Medieval Ovid: Frame Narrative and Political Allegory A.
Gerber,2015-03-20 Ovid's Metamorphoses played an irrefutably
important role in the integration of pagan mythology in Christian
texts during the Middle Ages. This book is the only study to

consider this Ovidian revival as part of a cultural shift disintegrating the boundaries between not only sacred and profane literacy but also between academic and secular politics.

The City of Poetry David G. Lummus, 2020-12-17 What did it mean to be a poet in fourteenth-century Italy? What counted as poetry? In an effort to answer these questions, this book examines the careers of four medieval Italian poets (Albertino Mussato, Dante Alighieri, Francesco Petrarch, and Giovanni Boccaccio) who wrote in both Latin and the Italian vernacular. In readings of defenses of poetry, speeches and letters on public laurel-crowning ceremonies, and other theoretical and poetic texts, this book shows

how these poets viewed their authorship of poetic works as a function of their engagement in a human community. Each poet represents a model of the poet as a public intellectual - a poet-theologian - who can intervene in public affairs thanks to his authority within texts. The City of Poetry provides a new historicized approach to understanding poetic culture in fourteenth-century Italy which reshapes long-standing Romantic views of poetry as a timeless and sublimely inspired form of discourse.

Reconstructing Italy Stephanie Zeier Pilat,2016-04-08

Reconstructing Italy traces the postwar transformation of the Italian nation through an analysis of the Ina-Casa plan for working class housing, established in 1949 to address the employment and housing crises. Government sponsored housing programs undertaken after WWII have often been criticized as experiments that created more social problems than they solved. The neighborhoods of Ina-Casa stand out in contrast to their

contemporaries both in terms of design and outcome. Unlike modernist high-rise housing projects of the period, Ina-Casa neighborhoods are picturesque and human-scaled and incorporate local construction materials and methods resulting in a rich aesthetic diversity. And unlike many other government forays into housing undertaken during this period, the Ina-Casa plan was, on the whole, successful: the neighborhoods are still lively and cohesive communities today. This book examines what made Ina-Casa a success among so many failed housing experiments, focusing on the tenuous balance struck between the legislation governing Ina-Casa, the architects who led the Ina-Casa administration, the theory of design that guided architects working on the plan, and an analysis of the results-the neighborhoods and homes constructed. Drawing on the writings of the architects, government documents, and including brief passages from works of neorealist literature and descriptions of neorealist films by Pier Paolo Pasolini, Italo Calvino and others, this book presents a portrait of the postwar struggle to define a post-Fascist Italy.

Poeticus, or the Muses Interpreter John R. Glenn, 2019-05-23 First published in 1987, this is a critical edition of the 1647 text by the Scottish author Alexander Ross which offered the Renaissance reader not only a wealth of factual information concerning the gods, goddesses, heroes and monsters of ancient myth and legend, but also served as a treasury of interpretation and commentary ingeniously explaining the facts in terms moral, theological, historical and scientific.
