The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Promoting an Age-Inclusive Workforce Living, Learning and Earning Longer OECD,2020-12-16 All OECD economies are undergoing rapid population ageing, leading to more age diversity in workplaces than ever before as people are not only living longer but working longer. This report presents a business case for embracing greater age diversity at the workplace and debunks several myths about generational differences in work performance, attitudes and motivations towards work.

Obsessed by a Dream Aashild Sørheim,2019-01-01 This Open Access biography chronicles the life and achievements of the Norwegian engineer and physicist Rolf Widerøe. Readers who meet him in the pages of this book will wonder why he isn't better known. The first of Widerøe's many pioneering contributions in the field of accelerator physics was the betatron. He later went on to build the first radiation therapy machine, an advance that would eventually revolutionize cancer treatment. Hospitals worldwide installed his machine, and today's modern radiation treatment equipment is based on his inventions. Widerøe's story also includes a fair share of drama, particularly during World War II when both Germans and the Allies vied for his collaboration. Widerøe held leading positions in multinational industry groups and was one of the consultants for building the world's largest nuclear laboratory, CERN, in Switzerland. He gained over 200 patents, received several honorary doctorates and a number of international awards. The author, a professional writer and maker of TV documentaries, has gained access to hitherto restricted archives in several countries, which provided a wealth of new material and insights, in particular in relation to the war years. She tells here a gripping and illuminating story.

How to Invest in Structured Products Andreas Bluemke,2009-09-15 This book is essential in understanding, investing and risk managing the holy grail of investments - structured products. The book begins by introducing structured products by way of a basic guide so that readers will be able to understand a payoff graphic, read a termsheet or assess a payoff formula, before moving on to the key asset classes and their peculiarities. Readers will then move on to the more advanced subjects such as structured products construction and behaviour during their lifetime. It also explains how to avoid important pitfalls in products across all asset classes, pitfalls that have led to huge losses over recent years, including detailed coverage of counterparty risk, the fall of Lehman Brothers and other key aspects of the financial crisis related to structured products. The second part of the book presents an original approach to implementing structured products in a portfolio. Key features include: A comprehensive list of factors an investor needs to take into consideration before investing. This makes it a great help to any buyer of structured products; Unbiased advice on product investments across several asset classes: equities, fixed income, foreign exchange and commodities; Guidance on how to implement structured products in a portfolio context; A comprehensive questionnaire that will help investors to define their own investment preferences, allowing for a greater precision when facing investment decisions; An original approach determining the typical distribution of returns for major product types, essential for product classification and optimal portfolio implementation purposes; Written in a fresh, clear and understandable style, with many figures illustrating the products and very little mathematics. This book will enable you to better comprehend the use of structured products in everyday banking, quickly analyzing a product, assessing which of your clients it suits, and recognizing its major pitfalls. You will be able to see the added value versus the cost of a product and if the payoff is compatible with the market expectations.

Future of Jobs IntroBooks Team, Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted - a lot will be contingent on devising the right policies and institutes in place.

The New Spirit of Capitalism Eve Chiapello,Luc Boltanski,2018-01-16 In this major work, sociologists Luc Boltanski and Eve Chiapello go to the heart of the changes in contemporary capitalism. Via an unprecedented analysis of the latest management texts that have formed the thinking of employers in their reorganization of business, the authors trace the contours of a new spirit of capitalism. They argue that from the middle of the 1970s onwards, capitalism abandoned the hierarchical Fordist work structure and developed a new network-based form of organization

that was founded on employee initiative and autonomy in the workplace-a freedom that came at the cost of material and psychological security. The authors connect this new spirit with the children of the libertarian and romantic currents of the late 1960s (as epitomised by dressed-down, cool capitalists such as Bill Gates and Ben and Jerry) arguing that they practice a more successful and subtle-form of exploitation. Now a classic work charting the sociological structure of neoliberalism, Boltanski and Chiapello show how the new spirit triumphed thanks to a remarkable recuperation of the left's critique of the alienation of everyday life that simultaneously undermined their social critique. In this new edition, the two authors reflect on the reception of the book and the debates it has stimulated.

Standard & Poor's Creditweek ,2002

The Global Innovation Index 2014 Cornell University,INSEAD ,World Intellectual Property Organization,Soumitra Dutta,Bruno Lanvin,Sacha Wunsch-Vincent,2014 The Global Innovation Index ranks the innovation performance of 143 countries and economies around the world, based on 81 indicators. This edition explores the role of the individuals and teams behind the innovation process. It sheds light on different aspects of human capital required to achieve innovation, including skilled labor; the intersection of human, financial and technological capital; talent retention; and the mobilization of highly educated people.

People as Merchandise Josef Kadlec,2013-05-13 DO NOT READ THIS BOOK UNLESS YOU WANT TO BECOME A WORLD-CLASS HEADHUNTER If you want to make significant improvements in your recruitment results and become a member of the top, world headhunters, follow this unorthodox LinkedIn recruitment guide. So-called 'social recruitment' is an inevitable trend in today's recruitment business, and LinkedIn is simply the main part of it. This book reveals many shortcuts and tricks everybody was afraid to unleash, including: How to uncover any full LinkedIn profile view without upgrading to premium How to override the limit of LinkedIn invitations How to search through LinkedIn groups you cannot join How to use search engines to scan LinkedIn for candidates How to automate candidate sourcing How to track the steps of your competition on LinkedIn No matter if you are a recruiter, headhunter, HR personnel, entrepreneur or startuppreneur, this book will help you to: Dramatically increase the efficiency of your recruitment activities Skyrocket the volume of reachable candidates Significantly cut costs of hiring new employees People as Merchandise, with its no-nonsense pragmatic approach, is an indispensable tool for today's recruitment professionals and entrepreneurs. -- Barbara Corcoran, founder of The Corcoran Group, author, and investor on ABC's Shark Tank Josef's book excels where others fail. I highly recommend it to any HR and staffing professional. -- Horst Gallo, Director HR at IBM People as Merchandise is not another vague guide, rather a piece of art among recruitment manuals. Definitely a no-brainer for all recruiters. -- Jeanne E. Branthover, Managing Director at Boyden and the World's Most Influential Headhunter by BusinessWeek Learn more at: www.PeopleAsMerchandise.com
