*Regulating Refugee Protection Through Social Welfare* Peter

Billings,2022-07-15 This book analyses the use and abuse of social welfare as a means of border control for asylum seekers and refugees in Australia. Offering an unparalleled critique of the regulation and deterrence of protection seekers via the denial or depletion of social welfare supports, the book includes contributions from legal scholars, social scientists, behavioural scientists, and philosophers, in tandem with the critical insights and knowledge supplied by refugees. It is organised in three parts, each framed by a commentary that serves as an introduction, as well as offering pertinent comparative perspectives from Europe. Part One comprises three chapters: a rights-based analysis of Australia's 'hostile environment' for protection seekers; a searing critique of welfare policing of asylum seekers as 'necropolitics'; and a unique philosophical perspective that grounds scrutiny of Australia's policing of asylum seekers. Part Two contains

five chapters that uncover and explore the lived experiences and adverse impacts of different social welfare restrictions for refugee protection seekers. Finally, the chapters in Part Three offer distinct views on human rights advocacy movements and methods, and the scope for resistance and change to the status quo. This book will appeal to an international, as well as an Australian, readership with interests in the areas of human rights, immigration and refugee law, social welfare law/policy, social work, and public health.

Constructing the Uzbek State Marlene Laruelle, 2017-12-20 Over the past three decades, Uzbekistan has attracted the attention of the academic and policy communities because of its geostrategic importance, its critical role in shaping or unshaping Central Asia as a region, its economic and trade potential, and its demographic weight: every other Central Asian being Uzbek, Uzbekistan's political, social, and cultural evolutions largely exemplify the

transformations of the region as a whole. And yet, more than 25 years after the collapse of the Soviet Union, evaluating Uzbekistan's post-Soviet transformation remains complicated. Practitioners and scholars have seen access to sources, data, and fieldwork progressively restricted since the early 2000s. The death of President Islam Karimov, in power for a quarter of century, in late 2016, reopened the future of the country, offering it more room for evolution. To better grasp the challenges facing post-Karimov Uzbekistan, this volume reviews nearly three decades of independence. In the first part, it discusses the political construct of Uzbekistan under Karimov, based on the delineation between the state, the elite, and the people, and the tight links between politics and economy. The second section of the volume delves into the social and cultural changes related to labor migration and one specific trigger – the difficulties to reform agriculture. The third part explores the place of religion in Uzbekistan, both at the state level and in society, while the last part looks at the renegotiation of collective identities.

**Children of the Crisis** Annika Lems, Kathrin Oester, Sabine Strasser, 2021-09-30 Every year, thousands of young people on the run from war and persecution, or escaping poverty and chronic instability, make their way to Europe without their parents. Embarking on long and often dangerous journeys, they have either become separated from their families on the way or set out on their own. In recent years, the number of unaccompanied minors

arriving in Europe has risen drastically. It has led to a major shift in perception in European countries, initiating a wealth of policies and infrastructures targeted specifically at unaccompanied child refugees. This book investigates the emergence of the unaccompanied child refugee as a 'crisis figure'. It shows how the sense of exceptionality attached to this figure translates into ambiguous and at times extremely contradictory social practices that have far-reaching effects on the lives of refugee youth. By bringing together ethnographically driven research on unaccompanied minors in some of the core arrival and transit countries in or into Europe, it shows the divergent ways ideas on childhood, deservingness and vulnerability are interpreted, lived, and grappled with on the ground. By laying the focus on young people's own experiences and perspectives, it establishes a deeper understanding of the ways unaccompanied asylum seekers live and make sense of shifting social terrains. The chapters in this book were originally published as a special issue of the Journal of Ethnic and Migration Studies.

Albion's Seed David Hackett Fischer,1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the

importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Covid-19 and Global Inequalities Victor Jeleniewski Seidler,2024-03-22 This timely and powerful autoethnography traces the spread of and responses to Covid-19: from the uncertainty surrounding its outbreak, to its devastating and continued aftermath. Following the virus in real time, it explores the

fears, risks and responses to the global pandemic, and how it has shaped our everyday lives against the backdrop of social and political upheaval, and the looming climate crisis. Social theorist and moral philosopher, Victor Jeleniewski Seidler, discusses fundamental questions of inequality and injustice regarding race, class and gender brought to the fore by the visibility of varying risk levels, vulnerabilities and protections provided by legislative measures against the virus. This interdisciplinary analysis scrutinises values, ethics, responsibilities and uncertain futures formed by the global health crisis, and evaluates media and communications strategies, government responses and political communications at domestic and international levels. Seidler shares critical insights into the cultural history of pandemics, highlighting lessons to be learned from anticipating, preparing for and enduring moments of crisis. Perceiving how the pandemic and climate emergency are interwoven, the book concludes with an urgent call to rebuild sustainable economic, political and ecological imaginations. This wide-reaching volume will appeal to a broad academic readership in environmental studies, sociology, philosophy, health studies, cultural studies, gender studies, media and communication.
