Designing Interactive Speech Systems Niels O. Bernsen,Hans Dybkjaer,Laila Dybkjaer,2012-12-06

A description of the design and implementation of spoken language dialogue within the context of spoken language dialogue systems development. Using an applications-oriented SLDS developed through the Danish Dialogue project, the authors describe the complete process involved; and in so doing present several innovative practical tools, such as dialogue design guidelines, in-depth evaluation methodologies, and speech functionality analysis. Their approach is firmly applications-oriented, describing the results applicable to industry and showing how the development of advanced applications drives research rather than vice versa. For everyone working on the R&D of spoken language services, especially in the area of telecommunications.

Bordering Professor Anders Linde-Laursen,2012-11-28 What is a border? This seemingly simple

question is here answered via a multidisciplinary study of the cultural, geographic and historic existence of borders, and the ways that they have shaped our world. Using the Danish-Swedish border to illustrate the actions of groups and individuals engaged in bordering since the 1600s, this richly theoretical discussion highlights the complexities of political and cultural identity processes. Comparative perspectives are brought together to produce a thoughtful analysis of how such processes function, and of how borders work on both an imagined nationhood and experiential personal level. The author also examines how throughout history people have lived with and influenced or been influenced by borders, why some borders remain uncontested while others repeatedly provoke cross-border conflicts, and how today's bordering processes may be deliberately manipulated.

Trafik på afveje Lars Søndergård,2023-05-05 Mange danskere bruger daglig et par timer på transport, og vi kan snakke længe om trafik. Kan det betale sig at køre i bil til arbejde? Hvor lang tid

vil turen tage med bussen? Har du overvejet at cykle? Vi interesserer os for vores egen trafiksituation. Men at tage stilling til trafikken som helhed, til trafikpolitikken, og at arbejde for bedre trafik, det overlader vi til politikere og teknikere. Meningen med Trafik på afveje er at give dig en række facts og argumenter. For og imod kollektiv trafik. For og imod bilen. Det betyder ikke, at alle facts og argumenter er lige vigtige. Du skal selv afgøre, hvad der tæller mest. Bogen udkom første gang i 1980. Lars Søndergård er lektor i samfundsfag og forfatter til en lang række undervisningsmaterialer om blandt andet international politik, handel, industri, miljø og energi. Han har tidligere arbejdet for blandt andet Dansk Industri og deltaget i en række Danida-projekter i Afrika og Asien.

ID- og grænsekontroller i Norden Andresen, Britt (Øresundsinstituttet),Palmehag, Anna (Øresundsinstituttet),Wiborg, Thea (Øresundsinstituttet),2016-07-04 Denna rapport beskriver effekterna

av de tillfälliga gränskontroller och ID-kontroller som förekommer i Norden sedan drygt ett halvår tillbaka. Rapporten fokuserar på de effekter kontrollerna har på mobiliteten, resenärer och ekonomin i de nordiska gränsregionerna. Rapporten ger en översikt över de åtgärder som respektive land har vidtagit för att genomföra dessa kontroller och den innehåller också en närmare analys av situationen i ett antal utvalda gränsområden i Norden. Analysen visar att kontrollerna generellt fungerar relativt smidigt och att de inte stör trafiken med undantag för tågtrafiken över Öresundsbron där både tillgängligheten och restiden har försämrats väsentligt. Det är också i Öresundsområdet som tranportörernas kostnader för ID-kontrollerna är som störst. Rapporten har utarbetats av Öresundsinstitutet på uppdrag av Nordiska ministerrådet.
