The Golden Thread Ewan Clayton, 2015-01-20 From the simple representative shapes used to record transactions of goods and services in ancient Mesopotamia, to the sophisticated typographical resources available to the twenty-first-century users of desktop computers, the story of writing is the story of human civilization itself. Calligraphy expert Ewan Clayton traces the history of an invention which—ever since our ancestors made the transition from a nomadic to an agrarian way of life in the eighth century BC—has been the method of codification and dissemination of ideas in every field of human endeavour, and a motor of cultural, scientific and political progress. He explores the social and cultural impact of, among other stages, the invention of the alphabet; the replacement of the papyrus scroll with the codex in the late Roman period; the perfecting of printing using moveable type in the fifteenth century and the ensuing spread of literacy; the industrialization of printing during the Industrial Revolution; the impact of artistic Modernism on the written word in the early twentieth century—and of the digital switchover at the century's close. The Golden Thread also raises issues of urgent interest for a society living in an era of unprecedented change to the tools and technologies of written communication. Chief among these is the fundamental question: What does it mean to be literate in the early twenty-first century? The book belongs on the bookshelves of anyone who is inquisitive not just about the centrality of writing in the history of humanity, but also about its future; it is sure to appeal to lovers of language, books and cultural history.

**Media Ventriloquism** Jaimie Baron, Jennifer Fleeger, Shannon Wong Lerner, 2021 Media Ventriloquism repurposes the term ventriloquism, which has traditionally referred to the act of throwing one's voice into an object that appears to speak, to reflect our complex vocal relationship with media technologies. Indeed, media technologies have the potential to separate voice from body and to constitute new relationships between them that could scarcely have been imagined before such technologies' invention and mass circulation. Radio, cinema, television, video games, digital technologies, and other media have each fundamentally transformed the relationship between voice and body in myriad and often unexpected ways. Our volume interrogates the categorical definitions of voice and body as they operate within mediated environments, exploring the experiences of ventriloquism facilitated by media technologies and theorizing some of the political and ethical implications of separating bodies from voices. We build in particular on Steven Connor's notion of the vocalic body, which he coined to identify an imaginary body that is created and maintained primarily through voice. In modifying Connor's term to theorize the technovocalic body, we focus our study on cases in which the relationship between voice and body has been modified specifically by media technologies. The essays in the collection demonstrate not only how particular bodies and voices have been (mis)represented through media ventriloquism but also how marginalized groups - racialized, gendered, queered, etc. - have used media ventriloquism to claim their agency and power--
