The Houses of Roman Italy, 100 B.C.–A.D. 250 John R. Clarke, 1991 Extensively documented with well-chosen, good quality photographs, Clarke's book effectively surveys these representative examples from the Late Republic to the Late Empire, illustrating the shift in the agendas of decoration as well as in the patterns of the lives played out behind closed doors within these highly charged domestic interiors.—Richard Brilliant, author of *Visual Narratives: Storytelling in Etruscan & Roman Art* An enlightening and engaging walk through Roman cultural history. . . . This book will be essential to anyone interested in the classical past, in artistic ensembles, or in the experience of architecture.—Diane Favro, University of California, Los Angeles Real experts in Roman painting are few. This book should be very welcome to Roman art historians and social historians wanting to present this material to their students.—Eleanor Winsor Leach, author of *The Rhetoric of Space*

The Ritual Adam Nevill, 2012-02-14 Unexpectedly clashing with his three old University friends while hiking in the Scandinavian wilderness of the Arctic Circle, Luke takes a shortcut that leads the group to an ancient pagan sacrificial site where they are hunted by a bestial predator. Original. 40,000 first printing.

The Ritual Practice of Time Lars Kirkhusmo Pharo, 2013-11-28 Drawing upon the category “ritual practices of time” the book offers a comparative analytical model and theoretical insights about calendars in Mesoamerica and in general. This comprehensive study systematically explicates how ritual practises are represented and conceptualised in intellectual systems and societies.

Eight human skulls in a dung heap and more Annet Nieuwhof, 2015-01-06 The study of ritual practice in the past is an accepted part of archaeological research these days. Yet, its theoretical basis is still not fully mature. This book aims at making a contribution to the study of ritual practice in the past by assembling a theoretical framework, which is tailored to the needs of archaeology, and which helps to identify and interpret the remains of rituals in the past. This framework is applied in a special archaeological region: the coastal area of the northern Netherlands, a former salt marsh area. In the past, people lived here on artificial dwelling mounds, so-called terps. Preservation conditions are excellent in this wetland area. This study makes use of the well-preserved remains of rituals in terps, to examine the role of ritual practice in the societies of the pre-Roman and Roman Iron Age in this area.

Caves and Ritual in Medieval Europe Knut Bergsvik, 2022-04-15 Presents an interdisciplinary exploration of the use of caves and rock shelters across Europe during the medieval period for a wide range of religious and spiritual purposes by Christian, Muslim, Pictish and non-denominational communities, at both regional and local levels.

Water and Ritual Lisa J. Lucero, 2009-07-21 In the southern Maya lowlands, rainfall provided the primary and, in some areas, the only source of water for people and crops. Classic Maya kings sponsored elaborate public rituals that affirmed their close ties to the supernatural world and their ability to intercede with deities and ancestors to ensure an adequate amount of rain, which was then stored to provide water during the four-to-five-month dry season. As long as the rains came, Maya kings supplied their subjects with water and exacted tribute in labor and goods in return. But when the rains failed at the end of the Classic period (AD 850-950), the Maya rulers lost both their claim to supernatural power and their temporal authority. Maya commoners continued to supplicate gods and ancestors for rain in household rituals, but they stopped paying tribute to rulers whom the gods had forsaken. In this paradigm-shifting book, Lisa Lucero investigates the central role of water and ritual in the rise, dominance, and fall of Classic Maya rulers. She documents commoner, elite, and royal ritual histories in the southern Maya lowlands from the Late Preclassic through the Terminal Classic periods to show how elites and rulers gained political power through the public replication and elaboration of household-level rituals. At the same time, Lucero demonstrates that political power rested equally on material conditions that the Maya rulers could only partially control. Offering a new, more nuanced understanding of these dual bases of power, Lucero makes a compelling case for spiritual and material factors intermingling in the development and demise of Maya political complexity.

The Hidden Powers of Ritual Bradd Shore, 2023-12-12 An illuminating overview of the development, benefits, and importance of ritual in everyday life, written by a leading cognitive anthropologist. *The Hidden Powers of Ritual* is an engaging introduction to ritual studies that presents ritual as an evolved form of human behavior of almost unimaginable significance to our species. Every day across the globe, people gather to share meals, brew caffeinated beverages, or honor their ancestors. In this book, Bradd Shore, a respected anthropologist, reaches beyond familiar “big-R” rituals to present life’s humbler, overshadowed moments, exploring everything from the Balinese peleton to baseball to family Zoom sessions in the age of Covid to the sobering reenactment rituals surrounding the Moore’s Ford lynchings. In each ritual, Shore shows how our capacity to ritualize behavior is a remarkable part of the human story. Encompassing both the commonly unlabeled “interaction rituals” studied by sociologists and the symbolically elaborated sacred rituals of religious studies, Shore organizes his conception around detailed case studies drawn from international research and personal experience, weaving scholarship with a memoir of a life encompassed by ritual. A probing exploration that matches breadth with accessibility, *The Hidden Powers of Ritual* is a provocative contribution to ritual theory that will appeal to a wide range of readers curious about why these unique repetitive acts matter in our lives.

Miskwabik, Metal of Ritual Amelia M. Trevelyan, 2021-12-14 *Miskwabik, Metal of Ritual* examines the thousands of beautiful and intricate ritual works of art—from ceremonial weaponry to delicate copper pendants and ear ornaments—created in eastern North America before the arrival of Europeans. The first comprehensive examination of

this 3,000-year-old metallurgical tradition, the book provides unique insight into the motivation of the artisans and the significance of these objects, and highlights the brilliance and sophistication of the early civilizations of the Americas. Comparing the ritual architecture and metallurgy of the original Americans with the ethnological record, Amelia M. Trevelyan begins to unravel the mystery of the significance of the objects as well as their special functions within the societies that created them. The book includes dozens of striking color and black and white photographs.

Cenote of Sacrifice Clemency Chase Coggins, Orrin C. Shane, III, 2014-10-03 Chichén Itzá (mouth of the well of the Itza) was one of the great centers of civilization in prehistoric America, serving between the eighth and twelfth centuries A.D. as a religious, economic, social, and political capital on the Yucatán Peninsula. Within the ancient city there were many natural wells or cenotes. One, within the ceremonial heart of the city, is an impressive natural feature with vertical limestone walls enclosing a deep pool of jade green water some eighty feet below ground level. This cenote, which gave the city its name, became a sacred shrine of Maya pilgrimage, described by one post-Conquest observer as similar to Jerusalem and Rome. Here, during the city's ascendancy and for centuries after its decline, the peoples of Yucatán consulted their gods and made ritual offerings of precious objects and living victims who were thought to receive prophecies. Although the well was described by Bishop Diego de Landa in the late sixteenth century, its contents were not known until the early 1900s when revealed by the work of Edward H. Thompson. Conducting excavations for the Peabody Museum of Harvard University, Thompson recovered almost thirty thousand artifacts, most ceremonially broken and many beautifully preserved by burial in the deep silt at the bottom of the well. The materials were sent to the Peabody Museum, where they remained, unexhibited, for over seventy years. In 1984, for the first time, nearly three hundred objects of gold, jade, copper, pottery, wood, copal, textile, and other materials from the collection were gathered into a traveling interpretive exhibition. No other archaeological exhibition had previously given this glimpse into Maya ritual life because no other collection had objects such as those found in the Sacred Cenote. Moreover, the objects from the Cenote come from throughout Mesoamerica and lower Central America, representing many artistic traditions. The exhibit and this, its accompanying catalog, marked the first time all of the different kinds of offerings have ever been displayed together, and the first time many have been published. Essays by Gordon R. Willey and Linnea H. Wren place the Cenote of Sacrifice and the great Maya city of Chichén Itzá within the larger context of Maya archaeology and history. The catalog entries, written by Clemency Chase Coggins, describe the objects displayed in the traveling exhibition. Some entries are brief descriptive statements; others develop short scholarly themes bearing on the function and interpretation of specific objects. Coggins' introductory essay describes how the objects were collected by Thompson and how the exhibition collection has been studied to reveal the periods of Cenote ritual and the changing practices of offering to the Sacred Cenote.

Forgive Us Our Sins Ad Dudink, Nicolas Standaert, 2023-05-31 Confession in early modern Europe has been the subject of several studies. But what happened to the confessional practice when it moved to other cultures? This is the major research question of the present book as applied to late Ming and early Qing China. The origin of this research can be traced back to the Handbook of Christianity in China: Volume One (635-1800) (Leiden 2000) compiled by researchers of the K.U. Leuven, in collaboration with an international team of circa twenty scholars. As a reference work, the Handbook comprehensively presents many different aspects of Christianity in China, including sciences, arts and crafts. But there was one major absentee: ritual, which is often considered essential for understanding China. A first step in filling this gap was the organisation of an international workshop on Chinese and Christian Rituality in Late Imperial China (Leuven, June 2004). The present volume includes the revised contributions by Eugenio Menegon and Erik Zürcher and a reworked version of an article by Liam Brockey as well as the edition of the primary source he used for his article, a confessional manual composed by Jose Monteiro S.J. (1646-1720). These articles portray from different angles one of the sacramental rituals, viz. that of confession.

Mississippian Culture Heroes, Ritual Regalia, and Sacred Bundles David H. Dye, 2021-07-13 In *Mississippian Culture Heroes, Ritual Regalia, and Sacred Bundles*, the contributors examine Mississippian artistic traditions and society through an archaeological analysis of religious objects.

The Oxford Handbook of Early Christian Ritual Risto Uro, Juliette Day, Rikard Roitto, Richard E. DeMaris, 2019 Scholars of religion have long assumed that ritual and belief constitute the fundamental building blocks of religious traditions and that these two components of religion are interrelated and interdependent in significant ways. Generations of New Testament and Early Christian scholars have produced detailed analyses of the belief systems of nascent Christian communities, including their ideological and political dimensions, but have by and large ignored ritual as an important element of early Christian religion and as a factor contributing to the rise and the organization of the movement. In recent years, however, scholars of early Christianity have begun to use ritual as an analytical tool for describing and explaining Christian origins and the early history of the movement. Such a development has created a momentum toward producing a more comprehensive volume on the ritual world of Early Christianity employing advances made in the field of ritual studies. The *Oxford Handbook of Early Christian Ritual* gives a manifold account of the ritual world of early Christianity from the beginning of the movement up to the end of the fifth century. The volume introduces relevant theories and approaches; central topics of ritual life in the cultural world of early Christianity; and important Christian ritual themes and practices in emerging Christian groups and factions.

The Cavern-Mystery Transmission Charles D. Benn, 2019-03-31 Very little scholarly research has been done on the institutional structure of Taoism in medieval times. With this study of investiture, Benn attempts to fill that void. He describes the mechanism by which the Taoist priesthood ordered and perpetuated itself, as revealed in a rare account of an ordination rite for two T'ang princesses. He examines the lives of the participants, the hierarchy of the clergy, the liturgy, and the significance of the altar and its furnishings, and discusses other works of Chang Wan-fu, who authored this account.
