*School Leader Internship* Gary E. Martin,Arnold B. Danzig,William F. Wright,Richard A. Flanary,2013-10-02 School leadership internships are the bridge between classroom teachers and first-time leadership positions. Research shows that quality internships are equally as important as the graduate programs themselves in establishing leadership practices that improve teaching, learning, and school conditions. This book was written as a stand-alone graduate textbook and serves as a guide and support for creating and managing quality school leader internship programs. It provides step-by-step guidance for interns, their supervisors, and their faculty on how to initiate an internship and evaluate interns' work. In this updated third edition, the authors have aligned the internship to the revised ISLLC standards, making this book critical for the over 500 leadership preparation programs nationwide and the thousands of school districts that support leadership candidates.

*Emotion-Centered Problem-Solving Therapy* Arthur M. Nezu, PhD, ABPP, Christine Maguth Nezu, PhD, ABPP, 2018-12-14 Written by the developers of the popular Problem-Solving Approach (PST), this evidence-based manual reflects important advances in neuroscience that underscore the important role of emotion as a crucial aspect of behavioral health treatment. This updated treatment model, Emotion-Centered Problem-Solving Therapy (EC-PST) moves emotion to a critical position that is integrated throughout its therapeutic strategies. This is a significant shift in interventions that had previously focused on cognitive approaches. Comprehensive and detailed, this manual provides specific treatment guidelines based on a “stepped-care” model of PST through four major toolkits, clinical examples, and case studies for the application of EC-PST. It describes approaches that can be used for a wide variety of populations (including such targeted groups as U.S. Veterans and active military personnel), settings, and client issues. It addresses such new implementation systems as telehealth, and community collaborative care models. In addition, the authors provide empirically-based evidence of the treatment’s efficacy underlying positive functioning factors such as hope, well-being, enhanced leadership, and more. The print version of the book includes free, searchable, digital access to the entire contents. Therapy client workbook available as an added resource with book purchase. Key Features: Provides evidence-based update of popular treatment modality Authored by the co-developers of PST and EC-PST Includes clinical examples, treatment aids, and case studies for treatment with a variety of populations Offers new treatment guidelines for suicide risk reduction, enhancing positive functioning, and fostering resilience among U.S. veterans and active military personnel Adopted by the VA and DOD Also

Holmes,2013-06-10 Using Propensity Scores in Quasi-Experimental Designs, by William M. Holmes, examines how propensity scores can be used to reduce bias with different kinds of quasi-experimental designs and to fix or improve broken experiments. Requiring minimal use of matrix and vector algebra, the book covers the causal assumptions of propensity score estimates and their many uses, linking these uses with analysis appropriate for different designs. Thorough coverage of bias assessment, propensity score estimation, and estimate improvement is provided, along with graphical and statistical methods for this process. Applications are included for analysis of variance and covariance, maximum likelihood and logistic regression, two-stage least squares, generalized linear regression, and general estimation equations. The examples use public data sets that have policy and programmatic relevance across a variety of disciplines.

Emergence: Lester Churchill,2019-12-18 If you're like most people, you've encountered issues in your life that persist and if you only knew how to solve it, you would without hesitation. You've probably encountered people who have told you things like just let it go only to find that you don't know how even though you would dearly love to do it. This book walks you step-by-step through the MATISH process created by Lester Churchill, a childhood trauma, childhood poverty, and combat zone survivor who spent more than 40

years searching for the answers in his own life. After finishing his Bachelor of Science Degree in Psychology at Washington State University, he compiled his findings after discovering each component of his model was backed by research, each component already being used by many people around the world to heal parts of their lives. It holds the promise of allowing people to heal their whole selves- why not take a peek inside and see what it can do for you?
