Passage to the World Kevin Brown,2013-04-30 From the early nineteenth century onwards, literally millions of people left their homes to cross the seas. Some, like the convicts transported to Australia, had no choice; others like the indentured Indian and Chinese labourers had almost no alternative; but the vast majority were driven to escape war, famine or grinding poverty in Europe by seeking a new life abroad. Whatever their circumstances and wherever their destination, the one experience they all shared in common was the sea voyage. This book is centred on the rite of passage that marked the transition from one life to the other, tracing the story of the emigrant, through a fresh look at original sources and first-hand accounts, from the decision to emigrate, the journey to the port and the voyage itself, to arrival in the new world. It describes the emigrant trade, the differing conditions on board sailing ships and steamers, convict and coolie ships, and the perils of overcrowding, epidemics, fire, shipwreck and even cannibalism. It also investigates the varied receptions emigrants were likely to face not necessarily the welcome promised the homeless, tempest-tost by the Statue of Liberty. This unprecedented population shift left few European families untouched by emigration, while the present-day populations of the Americas and Australasia are dominated by the descendants of those who made the journey. This gives the emigrants story a universal interest.

Can integrated titles improve the viewing experience? Wendy Fox, Historically a dubbing country, Germany is not well-known for subtitled productions. But while dubbing is predominant in Germany, more and more German viewers prefer original and subtitled versions of their favourite shows and films. Conventional subtitling, however, can be seen as a strong intrusion into the original image that can not only disrupt but also destroy the director's intended shot composition and focus points. Long eye movements between focus points and subtitles decrease the viewer's information intake, and especially German audiences, who are often not used to subtitles, seem to prefer to wait for the next subtitle instead of looking back up again. Furthermore, not only the placement, but also the overall design of conventional subtitles can disturb the image composition – for instance titles with a weak contrast, inappropriate typeface or irritating colour system. So should it not, despite the translation process, be possible to preserve both image and sound as far as possible? Especially given today's numerous artistic and technical possibilities and the huge amount of work that goes into the visual aspects of a film, taking into account not only special effects, but also typefaces, opening credits and text-image compositions. A further development of existing subtitling guidelines would not only express respect towards the original film version but also the translator's work. The presented study shows how integrated titles can increase information intake while maintaining the intended image composition and focus points as well as the aesthetics of the shot compositions. During a three-stage experiment, the specifically for this purpose created integrated titles in the documentary "Joining the Dots" by director Pablo Romero-Fresco were analysed with the help of eye movement

data from more than 45 participants. Titles were placed based on the gaze behaviour of English native speakers and then rated by German viewers dependant on a German translation. The results show that a reduction of the distance between intended focus points and titles allow the viewers more time to explore the image and connect the titles to the plot. The integrated titles were rated as more aesthetically pleasing and reading durations were shorter than with conventional subtitles. Based on the analysis of graphic design and filmmaking rules as well as conventional subtitling standards, a first workflow and set of placement strategies for integrated titles were created in order to allow a more respectful handling of film material as well as the preservation of the original image composition and typographic film identity.

Irish Urban Fictions Maria Beville, Deirdre Flynn, 2018-11-01 This collection is the first to examine how the city is written in modern Irish fiction. Focusing on the multi-faceted, layered, and ever-changing topography of the city in Irish writing, it brings together studies of Irish and Northern Irish fictions which contribute to a more complete picture of modern Irish literature and Irish urban cultural identities. It offers a critical introduction to the Irish city as it represented in fiction as a plural space to mirror the plurality of contemporary Irish identities north and south of the border. The chapters combine to provide a platform for new research in the field of Irish urban literary studies, including analyses of the fiction of authors including James Joyce, Roddy Doyle, Kate O'Brien, Hugo Hamilton, Kevin Barry, and Rosemary Jenkinson. An exciting and diverse range of fictions is introduced and examined with the aim of generating a cohesive perspective on Irish urban fictions and to stimulate further discussion in this emerging area.
