

Actual Fighter

Michael Staack

Natural Born Fighters Craig Goldman, 2002 Bare-knuckle fighters, unlicensed boxers and No-Holds-Barred gladiators. They're not amateurs because they do it for money, they're not professional because nobody regulates them. They're fighters - it's what they do. Plunged into a brutal world that exists beyond the authority of any sporting body, NATURAL BORN FIGHTERS uncovers today's kings of underground combat. It's a world where every fight has different rules and some have no rules at all. From bare-knuckle fights that take place in country lanes and inner-city building sites to bloody, raw gladiatorial cage fighting, you'll meet hard men, villains, gypsies, mayben even the bloke who lives next door to you. They're all connected by a common thread-they all love fighting, and they'll do anything to win. Introductions to these twenty-first-century gladiators and are given by several respected and feared personalities personal insights into the current underground fighting scene; including Bobby Frankham, ex-professional boxer and gypsy bare-knuckle fighter; Alan Mortlock, Britain's king of unlicensed boxing; and Andy Jardine, founder of the British end of the new mixed martial arts, the fighting are of No-Holds-Barred. And, of course, there's the fighters . . .

Streetfighters Julian Davies, 2002 In every city and town in Britain there are men who have earned notoriety with their fists. Bouncers, boxers, bareknuckle fighters, brawlers and enforces, they are throwbacks to an age when disputes settled in blood. In this chilling book, Julian Davies interviews two dozen of the hardest men in Britain, from the King of the Gypsies to champion martial artists, to lift the lid on their brutal world of violence, honour and respect. Through the fighter's own words, readers will enter a harrowing world of bloody gang fights, brutal

reprisals, pub brawls, and deaths.

Fighter Drawdown Dynamics William W. Taylor, J. H. Bigelow, John A. Ausink, 2009 The number of fighter aircraft in the Air Force inventory is decreasing, but the demand for experienced fighter pilots is increasing. The authors use a dynamic mathematical model to show that, to keep from damaging fighter unit readiness, fighter pilot production in the active Air Force must be reduced and new approaches to developing and managing personnel with fighter pilot-like skills must be adopted.

Review of Current Military Literature ,1946

The Fighting Edge James Lafond, 2000-01-01 James LaFond has been training in various U.S., European, Korean, Chinese and Filipino martial arts for 25 years. He is also a veteran boxer and a laborer in one of America's toughest cities. He knows that the martial arts do not present all the realities of real combat and that 30 seconds on the sidewalk is worth three years in the dojo. In this book he explores the practical value, study and application of the martial arts in relation to real violence. What is it like to be in a real fight against deranged, drunk or drugged opponents? What is it like to be punched in the head? What do you do if your attacker is armed and you're not? What about the claims of various martial arts - are they valid? Which martial art is better for real fighting? Reading this book will help you maximize your training and become a better, smarter fighter.

Fighter Aces of the Great War Stephen Wynn, Tanya Wynn, 2020-04-30 History has recorded that the first ever powered flight took place at Kitty Hawk in America, on 17 December 1903 and was carried out by the Wright brothers, Orville and Wilbur, who were aircraft designers and manufacturers. By the time of the outbreak of the First World War, aviation was only eleven years old. The daddy of

battlefield warfare until that point in time had been the cavalry, a position it maintained even as war was declared on the Western Front. Aircraft were not initially seen as an offensive weapon and were instead used by both sides as observation platforms, or to take aerial photographs from. Even when they were eventually used in an offensive capacity, they did not have machine guns attached to them; if the crew wanted to open fire then they had to use a pistol or rifle. As the war progressed so the use of aircraft changed from being an observational tool, to that of a fighter and bomber aircraft - something that had never been foreseen at the outbreak of the war. The book then looks at the fighter aces from all sides. These were pilots who had been credited with shooting or forcing down a minimum of five enemy aircraft, of which there were hundreds. While some of these aces survived, many of them were killed. The most famous fighter ace of all is without doubt the German pilot known as the Red Baron, Manfred von Richthofen.

RAF Fighter Command Ron Mackay, 2019-11-03 Royal Air Force Fighter Command's brief was to provide an effective aerial barrier to any attempt at domination of British skies. The aircraft and technical resources on hand between 1936 and WWII's initiation were thankfully improved to a level that was barely sufficient to withstand the hitherto unchallengeable Luftwaffe's advance across Western Europe. Between 1940 and 1942 the Command generally found itself on the back-foot in terms of overall success. The introduction of aircraft designs that would change the situation, however costly, in its ultimate favour, featured prominently from the mid-point of WWII. The Luftwaffe found itself being challenged and regularly bested 'round the clock'; by the advent of D-Day the Command's efforts had materially contributed to the Allied on-surge that had placed

its adversary on a permanent downward spiral towards total extinction.

Bruce Lee's Fighting Method Bruce Lee, M. Uyehara, 1977 Part of the Bruce Lee's Fighting Method series, this book teaches how to perform jeet kune do's devastating strikes and exploit an opponent's weaknesses with crafty counterattacks like finger jabs and spin kicks.

Fighting As Real As It Gets Michael Staack, 2019-07-25 Michael Staack's multi-year ethnography is the first and only comprehensive social-scientific analysis of the combat sport 'Mixed Martial Arts'. Based on systematic training observations, the author meticulously analyses how Mixed Martial Arts practitioners conjointly create and immerse themselves into their own world of ultimate bodily combat. With his examination of concentrative technique demonstrations, cooperative technique train-ings, and chaotic sparring practices, Staack not only provides a sociological illumination of Mixed Martial Arts

culture's defining theme - the quest of 'Fighting As Real As It Gets'. Rather further-more, he provides a compelling cultural-sociological case study on practical social constructions of 'authenticity'.

Born To Fight Mark Hunt, Ben Mckelvey, 2015-09-29 'There's more than a few instances in this biography of UFC cult favourite Mark Hunt that make you shake your head in can't-make-this-stuff-up disbelief' - Inside Sport A powerful story of sadness, hope, pride, honour and triumph from the real-life Rocky! Raw, confronting and honest, UFC champion Mark Hunt's inspiring autobiography shows it is possible to defy the odds and carve a better life. Born into a Mormon Samoan family, Hunt details his harrowing early life, his troubled teen years, and his angry youth with no apparent future. After being plucked from an Auckland street fight and dropped into his first kickboxing bout, Mark went on to achieve unprecedented success in Australian and New Zealand combat sports. In an ongoing career that has spanned the globe, Mark Hunt has been in some of the UFC, Pride and K-1's most memorable battles. But in some ways those fights pale in comparison to that which he has overcome out of the ring and cage. As

fearless with his opinions as he is in the Octagon, Mark pulls no punches in revealing the highs and lows of his extraordinary life.

Scream of Eagles Robert K. Wilcox, 2014-04-12 The mission: Become the most skilled, highly-trained, and deadliest fighter pilots in the world. The place: TOP GUN In the darkest days of the Vietnam War, the U.S. Navy's kill ratio had fallen to 2:1 -- a deadly decline in pilot combat effectiveness. To improve the odds, a corps of hardened fighter pilots founded the Fighter Weapons School, a.k.a. TOP GUN. Utilizing actual enemy fighter planes in brutally realistic dogfights, the Top Gun instructors dueled their students and each other to achieve a lethal new level of fighting expertise. The training paid off. Combining the latest weaponry and technology, mental endurance, and razor-sharp instincts, the Top Gunners drove the Navy's kill ratio up to an astounding 12:1, dominating the skies over Vietnam. This gripping account takes you inside the cockpit for an adventure more explosive than any fiction -- in a dramatic true story of the legendary military

school that has created the most dangerous fighter pilots the world has ever seen.

Dirty Money Larry Johns, 2015-03-22 With nightmares of past deeds threatening his sanity, Martin Palmer - hero of A Warrior's Code - wants out of the mercenary soldier business. The problem: he was good at it. The question: will the business let him go? His solution: try any damned thing that does not require pointing guns at people. Keeping his profile obscured he ends up in Nigeria where, more or less on a whim, he opens a motor-repair business. Chance brings him together with a full-blooded Kenyan tribesman, Kowato Segani. The pair hit it off from the start, like long lost brothers, and Palmer hires him to help in the repair business. Neither of them know too much about motor repair and, understandably, the business as such does not exactly prosper. Of the two of them, only Segani really wants to make a go of it. But, for Palmer at least, it's a lot of fun, and he's sleeping nights. Then, out of the blue, up pops a man who bears all the hallmarks of a mercenary recruiter. The offer is in mercenary numbers and the job is related to the mercenary business. Apparently, something Palmer stole many years before, had already been stolen...and they want it back!

Flying Fast Jets Asst Prof David G. Newman, 2014-05-28 This book provides a detailed overview of the human factors and performance limitations associated with flying fast jets, integrating all the latest available research literature on the demanding operational tasks faced by such pilots and aircrews. As such, it has a strong military focus, dealing with pilots of fighter aircraft, attack aircraft and lead-in fighter trainer aircraft that are traditionally only single or dual pilot operations.
