Transnational Labour Regulation Kerstin Ahlberg, 2008 This book illuminates the process and substance of transnational regulation of labour in a global economy. Transnational labour regulation, a central feature of the European social model, engages the 27 Member States of the European Union, and is of potential importance to the rest of the world. The book analyses the attempts at transnational regulation of temporary agency work through the social dialogue between trade unions and employers' organisations at European level and the subsequent - and so far fruitless - EU legislative process. These two processes of transnational labour regulation, and their interaction, until now have been largely invisible. The book also highlights distinctive features of Member States' national regulation as they interacted with the debates on EU transnational labour regulation. It further explores the overlap between regulation of temporary agency work and the EU's regulation of transnational trade in services, the subject of the Directive on services in the internal market. Finally, it draws lessons from the experience of regulation of temporary agency work at national and European levels for transnational labour regulation in general.

Labour Law and Industrial Relations in Recessionary Times Anthony Forsyth, 2014-01-14 This volume includes a number of papers written in English and published in the last fifteen years in which the Italian labour market faced many changes. The book not only provides the international readership with a frame of reference - in both conceptual and legal terms - that helps to appreciate the Italian Labour Law currently in force, but also represents a contribution to moving beyond the self-referential nature of the Italian debate on the reform of labour laws. As such, the book supplies the reform process of the Italian labour market with an international and comparative dimension which - in accordance with the programmatic approach of Marco Biagi - will also feed the debate at the national level.

EURES European Commission. Directorate-General for Employment, Social Affairs and Equal Opportunities, 2009 EURES offers information, advice and job placement services to citizens of the EU member states, Iceland, Liechtenstein, Norway and Switzerland, and also monitors the labor market situation in and across these countries. This book marks the work and staff of EURES, launched in 1994, on the occasion of the service's 15th anniversary. It tracks the legislative steps that led to the creation of the service and offers a retrospective portrayal of the network's members and achievements over its history, before examining the potential topics with which the service may deal in the future.-- Publisher's description.

OECD Employment Outlook 2019 The Future of Work

OECD, 2019-04-25 The 2019 edition of the OECD Employment Outlook presents new evidence on changes in job stability, underemployment and the share of well-paid jobs, and discusses the policy implications of these changes with respect to how technology, globalisation, population ageing, and other megatrends are transforming the labour market in OECD countries.

Transforming Disability into Ability Policies to Promote Work and Income Security for Disabled People

OECD, 2003-02-10 This book examines a wide array of labour market and social protection programmes aimed at people with disabilities and analyses the relationship between policies and outcomes across twenty OECD countries.

Future of Jobs IntroBooks Team, Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed

instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

This report presents a business case for embracing greater age diversity at the workplace and debunks several myths about generational differences in work performance, attitudes and motivations towards work.

Negotiating Our Way Up Collective Bargaining in a Changing World of Work OECD, 2019-11-18 Collective bargaining and workers' voice are often discussed in the past rather than in the future tense, but can they play a role in the context of a rapidly changing world of work? This report provides a comprehensive assessment of the functioning of collective bargaining systems and workers' voice arrangements across OECD countries, and new insights on their effect on labour market performance today.

L'economia della reputazione Alessandro Gandini, 2019-05-30 Il volume esplora le nuove forme di lavoro nell'economia della conoscenza. Attraverso una ricca galleria di dati, studi di caso ed esempi, il libro documenta l'ascesa del lavoro freelance e delinea il ruolo centrale della reputazione nei mercati del lavoro della società digitale; racconta inoltre come l'arrivo delle tecnologie digitali stia trasformando i processi produttivi e organizzativi, consentendo nuove opportunità d'incontro tra domanda e offerta di lavoro e portando all'emergere di nuove concezioni culturali del lavoro e del valore. Lo studio si basa sull'assunto teorico che il lavoro della conoscenza, così come lo intendiamo oggi, rappresenta il prodotto di un decennio nel quale i concetti di "creatività" e "lavoro creativo" hanno travalicato il loro significato originario di "espressione artistica" per essere integrati all'interno delle modalità di organizzazione e produzione del valore tipiche dell'economia digitale. Questo ha portato all'emergere di nuove forme di lavoro e di nuove professioni, pratiche e concezioni culturali.

The Cambridge Handbook of the Changing Nature of Work

Brian J. Hoffman, Mindy K. Shoss, Lauren A. Wegman, 2020-04-23

This handbook provides an overview of the research on the changing nature of work and workers by marshalling interdisciplinary research to summarize the empirical evidence and provide documentation of what has actually changed. Connections are explored between the changing nature of work and macro-level trends in technological change, income inequality, global labor markets, labor unions, organizational forms, and skill polarization, among others. This edited volume also reviews evidence for changes in workers, including generational change (or lack thereof), that has accumulated across domains. Based on documented changes in work and worker behavior, the handbook derives implications for a range of management functions, such as selection, performance management, leadership, workplace ethics, and employee well-being. This evaluation of the extent of changes and their impact gives guidance on what best practices should be put in place to harness these developments to achieve success.

A Continent Moving West? Richard Black, Godfried

Engbersen, Marek Okólski, 2010 Dit boek beschrijft de toename van migratie uit Oost-europese landen in de periode van 2004-2007, na toetreding tot de EU. Het bevat nieuwe empirische 'casestudies' van migratiepatronen, zowel gebaseerd op veldwerk als op de analyse van bestaande statistieken.

The Global Innovation Index 2015 Cornell

University, INSEAD, World Intellectual Property Organization, 2015 The Global Innovation Index ranks the innovation performance of 141 countries and economies around the world, based on 79 indicators. This edition explores the impact of innovation-oriented policies on economic growth and development. High-income and developing countries alike are seeking innovation-driven growth through different strategies. Some countries are successfully improving their innovation capacity, while others still struggle.

Merchants of Labour International Labour Office, International Institute for Labour Studies, 2006 More workers are crossing national borders to look for jobs than ever before. Many migrants seek overseas employment with the help of agents or intermediaries. These merchants of labour include relatives who finance a migrant's trip, provide housing and arrange for a job abroad; public employment services; and private recruitment agencies. They also comprise an insalubrious underworld of smugglers and traffickers. The agents who recruit and deploy migrant workers are at the heart of the evolving migration infrastructure, i.e. the network of business and personal ties that is creating a global labour market. This book highlights best practices in the activities and regulation of these merchants of labour as well as innovative strategies to protect migrant workers, underlining the contribution of ILO standards. It covers a broad range of national and regional experiences and puts merchants of labour in the wider context of changing employment relationships in globalizing labour markets. The papers it contains are an important contribution to understanding a major mechanism facilitating the growth of the migrant labour force.

Automation, Skills and the Future of Work: What do Workers Think? Mr. Carlos Mulas-Granados, Richard Varghese, Vizhdan Boranova, Alice deChalendar, Judith Wallenstein, 2019-12-20 We exploit a survey data set that contains information on how 11,000 workers across advanced and emerging market economies perceive the main forces shaping the future of work. In general, workers feel more positive than negative about automation, especially in emerging markets. We find that negative perceptions about automation are prevalent among workers who are older, poorer, more exposed to job volatility, and from countries with higher levels of robot penetration. Perceptions over automation are positively viewed by workers with higher levels of job satisfaction, higher educational attainment, and from countries with stronger labor protection.

Workers with positive perceptions of automation also tend to respond that re-education and retraining will be needed to adapt to rapidly evolving skill demands. These workers expect governments to have a role in shaping the future of work through protection of labor and new forms of social benefits. The demand for protection and benefits is more significant among women and workers that have suffered job volatility.

This success can be largely attributed to Norway's robust and inclusive labour market and recent higher education reforms to improve quality.
