Get What's Yours for Health Care Philip Moeller,2021-01-12 At a time when healthcare and medical insurance are more important than ever comes this authoritative, unbiased new volume in the acclaimed Get What's Yours series. Healthcare expert Philip Moeller has written a reliable, concise guide to healthcare and health insurance basics. He provides tools that patients need before, during, and after they get medical care. He describes the care we need, the care we don't, and how to deal with doctors, hospitals, and other healthcare providers. Moeller explains telemedicine and healthcare apps that have become so important during the coronavirus epidemic. The book shares the stories of disruptive health innovators who have given us access to true health costs, cheaper prescription drugs, and low-cost care in and outside the US. You will learn how to avoid poor care, fight back against denied insurance claims and inflated bills, and use social media to connect with powerful advocates. Throughout, Get What's Yours for Healthcare draws on stories of people who share their lessons on how to successfully navigate the healthcare system. This invaluable guide helps people get access to the care they need at a price they can afford. It's the book we all need now.

Primary Care Institute of Medicine,Committee on the Future of Primary Care,1996-09-05 Ask for a definition of primary care, and you are likely to hear as many answers as there are health care professionals in your survey. Primary Care fills this gap with a detailed definition already adopted by professional organizations and praised at recent conferences. This volume makes recommendations for improving primary care, building its organization, financing, infrastructure, and knowledge base—as well as developing a way of thinking and acting for primary care clinicians. Are there enough primary care doctors? Are they merely gatekeepers? Is the traditional relationship between patient and doctor outmoded? The committee draws conclusions about these and other controversies in a comprehensive and up-to-date discussion that covers: The scope of primary care. Its philosophical underpinnings. Its value to the patient and the community. Its impact on cost, access, and quality. This volume discusses the needs of special populations, the role of the capitation method of payment, and more. Recommendations are offered for achieving a more multidisciplinary education for primary care clinicians. Research priorities are identified. Primary Care provides a forward-thinking view of primary care as it should be practiced in the new integrated health care delivery systems—important to health care clinicians and those who train and employ them, policymakers at all levels, health care managers, payers, and interested individuals.

Aortopathy Koichiro Niwa,Harald Kaemmerer,2017-02-09 This is the first textbook to focus on Aortopathy, a new clinical concept for a form of vasculopathy. The first section of the book starts from discussing general concept and history of Aortopathy, and then deals with its pathophysiology, manifestation, intrinsic factor, clinical implication, management and prevention. The second part closely looks at various disorders of the Aortopathy such as bicuspid aortic valve and coarctation of aorta. The book editors have published a lot of works on the topic and have been collecting relating data in the field of congenital heart disease for the past 20 years, thus present the book with confidence. The topic - an association of aortic pathophysiological abnormality, aortic dilation and aorto-left ventricular interaction - is getting more and more attention among cardiovascular physicians. This is the first book to refer for cardiologists, pediatric cardiologists, surgeons, ACHD specialists, etc. to acquire thorough knowledge on Aortopathy.

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Health Needs of the Elderly Gill Garrett,1987 Since the first edition of this book was published the population profile for the elderly has continued to swell. How many elderly people are there? Where are they now? How well off are they? The new edition answers these and many more key questions and takes a fresh look at approaches to planning future health care. The original text has been updated throughout and there are suggestions for additional reading at the end of each chapter. The future of our ageing society is considered in depth, alongside the necessity to prepare nurses to meet the inevitable future health needs of the elderly.

The Lyme Disease Solution Kenneth B. Singleton,2008 Lyme disease has become the fastest-growing infectious disease transmitted by ticks (or other vectors) in the United States, but still remains a condition that is frequently misunderstood, overlooked, and misdiagnosed. Written by a leading practitioner of Lyme-aware medicine, this comprehensive guide will reveal to you the facts about this very serious disease - symptoms of which can mimic cardiac, neurological, and rheumatoid conditions - and will tell you what you need to know about the diagnosis, treatment, and prevention of Lyme disease.

Each chapter features key facts highlighting important areas, summary points, and ethical issues. FEATURES • Use of cannabinoids in palliative nutrition care • Pain control in palliative care • Communications in palliative/end-of-life care: aspects of bad news • Anorexia in cancer:

appetite, physiology, and beyond • Palliative care in severe and enduring eating disorders • Linking food supplementation and palliative care in HIV • Eating-related distress in terminally ill cancer patients and their family members • Palliative care of gastroparesis • Preoperative nutrition assessment and optimization in the cancer patient • Childhood leukemia, malnutrition, and mortality as components of palliative care • End-of-life decisions in persons with neurodevelopmental disorders • Resources: listing web sites, journals, books and organizations

Facebook Nation Newton Lee,2014-10-16 Facebook’s psychological experiments and Edward Snowden’s NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America “the nation of Edison and the Wright brothers” and “of Google and Facebook.” U.S. Chief Information Officer Steven VanRoekel opines that America has become a “Facebook nation” that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness – a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA’s secret PRISM program has reinvigorated WikiLeaks founder Julian Assange’s accusation that “Facebook is the most appalling spying machine that has ever been invented.” Facebook CEO Mark Zuckerberg once said, “We exist at the intersection of technology and social issues.” This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.
