Measuring Bias on Television Barrie Gunter,1997 Exploring the important issue of impartiality in news reporting, with special reference to news broadcasting on television, this book examines the position of impartiality or bias within the context of news objectivity by exploring accusations of bias by aggrieved parties claiming to have been treated unfairly, misrepresented, or underrepresented.

Advances in Computing Science – ASIAN 2002: Internet Computing and Modeling, Grid Computing, Peer-to-Peer Computing, and Cluster Computing Jean-Marie Alain,2003-07-01 This book constitutes the refereed proceedings of the 7th Asian Computing Science Conference, ASIAN 2002, held in Hanoi, Vietnam in December 2002. The 17 revised full papers presented together with two invited contributions were carefully reviewed and selected from 30 submissions. The conference was devoted to Internet computing and modeling, grid computing, peer-to-peer systems, and cluster

computing. Among the issues addressed are scalable infrastructure for global data grids, distributed checkpointing, list coloring, parallel debugging, combinatorial optimization, video on demand servers, caching, grid environments, network enabled servers, multicast communication, dynamic resource allocation, traffic engineering, path-vector protocols, Web-based Internet broadcasting, Web-based middleware, and subscription-based Internet services.

The Art and Practice of Musical Theatre Choreography Cassie Abate, 2022-07-28 What does a musical theatre choreographer actually do? They just 'make up the steps', right? This book firstly debunks the misunderstandings around what musical theatre choreographers actually do, demonstrating their need to have an in-depth understanding of storytelling, music theory, performance practices and plot structure in order to create movement that enhances and enlivens the musical. Secondly, it equips the musical theatre choreographer with all the tools needed to create nuanced, informed and inspired movement for productions, through structured activities that build specific skills (such as 'notating the script' and 'scoring the score'). Traditionally, this training has been something of a series of secrets, passed from mentor to apprentice. The author demystifies the process to make the previously undisclosed “tricks of the trade” accessible to all choreographers, everywhere. Covering the entire process of choreographing a musical from the first script reading to the final curtain call, this book makes case for the absolute integrity of the choreographer to any musical theatre production and sets out the theoretical principles of choreography alongside the practical application during every step of the production process.

Antebellum American Pendant Paintings Wendy N. E. Ikemoto, 2017-07-06 *Antebellum American Pendant Paintings: New Ways of Looking* marks the first sustained study of pendant paintings: discrete images designed as a pair. It opens with a broad overview that anchors the form in the medieval diptych, religious history, and aesthetic theory and explores its cultural and historical resonance in the 19th-century United States. Three case studies examine how antebellum American artists used the pendant format in ways revelatory of their historical moment and the aesthetic and cultural developments in which they partook. The case studies on John Quidor's *Rip Van Winkle and His Companions at the Inn Door* of Nicholas Vedder (1839) and *The Return of Rip Van Winkle* (1849) and Thomas Cole's *Departure and Return* (1837) shed new light on canonical antebellum American artists and their practices. The chapter on Titian Ramsay Peale's *Kilauea by Day and Kilauea by Night* (1842) presents new material that pushes the geographical boundaries of American art studies toward the Pacific Rim. The book contributes to American art history the study of a characteristic but as yet overlooked format and models for the discipline a new and productive framework of analysis focused on the fundamental yet complex way images

work back and forth with one another.

Poor Reception Barrie Gunter,1987 The whole volume is very well organized and indexed. No comparable work exists that accomplishes so much in one volume. An extremely valuable review and analysis of literature, this book is recommended not only for students and researchers, but also for television news presenters inclined to gloat in their self- perceived importance.-CHOICE.

Advances in Spatial and Temporal Databases Christian S. Jensen,2001-07-02 This book constitutes the refereed proceedings of the 7th International Conference on Spatial and Temporal Databases, SSTD 2001, held in Redondo Beach, CA, USA, in July 2001. The 25 revised full papers and two industrial papers presented were carefully reviewed and selected from a total of 70 submissions. The book offers topical sections on modeling and querying, moving-object query processing, query processing: architectures and cost estimation, processing advanced queries, formal aspects, data representation, industrial session, data warehousing and mining, and indexing.

Advances in Advertising Research (Vol. VI) Peeter Verlegh,Hilde Voorveld,Martin Eisend,2015-09-07 This book provides insights into the inspiring and multifaceted field of advertising research, which is confronted with challenges regarding ad content and execution, media placement, as well as online and social media. Distinguishing between digital, classic, subtle, and alternative advertising formats, renowned scholars from around the globe contribute state-of-the-art research on these issues in 30 chapters. Advances in Advertising Research are published by the European Advertising Academy (EAA). This volume is a compilation of research presented at the 13th International Conference in Advertising (ICORIA), which was held in Amsterdam (The Netherlands) in June 2014. The conference gathered around 150 participants from diverse countries from Europe, North-America, Asia, and Australia.
