Game On Susan F. Paterno, 2021-06-15 Director of the Chapman journalism program—and mother of four recent college grads—Susan F. Paterno leads you through the admissions process to help you and your family make the best decision possible. How is it possible that Harvard is more affordable for most American families than their local state university? Or that up to half of eligible students receive no financial aid? Or that public universities are rejecting homegrown middle- and working-class applicants and instead enrolling wealthy out-of-state students? College admission has escalated into a high-stakes game of emotional and financial survival. How is the deck stacked against you? And what can you do about it? Susan F. Paterno, a veteran academic and journalist, answers these questions and more in *Game On*. Paterno helped her four very different kids navigate the application process to a wide range of colleges, paying for their four-year educations on a finite budget. She incisively decodes the college admission industry—the consultants, the tutors, the rankers, the branding companies hawking “advantage”—and arms you with the knowledge you need to make the system work for you. You'll learn how to narrow your focus, analyze who gets in and why, and look for the right financial fit before considering anything else, including geography, reputation, and, especially, ranking. Among the tools and insights in *Game On*: • Why forty years of failed free-market policies have led to skyrocketing tuition and historic levels of student debt • Why applying to college has become a bewildering maze and how to find your way to a successful result • Why college costs are more terrifying than you think • How to read beyond the rack rate to negotiate the best financial package with the least debt • Why merit is a myth, but merit aid is essential • The difference between family debt and student debt and how to split it A playbook for the Hunger Games of higher education, *Game On* explains the anxiety, uncertainty, and chaos in college admission, explodes the myth of meritocracy, exposes the academy's connection to America's widening gap between rich and poor, and provides strategies to beat—and reform—a broken system.

The Chosen Jerome Karabel, 2005 Drawing on decades of research, Karabel shines a light on the ever-changing definition of merit in college admissions, showing how it shaped—and was shaped by—the country at large.

The Early Admissions Game Christopher Avery, Andrew Fairbanks, Richard Zeckhauser, 2009-07-01 Each year, hundreds of thousands of high school seniors compete in a game they'll play only once, whose rules they do not fully understand, yet whose consequences are enormous. The game is college admissions, and applying early to an elite school is one way to win. But the early admissions process is enigmatic and flawed. It can easily lead students toward hasty or misinformed decisions. This book—based on the careful examination of more than 500,000 college applications to fourteen elite colleges and hundreds of interviews with students, counselors, and admissions officers—provides an extraordinarily thorough analysis of early admissions. In clear language it details the advantages and pitfalls of applying early as it provides a map for students and parents to navigate the process. Unlike college admissions guides, *The Early Admissions Game* reveals the realities of early applications, how they work and what effects they have. The authors frankly assess early applications. Applying early is not for everyone, but it will improve—sometimes double, even triple—the chances of being admitted to a prestigious college. An early decision program can greatly enhance a college's reputation by skewing statistics, such as selectivity, average SAT scores, or percentage of admitted applicants who matriculate. But these gains come at the expense of distorting applicants' decisions and providing disparate treatment of students who apply early and regular admissions. The system, in short, is unfair, and the authors make recommendations for improvement. *The Early Admissions Game* is sure to be the definitive work on the subject. It is must reading for admissions officers, guidance counselors, and high school seniors and their parents.

Who Gets In and Why Jeffrey Selingo, 2020-09-15 From award-winning higher education journalist and New York Times bestselling author Jeffrey Selingo comes a revealing look from inside the admissions office—one that identifies surprising strategies that will aid in the college search. Getting into a top-ranked college has never seemed more impossible, with acceptance rates at some elite universities dipping into the single digits. In *Who Gets In and Why*, journalist and higher education expert Jeffrey Selingo dispels entrenched notions of how to compete and win at the admissions game, and reveals that teenagers and parents have much to gain by broadening their notion of what qualifies as a “good college.” Hint: it's not all about the sticker on the car window. Selingo, who was embedded in three different admissions offices—a selective private university, a leading liberal arts college, and a flagship public campus—closely observed gatekeepers as they made their often agonizing and sometimes life-changing decisions. He also followed select students and their parents, and he traveled around the country meeting with high school counselors, marketers, behind-the-scenes consultants, and college rankers. While many have long believed that admissions is merit-based, rewarding the best students, *Who Gets In and Why* presents a more complicated truth, showing that “who gets in” is frequently more about the college's agenda than the applicant. In a world where thousands of equally qualified students vie for a fixed number of spots at elite institutions, admissions officers often make split-second decisions based on a variety of factors—like diversity, money, and, ultimately, whether a student will enroll if accepted. One of the most insightful books ever about “getting in” and what higher education has become, *Who Gets In and Why* not only provides an unusually intimate look at how admissions decisions get made, but guides prospective students on how to honestly assess their strengths and match with the schools that will best serve their interests.

College Admissions for the 21st Century Robert J. Sternberg, 2011-02-01 SATs, ACTs, GPAs. Everyone knows that these scores can't tell a college everything that's important about an applicant. But what else should admissions officers look for, and how can they know it when they see it? In *College Admissions for the 21st Century* a leading researcher on intelligence and creativity offers a bold and practical approach to college admissions testing. Standardized tests are measures of memory and analytical skills. But the ever-changing global society beyond a college campus needs more than just those qualities, argues Robert Sternberg. Tomorrow's leaders and citizens also need creativity, practicality, and wisdom. How can the potential for those complex qualities be measured? One answer is “Kaleidoscope,” a new initiative in undergraduate admissions, first used at Tufts University. Its open-ended questions for applicants, and the means used to score the answers, gives applicants and admissions officers the chance to go beyond standardized tests. Does it work? As Sternberg describes in detail, Kaleidoscope measures predicted first-year academic success, over and above SATs and high school GPAs, and predicted first-year extracurricular activities, leadership, and active citizenship as well. And every year that Kaleidoscope measures were used, the entering class's average SATs and high school GPAs went up too. What worked at Tufts can work elsewhere. New kinds of assessments, like Kaleidoscope, can liberate many colleges and students from the narrowness of standardized tests and inspire new approaches to teaching for new kinds of talented, motivated citizens of the world.

The Admissions Meg Mitchell Moore, 2015-08-18 The Admissions brilliantly captures the frazzled pressure cooker of modern life as a seemingly perfect family comes undone by a few desperate measures, long-buried secret—and college applications! The Hawthorne family has it all. Great jobs, a beautiful house in one of the most affluent areas of Northern California, and three charming kids whose sunny futures are all but assured. And then comes their eldest daughter's senior year of high school . . . Firstborn Angela Hawthorne is a straight-A student and star athlete, with extracurricular activities coming out of her ears and a college application that's not going to write itself. She's set her sights on Harvard, her father's alma mater, and like a dog with a chew toy, Angela won't let up until she's basking in crimson-colored glory. Except her class rank as valedictorian is under attack, she's suddenly losing her edge at cross-country, and she can't help but daydream about a cute baseball player. Of course Angela knows the time put into her schoolgirl crush would be better spent coming up with a subject for her English term paper—which, along with her college essay, has a rapidly approaching deadline. Angela's mother, Nora, is similarly stretched to the limit, juggling parent-teacher meetings, carpool, and a real estate career where she caters to the mega-rich and super-picky buyers and sellers of the Bay Area. The youngest daughter, second-grader Maya, still can't read; the middle child, Cecily, is no longer the happy-go-lucky kid she once was; and their dad, Gabe, seems oblivious to the mounting pressures at home because a devastating secret of his own might be exposed. A few ill-advised moves put the Hawthorne family on a collision course that's equal parts achingly real and delightfully screwball—and they learn that whatever it cost to get their lucky lives it may cost far more to keep them. Sharp, topical, and wildly entertaining, The Admissions shows that if you pull at a loose thread, even the sturdiest lives start to unravel at the seams of high achievement.
