Advanced Transaction Models and Architectures

Sushil Jajodia, Larry Kerschberg, 2012-12-06 Motivation Modern enterprises rely on database management systems (DBMS) to collect, store and manage corporate data, which is considered a strategic corporate resource. Recently, with the proliferation of personal computers and departmental computing, the trend has been towards the decentralization and distribution of the computing infrastructure, with autonomy and responsibility for data now residing at the departmental and workgroup level of the organization. Users want their data delivered to their desktops, allowing them to incorporate data into their personal databases, spreadsheets, word processing documents, and most importantly, into their daily tasks and activities. They want to be able to share their information while retaining control over its access and distribution. There are also pressures from corporate leaders who wish to use information technology as a strategic resource in

offering specialized value-added services to customers. Database technology is being used to manage the data associated with corporate processes and activities. Increasingly, the data being managed are not simply formatted tables in relational databases, but all types of objects, including unstructured text, images, audio, and video. Thus, the database management providers are being asked to extend the capabilities of DBMS to include object-relational models as well as full object-oriented database management systems.

Advanced Multi-Project Management Gerald I. Kendall, Kathleen M. Austin, 2012-11-02 Even in a well-managed multi-project environment, it is not unusual to see half of all projects completed either late, over budget or with cuts to original scope. However, the proven approach presented in *Advanced Multi-Project Management* has enabled large, medium, and even small organizations to consistently complete their projects faster, within original scope and budget, and increase the number of projects executed with the same resources by as much as 70%. The list of companies that have used this methodology for stunning results includes some of the biggest, well-known names in the world—Boeing, Rio Tinto, ABB, and Chrysler. This guide details the six gears that must work in unison to drive speed and predictability within an organization.

Advanced Case Management with IBM Case Manager Wei-Dong Zhu, Brian Benoit, Bob Jackson, Johnson

Liu, Mike Marin, Seema Meena, Juan Felipe Ospina, Guillermo Rios, IBM Redbooks, 2015-04-28

Organizations face case management challenges that require insight, responsiveness, and collaboration. IBM® Case Manager, Version 5.2, is an advanced case management product that unites information, process, and people to provide the 360-degree view of case information and achieve optimized outcomes. With IBM Case Manager, knowledge workers can extract critical case information through integrated business rules, collaboration, and analytics. This easy access to information enhances decision-making ability and leads to more successful case outcomes. IBM Case Manager also helps capture industry preferred practices in frameworks and templates to empower business users and accelerate return on investment. This IBM Redbooks® publication introduces the case management concept. It includes the reason for and benefits of case management, and why it is different from the traditional business process management or content management. In addition, this book addresses how you can design and build a case management solution with IBM Case Manager and integrate that solution with external products and components. This book is intended to provide IT architects and IT specialists with the high-level concepts of case management and the capabilities of IBM Case Manager. It also serves as a practical guide for IT professionals who are responsible for designing, building, customizing, and deploying IBM Case Manager solutions.

Database Systems For Advanced Applications '91 - Proceedings Of The 2nd International Symposium On Database Systems For Advanced Applications Akifumi Makinouchi, 1992-09-21 This volume contains 64 papers from contributors around the world on a wide range of

topics in database systems research. Of special mention are the papers describing the practical experiences of developing and implementing some of the many useful database systems on the market. Readers should find useful new ideas from the proceedings of this international symposium.

Integrated Process Modeling, Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing Y. A. Liu, Niket Sharma, 2023-07-25 Integrated Process Modeling, Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing Detailed resource on the “Why,” “What,” and “How” of integrated process modeling, advanced control and data analytics explained via hands-on examples and workshops for optimizing polyolefin manufacturing. Integrated Process Modeling, Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing discusses, as well as demonstrates, the optimization of polyolefin production by covering topics from polymer process modeling and advanced process control to data analytics and machine learning, and sustainable design and industrial practice. The text also covers practical problems, handling of real data streams, developing the right level of detail, and tuning models to the available data, among other topics, to allow for easy translation of concepts into practice. Written by two highly qualified authors, Integrated Process Modeling, Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing includes information on: Segment-based modeling of polymer processes; selection of thermodynamic methods; estimation of physical properties for polymer process modeling Reactor modeling, convergence tips and data-fit tool; free radical polymerization (LDPE, EVA and PS), Ziegler-Natta polymerization (HDPE, PP, LLPDE, and EPDM) and ionic

polymerization (SBS rubber) Improved polymer process operability and control through steady-state and dynamic simulation models Model-predictive control of polyolefin processes and applications of multivariate statistics and machine learning to optimizing polyolefin manufacturing Integrated Process Modeling, Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing enables readers to make full use of advanced computer models and latest data analytics and machine learning tools for optimizing polyolefin manufacturing, making it an essential resource for undergraduate and graduate students, researchers, and new and experienced engineers involved in the polyolefin industry.

Embedded Software and Systems Zhaohui

Wu, 2005-09-15 This book constitutes the thoroughly refereed postproceedings of the First International Conference on Embedded Software and Systems, ICSSS 2004, held in Hangzhou, China in December 2004. The 80 revised full papers presented together with the abstracts of 4 keynote speeches and 4 invited talks were thoroughly

reviewed and selected from almost 400 submissions. The papers are organized in topical sections on distributed embedded computing, embedded systems, embedded hardware and architecture, middleware for embedded computing, mobile systems, transducer network, embedded operating system, power-aware computing, real-time system, embedded system verification and testing, and software tools for embedded systems.

Shaping the Future of ICT Research: Methods and Approaches Anol Bhattacharjee, Brian

Fitzgerald, 2012-12-09 This book constitutes the refereed proceedings of the IFIP WG 8.2 Working Conference Shaping the Future of ICT Research, held in Tampa, FL, USA, in December 2012. The 15 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers are organized in the following topical sections: new methods in design science research; recent developments in inductive research methods; emerging themes in interpretive case study research; new ideas in positivist research; and innovative trends in information systems research.

Advanced SOA Tools and Applications Stanisław Ambroszkiewicz, Jerzy Brzeziński, Wojciech Cellary, Adam Grzech, Krzysztof Zieliński, 2013-10-28 This book presents advanced software development tools for construction, deployment and governance of Service Oriented Architecture (SOA) applications. Novel technical concepts and paradigms, formulated during the research stage and during development of such tools are presented and illustrated by practical usage examples. Hence this book will be of interest not only to theoreticians but also to engineers who cope with real-life problems. Additionally, each chapter contains an overview of related work, enabling comparison of the proposed concepts with exiting

solutions in various areas of the SOA development process. This makes the book interesting also for students and scientists who investigate similar issues.

Advanced Project Management Frederick Harrison, Dennis Lock, 2017-03-02 When Advanced Project Management first appeared it quickly acquired a reputation for excellence on both sides of the Atlantic as a book that successfully bridges the gap between introductory texts on project management and specialist works on professional practice. Its aim is twofold: to provide a guide for managers, engineers, accountants and others involved in project work, and a reference for advanced students of project and construction management. This fourth edition of the book has been heavily revised, with substantial material to reflect the changes in project management. The following topics are either new to the book or have been given greater emphasis: ¢ Project definition and appraisal ¢ Procurement and the supply chain ¢ Concurrent engineering ¢ Cost and management accounting ¢ Quality management ¢ More detailed explanations of critical path analysis, now predominantly using the precedence system ¢ Increased treatment of resource scheduling ¢ Planning with multiple calendars ¢ Planning within fixed time constraints, using crashing and fast-tracking methods ¢ Standard networks, modules and templates ¢ Risk management.
