The Beginning After The End TurtleMe,2021-03-19 I had to accept that I wasn't just Arthur Leywin anymore, and that I could no longer be limited by the circumstances of my birth. If I was going to escape, if I was going to go toe-to-toe with the most powerful beings in this world, I needed to push myself to my utmost limit...and then I needed to push even further. After nearly dying as a victim of his own strength, Arthur Leywin wakes to find himself far from the continent where he was born for the second time. Alone, broken, and with no way to tell his family he's alive, Arthur must rebuild his strength to survive. As he ascends through an ancient dungeon filled with hostile beasts and devious trials, he discovers an ancient, absolute power - a power that will either ruin him or take him to new heights. But the dungeon won't give up its knowledge easily. Before he can plunder its depths, Arthur must learn to untangle the threads of fate. He must band together with the unlikely of allies if he hopes to escape with his life.

Steamed Katie Macalister,2020-06-22 Katie Macalister takes on Steampunk--and romance gets hotter than ever... Jack Fletcher's heart is about to get punked. Computer technician Jack Fletcher is no hero, despite his unwelcome

reputation as one. In fact, he's just been the victim of bizarre circumstances. Like now. His sister happens to disturb one of his nanoelectromechanical system experiments, and now they aren't where they're supposed to be. In fact, they're not sure where they are when... ..they wake up to see a woman with the reddest hair Jack has ever seen—and a gun. Octavia Pye is an Aerocorps captain with a whole lot of secrets, and she's not about to see her maiden voyage ruined by stowaways. But the sparks flying between her and Jack just may cause her airship to combust and ignite a passion that will forever change the world as she knows it...

Under the Never Sky Veronica Rossi, 2012-01-03 Fighting to survive in a ravaged world, a Dweller and a Savage form an unlikely alliance in New York Times bestselling author Veronica Rossi's unforgettable dystopian masterpiece (Examiner.com). Exiled from her home, the enclosed city of Reverie, Aria knows her chances of surviving in the outer wasteland—known as The Death Shop—are slim. Then Aria meets an Outsider named Perry. He's wild—a savage—and her only hope of staying alive. A hunter for his tribe in a merciless landscape, Perry views Aria as sheltered and fragile—everything he would expect from a Dweller. But he needs Aria's help too; she alone holds the key to his redemption. In alternating chapters told in Aria's and Perry's voices, *Under the Never Sky* subtly and powerfully captures the evolving relationship between these characters and sweeps readers away to a harsh but often beautiful world. Continuing with *Through the Ever Night* and concluding with *Into the Still Blue*, the *Under the Never Sky* trilogy has already been embraced by readers in twenty-six countries and been optioned for film by Warner Bros. Lightspeed John C. H. Spence, 2019-10-14 This is the human story and

adventures of the great scientists who measured the speed of light -- which takes eight minutes to get here from the sun, so that when we look at the stars we are looking back in time. The book narrates how, since the ancient Greeks, scientists from Faraday, Maxwell, Fizeau and Michelson struggled to understand how light can travel through the vacuum of outer space, unless it is filled with a ghostly invisible vortex Aether foam. Thereader moves from Galileo's observations of the eclipses of Jupiter's moon for navigation, to Einstein's theories and his equation $E = mc^2$, and all the quantum weirdness which followed. Space probes, the Transit of Venus expeditions, the discovery of radio, optics and satellite navigation, and the amazing scientific instruments built to detect the Aether wind are described.

Alchemy and Artifacts Lorina Stephens, Susan MacGregor, Colleen Anderson, Lara Apps, Leslie Brown, Katherine Cameron, Chris Patrick Carolan, Geoff Gander & Fiona Plunkett, Bev Geddes, Mary-Jean Harris, Geoffrey Hart, Kate Heartfield, R. W. Hodgson, Kurt Kirchmeier, Jason Lane, Halli Lilburn, Cat McDonald, Tony Pi, Mike Rimar, Bianca Sayan, Holly Schofield, Michael Skeet, Erik Jon Spigel, Liz Westbrook-Trenholm, Michal Wojcik, 2019-06-10 There is nothing new in the world except the history we do not know. *Alchemy and Artifacts* (Tesseract Twenty-Two) is a collection of twenty-three amazing stories based on historical artifacts combined with fantastic historical fiction. The stories meld culture, concept and incident into a rich collection of 'what if' speculations that provide warnings yet revel in the cultural celebrations we continue to observe today. They are the touchstones that resonate with all who listen to and learn from the past. For, once the instigators are dead, the wars ended, and the political machines decayed, only artifacts remain.

And it's through these cultural artifacts that we glimpse the possibility of what may have occurred in the past and may yet occur in the future. You are invited to delve into the motivations behind the events of the past, the quests for power, the fights against repression, and the sacrifices to a greater cause -- human dramas that reflect the worst and best of who we are -- to see what satisfaction comes from sudden insight and awe. Featuring works by these Canadian writers: Colleen Anderson, Lara Apps, Leslie Brown, Katherine Cameron, Chris Patrick Carolan, Geoff Gander & Fiona Plunkett, Bev Geddes, Mary-Jean Harris, Geoffrey Hart, Kate Heartfield, R. W. Hodgson, Kurt Kirchmeier, Jason Lane, Halli Lilburn, Cat McDonald, Tony Pi, Mike Rimar, Bianca Sayan, Holly Schofield, Michael Skeet, Erik Jon Spigel, Liz Westbrook-Trenholm, Michal Wojcik The stories in *Alchemy and Artifacts* (Tesseract Twenty-Two) nourish those who wander in today's wilderness, and who, without the benefit of the past, are destined to plunge blindly along a path of ignorance, destroying all that has been, everything that is true and beautiful and that which nourishes our global community.

Promise of Shadows Justina Ireland, 2014-03-11 "A healthy dose of action, a strong thread of humor and just a touch of romance" (VOYA, starred review). A teen who is half-god, half-human must own her power whether she likes it or not in this snappy, snarky novel with a serving of smoldering romance that Kirkus Reviews calls "a dark, slyly funny read." Zephyr Mourning has never been very good at being a Harpy. She'd rather watch reality TV than learn

forty-seven ways to kill a man, and she pretty much sucks at wielding magic. Zephyr was ready for a future pretending to be a normal human instead of a half-god assassin. But all that changed when her sister was murdered—and Zephyr used a forbidden dark power to save herself from the same fate. On the run from a punishment worse than death, an unexpected reunion with a childhood friend upends Zephyr's world—and not only because her old friend has grown surprisingly, extremely hot. It seems that Zephyr might just be the Nyx, a dark goddess that is prophesied to shift the power balance: for hundreds of years the half-gods have lived in fear, and Zephyr is supposed to change that. But how is she supposed to save everyone else when she can barely take care of herself?

A Compendious Dictionary of the Latin Tongue Alexander Adam, 1805

Romance of the Perilous Land Scott Malthouse, 2019-12-12 Romance of the Perilous Land is a roleplaying game of magic and adventure set in the world of British folklore, from the stories of King Arthur to the wonderful regional tales told throughout this green and pleasant land. It is a world of romantic chivalry, but also of great danger, with ambitious kings, evil knights, and thieving brigands terrorising the land, while greedy giants, malevolent sorcerers, and water-dwelling knuckers lurk in the shadows. As valiant knights, mighty barbarians, subtle cunning folk, and more, the players are heroes, roaming the land to fight evil, right wrongs, and create their own legends.

Space Capstone Publication Spacepower Us Government United States Space Force, 2020-08-11 This book, Space Capstone Publication Spacepower: Doctrine for Space Forces, is capstone doctrine for the United States Space Force and represents our Service's first articulation of an independent theory of spacepower. This publication answers why spacepower is vital for our Nation, how military spacepower is employed, who military space forces are, and what military space forces value. In short, this capstone document is the foundation of our professional body of knowledge as we forge an independent military Service committed to space operations. Like all doctrine, the SCP remains subject to the policies and strategies that govern its employment. Military spacepower has deterrent and coercive capacities – it provides independent options for National and Joint leadership but achieves its greatest potential when integrated with other forms of military power. As we grow spacepower theory and doctrine, we must do so in a way that fosters greater integration with the Air Force, Army, Navy, Marine Corps, and Coast Guard. It is only by achieving true integration and interdependence that we

can hope to unlock spacepower's full potential.

Physics and Technology for Future Presidents Richard A. Muller, 2010-04-12
Physics for future world leaders Physics and Technology for Future Presidents contains the essential physics that students need in order to understand today's core science and technology issues, and to become the next generation of world leaders. From the physics of energy to climate change, and from spy technology to quantum computers, this is the only textbook to focus on the modern physics affecting the decisions of political leaders and CEOs and, consequently, the lives of every citizen. How practical are alternative energy sources? Can satellites really read license plates from space? What is the quantum physics behind iPods and supermarket scanners? And how much should we fear a terrorist nuke? This lively book empowers students possessing any level of scientific background with the tools they need to make informed decisions and to argue their views persuasively with anyone—expert or otherwise. Based on Richard Muller's renowned course at Berkeley, the book explores critical physics topics: energy and power, atoms and heat, gravity and space, nuclei and radioactivity, chain reactions and atomic bombs, electricity and magnetism, waves, light, invisible light, climate change, quantum physics, and relativity. Muller engages readers through many intriguing examples, helpful facts to remember, a fun-to-read text, and an emphasis on real-world problems rather than mathematical computation. He includes chapter summaries, essay and discussion questions, Internet research topics, and handy tips for instructors to make the classroom experience more rewarding. Accessible and entertaining, Physics and Technology for Future Presidents gives students the scientific fluency they need to become well-rounded leaders in a world driven by science and

technology. Leading universities that have adopted this book include: Harvard Purdue Rice University University of Chicago Sarah Lawrence College Notre Dame Wellesley Wesleyan University of Colorado Northwestern Washington University in St. Louis University of Illinois - Urbana-Champaign Fordham University of Miami George Washington University Some images inside the book are unavailable due to digital copyright restrictions.

The Romantic Sublime Thomas Weiskel, 2019-12-01 Originally published in 1976. In *The Romantic Sublime* Thomas Weiskel investigates the concept of the sublime in the poetry of English Romantic writers. His work infuses elements of structuralism and psychological thought in his attempt to describe and demystify the sublime experience—or, in his words, to desubliminate the sublime. In doing so, he demonstrates that the sublime is largely mystified, and he contrasts those with faith in the awesomeness of sublimation and those who remain skeptical of the sublime's mystifying power. In working to demystify the sublime, Weiskel emphasizes the task of intelligence by assigning morality and intellect the value of mistrust in sublimation.
