Music Apps for Musicians and Music Teachers Elizabeth C.

Axford, 2015-02-19 In today's digital age, learning and creating music has never been so easy and affordable. Anyone can enhance their musical knowledge, skills, and creativity with the multitude of music apps available. However, sifting through thousands of music apps in the Apple App Store and Google Play can be a daunting task for any musician or music instructor. But not anymore! Having spent countless hours researching the most interesting useful, educational, fun, and easy-to-use music apps, Elizabeth C. Axford in *Music Apps for Musicians and Music Teachers* surveys the landscape of music-related apps for both iOS and Android mobile devices, including tablets and smartphones. *Music Apps for Musicians and Music Teachers* lists hundreds of music-related apps organized by category, including singing, musical instruments, music theory and composition, songwriting, improvisation, recording, evaluating music performances, listening to music, music history and literature, music appreciation, and more. App developers are listed with each app, including links to their websites for updates and support. The book sections and chapters align with the newly revised National Standards for Music

Education released in 2014 by the National Association for Music Education. Suggested activities for educators are provided, as well as key terms and a bibliography. *Music Apps for Musicians and Music Teachers* is for anyone interested in music, whether hobbyist or professional. It enhances the ability to learn on the go by offering musicians, music students, and music instructors a list of the most useful music apps available.

Apple Pro Training Series Mary Plummer, 2014-07-09 This book covers GarageBand 10.0. The content and/or media files do not work with subsequent releases of the software. In the only Apple-certified guide to GarageBand 10.0.0, readers will be creating

original works within the first few chapters. Using real-life material and practical lessons that they can apply immediately to their own projects, this book/media combo offers a complete, self-paced course in all aspects of GarageBand. Focused lessons take you step-by-step through fun, real-world projects, and GarageBand 10.0.0 features. Exclusively for this book, author/musician Mary Plummer works with a host of talented artists ranging from a student songwriter to a professional touring guitarist, an award-winning poet, an independent hip hop recording artist, and award winning dancers to create all new, real-world projects that readers will step-through. Along the way readers will get to mix a songwriter's demo, test amp simulators and stomp boxes with an electric guitar solo, edit spoken dialog for an audio book, lay down original hip-hop beats using a drum machine patch and dynamic tempo changes, and add percussion and effects to a dance video to enhance the sound. For mobile users, the book includes an overview of GarageBand for iOS and sharing GarageBand songs via iCloud between iOS devices and your Mac. This self-paced learning tool pairs an easy, accessible style with ample illustrations and keyboard shortcuts to guarantee that readers become proficient with GarageBand 10.0.0 in no time.

Major Label Mastering Evren Gökner,2020-03-24 Major Label Mastering: Professional Mastering Process distills 25 years of mastering experience at Capitol Records into practical understandings and reliable systems. Containing unparalleled insights, this book reveals the mastering tricks and techniques used by Evren Gökner at one of the world's most notable record labels. Beginning with the requisite competencies every Mastering

Engineer must develop, Major Label Mastering delves into the particulars of the mastering studio, as well as fundamental mastering tools. Included among these tools is The Five Step Mastering Process, a rigorously tested system that equips the practitioner to successfully and confidently master a project to exacting standards of audio fidelity. Covering all bases, the book discusses both macro and micro considerations: from mindset approach and connecting with clients down to detailed guidelines for processing audio, advanced methods, and audio restoration. Each chapter ends with exercises intended to deepen understanding and skill, or to supplement course study. Suitable for all levels, this is a unique resource for students, artists, and recording and Mastering Engineers alike. Major Label Mastering is supplemented by digital resources including audio examples and video tutorials.

Analog Nightmares Richard Mogg, 2018-10-05 The most comprehensive, all-inclusive look at the history and evolution of shot on video horror films. In 1982, Boardinghouse became the first shot on video feature-length horror film ever made. Totally lensed on videotape, the film was later transferred to 16mm and blown-up to 35mm for theatrical exhibition. In 1983, David A. Prior shot

Sledgehammer on video and eventually released the film on videotape. For the first time, analog video became the format used in motion picture productions. It was smeary, messy and it wasn't film... but it was cheap. In 1985, United Home Video boldly released Blood Cult with the claim it was the first movie made for the home video market. The booming popularity of video stores coupled with a never-satisfied demand for content ensured these films longevity. Soon hundreds of titles followed, all video-created features by independent unknowns. They weren't from Hollywood. They weren't trained. But they had a lot of heart and a love for horror. And they made their own movies against the odds. For the first time EVER - ANALOG NIGHTMARES has brought these films together. Everything from Boardinghouse to Zombie Holocaust individually reviewed, categorized and presented chronologically by production year. Over 260 films! Featuring in-depth interviews with the filmmakers themselves - some speaking for the very first time! TIM BOGGS! MARK POLONIA! DONALD FARMER! TIM RITTER! JOEL D. WYNKOOP! DOUG STONE! ANDREA ADAMS! Can Music Make You Sick? Sally Anne Gross, George Musgrave, 2020-09-29 “Musicians often pay a high price for sharing their art with us. Underneath the glow of success can often lie

loneliness and exhaustion, not to mention the basic struggles of paying the rent or buying food. Sally Anne Gross and George Musgrave raise important questions – and we need to listen to what the musicians have to tell us about their working conditions and their mental health.” Emma Warren (Music Journalist and Author). “Singing is crying for grown-ups. To create great songs or play them with meaning music's creators reach far into emotion and fragility seeking the communion we demand of it. However, music's toll on musicians can leave deep scars. In this important book, Sally Anne Gross and George Musgrave investigate the relationship between the wellbeing music brings to society and the wellbeing of those who create. It's a much needed reality check, deglamorising the romantic image of the tortured artist.” Crispin Hunt (Multi-Platinum Songwriter/Record Producer, Chair of the Ivors Academy). It is often assumed that creative people are prone to psychological instability, and that this explains apparent associations between cultural production and mental health problems. In their detailed study of recording and performing artists in the British music industry, Sally Anne Gross and George Musgrave turn this view on its head. By listening to how musicians understand and experience their working lives, this book proposes

that whilst making music is therapeutic, making a career from music can be traumatic. The authors show how careers based on an all-consuming passion have become more insecure and devalued. Artistic merit and intimate, often painful, self-disclosures are the subject of unremitting scrutiny and data metrics. Personal relationships and social support networks are increasingly bound up with calculative transactions. Drawing on original empirical research and a wide-ranging survey of scholarship from across the social sciences, their findings will be provocative for future research on mental health, wellbeing and working conditions in the music industries and across the creative economy. Going beyond self-help strategies, they challenge the industry to make transformative structural change. Until then, the book provides an invaluable guide for anyone currently making their career in music, as well as those tasked with training and educating the next generation.

88 Instruments Chris Barton,2016-08-16 The rhythmic, onomatopoeic text dances across exuberant watercolors with lots of movement. This celebration of a child's agency in choosing a means of artistic expression strikes just the right note. --Kirkus A delightful offering for reading aloud, especially during music-themed storytimes. --School Library Journal From New York Times bestselling author Chris Barton and new illustrator Louis Thomas comes a fun, rhythmic picture book about finding the music that is perfect for you! A boy who loves to make noise gets to pick only one instrument (at his parents urging) in a music store, but there is too much to choose from! There's triangles and sousaphones! There's guitars and harpsichords! Bagpipes and cellos and trombones! How can he find the one that is just right for him out of all those options?

To Feel the Music Neil Young,Phil Baker,2019-09-10 Neil Young took on the music industry so that fans could hear his music—all music—the way it was meant to be heard. Today, most of the music we hear is com-pressed to a fraction of its original sound,while analog masterpieces are turning to dust in record company vaults. As these recordings disappear, music fans aren't just losing a collection of notes. We're losing spaciousness,breadth of the sound field, and the ability to hear and feel a ping of a triangle or a pluck of a guitar string, each with its own resonance and harmonics that slowly trail off into silence. The result is music

that is robbed of its original quality—muddy and flat in sound compared to the rich, warm sound artists hear in the studio. It doesn't have to be this way, but the record and technology companies have incorrectly assumed that most listeners are satisfied with these low-quality tracks. Neil Young is challenging the assault on audio quality—and working to free music lovers from the flat and lifeless status quo. *To Feel the Music* is the true story of his quest to bring high-quality audio back to music lovers—the most important undertaking of his career. It's an unprecedented look inside the successes and setbacks of creating the Pono player, the fights and negotiations with record companies to preserve masterpieces for the future, and Neil's unrelenting determination to make musical art available to everyone. It's a story that shows how much more there is to music than meets the ear. Neil's efforts to bring quality audio to his fans garnered media attention when his Kickstarter campaign for his Pono player—a revolutionary music player that would combine the highest quality possible with the portability, simplicity and affordability modern listeners crave—became the third-most successful Kickstarter campaign in the website's history. It had raised more than \$6M in pledges in 40 days. Encouraged by the enthusiastic response, Neil still had a

long road ahead, and his Pono music player would not have the commercial success he'd imagined. But he remained committed to his mission, and faced with the rise of streaming services that used even lower quality audio, he was determined to rise to the challenge. An eye-opening read for all fans of Neil Young and all fans of great music, as well as readers interesting in going behind the scenes of product creation, *To Feel the Music* has an inspiring story at its heart: One determined artist with a groundbreaking vision and the absolute refusal to give up, despite setbacks, naysayers, and skeptics.
