The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Presidents, Populism, and the Crisis of Democracy William G. Howell, Terry M. Moe, 2020-07-14 To counter the threat America faces, two political scientists offer “clear constitutional solutions that break sharply with the conventional wisdom” (Steven Levitsky, New York Times–bestselling coauthor of *How Democracies Die*). Has American democracy’s long, ambitious run come to an end? Possibly yes. As William G. Howell and Terry M. Moe argue in this trenchant new analysis of modern politics, the United States faces a historic crisis that threatens our system of self-government—and if democracy is to be saved, the causes of the crisis must be understood and defused. The most visible cause is Donald Trump, who has used his presidency to attack the nation’s institutions and violate its democratic norms. Yet Trump is but a symptom of causes that run much deeper: social forces like globalization, automation, and immigration that for decades have generated economic harms and cultural anxieties that our government has been wholly ineffective at addressing. Millions of Americans have grown angry and disaffected, and populist appeals have found a receptive audience. These were the drivers of Trump’s dangerous presidency, and they’re still there for other populists to weaponize. What can be done? The disruptive forces of modernity cannot be stopped. The solution lies, instead, in having a government that can deal with them—which calls for aggressive new policies, but also for institutional reforms that enhance its capacity for effective action. The path to progress is filled with political obstacles, including an increasingly populist, anti-government Republican Party. It is hard to be optimistic. But if the challenge is to be met, we need reforms of the presidency itself—reforms that harness the promise of presidential power for effective government, but firmly protect against that power being put to anti-democratic ends.

Automated and Autonomous Spatial Mobilities Aharon Kellerman, 2018 This ground-breaking book explores a rapidly developing aspect of contemporary life: automated and autonomous spatial mobilities and their social and urban implications. Presenting a wide-ranging discussion on autonomous vehicle (AV) development and its future adoption, this highly topical book points to the emergence of autonomously mobile cities and the new mobility landscapes they will present. Academics, as well as practitioners, in the fields of mobility, transportation, urban planning, geography and sociology will find this an essential read.

Parking and the City Donald Shoup, 2018-04-11 Donald Shoup brilliantly overcame the challenge of writing about parking without being boring in his

iconoclastic 800-page book *The High Cost of Free Parking*. Easy to read and often entertaining, the book showed that city parking policies subsidize cars, encourage sprawl, degrade urban design, prohibit walkability, damage the economy, raise housing costs, and penalize people who cannot afford or choose not to own a car. Using careful analysis and creative thinking, Shoup recommended three parking reforms: (1) remove off-street parking requirements, (2) charge the right prices for on-street parking, and (3) spend the meter revenue to improve public services on the metered streets. *Parking and the City* reports on the progress that cities have made in adopting these three reforms. The successful outcomes provide convincing evidence that Shoup's policy proposals are not theoretical and idealistic but instead are practical and realistic. The good news about our decades of bad planning for parking is that the damage we have done will be far cheaper to repair than to ignore. The 51 chapters by 46 authors in *Parking and the City* show how reforming our misguided and wrongheaded parking policies can do a world of good. Philanthropy Paul Vallely, 2020-09-17 'This is the definitive book on philanthropy – its history, contradictions and future' – John Gray, Emeritus Professor of European Thought, London School of Economics 'Good books lay out the lie of the land. Important books change it. This book is both' – Giles Fraser, priest, journalist and broadcaster The super-rich are silently and secretly shaping our world. In this groundbreaking exploration of historical and contemporary philanthropy, bestselling author Paul Vallely reveals how this far-reaching change came about. Vivid with anecdote and scholarly insight, this magisterial survey – from the ancient Greeks to today's high-tech geeks – provides an original take on the history of philanthropy. It shows how giving has, variously, been a matter of honour, altruism, religious injunction, political control, moral activism, enlightened self-interest, public good, personal fulfilment and plutocratic manipulation. Its narrative moves from the Greek man of honour and Roman patron, via the Jewish prophet and Christian scholastic – through the Elizabethan machiavel, Puritan proto-capitalist, Enlightenment activist and Victorian moralist – to the robber-baron philanthropist, the welfare socialist, the celebrity activist and today's wealthy mega-giver. In the process it discovers that philanthropy lost an essential element as it entered the modern era. The book then embarks on a journey to determine where today's philanthropists come closest to recovering that missing dimension. Philanthropy explores the successes and failures of philanthrocapitalism, examines its claims and contradictions, and asks tough questions of top philanthropists and leading thinkers – among them Richard Branson, Eliza Manningham-Buller, Jonathan Ruffer, David Sainsbury, John Studzinski, Bob Geldof, Naser Haghamed, Lenny Henry, Jonathan Sacks, Rowan Williams, Ngairé Woods, and the presidents of the Rockefeller and Soros foundations, Rajiv Shah and Patrick Gaspard. In extended conversations they explore the relationship between philanthropy and family, faith, society, art, politics, and the creation and distribution of wealth. Highly engaging and meticulously researched, Paul Vallely's authoritative account of philanthropy then and now critiques the excessive utilitarianism of much modern philanthrocapitalism and points to how philanthropy can rediscover its soul.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Big Data Opportunity in Our Driverless Future Evangelos

Simoudis, 2017-02-09 From Detroit to Germany, Japan, and Korea, within the incumbent automotive industry there is amplifying conversation about the magnitude, extent and timing of the disruption that will result from the introduction of autonomous and driverless vehicles. This disruption will in turn result from innovations in technology and business models and changing attitudes toward car ownership. Catalyzed by the development of Autonomous, Connected and Electrified (ACE) vehicles and Mobility Services, the emerging hybrid mobility model will blend car ownership with on-demand car access. Big data generated inside and outside ACE vehicles and the exploitation of that data by machine intelligence technologies are key ingredients in this next generation of mobility. Together they offer a unique and still overlooked value creation opportunity. The book presents a strategy for capitalizing on the opportunities presented in our driverless future through the combination of startup innovations with corporate innovation efforts.
