African Economic Outlook 2015 Regional Development and Spatial Inclusion
African Development Bank,OECD,United Nations Development Programme,2015-05-25
The African Economic Outlook 2015 analyses Africa's growing role in the world economy and predicts the continent's two-year prospects in crucial areas: macroeconomics, financing, trade policies and regional integration, human development, and governance.

Global Growth and Financial Spillovers and the South African Macro-economy
Mthuli Ncube,Eliphaz Ndou,Nombulelo Gumata,2016-04-29 To what extent is South Africa affected by G8 economies and BRIC growth shocks? This book identifies channels that amplify these shock effects, the relevance of third country transmission effects and the effects of the first and second rounds of US quantitative easing. The changing reactions of South African variables over time to financial shocks emanating from the US and selected countries in the Euro area, is presented. The book quantifies the effects of capital flow shocks, determines the counterfactuals of asset prices and economic growth variables, and compares the contribution of capital flows and domestic macro factors on asset prices. The effects of the exchange rate depreciation are contrasted to the decline in investment as key drivers of the trade balance. Stock market interdependence is determined amongst South African, Indian and Brazilian equities. The contributions of stock price returns and volatility on South African economic growth are contrasted. The authors construct a financial stress index for South Africa and determine how it amplifies shocks.

Asian Tigers, African Lions ,2013-10-02 Asian Tigers, African Lions is an anthology of contributions by scholars and (former) diplomats related to the 'Tracking Development' research project, funded by the Netherlands Ministry of Foreign Affairs, and coordinated by the African Studies Centre and KITLV, both in Leiden, in collaboration with scholars based in Africa and Asia. The project compared the performance of growth and development of four pairs of countries in Southeast Asia and Sub-Sahara Africa during the last sixty years. It tried to answer the question how two regions with comparable levels of income per capita in the 1950s could diverge so rapidly. Why are there so many Asian tigers and not yet so many African lions? What could Africa learn from Southeast Asian development trajectories?

African Seaports and Maritime Economics in Historical Perspective Ayodeji Olukoju, Daniel Castillo Hidalgo, 2020-07-14 This book updates African maritime economic history to analyse the influence of seaports and seaborne trade, processes of urbanization and development, and the impact of globalization on port evolution within the different regions of Africa. It succeeds the seminal collection edited by Hoyle & Hilling which was conceived during a phase of sustained economic growth on the African continent, and builds on a similar trend where African economies have experienced processes of economic growth and the relative improvement of welfare conditions. It provides valuable insights on port evolution and the way the maritime sector has impacted the hinterland and the regional economic structures of the affected countries, including the several and varied agents involved in these activities. African Seaports and Maritime Economics in Historical Perspective will be useful for economists, historians, and geographers interested in African and maritime issues, as well as policy makers interested in path-

dependence and long-term analysis

Investing in carbon neutrality: Utopia or the new green wave? Santos, N., Monzini Taccone di Sitizano, J., Pedersen, E., Borgomeo, E., 2022-06-17 The world's agrifood systems are on the frontlines of climate change, both as a cause and a victim. The agrifood sector is increasingly being targeted and curbing emissions is becoming a key global investment and policy theme. 'Investing in carbon neutrality: utopia or the new green wave?' presents a comprehensive assessment of the key challenges and opportunities of carbon neutrality, and scopes out the road ahead for agrifood systems. It provides strategic insights on the actions needed to move the carbon neutrality agenda forward in terms of investment opportunities and public policy priorities, with important recommendations for development partners. This publication is part of the Directions in Investment series under the FAO Investment Centre's Knowledge for Investment (K4I) programme.

West African Studies Africa's Urbanisation Dynamics 2022 The Economic Power of Africa's Cities OECD, United Nations Economic Commission for Africa, African Development Bank, 2022-04-26 This report provides a new perspective on Africa's urban economies that is unique in its breadth and level of detail. Based on data from more than 4 million individuals and firms in 2 600 cities across 34 countries, it presents compelling evidence that urbanisation contributes to better economic outcomes and higher living standards.

African Economic Outlook 2017 Entrepreneurship and Industrialisation African Development Bank, OECD, United Nations Development Programme, 2017-05-22 The African Economic Outlook 2017 presents the continent's current state of affairs and forecasts its situation for the coming two years.

The Evolution of Economic Development in Africa Francis K. Mbroh, 2021-07-11

Within the theoretical framework of the trade-growth and structural transformation-growth nexuses, the book examines the evolution of African (goods and service) trade in terms of value and share of global commerce relative to other regions during the period 1948–2017. It also identifies and discusses discernible changes in the composition and structure of African exports and imports between 1995 and 2015 and their implications for economic development in Africa. The study attributes Africa's laggard trade performance during the period primarily to sub-optimal macroeconomic policies and lack of bold export development policies and initiatives, among other factors. It also offers an incisive discussion of several inhibitions to the structural transformation of African exports and imports, including lack of finance, globalization, tariff, and non-tariff measures in global markets. The discussion of the evolution of African trade during the period 1948–2017 based on statistics and publications of international organizations, including the UNCTAD, the World Bank, and the African Development Bank, among others, is the first of its kind in terms of scope and depth of review of African trade. The analyses of cross-border trade during 1948–2017 and their implications for Africa's economic development prospects constitute a useful reference material for academics and students of African and development studies and African and international policymakers.

African Policy Innovation and the Political Economy of Public-Private Policy Partnerships Olayele, Fred, 2022-06-30 A core political economy issue in the growth literature is how to structure the relationship between the public and private sectors to ensure optimal outcomes. While conventional arguments on the ability of the private sector to intrinsically generate efficiency gains remain valid, governments' traditional role of providing an

enabling environment to foster private risk taking for capital accumulation is no less important. African Policy Innovation and the Political Economy of Public-Private Policy Partnerships borrows from contemporary theories of policy change and raises some fundamental questions about the political economy of development in Africa. This book examines the current knowledge and research about the role of public-private policy partnerships in the policy innovation discourse. It contributes a comprehensive, cutting-edge analysis vis-à-vis the appropriateness of contemporary policy devices and paradigms, the compatibility of individualistic analytical frameworks with the African philosophy of Ubuntu, the debate on the rise of neoliberalism versus Africa's traditions and values, and the implications of path dependence for the African Renaissance. From local communities and NGOs to African governments and international development agencies, the author advances a multi-stakeholder development policy and programming framework which recognizes Africa's vastly heterogeneous economies and societies. Covering topics such as policy diffusion, demographic shifts, inequality, rentier capitalism, industrial transformation, development finance innovations, venture capital ecosystems, tax policy and supply-side economics, ocean finance, the global minimum tax debate, and higher education under disruptive technologies, this premier reference source is an excellent resource for government officials, policymakers, entrepreneurs, business leaders, libraries, students and educators of higher education, researchers, and academicians.

The Oxford Handbook of the Economy of Cameroon Célestin Monga, Visiting Professor of Public Policy Célestin Monga, 2022-10-25 Cameroon's suboptimal economic experience since independence (1960) sheds light on broader issues

of Africa's development narrative, and provides valuable economic and policy knowledge. While Cameroon's large informal economy is diverse and resilient and rooted in old business traditions, its formal economy has exhibited low productivity and employment growth for over 60 years. This has brought anger, disappointment, and violent conflict in several regions of the country. The Oxford Handbook of the Economy of Cameroon examines the reasons of Cameroon's unsatisfactory economic performance and draws lessons from successful development experience to help tackle these issues. The Handbook provides a critical assessment of the history, patterns, and strategies of economic development in Cameroon, and outlines new approaches to economic enquiry for prosperity and social change. Through Cameroon's governance story, the handbook analyzes the evolving conceptions of economic policy, takes stock of intellectual progress, documents the challenges of implementation, and outlines the intellectual and policy agenda ahead. For a developing country increases in per capita income arise from advances in technology arise from closing the knowledge and technology gap with those at the frontier. And within any country (especially one like Cameroon), there is enormous scope for productivity improvement simply by closing the gap between best practices and average practices. Standards of living can therefore be improved through the implementation of pertinent learning strategies. In this Oxford Handbook of the Economy of Cameroon, an international team of leading development economists and researchers address the wide range of issues facing Cameroon and provide guiding principles on how best the country (and other developing nations) could move human, capital, and financial resources from low- to high-productivity sectors in a constantly changing global economy.

African Economic Outlook 2016 Sustainable Cities and Structural

Transformation African Development Bank, OECD, United Nations Development Programme, 2016-05-23 This report presents the continent's current state of affairs and forecasts its situation for the coming two years. It examines Africa's performance in crucial areas: macroeconomics, financing, trade policies and regional integration, human development, and governance.

African Political Economy in the Twenty-First Century Emeka C. Iloh, Ernest T. Aniche, Stephen N. Azom, 2023-09-12 This book contributes to the debate concerning the future of the political economy of African development by addressing the important question of how African countries can strategically approach global political economy at multilateral, continental, and regional levels in view of North-South versus South-South configurations.

Our Continent, Our Future P. Thandika Mkandawire, Charles Chukwuma Soludo, 2014-05-14 *Our Continent, Our Future* presents the emerging African perspective on this complex issue. The authors use as background their own extensive experience and a collection of 30 individual studies, 25 of which were from African economists, to summarize this African perspective and articulate a path for the future. They underscore the need to be sensitive to each country's unique history and current condition. They argue for a broader policy agenda and for a much more active role for the state within what is largely a market economy. Finally, they stress that Africa must, and can, compete in an increasingly globalized world and, perhaps most importantly, that Africans must assume the leading role in defining the continent's development agenda.

Housing Market Dynamics in Africa El-hadj M. Bah, Issa Faye, Zekebweliwai F. Geh, 2018-03-12 This open access book utilizes new data to thoroughly analyze the main factors currently shaping the African housing market. Some of these

factors include the supply and demand for housing finance, land tenure security issues, construction cost conundrum, infrastructure provision, and low-cost housing alternatives. Through detailed analysis, the authors investigate the political economy surrounding the continent's housing market and the constraints that behind-the-scenes policy makers need to address in their attempts to provide affordable housing for the majority in need. With Africa's urban population growing rapidly, this study highlights how broad demographic shifts and rapid urbanization are placing enormous pressure on the limited infrastructure in many cities and stretching the economic and social fabric of municipalities to their breaking point. But beyond providing a snapshot of the present conditions of the African housing market, the book offers recommendations and actionable measures for policy makers and other stakeholders on how best to provide affordable housing and alleviate Africa's housing deficit. This work will be of particular interest to practitioners, non-governmental organizations, private sector actors, students and researchers of economic policy, international development, and urban development.

Making It Big Andrea Ciani, Marie Caitriona Hyland, Nona Karalashvili, Jennifer L. Keller, Trang Thu Tran, 2020-10-08 Economic and social progress requires a diverse ecosystem of firms that play complementary roles. *Making It Big: Why Developing Countries Need More Large Firms* constitutes one of the most up-to-date assessments of how large firms are created in low- and middle-income countries and their role in development. It argues that large firms advance a range of development objectives in ways that other firms do not: large firms are more likely to innovate, export, and offer training and are more likely to adopt international standards of quality, among other

contributions. Their particularities are closely associated with productivity advantages and translate into improved outcomes not only for their owners but also for their workers and for smaller enterprises in their value chains. The challenge for economic development, however, is that production does not reach economic scale in low- and middle-income countries. Why are large firms scarcer in developing countries? Drawing on a rare set of data from public and private sources, as well as proprietary data from the International Finance Corporation and case studies, this book shows that large firms are often born large—or with the attributes of largeness. In other words, what is distinct about them is often in place from day one of their operations. To fill the “missing top†? of the firm-size distribution with additional large firms, governments should support the creation of such firms by opening markets to greater competition. In low-income countries, this objective can be achieved through simple policy reorientation, such as breaking oligopolies, removing unnecessary restrictions to international trade and investment, and establishing strong rules to prevent the abuse of market power. Governments should also strive to ensure that private actors have the skills, technology, intelligence, infrastructure, and finance they need to create large ventures. Additionally, they should actively work to spread the benefits from production at scale across the largest possible number of market participants. This book seeks to bring frontier thinking and evidence on the role and origins of large firms to a wide range of readers, including academics, development practitioners and policy makers.

African Youth and the Persistence of Marginalization Danielle Resnick, James Thurlow, 2015-04-10 The much heralded growth and transformation of many economies in sub-Saharan Africa over the last decade continues to receive

prominent attention in academic scholarship and among policy practitioners. An apparent feature about this transformation, however, is that Africa's youth appear to have been left out. This book critically examines the extent and consequences of the marginalization of African youth. It questions conventional wisdoms about data trends, aspirational goals, and common policy interventions surrounding Africa's youth that have been variously propagated in both the development studies literature and in mainstream donor policy reports. The book explores macro trends from both a temporal and cross-regional perspective in order to highlight what is distinct about contemporary African youth and whether their prospects and behaviours do actually vary from their counterparts in other regions of the world or from previous generations of African youth. Such studies include cross-country analyses of youth employment patterns and modes of political participation, in-depth examination of the behaviours and aspirations of the urban youth, and critical reflections on the impact of rural employment initiatives, vocational education, and learnership programmes. The incorporation of multiple methods and disciplines, as well as its attention to policy issues, ensures that the book will be of great interest to graduate students, researchers, and professional researchers whose work lies at the intersection of African area studies and development studies as well as those focused on development economics, political science, and public policy and administration.

Trade Liberalisation and Economic Development in Africa Gift
Mugano, 2021-09-30 This book provides a thorough and rigorous discussion on the impact of trade liberalisation on economic development with a special focus on the African continent. The author presents the rationale for trade

liberalisation, trade liberalisation frameworks, the trade liberalisation economic development nexus, impediments to trade, and contemporary issues of international trade. In this book, notwithstanding the benefits from trade liberalisation, the author shows that African trade as a share of global trade has remained flat at 3% as in 1975, while the continent's exports have remained raw materials and its intra-regional trade at less than 15% of total trade, which is the lowest in the world (UNCTAD, 2020). With respect to key economic development indicators such as economic growth, poverty levels, and employment levels, this book shows that, ironically and in direct contrast with the conventional views that trade liberalisation alleviates poverty, trade liberalisation in Africa has resulted in high levels of unemployment and low economic growth which ultimately lead to increased poverty. In addition, this book provides a detailed analysis of why trade liberalisation has failed to yield meaningful benefits to Africa. The binding constraints and blockages which prevent positive spin-offs on trade liberalisation in Africa are discussed in detail in this book. In the same vein, the author provides practical strategies which must be adopted by African countries in order to gain from trade liberalisation, making this work a must-read for African governments, academia, trade experts, regional trading blocs, the World Trade Organization, and development partners. In view of this, and as part of the disruptive and structural transformation policies, the author discusses case studies and international experience contextualised to Africa as well as strategies for addressing the trade-related infrastructure gap, production capacities, export promotion, and aid for trade.

Global Governance Futures Thomas G Weiss, Rorden Wilkinson, 2021-09-30 Global Governance Futures addresses the crucial importance of thinking through the

future of global governance arrangements. It considers the prospects for the governance of world order approaching the middle of the twenty-first century by exploring today's most pressing and enduring health, social, ecological, economic, and political challenges. Each of the expert contributors considers the drivers of continuity and change within systems of governance and how actors, agents, mechanisms, and resources are and could be mobilized. The aim is not merely to understand state, intergovernmental, and non-state actors. It is also to draw attention to those underappreciated aspects of global governance that push understanding beyond strictures of traditional conceptualizations and offer better insights into the future of world order. The book's three parts enable readers to appreciate better the sum of forces likely to shape world order in the near and not-so-near future: "Planetary" encompasses changes wrought by continuing human domination of the earth; war; current and future geopolitical, civilizational, and regional contestations; and life in and between urban and non-urban environments. "Divides" includes threats to human rights gains; the plight of migrants; those who have and those who do not; persistent racial, gender, religious, and sexualorientation-based discrimination; and those who govern and those who are governed. "Challenges" involves food and health insecurities; ongoing environmental degradation and species loss; the current and future politics of international assistance and data; and the wrong turns taken in the control of illicit drugs and crime. Designed to engage advanced undergraduate and graduate students in international relations, organization, law, and political economy as well as a general audience, this book invites readers to adopt both a backward- and forward-looking view of global governance. It will spark discussion and debate as to how dystopic futures might be avoided and

change agents mobilized.

Special Economic Zones in Africa Thomas Farole, 2011-01-01 This book, designed for policymakers, academics and researchers, and SEZ program practitioners, provides the first systematic and comprehensive analysis of SEZ programs in Sub-Saharan Africa. It is the result of detailed surveys and case studies conducted during 2009 in ten developing countries, including six in Sub-Saharan Africa. The book provides quantitative evidence of the performance of SEZs, and of the factors which contribute to that performance, highlighting the critical importance not just of the SEZ itself but of the wider national investment climate in which it functions. It also provides a comprehensive guide to the key policy questions that confront governments establishing SEZ programs, including: if and when to launch an SEZ program, what form of SEZ is most appropriate, and how to go about implementing it. Among the most important findings from the study that is stressed in the book is the shift from traditional enclave models of zones to SEZs that are integrated ? with national trade and industrial strategies, with core trade and social infrastructure, with domestic suppliers, and with local labor markets. Although the book focuses primarily on the experience of Sub-Saharan Africa, its lessons will be applicable to developing countries around the world.
