*The Cambridge Companion to Boethius* John Marenbon, 2009-05-14 Boethius (c.480–c.525/6), though a Christian, worked in the tradition of the Neoplatonic schools, with their strong interest in Aristotelian logic and Platonic metaphysics. He is best known for his *Consolation of Philosophy*, which he wrote in prison awaiting execution. His works also include a long series of logical translations, commentaries and monographs and some short but densely-argued theological treatises, all of which were enormously influential on medieval thought. But Boethius was more than a writer who passed on important ancient ideas to the Middle Ages. The essays here by leading specialists, which cover all the main aspects of his writing and its influence, show that he was a distinctive thinker, whose arguments repay careful analysis and who used his literary talents in conjunction with his philosophical abilities to present a complex view of the world.

*The Complete Internet Companion for Librarians* Allen C. Benson, 1995 A user's manual that one can use to access many of the Internet's best known and most useful resources.

Fumonisin in Food Lauren S. Jackson,Jonathan W. DeVries,Lloyd B. Bullerman,2013-11-21 The contents of this book are the proceedings of the ACS symposium, Fumonisin in Food, which was held April 4-6, 1995, at the American Chemical Society National Meeting in Anaheim, CA. This symposium, which was international in scope, brought together researchers from diverse backgrounds in academia, government, and industry. Thirty-three speakers discussed topics ranging from the analysis of fumonisins to toxicology and regulatory aspects. The fumonisins became the spotlight of mycotoxin research in 1988, when researchers at the South African Medical Research Council isolated and structurally characterized the fumonisins. Since 1988, there has been an explosion in the numbers of papers dealing with fumoin-sin-related topics. The interest in the fumonisins has arisen for several reasons. First, fumonisins are found in measurable concentrations in corn grown throughout the world. Second, these compounds have been implicated as the causative agents in a variety of naturally occurring animal diseases. Finally, there is speculation that fumonisins may in part be responsible for the high incidence of esophageal cancer in regions of the world in which corn is the staple grain.

**Pivot to the Future** Omar Abbosh, Paul Nunes, Larry Downes, 2019-04-23 The proven, effective strategy for reinventing your business in the age of ever-present disruption Disruption by digital technologies? That's not a new story. But what is new is the wise pivot, a replicable strategy for harnessing disruption to

survive, grow, and be relevant to the future. It's a strategy for perpetual reinvention across the old, now, and new elements of any business. Rapid recent advances in technology are forcing leaders in every business to rethink long-held beliefs about how to adapt to emerging technologies and new markets. What has become abundantly clear: in the digital age, conventional wisdom about business transformation no longer works, if it ever did. Based on Accenture's own experience of reinventing itself in the face of disruption, the company's real world client work, and a rigorous two-year study of thousands of businesses across 30 industries, *Pivot to the Future* reveals methodical and bold moves for finding and releasing new sources of trapped value-unlocked by bridging the gap between what is technologically possible and how technologies are being used. The freed value enables companies to simultaneously reinvent their legacy, and current and new businesses. *Pivot to the Future* is for leaders who seek to turn the existential threats of today and tomorrow into sustainable growth, with the courage to understand that a wise pivot strategy is not a one-time event, but a commitment to a future of perpetual reinvention, where one pivot is followed by the next and the next.

The Bible in Early Transatlantic Pietism and Evangelicalism Ryan P. Hoselton, Jan Stievermann, Douglas A. Sweeney, Michael A. G. Haykin, 2022-06-29 This collection of essays showcases the variety and complexity of early awakened Protestant biblical interpretation and practice while highlighting the many parallels, networks, and exchanges that connected the Pietist and evangelical traditions on both sides of the Atlantic. A yearning to obtain from the Word spiritual knowledge of God that was at once experiential and practical lay at the heart of the Pietist and evangelical quest for true religion,

and it significantly shaped the courses and legacies of these movements. The myriad ways in which Pietists and evangelicals read, preached, translated, and practiced the Bible were inextricable from how they fashioned new forms of devotion, founded institutions, engaged the early Enlightenment, and made sense of their world. This volume provides breadth and texture to the role of Scripture in these related religious traditions. The contributors probe an assortment of primary source material from various confessional, linguistic, national, and regional traditions and feature well-known figures—including August Hermann Francke, Cotton Mather, and Jonathan Edwards—alongside lesser-known lay believers, women, people of color, and so-called radicals and separatists. Pioneering and collaborative, this volume contributes fresh insight into the history of the Bible and the entangled religious cultures of the eighteenth-century Atlantic world. Along with the editors, the contributors to this volume include Ruth Albrecht, Robert E. Brown, Crawford Gribben, Bruce Hindmarsh, Kenneth P. Minkema, Adriaan C. Neele, Benjamin M. Pietrenka, Isabel Rivers, Douglas H. Shantz, Peter Vogt, and Marilyn J. Westerkamp.
