Introduction to Public Health for Chiropractors Michael Haneline, William C. Meeker, 2010-10-25 Public health is of concern to practicing chiropractors, as well as chiropractic students. The vast majority of chiropractors utilize public health concepts every day as an integral part of patient care. For instance, they give advice on risk factors that should be avoided and protective factors to be added by their patients to enhance healing and prevent illness. Public health is also part of the curriculum at all chiropractic colleges and is tested by the National Board. No public health textbooks are available that are specifically designed for the chiropractor. Consequently, college instructors are forced to make-do with class notes and generic texts that do not address the specific issues relevant to chiropractic. This book will not only be of interest to chiropractic students, but also practicing chiropractors because it will provide information they can utilize to provide better care by positively intervening with their patients and their communities regarding public health matters.

The True Power of Chiropractic Jason W. Ingham, 2019-08-27 With over one hundred Americans dying everyday to opioid overdose, doctors must look toward permanent solutions before the epidemic continues to spiral out of control. This is where chiropractic comes into play. Instead of throwing medicine at symptoms and chronic pain and hoping they go away, chiropractic is a nonsurgical solution that can alleviate pain and save you money down the road. From watching his mother see dramatic results with her polio through chiropractic treatment, to being treated himself as a child, Dr. Jason W. Ingham knows the benefits of chiropractic all too well. He wrote this book as a guide for a pain-free life--one where you don't have to use medicine as a crutch. In The True Power of Chiropractic: Unlock Your Body's Natural Ability to Adapt, Renew, and Restore, Dr. Ingham will share his knowledge with you so you can take your first steps to improving your life through chiropractic.

Careers in Chiropractic Health Care Cheryl Hawk, 2017-03-09 This book provides potential students of a chiropractic career path, as well as other health care practitioners, with vital information regarding the training required to enter the chiropractic field and the roles of chiropractors in modern health care. Chiropractic is the second largest physician-level health profession in the United States, with chiropractors providing care to at least 20 million patients annually. As chiropractic health care has been proven to be both effective and cost effective for many musculoskeletal conditions, particularly back pain, the inclusion of Doctors of Chiropractic (DCs) in a variety of health care settings is likely to continue to increase. Surprisingly, there is little readily accessible information on

chiropractic as a career path. This book provides concise yet comprehensive information about career paths, training, and professional roles in chiropractic for students considering chiropractic as well as health care practitioners in the field. Written in an easy-to-read style, *Careers in Chiropractic Health Care: Exploring a Growing Field* serves students, those in non-chiropractic health fields, and general readers considering chiropractic as a career change option. The chapters explain the training and specific licensure requirements for chiropractors in all 50 U.S. states and provide information useful to health care professionals for referrals and management of patients using chiropractic care.

Optimum Health encompasses so much more than what is perceived to be good health. Even with all our current medical advances and the constant improvement in the healthcare sciences, we, as a country, still rank in the bottom third for Health in developed countries. Is it because we do not take care of our sick? Is it because we don't have proper insurance coverage for our population? Could it be we just do not do the proper things to maintain our overall health? The reality of our Health Crisis is that it doesn't make a difference how we got to this point, the fact is that America's health is in a steady decline and needs to be changed. We wrote this book to help you begin that change. It's time to put *Your Health First*!

The Praeger Handbook of Chiropractic Health Care Cheryl Hawk, 2017-03-20 What does scientific research show about the effectiveness of chiropractic care? How are chiropractors trained and what do they do? When should one turn to chiropractic care, and how does one select a practitioner? This book answers all of these questions and more. Chiropractic is the most frequently used complementary and alternative medicine (CAM) practice in the United States, with nearly \$4 billion spent out-of-pocket annually by chiropractic patients. In fact, as evidence for its effectiveness for common conditions such as back pain continues to mount and acceptance grows in a variety of health care settings, chiropractic could be considered more mainstream than many other forms of CAM. In this information-packed single-volume work, an expert team led by Cheryl Hawk—a well-known chiropractic researcher—explains chiropractic licensure, practice, and effectiveness to general readers researching chiropractic care options and to undergraduate students choosing a major or specialty. Readers will see the range of scientific evidence supporting the use of chiropractic health care for many common conditions, learn about the typical chiropractic clinical encounter and chiropractic procedures, and understand the criteria by which patients and other health professionals can use to select a chiropractic physician. This book also provides health care practitioners in other fields with current information that enables a greater understanding of the training and the roles of chiropractors in health care.

Chiropractic Care Guide Brent Baldasare, 2014-11-25 We are so happy that your journey to wellness has led you to try chiropractic care. As chiropractors our

philosophy is simple, yet profound. As a profession, the primary belief is in natural and conservative methods of health care. Doctors of chiropractic have a deep respect for the human body's ability to heal itself without the use of surgery or medication. We devote careful attention to the biomechanics, structure and function of the spine, its effects on the musculoskeletal and neurological systems, and the role played by the proper function of these systems in the preservation and restoration of health. A Doctor of chiropractic is one who is involved in the treatment and prevention of disease, as well as the promotion of public health, and a wellness approach to patient healthcare. My personal journey began as a result of a paralyzing football injury that left me with two choices. The first choice was to have spinal surgery and the second was to find an alternative that would relieve the pressure to the nerves that supplied function to my legs. On the recommendation of my trainer I tried chiropractic and twenty years to this day I've never had surgery and regained full use of my legs. I know I'm truly blessed and I'm not suggesting chiropractic is a cure all for paralysis but I am a walking testament that there is a powerful healing force in the body that if given the proper neurological, emotional and nutritional channels can perform miraculous healing. Let us share with you a brief introduction to the profession that chose me. The world's understanding of the efficacy of chiropractic care is still in its early stages even though knowledge of chiropractic science has been around to some degree as long as recorded time. Early chiropractors were jailed and they were publicly mocked by the medical community as charlatans and quacks. Until a brave group of doctors took on the powerful AMA and exposed an illegal conspiracy to destroy chiropractic. Here is a brief summary of the result. Summary of Judge's Opinion and Order On August 27, 1987, Judge Susan Getzendanner, United States District Judge for the Northern District of Illinois Eastern Division, found the American Medical Association, The American College of Surgeons, and The American College of Radiology, guilty of having conspired to destroy the profession of chiropractic in the United States. In a 101-page opinion, Judge Getzendanner ruled that the American Medical Association and its co-conspirators had violated the Sherman Antitrust Laws of the United States. Judge Getzendanner ruled that they had done this by organizing a national boycott of doctors of chiropractic by medical physicians and hospitals using an ethics ban on interprofessional cooperation. Evidence at the trial showed that the defendants took active steps, often covert, to undermine chiropractic educational institutions, conceal evidence of the usefulness of chiropractic care, undercut insurance programs for patients of chiropractors, subvert government inquiries into the efficacy of chiropractic, engage in a massive misinformation campaign to discredit and destabilize the chiropractic profession and engage in numerous other activities to maintain a medical physician monopoly over health care in this country.
