*The Business Year: Morocco 2021/22* , In partnership with AMDIE, Morocco's Investment and Trade Agency, The Business Year returns to Morocco to offer insights into the themes of economic recovery. Though faced with significant challenges, the overall tone of those interviewed in this publication has been one of optimism. Having weathered the difficulties and adapted to the rigors of the pandemic, the business world of Morocco is tougher, savvier, and, crucially, more resilient. This 96-page publication featured interviews, news, and analysis across every major sector of the economy, including finance, industry, energy, IT, media, transport, logistics, construction, real estate, agriculture, health, education, and tourism.

Dynamics of Youth Agency in Times of Crisis Nadine Sika,2021-12-19 This book examines the political economy of the Middle East and North Africa, and how it impacts young people's civic and political participation today. The edited volume analyses the extent to which young people influence public policies, social, cultural and economic structures, and how on the other hand these young people are influenced by the same structures. It focuses on the politics and agency of youth, and

how they impact social change and continuity in the Middle East and North Africa. The book will be of great value to students, scholars and researchers interested in Youth Movements, MENA, Comparative Politics and Political Economy. The chapters in this book were originally published as a special issue of the journal, *Mediterranean Politics*.

**The Fourth Industrial Revolution** Klaus Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators

respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

The Future of Work R. Donkin, 2009-11-06 The forces that are shaping the future of employment are examined in this new book. The author presents a cohesive argument for a fundamental change in attitudes to work, both from policymakers and employers if we are to create a healthier society capable of meeting the expectations and concerns of a developing economy.

**Hybrid Diplomacy with NGOs** Raffaele Marchetti, 2021-11-09 This book explores a new way of doing diplomacy through the engagement with non-governmental organizations, here referred to as hybrid diplomacy. Today's global politics is played out most successfully by the combined actions of different actors. A specific type of partnership is that between governments (namely Ministries of Foreign Affairs) and civil society organizations. While not the only type of global partnership at work, this is particularly effective in advancing new issues and promoting the norm changes that have been discussed at length in international relations and sociological literature. The author has chosen Italy as a case study because of the country's prolonged deployment of such policy. Being a middle power, with a strong non-profit sector, and hosting the central node of catholic global network, Italy is well positioned to take advantage of this new diplomatic mode. Through presenting a new reading of the Italian contribution to international affairs, this book contributes to broadening

the scholarship in foreign policy analysis and transnational activism.

*The Precariat* Guy Standing, 2021-07-15 This book presents the new Precariat – the rapidly growing number of people facing lives of insecurity, on zero hours contracts, moving in and out of jobs that give little meaning to their lives. The delivery driver who brings your packages, the uber driver who gets you to work, the security guard at the mall, the carer looking after our elderly...these are The Precariat. Guy Standing investigates this new and growing group, finding a frustrated and angry new underclass who are often ignored by politicians and economists. The rise of zero hours contracts, encouraged by fat cat corporations as risk-free employment, and by silicon valley as a way of outsourcing costs and responsibility, has been exacerbated by the COVID pandemic. At the same time, in its experience of lockdown, the western world is realizing the true value of these nurses, carers and key workers. The answer? The return of income security and meaningful work - the principles 20th century capitalism was built on. By making the fears and desires of the Precariat central to economic thinking, Standing shows how concepts like Basic Income are not just desirable but inevitable, and plots the way to a better future.

**Tackling Youth Unemployment** Francesca Fazio, Anthony Forsyth, 2014-03-17 Youth have always had higher unemployment rates – about twice or more than the average – as they are usually the last to be hired in an expansion and the first to be let go in a recession. In addition, young people

engage in extensive job searching in their early years, and this can imply considerable job churning as both youth and employers look for a good match. This highlights the importance of facilitating the school-to-work transition and having early interventions to assist such youth before negative conditions set in. It also highlights the potential importance of determining those young people most “at risk” of long-term unemployment, and of targeting or streaming them into programmes that will yield the largest incremental net benefits given their characteristics. Unemployed youth without previous work experience often are not eligible for unemployment insurance benefits when they first enter the labour market. When they do receive job search assistance, they often face a bewildering array of programmes that are available to assist them, often with little guidance to help them select the programs that best meet their needs. Consequently, ensuring that today’s youth do not become a “lost generation” is an urgent matter. George Bernard Shaw once said that it is too bad that “youth is wasted on the young”, implying that youth do not realize the opportunities they have as youth and only see them as they get older. There is a danger, however, that many of today’s youth may be never have those opportunities and hence not even see them with hindsight. This book and others in the ADAPT Labour Studies Book-Series are intended to deal with these challenges, to make sure that youth is not wasted on the young.

**The Global Innovation Index 2015** Cornell University, INSEAD, World Intellectual Property Organization, 2015 The Global Innovation Index ranks the innovation performance of 141 countries and economies around the world, based on 79 indicators. This edition explores the impact of innovation-oriented policies on economic growth and development. High-income and developing countries alike are seeking innovation-driven growth through different strategies. Some countries are successfully improving their innovation capacity, while others still struggle.

**Transforming Disability into Ability Policies to Promote Work and Income Security for Disabled People** OECD,2003-02-10 This book examines a wide array of labour market and social protection programmes aimed at people with disabilities and analyses the relationship between policies and outcomes across twenty OECD countries.

**How We Work and Live, Forest Workers Talk about Themselves** Bernt Strehlke,2003

**Negotiating Our Way Up Collective Bargaining in a Changing World of Work** OECD,2019-11-18 Collective bargaining and workers' voice are often discussed in the past rather than in the future tense, but can they play a role in the context of a rapidly changing world of work? This report provides a comprehensive assessment of the functioning of collective bargaining systems and workers' voice arrangements across OECD countries, and new insights on their effect on labour market performance today.

**Merchants of Labour** International Labour Office,International Institute for Labour Studies,2006 More workers are crossing national borders to look for jobs than ever before. Many migrants seek overseas employment with the help of agents or intermediaries. These merchants of labour include relatives who finance a migrant's trip, provide housing and arrange for a job abroad; public employment services; and private recruitment agencies. They also comprise an insalubrious underworld of smugglers and traffickers. The agents who recruit and deploy migrant workers are at the heart of the evolving migration infrastructure, i.e. the network of business and personal ties that is creating a global labour market. This book highlights best practices in the activities and regulation of these merchants of labour as well as innovative strategies to protect migrant workers, underlining the contribution of ILO standards. It covers a broad range of national and regional experiences and puts merchants of labour in the wider context of changing employment

relationships in globalizing labour markets. The papers it contains are an important contribution to understanding a major mechanism facilitating the growth of the migrant labour force.
