**Interpreting Technologies – Current and Future Trends** Gloria Corpas Pastor,Bart Defrancq,2023-10-09 While interpreting long remained unaffected by the technological progress that transformed the translation industry, recent years have witnessed a paradigm shift, such that interpreters increasingly interact with technological tools, that the delivery of interpreting services becomes increasingly dependent on technologies, and, finally, that technologies start to emerge that might some day compete with interpreters. This volume brings together a series of contributions on interpreting technologies focusing on each of these aspects. Its goal is to inform and to empower interpreters, as well as to spark new reflections on the future of technology in the interpreting industry. With this volume, we want to encourage interpreters to participate in that reflection and to become partners of technology rather than its victims. The next generation of technologies will need a next generation of interpreters!

Ontologies play a major role in the development of Knowledge Engineering in various domains, from Semantic Web down to the design of specific Decision Support Systems. Research on Ontologies and their applications is a highly active front of current Computational Intelligence science that is addressed here. Other subjects in this volume are modern Machine Learning, Lattice Computing and Mathematical Morphology.The wide scope and high quality of these contributions clearly show that knowledge engineering is a continuous living and evolving set of technologies aimed at improving the design and understanding of systems and their relations with humans.

**Proceedings of the “Synergise!” Biennial National Conference of the Australian Institute of Interpreters and Translators** Annamaria Arnall,2011-07-12 The Australian national association for the translating and interpreting profession, AUSIT, has been organising biennial conferences for the last decade. As they steadily grew in quality and importance, the time to share their proceedings with a global readership has arrived. For the first time, AUSIT is releasing in book format the proceedings of its latest conference, held in November 2010 with the slogan “Synergise!” Presentations from an international gathering of speakers are collected in this volume, grouped into five chapters and addressing both theoretical and practical aspects of cross-cultural communication, the training of future practitioners, and a wide range of specific circumstances influencing the day-to-day work of translators and interpreters – including the business side of managing a professional practice. The hallmark of the conference was the balance it achieved between academic interest and professional reality, between research and detailed practice, between theory and the exigencies of translators’ and interpreters’ lives. The synergies achieved were much more than the simple sum of the components.

Training 21st century translators and interpreters: At the crossroads of practice, research and pedagogy Marc Orlando, 2016-02-19 Marc Orlando looks at the gap between practice and research in Translation & Interpreting Studies and at the way this gap could be bridged. He focuses on the way practice and research can inform each other in the education and training of future translators and interpreters, with the aim of training future professionals both as practitioners and researchers in an educational environment that would marry both vocational and academic elements. It is proposed that promoting the status of practisearchers would help to fill the current gap between practitioners, researchers and Translation & Interpreting educators. Suggestions are made concerning ways of undertaking research and gaining new insights into Translation & Interpreting Studies from professional practice and experience, and of designing new didactic tools for education and training from experiential and theoretical knowledge.

The Bloomsbury Handbook of Sound Art Sanne Krogh Groth, Holger Schulze, 2020-02-20 The Bloomsbury Handbook of Sound Art explores and delineates what Sound Art is in the 21st century. Sound artworks today embody the contemporary and transcultural trends towards the post-apocalyptic, a wide sensorial spectrum of sonic imaginaries as well as the decolonization and deinstitutionalization around the making of sound. Within the areas of musicology, art history, and, later, sound studies, Sound Art has evolved at least since the 1980s into a turbulent field of academic critique and aesthetic analysis. Summoning artists, researchers, curators, and critics, this volume takes note of and reflects the most recent shifts and drifts in Sound Art--rooted in sonic histories and implying future trajectories.
