Disease Control Priorities, Third Edition (Volume 2) Robert Black,Ramanan Laxminarayan,Marleen Temmerman,Neff Walker,2016-04-11 The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Managing Online Forums Patrick O'Keefe,2008-04-21 Every day, millions of users log on to their favorite online forums and interact with others to get advice and discuss everything from the latest news and trends to their

hobbies, professions, and whatever else strikes their fancy. Administrators have to lead these communities, deal with difficult users, and choose moderators. Legal constraints, spammers, and technical issues can turn the excitement of running an online community into chaos. With the right guidance, however, running forums can be a pleasure. Patrick O'Keefe has spent years developing and managing online communities. Now, he shows readers how to make the right decisions about every aspect of their forums, including:

- choosing a name and domain name
- picking the right software
- deciding on user options like avatars and private messaging
- setting guidelines and dealing with violators
- ensuring that posts stay on topic
- settling online disputes among users
- involving users and keeping the site interesting

Managing Online Forums is the one book that shows site owners and administrators how to create a safe and entertaining community that users will return to again and again.

Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the

fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning

systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Knowledge, Technology and Law Emilie Cloatre, Martyn Pickersgill, 2014-09-15
The relationships between knowledge, technologies, and legal processes are central to the constitution of contemporary societies. As such, they have come to provide the focus for a range of academic projects, across interdisciplinary legal studies and the social sciences. The domains of medical law and ethics, intellectual property law, environmental law and criminal law are just some of those within which the pervasive place and 'impact' of technoscience is immediately apparent. At the same time, social scientists investigating the making of technology and expertise - in particular, scholars working within the tradition of science and technology studies - frequently interrogate how regulation and legal processes, and the making of knowledge and technologies, are intermingled in complex ways that come to shape and define each other. This book charts the important interface between studies of law, science and society, as explored from the perspectives of socio-legal studies and the increasingly influential field of science and technology studies. It brings together scholars from both areas to interrogate the joint roles of law and science in the construction and

stabilization of socio-technical networks, objects, and standards, as well as their place in the production of contemporary social realities and subjectivities.

Pea in a Pod, Second Edition Linda Goldberg, 2012-07-19 Back in the good old days, mothers-to-be visited their obstetricians once a month and gave birth to their babies heavily sedated, while their husbands paced nervously in the waiting room. Today, most parents choose to be active players. If you want to be a participant in the birth of your baby, Pea in a Pod is your playbook. Taking you from your first day of pregnancy through your child's first year, Pea in a Pod presents everything from relaxation exercises to practice during pregnancy, birth positions, and breathing techniques. This comprehensive guide offers a month-by-month breakdown of the physical changes to expect during pregnancy and describes the emotional aspects of pregnancy. It also provides a nutrition plan for the pregnant woman; exercise plans for the mother-to-be, new mother, and cesarean mother; and a wealth of hints for the father-to-be and labor partner. The basics of infant care and breastfeeding are included, and over 200 photographs and illustrations clarify the text. A step-by-step handbook, a ready reference, and a source of practical advice, Pea in a Pod is a book you'll turn to time and time again.

Versailles Yannick Hill, 2016-08-25 Welcome to Versailles, an ocean-front mega-mansion, 100 rooms of technologically breathtaking real estate, tailor-

made for Casey Baer, founder and CEO of the internet's pre-eminent social network. He's the closest thing the online generation has to royalty, and this is his palace. But all is not well in this concrete shell of one man's American Dream. His wife, Synthea, once the world's foremost industrial designer, roams the corridors in a drugged dream state. His son, River, locks himself away in his room, living vicariously through dozens of virtual pseudonyms. And Missy, his daughter, has just deleted her online profile and driven away through the gates, never to return. As River tries to track his sister down, he lights upon Deep Sky. Is it a cult? And if so, what do they want with Missy? Is she running away from home or toward a darker mystery? And why? Is it something Casey did? Versailles is a fable for the digital age. In an era of perpetual connectivity and mass surveillance, the novel explores our dual need to be witnessed and to be alone.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a

child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and

services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Forum Josh Wardrip, 2022-03 In an unnamed town, an anonymous narrator scrupulously plans and commits an unspeakable, seemingly random act of mass-casualty violence. With a taut and nonlinear exposition that portrays with devastating precision an enigmatic loner's gradual transition from hedonistic anomie to an increasingly strange and sinister obsession, Josh Wardrip's brilliantly intricate debut novel gleefully dissects the raw existential horror of flophouses, mental hospitals, and everyday life. As a primal howl

in the wilderness that doubles as an exquisitely structured puzzle, Forum is a meditation on delusion, interiority, and the sources of evil.

Building Successful Online Communities Robert E. Kraut, Paul

Resnick, 2012-03-23 How insights from the social sciences, including social psychology and economics, can improve the design of online communities. Online communities are among the most popular destinations on the Internet, but not all online communities are equally successful. For every flourishing Facebook, there is a moribund Friendster—not to mention the scores of smaller social networking sites that never attracted enough members to be viable. This book offers lessons from theory and empirical research in the social sciences that can help improve the design of online communities. The authors draw on the literature in psychology, economics, and other social sciences, as well as their own research, translating general findings into useful design claims. They explain, for example, how to encourage information contributions based on the theory of public goods, and how to build members' commitment based on theories of interpersonal bond formation. For each design claim, they offer supporting evidence from theory, experiments, or observational studies.

Birthing a Mother Elly Teman,2010 This is an ethnography which probes the intimate experience of gestational surrogate motherhood. Teman shows how surrogates and intended mothers carefully negotiate their cooperative endeavour.

Baby Catcher Peggy Vincent,2003-04-15 In this engaging account of her career as a midwife, Vincent describes the hilarious, sometimes frightening, events surrounding the appearance of a new human being. More than a collection of unforgettable stories, *Baby Catcher* is a clarion call for a less technological, more personalized approach to childbirth in this country.

The Future of Assisted Suicide and Euthanasia Neil M. Gorsuch,2009-04-12 After assessing the strengths and weaknesses of arguments for assisted suicide and euthanasia, Gorsuch builds a nuanced, novel, and powerful moral and legal argument against legalization, one based on a principle that, surprisingly, has largely been overlooked in the debate; the idea that human life is intrinsically valuable and that intentional killing is always wrong. At the same time, the argument Gorsuch develops leaves wide latitude for individual patient autonomy and the refusal of unwanted medical treatment and life-sustaining care, permitting intervention only in cases where an intention to kill is present.

Producing Masculinity Michele White, 2019-03-01 Thoughtful, witty, and illuminating, in this book Michele White explores the ways normative masculinity is associated with computers and the Internet and is a commonly enacted online gender practice. Through close readings and a series of case studies that range from wedding forums to men's makeup video tutorials, White considers the ways masculinities are structured through people's collaborations and contestations over the establishment of empowered positions, including debates about such key terms and positions as "the nice guy," "nerd," "bro," and "groom." She asserts that cultural notions of masculinity are reliant on figurations of women and femininity, and explores cultural conceptions of masculinity and the association of normative white heterosexual masculinity with men and women. A counterpart to her earlier book, *Producing Women*, White has crafted an excellent primer for scholars of gender, media, and Internet studies.

Searching for Savanna Mona Gable, 2023-04-25 A gripping and illuminating investigation into the disappearance of Savanna LaFontaine-Greywind when she was eight months pregnant, highlighting the shocking epidemic of violence against Native American women in America and the societal ramifications of government inaction. In the summer of 2017, twenty-two-year-old Savanna LaFontaine-Greywind vanished. A week after she disappeared, police arrested the white couple who lived upstairs from Savanna and emerged from their apartment carrying an infant girl. The baby was Savanna's, but Savanna's body would not be found for days. The horrifying crime sent shock waves far beyond Fargo, North Dakota, where it occurred, and helped expose the sexual and physical violence Native American women and girls have endured since the country's colonization. With pathos and compassion, *Searching for Savanna* confronts this history of dehumanization toward Indigenous women and the government's complicity in the crisis. Featuring in-depth interviews, personal accounts, and trial analysis, *Searching for Savanna* investigates these injustices and the decades-long struggle by Native American advocates for meaningful change.
