The Linguistic Structure of Modern English Laurel J. Brinton,Donna Brinton,2010 This text is for advanced undergraduate and graduate students interested in contemporary English, especially

those whose primary area of interest is English as a second language, primary or secondary-school education, English stylistics, theoretical and applied linguistics, or speech pathology. The emphasis is on empirical facts of English rather than any particular theory of linguistics; the text does not assume any background in language or linguistics. In this newly revised edition numerous example sentences are taken from the Corpus of Contemporary American English. A full glossary of key terms, an additional chapter on pedagogy and new sections on cognitive semantics and politeness have been added. Other changes include: completely updated print references; web links to sites of special interest and relevance; and a revised, reader-friendly layout. A companion website that includes a complete workbook with self-testing exercises and a comprehensive list of web links accompanies the book. The website can be found at the following address: <http://dx.doi.org/10.1075/z.156.workbook> Students completing the text and workbook will acquire: a knowledge of the sound system of contemporary English; an understanding of the formation of English words; a comprehension of the structure of both simple and complex sentence in English; a recognition of complexities in the expression of meaning; an understanding of the context and function of use upon the structure of the language; and an appreciation of the importance of linguistic knowledge to the teaching of English to first and second-language learners. Laurel J. Brinton is Professor of English Language at the University of British Columbia. Donna M. Brinton is Senior Lecturer in TESOL at the University of Southern California's Rossier School of Education. The Linguistic Structure of Modern English is a revised edition of The Structure of Modern English by Laurel J. Brinton (2000).

The Study of Bilingual Language Processing Nan

Jiang,2023-03-30 This book offers a detailed account of the issues, models, and outcomes of research into the cognition of bilingualism. The first chapter identifies the most important characteristics of this research and its historical developments, before the main part of the book explores studies of four bilingual processing topics. The first of

these is lexico-semantic representation and organization in bilinguals, which deals with how words and meanings are represented and connected in the bilingual mind. The second, cross-language priming, explores the bilingual lexicon by examining how exposure to words in one language may affect word recognition in another and leads to the discovery of an asymmetry in translation priming. The third topic is selective lexical access in bilinguals, which examines whether bilinguals can selectively activate one language while suppressing the other, while the fourth is code switching, focussing on language control and language regulation mechanisms in bilinguals. The book concludes with a chapter that reviews research in three areas beyond lexical processing: autobiographical memory, the representation and interaction of syntactic knowledge, and the consequences of bilingualism. The volume demonstrates the theoretical significance and real-world practical implications of research into bilingual language processing, and will be a valuable resource for seminars and courses from advanced undergraduate level upwards.

60 Kinesthetic Grammar Activities Alice Savage, Colin Ward, 2020-09-20 “[60 Kinesthetic Grammar Activities contains] a wide range of practicable activities that, in the words of the authors, ‘connect language in our head to our arms and legs, eyes and ears.’ — Scott Thornbury, Author of *How to Teach Grammar* and *Grammar Uncovered* from the Foreword Language is more than words.
