societal welfare and what will happen to the structure of agriculture in the years ahead. The book provides insights on issues such as the family farm, the industrialization of agriculture and the impact of agricultural technology on the environment.

METHODS FOR SOLVING DECISION-MAKING PROBLEMS UNDER UNCERTAIN ENVIRONMENT NANCY, Multiple-criteria decision-making (MCDM) problems are the imperative part of modern decision theory where a set of alternatives has to be assessed against the multiple influential attributes before the best alternative is selected. In a decision-making(DM) process, an important problem is how to express the preference value. Due to the increasing complexity of the socioeconomic environment and the lack of knowledge or the data about the DM problems, it is difficult for the decision maker to give the exact decision as there is always an imprecise, vague or uncertain information.
