Advanced Trauma Life Support Program for Doctors ,1997

PHTLS ,2004-08 Prehospital Trauma Life Support (PHTLS), 5th Edition, Military Version is a unique, continuing education program that directly addresses trauma issues in the prehospital environment. Following the publication cycle of ATLS (Advanced Trauma Life Support) by the Committee on Trauma of the American College of Surgeons, the PHTLS program is designed to enhance and increase knowledge and skill in delivering trauma care. The PHTLS textbook is the required book for the PHTLS course, and is also ideal for use as the trauma component of a paramedic course or as a general reference book on trauma assessment and management. Based on Prehospital Trauma Life Support (PHTLS), 5th Edition, this military version combines both basic and advanced trauma concepts and skills in one definitive resource and features an entirely new chapter on evidence-based guidelines for military medicine, developed by the Committee on Tactical Combat Casualty Care. Instructor resources available; contact your sales representative for details. A companion CD-ROM with video presentations of the airway and spinal skills used in PHTLS is now included with every book. It also contains information to download onto a PDA, such as the Glasgow Coma Scale, Revised Trauma Score, Rule of 9's, Parkland Formula, and Pediatric Vital Signs. Content includes both basic and advanced training and has been updated to reflect the current ATLS guidelines - complete with extensive references and suggested readings. A consistent approach for every body region makes the book easy to follow and includes content on anatomy and physiology, pathophysiology, and assessment and

management. Includes chapters on Injury Prevention; Golden Principles of Prehospital Trauma Care; and Triage, Transport, and Trauma Systems. Golden Principles of Trauma Care chapter includes information on prolonged transportation and additional treatment for a trauma patient when transportation times are greater than normal. Case Scenarios with end-of-chapter solutions and Review Questions are included for every chapter to promote critical thinking and assess knowledge. NAEMT: Airway, thoracic, and spinal skills are presented in a heavily illustrated, step-by-step format as Specific Skills. The Airway Management and Ventilation chapter includes information on face-to-face intubation, an alternate method of intubating trauma patients. It also defines the difference between pharmacologically assisted intubation and rapid sequence intubation. Includes information on tools such as pulse oximetry and capnography. A difficult airway algorithm aids students in determining which airway adjuncts are appropriate and when they should be used. Includes new photographs geared specifically to the military. Describes differences in procedures in a non-combat situation and those in a combat situation. The Military Medicine chapter, written by the military, provides special trauma considerations and protocols. Military procedures are also found throughout the text, where applicable.

PHTLS 9E: Prehospital Trauma Life Support NATIONAL ASSOCIATION OF EMERGENCY MEDICAL TECHNICIANS NAEMT.,2019-02-12 Over three decades ago, PHTLS: Prehospital Trauma Life Support transformed the assessment and management of trauma patients in the field. Throughout the years and across the globe, the PHTLS course has improved the quality of trauma patient care and has saved lives. The ninth edition of this trusted and reliable resource continues the PHTLS mission to promote excellence in trauma patient management by all providers involved in the delivery of prehospital care through global education. This legendary program was first developed by the National Association of Emergency Medical Technicians (NAEMT) in the early 1980s in cooperation with the American College of Surgeons Committee on Trauma (ACS-COT). Its medical content is continuously revised and updated to reflect current, evidence-based knowledge and practice. PHTLS promotes critical thinking as the foundation for providing quality care. It is based on the belief that EMS practitioners make the best decisions on behalf of their patients when given a solid foundation of knowledge and key principles to fuel their critical-thinking skills. A Clear Approach to Assessing a Trauma Patient In the field, seconds count. PHTLS: Prehospital Trauma Life Support, Ninth Edition teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination. PHTLS is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of the American College of Surgeons. Comprehensive, evidenced-based coverage incorporates the latest research across all aspects of prehospital trauma in one convenient resource. Heavily illustrated presentation guides you step-by-step through essential airway, thoracic, and spinal skills. Each chapter details important prolonged transportation guidelines. Includes more information on kinematics than any similar book on the market. A consistent approach for every body system helps you easily reference key content on anatomy and physiology, pathophysiology, and assessment and management. Chapter Objectives and closing Summaries break down must-know information for each chapter. Two Environmental Trauma chapters provide response protocols for a wide variety of environmental emergencies. Wilderness Trauma Care chapter helps you confidently treat trauma patients in wilderness situations and includes information on extended transport times. Civilian Tactical EMS chapter details steps you can take to support police operations, promote crime scene awareness, and apply PHTLS concepts to civilian tactical settings. Burns chapter guides you through the treatment of burn trauma patients. More than 30 video demonstrations on

the companion DVD provide step-by-step procedural guidance for key skills, including 4 brand-new skills for King Airway, Sitting Immobilization (Vest Type), Cervical Collar Sizing and Application, and Needle Cricothyrotomy. Extensively updated photos clarify key concepts and techniques. New Art and Science of Medicine chapter helps you build the critical thinking skills to determine the best way to manage trauma patients based on each individual situation and condition. Expanded chapter on Explosives and Other Weapons of Mass Destruction outlines essential steps for responding to accidents involving biological, nuclear, incendiary, chemical, or explosive agents. Updated Disaster Management chapter details the latest management techniques and protocols. All-new Scenarios and Scenario Solutions in each chapter challenge you to apply treatment concepts to realistic situations you may encounter in the field. Enhanced organization reflects the most up-to-date research and mirrors the content and presentation of the American College of Surgeons' Advanced Trauma Life Support (ATLS) 8th Edition course. Updated Companion DVD includes 9 new narrations and 20 fully re-shot demonstrations and subtitles are available in eight languages (Danish, Dutch, English, French, Portuguese, Spanish, German, and Chinese (Mandarin)).

Policy, Committee on Military Trauma Care's Learning Health System and Its Translation to the Civilian Sector, 2016-09-12 Advances in trauma care have accelerated over the past decade, spurred by the significant burden of injury from the wars in Afghanistan and Iraq. Between 2005 and 2013, the case fatality rate for United States service members injured in Afghanistan decreased by nearly 50 percent, despite an increase in the severity of injury among U.S. troops during the same period of time. But as the war in Afghanistan ends, knowledge and advances in trauma care developed by the Department of Defense (DoD) over the past decade from experiences in Afghanistan and Iraq may be lost. This would have implications for the quality of trauma care both within the DoD and in the civilian setting, where adoption of military advances in trauma care has become increasingly common and necessary to improve the response to multiple civilian casualty events. Intentional steps to codify and harvest the lessons learned within the military's trauma system are needed to ensure a ready military medical force for future combat and to prevent death from survivable injuries in both military and civilian systems. This will require partnership across military and civilian sectors and a sustained commitment from trauma system leaders at all levels to assure that the necessary knowledge and tools are not lost. A National Trauma Care System defines the components of a learning health system necessary to enable continued improvement in trauma care in both the civilian and the military sectors. This report provides recommendations to ensure that lessons learned over the past decade from the military's experiences in Afghanistan and Iraq are sustained and built upon for future combat operations and translated into the U.S. civilian system.

Priorities in Critical Care Nursing - E-Book Linda D. Urden, Kathleen M. Stacy, Mary E.

Lough, 2019-01-09 Stay on top of the most important issues in high acuity, progressive, and critical care settings with *Priorities in Critical Care Nursing*, 8th Edition. Perfect for both practicing nurses and critical care nurses reviewing for CCRN® certification alike, this evidence-based textbook uses the latest, most authoritative research to help you identify patient priorities in order to safely and expertly manage patient care. Succinct coverage of all core critical care nursing topics includes medications, patient safety, patient education, problem identification, and interprofessional collaborative management. You'll learn how to integrate the technology of critical care with the physiological needs and psychosocial concerns of patients and families to provide the highest-quality care. Additionally, this new edition places a unique focus on interprofessional patient problems to help you learn to speak a consistent language of patient problems and work successfully as part of an interprofessional team. Need-to-know content reflects today's high acuity, progressive, and critical care environments! UNIQUE! Balanced coverage of technology and psychosocial concerns includes an emphasis on patient care priorities to help you provide the highest-quality nursing care. Consistent format features a Clinical Assessment and Diagnostic Procedures chapter followed by one or more Disorders and Therapeutic Management chapters for each content area. Strong QSEN focus incorporates Evidence-Based Practice boxes that employ the PICOT framework; Teamwork and Collaboration boxes that provide guidelines for effective handoffs, assessments, and communication between nurses and other hospital staff; and Patient Safety Alert boxes that highlight important guidelines and tips to

ensure patient safety in critical care settings. Nursing management plans at the end of the book provide a complete care plan for every priority patient problem — including outcome criteria, nursing interventions, and rationales. Additional learning aids include case studies, concept maps, Collaborative Management boxes, Patient Education boxes, Priority Medication boxes, and Cultural Competency boxes.
