Transnational Labour Regulation Kerstin Ahlberg,2008 This book illuminates the process and substance of transnational regulation of labour in a global economy. Transnational labour regulation, a central feature of the European social model, engages the 27 Member States of the European Union, and is of potential importance to the rest of the world. The book analyses the attempts at transnational regulation of temporary agency work through the social dialogue between trade unions and employers' organisations at European level and the subsequent - and so far fruitless - EU legislative process. These two processes of transnational labour regulation, and their interaction, until now have been largely invisible. The book also highlights distinctive features of Member States' national regulation as they interacted with the debates on EU transnational labour regulation. It further explores the overlap between regulation of temporary agency work and the EU's regulation of transnational trade in services, the subject of the Directive on services in the internal market. Finally, it draws lessons from the experience of regulation of temporary agency work at national and European levels for transnational labour regulation in general.

**Readings and Cases in International Human Resource Management** Sebastian B. Reiche,Günter K. Stahl,Mark E. Mendenhall,Gary R. Oddou,2023-08-15 This new edition of *Readings and Cases in International Human Resource Management* is a classic edited textbook, taking account of recent developments in the international human resources management (IHRM) field, such as the pandemic, the role of diversity, equity, and inclusion, as well as climate change. It includes a range of key readings that are essential for understanding the field and contextualizes each one with a selection of real-life case studies that demonstrate their meaning and impact in practice. The book aims to sensitize the reader to the complex human resource issues that exist in the global business environment. To that end, it strives to publish "tried and true" readings and cases that provide stimulating and intellectually challenging material and are written in ways that engage both the student and the instructor. Key features include: New readings and case studies that account for recent changes in the field, positioned alongside "tried and true" material Integration of contemporary themes such as remote working, digitization, sustainability, and social issues throughout the book An expanded introductory chapter, new discussion questions, and consistent pedagogy throughout Supplemental tutor support material, additional cases, and teaching notes to enhance instructors' abilities to use the readings and cases with their students Bringing together well-known contributors and field experts into one encompassing text, this textbook is ideal for any class in international human resource management, international organizational behaviour, or international business. This seventh edition is thoroughly updated to enable students to understand the complexity of human resource issues in the post-pandemic era of global, remote, and technology-mediated working.

*Imperium EU* Werner Rügemer,2021-09-02 Since the end of World War II, the European Union has been a joint creation of the victorious USA and Western European corporations, banks and newly founded Christian, then also conservative, liberal and

increasingly also social democratic parties. The institutional consolidation since the preliminary stages in the 1950s was characterized by the military and economic dual character: first by NATO and the Marshall Plan, later by the parallel eastward expansion of NATO and membership in the EU. The ever-expanding capital bureaucracy in the founding states of Luxembourg and Belgium (Commission, Parliament, judiciary, agencies, NATO headquarters) promotes private capitalist interests through privatization, subsidies, directives, court rulings, international treaties. Labor rights are deeply below the standard of Universal Human Rights and the International Labor Organization ILO. In particular, collective labor rights such as for unions and employee representation are not promoted. Thus, not only the EU member states, but also associated and candidate states have become a vast resource for low-wage labor for Western subcontracting services (automotive, pharmaceutical, retail, digital services) and growing, often illegal, migrant labor (truck drivers, construction workers, doctors, nurses, home care, prostitution, seasonal agricultural labor). What is covered up in the leading media: In all 28 EU states (also England before Brexit) and associated states many spontaneous as well as organized defensive struggles are taking place: For the first time in this book they are presented with examples from 12 states.

Labour Law and Industrial Relations in Recessionary Times Anthony

Forsyth, 2014-01-14 This volume includes a number of papers written in English and published in the last fifteen years in which the Italian labour market faced many changes. The book not only provides the international readership with a frame of reference – in both conceptual and legal terms – that helps to appreciate the Italian Labour Law currently in force, but also represents a contribution to moving beyond the self-referential nature of the Italian debate on the reform of labour laws. As such, the book supplies the reform process of the Italian labour market with an international and comparative dimension which – in accordance with the programmatic approach of Marco Biagi – will also feed the debate at the national level.

Future of Jobs IntroBooks Team, Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

The New Spirit of Capitalism Eve Chiapello, Luc Boltanski, 2018-01-16 In this major work, sociologists Luc Boltanski and Eve Chiapello go to the heart of the changes in contemporary capitalism. Via an unprecedented analysis of the latest management texts that have formed the thinking of employers in their reorganization of business, the authors trace the contours of a new spirit of capitalism. They argue that from the middle of the 1970s onwards, capitalism abandoned the hierarchical Fordist work structure and developed a new network-based form of organization that was founded on employee initiative and autonomy in the workplace—a freedom that came at the cost of material and psychological security. The authors connect this new spirit with the children of the libertarian and romantic currents of the late 1960s (as epitomised by dressed-down, cool capitalists such as Bill Gates and Ben and Jerry) arguing that they practice a more successful and subtle-form of exploitation. Now a classic work charting the sociological structure of neoliberalism, Boltanski and Chiapello show how the new spirit triumphed thanks to a remarkable recuperation of the left's critique of the alienation of everyday life that simultaneously undermined their social critique. In this new edition, the two authors reflect on the reception of the book and the debates it has stimulated.

**Promoting an Age-Inclusive Workforce Living, Learning and Earning Longer**

OECD,2020-12-16 All OECD economies are undergoing rapid population ageing, leading to more age diversity in workplaces than ever before as people are not only living longer but working longer. This report presents a business case for embracing greater age diversity at the workplace and debunks several myths about generational differences in work performance, attitudes and motivations towards work.

**Sport, Education et Formation en Europe / Sport, Education and Training in Europe** ,2015-06-09 Selon des études internationales, 30% des jeunes pratiquants entre 10 et 17 ans abandonnent le sport chaque année, parce qu'ils considèrent que la pratique sportive leur prend trop de temps. Cette situation est d'autant plus vraie pour les sportifs de haut niveau, dont le rythme de vie est difficilement conciliable avec les défis et contraintes du système éducatif et du marché du travail. Pour répondre à ce défi, la notion de double projet a vu le jour: elle se définit comme la recherche de l'excellence sportive et de la réussite scolaire, universitaire et professionnelle du sportif. Dans le cadre d'un projet pédagogique mené en collaboration avec le Mastère Spécialisé en Management des Organisations de Sport d'Audencia Nantes, le think tank Sport et Citoyenneté présente une approche comparée des systèmes mis en oeuvre dans six Etats européens pour faciliter la poursuite du double projet, accompagnée de prestigieuses contributions. According to international research, every year 30% of the young people between 10 and 17 who do sport give it up, because they find their sport takes up too much of their time. This is especially the case for top-level athletes; it is difficult to reconcile the demands of their sporting life with the challenges and constraints of the education system or the job market. The idea of the dual career was devised as a response to this problem: it can be defined as the pursuit of sporting excellence and academic or professional success by the athlete. Within the framework of an educational project in collaboration with the specialised Masters in Management of Sport Organisations at Audencia Nantes, Sport and Citizenship brings you a comparative approach to the systems set up with the aim of facilitating the dual career in sport and education in six European States and a compilation of important contributions

**It's about Time** Phyllis Moen,2018-08-06 How do two-career couples manage in a one-career world?It's about Time examines this mismatch between outdated scripts and the experiences of dual-earner couples. It broadens our understanding of occupational and family career strategies couples use in light of the widening gap between their real lives and the outdated work-hour and career-path roles, rules, and regulations they confront. It's about Time draws on the data from the Cornell Couples and Careers Study to demonstrate that:\*Regardless of income, time is a scarce commodity in dual-earner households. With two jobs, two commutes, often long work hours, high job demands, business travel, several cars, children, ailing relatives, and/or pets - time is always an issue.\*Time is built into jobs and career paths in ways that make continuous full-time (40 or typically more hours a week) paid work a fact of life in American society. \*The multiple strands of life—career, family and personal—unfold over time. Spouses move through their life courses in tandem, with early choices - to have children or not, to work long hours or not, to switch jobs or not, to relocate for his or her career or not—all having long-term consequences for life quality and for gender inequality.The evidence from this book suggests that it is about time for the United States to confront the realities and needs of contemporary working couples and indeed, all members of the new workforce. To do so requires more than Band-Aid, short-term (and often short-sighted) policy remedies. It's about Time argues that it is essential to re-imagine and reconfigure work hours, workweeks, and occupational career paths in ways that address the widening gaps between the time needs and goals of workers and their families, at all ages and stages of the life course.
