DiAP nel mondo | DiAP in the world – International Vision | Visioni internazionali Orazio Carpenzano, Roberto A. Cherubini, Anna Irene Del Monaco, 2020-04-20 International openness is one of the fundamental characteristics of the DiAP Department of Architecture and Design, which sees its members active in 57 bilateral collaboration agreements (without counting the Erasmus agreements) with countries in which today there is a demand for architectural design that looks at Italy as a model, not only for studies of historical architecture, but also for contemporary architecture designed in the existing city and for the new building, including complex landscape and environmental systems.

Ecosocial Work in Community Practice Komalsingh Rambaree, Meredith C. F. Powers, Richard J. Smith, 2022-12-26 This book focuses on ecosocial work within the context of community practice. It aims to provide insights on understanding key issues, concepts and debates surrounding the mainstreaming of ecosocial work for sustainable community development. Divided into three parts, the first part of the book focuses on ecosocial work and ecosocial change around water, the ecology of coastal communities experiencing climate change, and environmental degradation. The second part includes chapters on ecosocial change and community practice in other kinds of bioregions. Finally, the third part primarily focuses on pedagogical approaches for teaching ecosocial work. This book was originally published as a special issue of the Journal of Community Practice.

The Routledge Handbook of Green Social Work Lena Dominelli,2018-03-28 Green social work espouses a holistic approach to all peoples and other living things – plants and animals, and the physical ecosystem; emphasises the relational nature of all its constituent parts; and redefines the duty to care for and about others as one that includes the duty to care for and about planet earth. By acknowledging the interdependency of all living things it allows for the inclusion of all systems and institutions in its remit, including both (hu)man-made and natural disasters arising from the (hu)made ones of poverty to chemical pollution of the earth's land, waters and soils and climate change, to the natural hazards like earthquakes and volcanoes which turn to disasters through human (in)action. Green social work's value system is also one that favours equality, social inclusion, the equitable distribution of resources, and a rights-based approach to meeting people's needs to live in an ethical and sustainable manner. Responding to these issues is one of the biggest challenges facing social workers in the twenty-first century which this Handbook is intended to address. Through providing the theories, practices, policies, knowledge and skills required to act responsibly in responding to the diverse disasters that threaten to endanger all living things and planet earth itself, this green social work handbook will be required reading for all social work students, academics and professionals, as well as those working in the fields of community development and disaster management.

Source of Income Rules Peter H. Blessing,Gregory P. Lubkin,2007-01-01 ... analyzes the rules applicable in determining whether income is treated as from sources within the United States or from foreign sources. In the case of persons who are not citizens or residents of the United States or domestic

corporations, and thus are not subject to U.S. taxation on their worldwide income, the source of income rules generally are pivotal in determining whether the tax jurisdiction of the United States extends to the income. In addition, in the case of all persons who are subject to U.S. tax, the source of income rules are critical to determining to what extent a credit is available for income taxes or taxes in lieu of income taxes paid to a foreign government. The source of income rules are applied in conjunction with the rules governing the allocation and apportionment of expenses between domestic and foreign sources in order to determine foreign-source taxable income for purposes of the foreign tax credit limitation prescribed for each separate limitation category under [section] 904.

The Environmentalism of the Poor Joan Martínez-Alier, 2003-01-01 This is a wonderful book rich in empirical detail, full of theoretical insights, offering hope in a bleak world, altogether inspiring. . . a tremendous achievement of having helped to create the disciplines of ecological economics and political ecology, bringing them alive in this book, and making their insights available to the developing worldwide movement for environmental justice. Pat Devine, Environmental Values Any book by the ecological economist Joan Martinez-Alier is a Big Publishing Event. . . this is a book by a writer who loves his subject, knows it well, respects its history, and is driven by the desire to do justice. These are qualities enough to send you to the bookshop or the library in search of The Environmentalism of the Poor. Andrew Dobson, Environment Politics The book is a worthy and in-depth contribution to debates about political ecology and ecological economics. It should be read by all environmental and ecological economists who wish to make their analysis more relevant. Tim Forsyth, Progress in Development Studies A marvellous combination of insight, research and activism. . . A must-read for policymakers, practitioners and academics alike, and for anyone concerned with sustainable development, environmentalism or poverty alleviation. Human Ecology Journal . . . one of the most important environmental books to have been published recently. Martinez-Alier integrates two of the most significant areas of environmental theory political ecology and ecological economics. Eurig Scandrett, Friends of the Earth Scotland The book has three main strengths: its bibliography, which is extensive; the global perspective on the environmental movement and the relationship with poverty; and the general theme of this interdisciplinary work, which is not so much to provide new information, but to consider the existing information in a new light. Martinez-Alier is to be commended for taking such a step in the literature . . . the writing style is extremely approachable . . . Recommended. B.J. Peterson, Choice [Joan] Martinez-Alier combines the honest discipline of a scholar with the passionate energy of an activist. The result, The Environmentalism of the Poor, is highly recommended! Herman E. Daly, University of Maryland, College Park, US The Environmentalism of the Poor has the explicit intention of helping to establish two emerging fields of study political ecology and ecological economics whilst also investigating the relations between them. The book analyses several manifestations of the growing environmental justice movement , and also of popular environmentalism and the environmentalism of the poor , which will be seen in the coming decades as driving forces in the process to achieve an ecologically sustainable society. The author studies, in detail, many ecological distribution conflicts in history and at present,

in urban and rural settings, showing how poor people often favour resource conservation. The environment is thus not so much a luxury of the rich as a necessity of the poor. It concludes with the fundamental questions: who has the right to impose a language of valuation and who has the power to simplify complexity? Joan Martinez-Alier combines the study of ecological conflicts and the study of environmental valuation in a totally original approach that will appeal to a wide cross-section of academics, ecologists and environmentalists.

Just Sustainabilities Robert Doyle Bullard, Julian Agyeman, Bob Evans, 2012 Environmental activists and academics alike are realizing that a sustainable society must be a just one. Environmental degradation is almost always linked to questions of human equality and quality of life. Throughout the world, those segments of the population that have the least political power and are the most marginalized are selectively victimized by environmental crises. This book argues that social and environmental justice within and between nations should be an integral part of the policies and agreements that promote sustainable development. The book addresses the links between environmental quality and human equality and between sustainability and environmental justice.

Urban Disaster Resilience David Sanderson, Jerold S. Kayden, Julia Leis, 2016-04-14 Accelerating urbanization worldwide means more urban-centered disasters. Floods, earthquakes, storms and conflicts affecting densely populated areas produce significant losses in lives, livelihoods and the built environment, especially in comparison to rural areas. Poor urban dwellers, almost always the most vulnerable, too often bear the brunt. Aid agencies and urban professionals have been slowly adapting to these new conditions, but older models and practices hinder the most effective engagements. Drawing directly from the experiences of urban disasters in the Philippines, Chile, India, Thailand, Iraq, Haiti and Nepal, among other countries, Urban Disaster Resilience brings to light new collaborations and techniques for addressing the challenges of urban disasters in the coming years. Chapters range from country-specific case studies to more synthetic frameworks in order to promote innovative thinking and practical solutions. Edited by David Sanderson, Jerold S. Kayden and Julia Leis, this book is a crucial read for humanitarian and disaster specialists, urban planners and designers, architects, landscape architects, housing and economic development professionals, real estate developers, private business managers and students interested in the subject, whether based in non-governmental organizations, local, state or national governments, international agencies, private firms, or the academy.

After Great Disasters Laurie A. Johnson, Robert B. Olshansky, 2017 Great natural disasters are rare, but their aftermath can change the fortunes of a city or region forever. This book and its companion Policy Focus Report identify lessons from different parts of the world to help communities and government leaders better organize for recovery after future disasters. The authors consider the processes and outcomes of community recovery and reconstruction following major disasters in six countries: China, New Zealand, India, Indonesia, Japan, and the United States. Post-disaster reconstruction offers opportunities to improve construction and design standards, renew infrastructure, create new land use arrangements, reinvent economies, and improve governance. If done well, reconstruction can help

break the cycle of disaster-related impacts and losses, and improve the resilience of a city or region.

Power, Politics, And Pentecostals In Latin America Edward L Cleary, 2018-02-07 Today over forty million Latin Americans classify themselves as Protestant, of which the overwhelming majority belong to some form of Pentecostalism. The rapid dissemination of Pentecostal beliefs has produced vibrant alternatives to traditional dominant culture and changed relations within the family, locality, and workplace. This volume introduces broad issues in the Pentecostal movement, including gender relations, political power and organization, and inter-Pentecostal and ecumenical relations. These themes are then examined more specifically in the country case studies, which address the historical foundations of the Pentecostal movement, patterns of and explanation for its growth, and the consequences of its expanding presence, including increased political influence.

Building Resilience Daniel P. Aldrich, 2012-08-15 The factor that makes some communities rebound quickly from disasters while others fall apart: "A fascinating book on an important topic."—E.L. Hirsch, in *Choice* Each year, natural disasters threaten the strength and stability of communities worldwide. Yet responses to the challenges of recovery vary greatly and in ways that aren't explained by the magnitude of the catastrophe or the amount of aid provided by national governments or the international community. The difference between resilience and disrepair, as Daniel P. Aldrich shows, lies in the depth of communities' social capital. *Building Resilience* highlights the critical role of social capital in the ability of a community to withstand disaster and rebuild both the infrastructure and the ties that are at the foundation of any community. Aldrich examines the post-disaster responses of four distinct communities—Tokyo following the 1923 earthquake, Kobe after the 1995 earthquake, Tamil Nadu after the 2004 Indian Ocean Tsunami, and New Orleans post-Katrina—and finds that those with robust social networks were better able to coordinate recovery. In addition to quickly disseminating information and financial and physical assistance, communities with an abundance of social capital were able to minimize the migration of people and valuable resources out of the area. With governments increasingly overstretched and natural disasters likely to increase in frequency and intensity, a thorough understanding of what contributes to efficient reconstruction is more important than ever. *Building Resilience* underscores a critical component of an effective response.
