Online Teaching and Learning in Higher Education Pedro Isaias, Demetrios G. Sampson, Dirk Ifenthaler, 2020-09-29 This book is to explore a variety of facets of online learning environments to understand how learning occurs and succeeds in digital contexts and what teaching strategies and technologies are most suited to this format. Business, health, government and education are some of the core sectors of society which have been experiencing deep transformations due to a generalized digitalization. While these changes are not novel, the swift progress of technology and the rising complexity of digital environments place a focus on the need for further research and novel strategies. In the context of education, the promise of increased flexibility and broader access to educational resources is impelling much of higher education's course offerings to online environments. The 21st century learner requires an education that can be pursued anytime and anywhere and that is more aligned with the demands of a digital society. Online education not only assists students to successfully integrate a workforce that is increasingly digital, but it helps them to become more comfortable with the use of technology in general and, hence, more prepared to be prolific digital citizens. The variety of settings portrayed in this volume attest to the unlimited opportunities afforded by online learning and serve as valuable evidence of its benefit for students' educational experience. Moreover, these research efforts assist a more comprehensive reflection about the delivery of higher education in the context of online settings.

**Substance Use and Abuse** Victor N. Shaw, 2002-10-30 While the issues of substance use and abuse have been addressed from a variety of perspectives and approaches, the fundamental social issues have not been covered in any systematic way. This book represents the first academic effort to apply major sociological theories to the field of substance use and abuse in order to provide readers with a solid knowledge base from which they may develop more informed ideas about prevention, intervention, treatment, law enforcement, and social reactions to this ubiquitous social problem. Using a systematic framework, Shaw reviews the existing literature, explains key concepts, addresses fundamental issues, and discusses the policy implications for public health, social control, community, and work. This comprehensive sociological treatment of substance use and abuse is essential reading for educators in public policy, sociology, criminology, and deviance. Applying the major sociological theories of anomie, career, conflict, functionalist, rational choice, social control, social disorganization, social learning, social reaction, and subculture perspectives, Shaw provides an important overview of the issues involved with substance use and abuse. By utilizing such an approach, he demonstrates that public views, governmental policies, intervention strategies, and prevention programming can be informed by the different sociological theories. This unique consideration and analysis illustrates that no single view on substance use and abuse is absolute or sacred. Therefore, considering the issues from a variety of sociological perspectives will bring greater understanding to a pervasive social problem that continues to plague American society.

**Learning by Expanding** Yrjö Engeström, 2015 The second edition of this seminal text illustrates the development and implementation of Yrjö Engeström's expansive learning activity theory.

Oppression and Liberty Simone Weil, 2001 In this remarkable work, Weil analyses the causes of

oppression, its mechanisms and forms, and questions revolutionary responses while presenting a prophetic view of a way forward.

**Caliban and the Witch** Silvia Federici, 2004 Women, the body and primitive accumulation--Cover.

**Geographic Citizen Science Design** Artemis Skarlatidou, Muki Haklay, 2021-02-04 Little did Isaac Newton, Charles Darwin and other 'gentlemen scientists' know, when they were making their scientific discoveries, that some centuries later they would inspire a new field of scientific practice and innovation, called citizen science. The current growth and availability of citizen science projects and relevant applications to support citizen involvement is massive; every citizen has an opportunity to become a scientist and contribute to a scientific discipline, without having any professional qualifications. With geographic interfaces being the common approach to support collection, analysis and dissemination of data contributed by participants, 'geographic citizen science' is being approached from different angles. Geographic Citizen Science Design takes an anthropological and Human-Computer Interaction (HCI) stance to provide the theoretical and methodological foundations to support the design, development and evaluation of citizen science projects and their user-friendly applications. Through a careful selection of case studies in the urban and non-urban contexts of the Global North and South, the chapters provide insights into the design and interaction barriers, as well as on the lessons learned from the engagement of a diverse set of participants; for example, literate and non-literate people with a range of technical skills, and with different cultural backgrounds. Looking at the field through the lenses of specific case studies, the book captures the current state of the art in research and development of geographic citizen science and provides critical insight to inform technological innovation and future research in this area.

**The Sociogony** Mark P. Worrell, 2018-11-26 The Sociogony attempts to forge a new strain of critical social theory by repositioning Durkheim's relationship to Hegel and Marx. A fresh look at social facts, authority, and processes of genesis, rule, and decay provide a stable social ontology for a world turned upside down.

**Family Trust** Kathy Wang, 2018-11-01 'A globe-trotting, whirlwind, tragi-comic family saga... A joy' ANDREW SEAN GREER. Meet Stanley Huang: Father, husband, ex-husband, man of unpredictable temper, aficionado of bargain luxury goods. He's just been diagnosed with cancer, and his family are dealing with the fall-out. Meet Stanley's family: Son Fred, a banker who never has enough money; daughter Kate, juggling a difficult boss and her two small children; ex-wife Linda, suspicious of Stanley's grand gestures; and second wife Mary, giver of foot rubs and ego massages. Meet Stanley's fortune: As the Huangs come to terms with Stanley's approaching death, they are starting to fear that there's a lot less in the pot than they thought. And that's a problem when you're living in one of the wealthiest parts of California... Spanning themes of culture, ambition, love and – most of all – family, this sparkling debut is a sharp, funny and loving portrait of modern Asian-American life. PRAISE FOR FAMILY TRUST: 'Silky in satire, the writing is biting, bristling, intelligent' Irish Times. 'A brilliant mashup of Crazy Rich Asians and Arrested Development... The best kind of family drama' Cristina Alger, author of The Banker's Wife. 'Deftly weaves together rich family drama, biting corporate satire and deeply felt immigrant story... A sharp, spirited and wholly original take on the American Dream' Jillian Medoff. 'A wicked and witty send up of Asian-American Silicon Valley elite, a delightful debut that Jane Austen would be proud of' Micah Perks.

**The Social Construction of Gender** Judith Lorber, Susan A. Farrell, 1991 Essentialist notions of gender difference are being challenged increasingly by research on the social construction of gender. Lorber and Farrell present a key collection of current research which illustrates how the constructivist approach has been applied to a variety of issues, including those centred on the family, the workplace, social class, ethnic

identity and politics. Much of the recent work in this area has appeared in the journal *Gender and Society* which is the genesis of most of the papers in this volume.

Infant Child Mental Health Early Intervention Connie Lillas, Janiece Turnbull, 2009 A groundbreaking neuroscientific understanding of infant and child development, including a CD-ROM with supplementary worksheets, figures and tables. When early interventions with children fail, clinicians wonder: How could things have been different? The answers seem obvious at first, but a little reflection begins to unveil just how complicated this question really is. Who should have been included in the treatment? With what professionals and using what approaches? When should intervention have occurred? Each question involves a spectrum of both personal and societal issues, which is perhaps why problems that are so widely acknowledged remain so widely ignored. Often, a family is not aware that their story could have had a different ending. So, in response to the critical need for a more cohesive system of care for our youngest patients, this book presents a conceptual framework for interdisciplinary collaboration. Examining the issues of infant mental health and early intervention from a brain-based perspective—one that cuts across all domains—addresses the need for individual practitioners to incorporate the whole picture in relation to their part in assessing and intervening with each individual child and parent, and provides a global framework for team collaboration.

*The Silver Canvas* Bates Lowry, Isabel Barrett Lowry, 2000-02-03 By the middle of the nineteenth century, the most common method of photography was the daguerreotype—Louis Jacques Mandé Daguerre's miraculous invention that captured in a camera visual images on a highly polished silver surface through exposure to light. In this book are presented nearly eighty masterpieces—many never previously published—from the J. Paul Getty Museum's extensive daguerreotype collection.

*Methods of Critical Discourse Studies* Ruth Wodak, Michael Meyer, 2015-10-15 This is a sophisticated and nuanced introduction to critical discourse analysis (CDA) that covers a range of topics in an accessible, engaging style. With international examples and an interdisciplinary approach, readers gain a rich understanding of the many angles into critical discourse analysis, the fundamentals of how analysis works and examples from written texts, online data and images. This new edition: expands coverage of multimodality adds two new chapters on social media and analysis of online data supports learning with a guided introduction to each chapter includes a new and extended glossary Clearly written, practical and rigorous in its approach, this book is the ideal companion when embarking on research that focuses on discourse and meaning-making.

The study is based on the findings and results emanating from the first cycle reviews of the implementation of the Convention by 156 States parties (2010-2015). ***Picasso at the Lapin Agile and Other Plays*** Steve Martin, 1996 An imagined meeting between Pablo Picasso and Albert Einstein in 1904 examines the impact of science and art on a rapidly changing society

***Owning the Olympics*** Monroe Price, Daniel Dayan, 2009-12-10 A major contribution to the study of global events in times of global media. *Owning the Olympics* tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover. —Guobin Yang, Associate Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the New China---a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, *Owning the Olympics* reveals how multiple entities---including the Chinese Communist Party itself---seek to influence and control the narratives through which the Beijing Games will be understood. digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. ***The Practice of Everyday Life*** Michel de Certeau, 2011-11 Michel de Certeau considers the uses to which social representation and modes of social behavior are put by individuals and groups, describing the tactics available to the common man for reclaiming his own autonomy from the all-pervasive forces of commerce, politics, and culture. In exploring the public meaning of ingeniously defended private meanings, de Certeau draws on an immense theoretical literature in analytic philosophy, linguistics, sociology, semiology, and anthropology--to speak of an apposite use of imaginative literature.
