The Ad Makers Tom Logue Newth, 2013-07-01 The Ad-Makers looks at the cinematic form where commerce and creativity collide most dramatically: the TV commercial. Featuring interviews from top professionals in the field, the book provides the kind of behind-the-scenes expertise that it usually takes a lifetime of professional practice to acquire. Gathered from the disciplines of cinematography, directing, producing and editing, the filmmakers tell the stories behind the making of some of the world's top commercials. Each chapter includes an overview of best practice and a host of images—stills from the spots themselves and concept visuals. Exploring the creative process from conception to post-production, The Ad-Makers also covers developments within the industry precipitated by the digital age and the new challenges placed on ad-making by the explosion of social media. With special focus on the shooting and production elements of making a television advert, this book is ideal for all filmmakers who want to build a career in advertising, or, as is increasingly common, feature films. - The stories behind some of the best-known TV commercials, as told by the people who made them - Top producers, designers, storyboarders, directors, editors and visual effects creatives reveal the secrets of the television advertising industry

Scientific Advertising Claude C. Hopkins, 2019-09-18 Nobody should be allowed to have anything to do with advertising until he has read this book seven times. It changed the course of my life. — Advertising legend David Ogilvy Scientific Advertising begins with a

simple declarative statement: The time has come when advertising has in some hands reached the status of a science. It is based on fixed principles and is reasonably exact. The causes and effects have been analyzed until they are well understood. And in 21 concise chapters, Claude C. Hopkins covers the essence of good advertising. Beyond the points to be made about telling a story using headlines and art, being specific and providing vital information, and using samples and testing campaigns, this book clearly demonstrates why Hopkins was an expert on the best marketing policies. Almost a century after its initial publication, this little volume remains useful to those entering any area of the business world. More than an account of Hopkins's thoughts about good salesmanship, it is a window into a bygone era and the early decades of the American business of advertising.

Ad Women Juliann Sivulka,2012-12-27 Following three key periods in the history of American advertising, which represent eras of major social change, this work describes how the recognition of women as primary consumers has resulted in the hiring of more women to promote products for this target audience.

Adman's Dilemma Paul Rutherford,2018-01-01 The Adman's Dilemma is a cultural biography that explores the rise and fall of the advertising man as a figure who became effectively a licensed deceiver in the process of governing the lives of American consumers. Apparently this personage was caught up in a contradiction, both compelled to deceive yet supposed to tell the truth. It was this moral condition and its consequences that made the adman so interesting to critics, novelists, and eventually filmmakers. The biography tracks his saga from its origins in the exaggerated doings of P.T. Barnum, the emergence of a new profession in the 1920s, the heyday of the adman's influence during the post-WW2 era, the later rebranding of the adman as artist, until the apparent demise of the figure, symbolized by the triumph of that consummate huckster, Donald Trump. In The Adman's Dilemma, author Paul Rutherford explores how people inside and outside the advertising industry have understood the conflict between artifice and authenticity. The book employs a range of fictional and nonfictional sources, including memoirs, novels, movies, TV shows, websites, and museum exhibits to suggest

how the adman embodied some of the strange realities of modernity.

Political Advertising in the United States Erika Franklin Fowler, Michael M. Franz, Travis N. Ridout, 2021-11-24 Political Advertising in the United States examines the volume, distribution, content, and effects of political advertising in congressional and presidential elections. The book considers the role of television ads using extensive data on ad airings on local broadcast stations. It also analyzes newly available data on paid digital ads, including ads on Facebook, Instagram, Google, and YouTube. The book covers the role of outside groups in airing ads, including the rise of dark money groups and gaps in existing federal campaign finance laws around transparency of outside group spending. The authors consider how ad sponsors design and target ads. They also review the positive and negative implications of an electoral system where billions are spent on paid advertising. With detailed analysis of presidential and congressional campaign ads and discussion questions in each chapter, this accessibly written book is a must-read for students, scholars, and practitioners who want to understand the ins and outs of political advertising. New to the Second Edition • Covers the spending, content, and tone of political advertising in the 2016 and 2020 presidential elections and the 2018 midterms, looking ahead to 2022 and 2024. • Addresses the interference of foreign actors in elections and their connection to political advertising. • Expands the discussion of digital political advertising and incorporates this topic into every chapter. • Adds a new chapter specifically addressing digital ad content and spending. • Includes data from the Facebook, Google, and Snapchat ad libraries and explores the role of these companies in regulating the sale of political advertising. • Incorporates new data on the effects of race and gender in advertising, including what is known about the way in which advertising may activate prejudicial attitudes.

Democracy for Hire Dennis W. Johnson, 2017 Though they work largely out of the public eye, political consultants to candidates play a crucial role in shaping campaigns. As Dennis Johnson argues in this history of political consulting in the United States, they are essential to modern campaigning, often making positive contributions to democratic discourse, and yet they have also polarized the electorate with their biting messages

Dictionary of the Printing and Allied Industries F.J.M. Wijnekus, E.F.P.H. Wijnekus, 2013-10-22 The first edition of this dictionary, compiled by F.J.M. Wijnekus and published in 1967, was the result of years of systematic collection and preparation of thousands of terms and expressions which were until then not to be found in any other dictionary. The material was correlated for use in his daily work and, as the reputation of his private collection spread, there was an increasing demand for access to these findings. Until 1967 there was no comprehensive multilingual dictionary on the subject; former publications were incomplete and out of date and lacked clear definition - often leading to disastrous misunderstandings. Furthermore, the subject of printing, paper and ink technology had never been dealt with, in dictionary form, in relation to other aspects of the graphic industry. This new work, prepared by F.J.M. Wijnekus and his son, has been considerably up-dated. Much time has been devoted to checking the material against the most reliable and authoritative sources. The usefulness of the work has been further enhanced by the addition of Spanish and Italian to the original languages of English, French and German. The first edition was received with much enthusiastic praise and this new dictionary will undoubtedly continue to be an invaluable tool for all those working with the printed word in the widest sense. It is a reference work which should be in the hands of all those in any way connected with the printing industry, paper manufacturers, ink manufacturers, printers, bookbinders, publishers, lithographers, lay-out men and graphical research institutes.

Television in Society Arthur Asa Berger,2017-09-29 Is television a cultural wasteland, or a medium that has brought people more great art, music, dance, and drama than any previous media? How do we study and interpret television? What are the effects of television on individuals and society, and how do we measure them? What is the role of television in our political and economic life? *Television in Society* explores these issues in considering how television both reflects and affects society. The book is divided into two sections. The first focuses on programming and deals with commercials, ceremonial events, important series (such as MASH and Lou Grant), significant programs (a production of *Brave New World* on television), and the images of police on the medium. The second part of the book deals with important issues and topics related to the medium: the impact of television violence, values found on television, the impact of television on education, the significance of new technological developments, and the always thorny issue of freedom of the press. The articles are drawn together by a brilliant introductory essay by Arthur Asa Berger, who examines television as culture.

Political Persuasion in Presidential Campaigns Lawrence Patrick Devlin, This work incorporates the insights of many of America's foremost analyst of political campaigns. Coverage of a presidential campaign is examined by journalists both from print and television. In addition to staff professionals and journalists, academic experts in various aspects of presidential campaign communication analyze how key communicative components affect campaigns.

The Routledge Handbook of Audio Description Christopher Taylor,Elisa Perego,2022-04-06 The American Council of the Blind (ACB) Recipient of the 2022 Dr. Margaret Pfanstiehl Audio Description Achievement Award for Research and Development This Handbook provides a comprehensive overview of the expanding field of audio description, the practice of rendering the visual elements of a multimodal product such as a film, painting, or live performance in the spoken mode, for the benefit principally of the blind and visually impaired community. This volume brings together scholars, researchers, practitioners and service providers, such as broadcasters from all over the world, to cover as thoroughly as possible all the theoretical and practical aspects of this discipline. In 38 chapters, the expert authors chart how the discipline has become established both as an important professional service and as a valid academic subject, how it has evolved and how it has come to play such an important role in media accessibility. From the early history of the subject through to the challenges represented by ever-changing technology, the Handbook covers the approaches and methodologies adopted to analyse the “multimodal” text in the constant search for the optimum selection of the elements to describe. This is the essential guide and companion for advanced students, researchers and audio description professionals within the more general spheres of translation studies and media accessibility.

How to Protect Your Bottom Line from Your Advertising Agency John Oldfield,2012-03-01 This book is a brutally frank expose from behind the scenes of how hubris and self-serving behaviour has caused many of those working in the advertising industry to lose the plot - with disastrous consequences for those who invest in advertising. In concise chapters, John Oldfield poses questions as to why so much advertising fails and offers answers to those questions. Has the world of advertising become so self-absorbed that effectiveness and results have become side issues? Why can one ad campaign be a miserable flop, when another for the same product in the same circumstances can drive sales through the roof? Have visuals grown to dominate advertising to the point where words are now a dying art? The decision to choose one advertising campaign rather than another is a massive responsibility - it can literally mean the

difference between triumph and disaster. Should such an important decision be left to instinct? If not, what judgemental criteria can be applied to minimise the risk of failure? *How To Protect Your Bottom Line From Your Advertising Agency* is essential reading for CEOs, business owner operators and anyone else investing in advertising. It points out the traps that can result in a wasted advertising budget and explains why advertising agencies are part of the problem - rather than part of the solution.
