FLIGHT, CAMERA, ACTION! The History of U.S. Naval Aviation Photography and Photo-Reconnaissance Douglas E. Campbell, 2014-07-11 The first U.S. Navy aerial photographs were taken in 1913 in support of fleet exercises off Guantanamo, Cuba. Following WWI, a Navy Photographic expedition went north, making the first aerial mapping photos of the Alaskan territory. WWII found Navy shuttermen in the Pacific theatre, performing pre- and post-attack reconnaissance, along with hitting the beach to record the war as it unfolded. Shortly after, Navy photographic units were in the Pacific to record early atomic bomb tests. The Navy's aerial photo reconnaissance mission, both at the front end with the weaponless aircrews and the output of thousands of images and photo interpretation, continued to develop through the mid-20th century. The last aerial photo plane in the Navy's inventory was retired after flying to the Smithsonian's Air and Space Museum Annex at Dulles International Airport in Fairfax County, Virginia. The 74 year odyssey of Navy and Marine Corps aerial reconnaissance photography was finished.

Inside Aviation Photography Chad Slattery, 2018-04-15 Aviation Photography for Everybody, by photographer Chad Slattery, includes over 120 images of planes, corporate jets, experimental, and aerospace crafts with explanations about the machines and how he photographed them. Chad Slattery, based in Los Angeles, specializes in aviation & aerospace photography shooting, digital imaging, and post production for aviation and aerospace companies. His extensive experience photographing air-to-air and lighting of crafts has attracted the industry giants. His corporate clients include the business jet community, from manufacturers to brokers: Boeing, Dassault, Embraer, HondaJet, Lockheed Martin, Northrop Grumman and Orbital Sciences. He serves as contributing editor at Air & Space/Smithsonian magazine, and is regularly published in Aviation Week, AOPA Pilot, Business Jet Traveler, Executive Controller, Pro Pilot, and Volare magazines. He is skilled in both Astrovision and Vectorvision Learjet air-to-air platforms. He co-founded ISAP: the International Society for Aviation Photography. His lighting and Photoshop techniques are a large part of business jet photography for manufacturers, brokers, charter operators, and completion shops. He is a member of NBAA, AOPA, ISAP, SoCal Aviation Association, and the Aero Club of Southern California. The book's amazing image collection includes film stars, aerospace and aviation personalities, notable planes, jets, luxury and experimental craft. His subjects are in the air, on the ground, interiors and exteriors.

Takeoff Moose Peterson, 2017-09-05 Aviation photography is the perfect mix of sleek, beautiful machines, blended with nature's beautiful skies and fields, along with a fascinating collection of fearless pilots and capable crew, all wrapped in a rich, significant, and crucial part of history. Few genres combine this many elements, and invoke this much passion from photographers. This one-of-a-kind book from Moose Peterson, one of the world's most recognized experts in aviation photography, not only teaches you exactly what you need to know to start making beautiful, intriguing photographs of aircraft, but inspires you and pushes you creatively and technically every step of the way. Moose takes you through all the basics for camera gear and settings, showing you what he travels with and the settings he uses to get those tack sharp images. He covers one of the most important aspects of aviation photography—light! And, he gives you a number of examples of how to take the best advantage of that light any time of the day. He shares the critical techniques you'll need to master to create the illusion of flight, speed, and romance in a still image, including which types of prop blur you're aiming for (and which types you want to avoid). You'll learn how to make the most out of air shows and fly-ins—what to shoot while you're there, and what you might want to skip or avoid altogether (and why). You'll learn how to photograph aircraft on the ground, from ground-to-air, and ultimately air-to-air, and how to capture one of the most important elements in aviation photography today: the fascinating pilots and crew—the people! Moose shares many wonderful stories and adventures along the way, which illustrate how, as photographers, we're also storytellers, and the importance of bringing out those stories in our aviation photos. Plus, you'll gain free access to his acclaimed KelbyOne film, Warbirds and the Men Who Flew Them. With this book, your camera, and your passion, your success in aviation photography will quickly take flight!

A Complete Guide to Aviation Photography Peter M. Bowers, 1980

Photographing Airplanes Steve Mansfield, 1991 This practical how-to guide is appropriate for air show enthusiasts and aspiring professional photographers.

Jet Age Photographer Tim Kershaw, 2005-01-01 Russell Adams FRPS (1912-2000) was probably the pioneer photographer of the jet age. His dramatic air-to-air photographs of Britain's early jet fighters like the Gloster Meteor and Javelin regularly graced the pages of magazines and newspapers at home and overseas in the 1950s and early 60s. In fact, his photographs remain so popular that they are still used today with regularity by the aviation press. Russell Adams' photographs so impressed his employers, the Gloster Aircraft Company, that in 1950 they made him their photographer. Unusually for the time, much of his work was air-to-air photography of the aircraft themselves, mainly Meteors and Javelins on test flights. In fact, Russell's photographic work was of such a high standard that he was elected a Fellow of the Royal Photographic Society. This stunningly illustrated album showcases Adams' very best work, supported by accurate and detailed captions. Adams actually flew aerobatic routines himself as a passenger in a camera aircraft, enabling him to get close to the display aircraft. The adrenaline kick of such high performance flying is vividly captured in his photographs.

Aviation Photography for Everybody Chad Slattery, 2018-02 If you have a fascination with aviation, you're in the right place! Acclaimed photographer Chad Slattery takes you to the hangars, runways, and skies in pursuit of images that capture these magnificent machines at their best--Cover, page 4.

The Aviation Photography of Allen Rockwell - Volume 1 allen@allenrockwellphoto. com Allen Rockwell, 2008-08-07 A collection of high quality aviation photos taken by professional aviation photographer Allen Rockwell. Allen has traveled the USA and Europe shooting air shows, military exercises and aircraft wherever he can find them. This book is a collection of some of his favorite shots from his travels.

Photographing Aeroplanes Steve Mansfield, 1991

Concorde Adrian Meredith, 2010-01-07 Concorde can surely claim to be the world's favourite aircraft. Its sleek lines and glamorous design made it an icon recognised all over the world. Travelling at twice the speed of sound at 60,000ft, to fly Concorde was the dream of many and the regular pastime of the lucky few. The rich and famous graced its all-first-class cabins, some time and again; Sir David Frost notably undertook around twenty flights a year on Concorde for an average of twenty

years. Photographer Adrian Meredith spent many years shooting Concorde from every conceivable angle. Here he has collated his stunning artwork for the first time, to present a full colour tribute to this remarkable and memorable aircraft. Including information and photos from behind the scenes as well as significant milestones and detail on the passengers and personalities on board, this is a unique and beautiful photographic tribute.

A Guide to Aviation Photography T. Malcolm English,1992-01-01

Kitty Hawk and Beyond Ron Geibert,Patrick Bates Nolan,1990 This book, published in celebration of the 100th anniversary of powered flight in 2003, tells the story of two 20th century heroes who fashioned from the raw materials of ingenuity and ambition a legacy that will live forever in aviation history. 140 photos.

Storm of Eagles John Dibbs,Kent Ramsey,Robert "Cricket" Renner,2017-06-29 Soaring high above the fields and cities of Europe and Asia as well as the vast expanse of the Pacific, Allied and Axis pilots engaged in a deadly battle for control of the skies in World War II. Whoever won the skies would win the war. Published in association with the National Museum of World War II Aviation, Storm of Eagles is a fully illustrated coffee-table book that brings together classic as well as never-before-seen wartime images. Compiled by one of the world's premier aviation photographers and historians, this remarkable volume is a must-have for anyone interested in World War II aviation.

A Flying Life Richard Riding,2015-09-14 A beautifully illustrated insight into the golden pre-war age of British flying caught by the cameras of amateur enthusiasts.

Louisiana Aviation Vincent P. Caire,2012-04-02 At the beginning of the twentieth century the skies presented a new frontier, one that attracted daredevils, businessmen, politicians, and engineers enticed by a new form of transportation. Louisiana entrepreneurs and pilots proved instrumental in ushering in the Golden Age of Aviation. They advanced aircraft design, revolutionized aerial crop dusting, pioneered airmail routes, pushed the limits of stunt flying, and entertained spectators with air races. A pilot and freelance writer with more than twenty years of experience in the aviation industry, Vincent P. Caire chronicles the state's history of flight in 196 vintage and contemporary photographs, many never-before published. Photos of early aviation pioneer John Moisant, air racing champion General James Doolittle, barnstormer Roscoe Turner, aircraft designer James Wedell, and founder of Delta Airlines C. E. Woolman reflect Louisiana's zeal for aeronautics. Caire explains how the efforts of Senator Huey P. Long and Harry P. Williams, co-owner of the Wedell-Williams Air Service in Patterson, Louisiana, influenced the development of viable airmail routes throughout the southeastern United States. Rarely seen photographs depict the Art Deco elegance of the first modern, multioperational passenger terminal in the nation -- Shushan Airport in New Orleans. A captivating visual tour spanning one hundred years, Louisiana Aviation celebrates the state's air history, evident in Louisiana's seventy airports, 5,000 aircraft, 7,000 pilots, and numerous airshows in operation today.

World War II Aviation Artwork Joe Glyda,2021-06-08 World War II Aviation Artwork, and the stories behind these beautiful birds, is a curated collection of WWII aircraft photography and artwork. During my first WWII airplane photography session, I desired more than an ordinary photograph. I felt the necessity to create works of art from the thirty four vintage aircraft that I had photographed. By applying my digital imaging and commercial photography skills, I created this unique photographic/artistic process. Besides the artwork, I researched, discovered, and acquired historical images, aircraft specifications, unfamiliar background information and a few personal stories of some of the people that kept these planes flying. Even though these WWII planes were instrumental in the war, I was inspired to showcase the ingenuity of early aviation. It was and still is amazing to me how many different types of aircraft were built in such a short period of time. Modifications and upgrades were constantly being applied to these aircraft between 1939 and 1945. I wanted to portray that innovation and creativity of Aviation during a difficult time in our history through my artistic abilities. This reader-friendly book utilizes the Times Roman font in a larger than normal font size for easy reading as well. For the same reason the gutter or enlarged center area was used to keep the pages flat while observing the artwork. The unique aircraft artwork I have created for WWII Aviation Artwork and the Stories Behind These Beautiful Birds, has been combined with historical images, and enhanced with personal WWII stories from survivors of the war, to bring you a coffee table book you will enjoy reading and re-reading while sharing with your friends and loved ones.

Wings Over Nebraska Vince Goeres,Kylie Kinley,2010

Camera Aloft Von Hardesty,2015-12-02 Edward Steichen (1879–1973) played a key role in the development of photography in the twentieth century. He is well known for his varied career as an artist, a celebrated photographer and a museum curator. However, Steichen is less known for his pivotal role in shaping America's first experiments in aerial photography as a tool for intelligence gathering in what may be called his 'lost years'. In Camera Aloft, Von Hardesty tells how Steichen volunteered in 1917 to serve in the American Expeditionary Forces (AEF). He rose rapidly in the ranks of the Air Service, emerging as Chief of Air Photography during the dramatic final offensives of the war. His photo sections were responsible for the rapid processing of aerial images gained through the daily and hazardous sorties over the front and in the enemy rear areas. What emerged in the eighteen months of his active service was a new template for modern aerial reconnaissance. The aerial camera, as with new weapons such as the machine gun, the tank and the airplane, profoundly transformed modern warfare.
