The Glass Sentence S. E. Grove, 2015-06-16 For fans of *The Golden Compass*, this New York Times bestseller will take you on a fantastic journey across worlds and time. Boston, 1891. Sophia Tims comes from a family of explorers and cartographers who, for generations, have been traveling and mapping the New World—a world changed by the Great Disruption of 1799, when all the continents were flung into different time periods. Eight years ago, Sophia's parents left her with her uncle Shadrack, the foremost cartographer in Boston, and went on an urgent mission. They never returned. Then Shadrack is kidnapped. Sophia must search for him with the help of Theo, a refugee from the West. Together they travel over rough terrain and uncharted ocean, encounter pirates and traders, and rely on a combination of Shadrack's maps, common sense, and Sophia's unusual powers of observation. Little do they know that their lives are in as much danger as Shadrack's. A New York Times Bestseller! "I am in no doubt about the energy of S.E. Grove as a full-fledged, pathfinding fantasist. I look forward to the next installment to place upon the pile. Intensely."—Gregory Maguire, *The New York Times Book Review* * "Wholly original and marvelous beyond compare."—Kirkus Reviews, starred review

Seeing Things as They are John R. Searle, 2015 This book provides a comprehensive account of the intentionality of perceptual experience. With special emphasis on vision Searle explains how the raw phenomenology of perception sets the content and the conditions of satisfaction of experience. The central question concerns the relation between the subjective conscious perceptual field and the objective perceptual field. Everything in the objective field is either perceived or can be perceived. Nothing in the subjective field is perceived nor can be perceived precisely because the events in the subjective field consist of the perceivings, whether veridical or not, of the events in the objective field. Searle begins by criticizing the classical theories of perception and identifies a single fallacy, what he calls the Bad Argument, as the source of nearly all of the confusions in the history of the philosophy of perception. He next justifies the claim that perceptual experiences have presentational intentionality and shows how this justifies the direct realism of his account. In the central theoretical chapters, he shows how it is possible that the raw phenomenology must necessarily determine certain form of intentionality. Searle introduces, in detail, the distinction between different levels of perception from the basic level to the higher levels and shows the internal relation between the features of the experience and the states of affairs presented by the experience. The account applies not just to language possessing human beings but to infants and conscious animals. He also discusses how the account relates to certain traditional puzzles about spectrum inversion, color and size constancy and the brain-in-the-vat thought experiments. In the final chapters he explains and refutes Disjunctivist theories of perception, explains the role of unconscious perception, and concludes by discussing traditional problems of perception such as skepticism.

Polysaccharide Based Graft Copolymers Susheel Kalia, M.W. Sabaa, 2013-05-23 Renowned experts give all essential aspects of the techniques and applications of graft copolymers based on polysaccharides. Polysaccharides are the most abundant natural organic materials and polysaccharide based graft copolymers are of great importance and widely used in various fields.

Natural polysaccharides have recently received more attention due to their advantages over synthetic polymers by being non-toxic, biodegradable and available at low cost. Modification of polysaccharides through graft copolymerization improves the properties of polysaccharides. Grafting is known to improve the characteristic properties of the backbones. Such properties include water repellency, thermal stability, flame resistance, dye-ability and resistance towards acid-base attack and abrasion.

Polysaccharides and their graft copolymers find extensive applications in diversified fields. Applications of modified polysaccharides include drug delivery devices, controlled release of fungicides, selective water absorption from oil-water emulsions, purification of water etc.

Disrupting Logistics Christian Wurst, Luca Graf, 2021-01-29 This book presents trends, developments, and examples of how digital disruption is currently reshaping the logistics industry. Logistics is the invisible force behind the global economy, influencing and providing a lens into all economic activities. Chapters written by respected experts in the field describe how new technologies such as autonomous vehicles, blockchain, Internet of things (IoT), and state-of-the-art freight management solutions are fundamentally changing supply chain solutions. Special emphasis is placed on promising start-ups and venture capital firms around the world that are now investing in the future of logistics. Supply chains hold significant room for optimization to the benefit of customers, industry participants, authorities and the environment. This book provides a unique set of perspectives from industry leaders covering a wide range of topics. It is a 'must read' for anyone seeking to understand and contribute to a better tomorrow in supply chains logistics. – Thomas Bagge, Chief Executive Officer and Statutory Director DCSA "The need for standardisation and digitalisation in logistics is no longer an option. This book gives insights from industry experts, shows trends and innovations in platforms, underlines the need for transparency and how big data and analytics can make a world of difference. It's an incredible resource if you wish to better understand the new normal of logistics." – Global Chief Digital & Information Officer, MSC Mediterranean Shipping Company This book presents readers with a straightforward and comprehensive assessment of supply chain innovation and trends and their impact on the industry. With contributions from several industry leaders, it provides critical knowledge and insight that supply chain and logistics managers need to implement disruptive technologies strategically." – Rene Jacquat, Founder / Advisor, LogiChain Solutions

Debating Emerging Adulthood Jeffrey Jensen Arnett, Marion Kloep, Leo B. Hendry, Jennifer L. Tanner, 2011-01-14 Two pairs of developmental psychologists take sides in a debate that is central to the concept of emerging adulthood. They argue that as young people around the world share demographic similarities, such as longer education and later marriage, the years between the ages 18 and 25 are best understood as entailing a new life stage.

The Mediterranean region under climate change Collectif,2018-11-19 This book has been published by Allenvi (French National Alliance for Environmental Research) to coincide with the 22nd Conference of Parties to the United Nations Framework Convention on Climate Change (COP22) in Marrakesh. It is the outcome of work by academic researchers on both sides of the Mediterranean and provides a remarkable scientific review of the mechanisms of climate change and its impacts on the environment, the economy, health and Mediterranean societies. It will also be valuable in developing responses that draw on "scientific evidence" to address the issues of adaptation, resource conservation, solutions and risk prevention. Reflecting

the full complexity of the Mediterranean environment, the book is a major scientific contribution to the climate issue, where various scientific considerations converge to break down the boundaries between disciplines.

The Golden Specific S. E. Grove, 2016-06-14 For fans of *The Golden Compass*, this is book two in the *Mapmakers Trilogy* and follow-up to S.E. Grove's stunning debut, *The Glass Sentence*. It is the summer of 1892, one year since Sophia Tims and her friend Theo embarked upon the dangerous adventure that rewrote the map of the world. Since their return home to Boston, she has continued searching for clues to her parents' disappearance, combing archives and libraries, grasping at even the most slender leads. Theo has apprenticed himself to an explorer in order to follow those leads across the country—but one after another proves to be a dead end. Then Sophia discovers that a crucial piece of the puzzle exists in a foreign Age. At the same time, Theo discovers that his old life outside the law threatens to destroy the new one he has built with Sophia and her uncle Shadrack. What he and Sophia do not know is that their separate discoveries are intertwined, and that one remarkable person is part of both. There is a city that holds all of the answers—but it cannot be found on any map. Surrounded by plague, it can only be reached by a journey through darkness and chaos, which is at the same time the plague's cure: *The Golden Specific*. This delicious blend of magic, history, and science will continue to delight fans of intricate world-building and rich storytelling.—School Library Journal Readers who have already read the first installment will gladly savor another journey with Sophia and marvel at the worlds they enter. Brilliantly imagined and full of wonder.—Kirkus Reviews

The Crimson Skew S. E. Grove, 2017-07-04 The thrilling conclusion to S. E. Grove's New York Times–bestselling *Mapmakers Trilogy*—a historical, fantastical adventure perfect for fans of Philip Pullman! It is late August 1892, and Sophia Tims is coming home from a foreign Age, having risked her life in search of her missing parents. Now she is aboard ship, with a hard-earned, cryptic map that may help her find them at long last. But her homecoming is anything but peaceful. Threatening clouds hang over New Orleans harbor. Sinkholes have been opening in Boston, swallowing parts of the city whole. Rogue weirs tear up the Baldlands. Worst of all, New Occident is at war, led by a prime minister who will do anything to expand the country westward. He has blackmailed Sophia's beloved uncle Shadrack into drawing the battle maps that will lead countless men and boys—including Sophia's best friend, Theo—to their deaths. As Sophia puzzles out her next move, Shadrack is peeling back layers of government intrigue, and Theo is bracing himself to fight. A red fog of war is rising, and New Occident's future hangs in the

Neural Monitoring Steven K. Salzman, 2012-12-06 The symposium from which this book originates represents a significant watershed in the field of intraoperative neural monitoring, since the participants concluded that electrophysiologic monitoring techniques should be considered a standard of care for surgical procedures that place the central nervous system (CNS) at risk for injury. Specifically, it was agreed that the somatosensory-evoked potential (SEP) is a remarkably reliable and sensitive indicator of several aspects of CNS function, and should be routinely employed as an intraoperative monitor during many neurosurgical and orthopedic procedures. The significance of this conclusion cannot be overstated, for at the time of this writing, intraoperative monitoring methods based on evoked-potential analyses are still considered experimental and are not in routine use. The reasons for this are not clear, given the accumulation of literature and expertise on this subject over the past five years. Granted, the cost of electrophysiological monitoring equipment is high, but only initially. The benefits of injury prevention far outweigh these costs, from both medical and economic viewpoints. It is our sincere hope and goal that the medical community be made aware of the value of intraoperative neural monitoring.
