Jason Chambers

**Banking on Black Enterprise** Timothy Mason Bates,1993 Since the 1960s, black businesses have been diversifying and expanding in response to increases in entrepreneurial talent and investment capital. Opportunities created by policies such as procurement set-aside programs have induced better educated, younger blacks to create and expand firms in new lines of business, including wholesaling, contracting, and skill-intensive services. Bates argues that targeting assistance toward these emerging small businesses could go far toward halting the chronic drain of capital and skills suffered by our nation's inner cities. For the research in this book, Bates has been quoted most recently in *The Economist* and, twice, in *The Wall Street Journal*, whose editors described him as 'the reigning expert on minority business.' In 1993 *Banking* was cited in Congressional hearings for its evidence of the positive impact that greater investment in minority-owned firms could have on inner-city poverty.

**Affirmative Action and Black Entrepreneurship** Thomas D Boston,1998-10-29 This volume isolates the cause of continuing disparities not only between blacks and whites, but amongst blacks as well. Key factors discussed include the current state of the economy the influence of public policies, the persistence of urban poverty, economic opportunities, changes in family and social structure and equal opportunities. The city of Atlanta is used as a case study focusing on the emergence of the new black entrepreneur, with data on black businesses drawn from records of almost 1000 black owned firms.

**Our Black Year** Maggie Anderson,2012-02-14 On January 1, 2009, Maggie and John Anderson, a successful African American couple raising two daughters in a Chicago suburb, engaged in a social experiment to reinvest in the black community and buy from only black-owned businesses for a year. Throughout that time the Andersons combed Chicago in search of a black-owned supermarket, dry cleaner, gas station, pharmacy, and clothing store. Our black year is the story of what they learned. Maggie examines the commercial exploitation of black neighborhoods through the lens of her year supporting black-owned businesses. She discovers that black businesses lag behind businesses of all other racial and ethnic groups in every measure of success, and argues that the social crises that disproportionately impact black people and underserved black neighborhoods could be countered through conscious consumerism--supporting businesses that empower struggling communities. At once a personal journey and an investigation into the causes of a persistent economic suffering, this is a hard-hitting call to action to close a gaping hole in the American economy--one purchase at a time--From publisher description.

*America Becoming* National Research Council,Commission on Behavioral and Social Sciences and Education,2001-01-25 The 20th Century has been marked by enormous change in terms of how we define race. In large part, we have thrown out the antiquated notions of the 1800s, giving way to a more realistic, sociocultural view of the world. The United States is, perhaps more than any other industrialized country, distinguished by the size and diversity of its racial and ethnic minority populations. Current trends promise that these features will endure. Fifty years from now, there will most likely be no single majority group in the United States. How will we fare as a nation when race-based issues such as immigration, job opportunities, and affirmative action are already so contentious today? In *America Becoming*, leading scholars and commentators explore past and current trends among African Americans, Hispanics, Asian Americans, and Native Americans in the context of a white majority. This volume presents the most up-to-date findings and analysis on racial and social dynamics, with recommendations for ongoing research. It examines compelling issues in the field of race relations, including: Race and ethnicity in criminal justice. Demographic and social trends for Hispanics, Asian Americans, and Native Americans. Trends in minority-owned businesses. Wealth, welfare, and racial stratification. Residential segregation and the meaning of neighborhood. Disparities in educational test scores among races and ethnicities. Health and development for minority children, adolescents, and adults. Race and ethnicity in the labor market, including the role of minorities in America's military. Immigration and the dynamics of race and ethnicity. The changing meaning of race. Changing racial attitudes. This collection of papers, compiled and edited by distinguished leaders in the behavioral and social sciences, represents the most current literature in the field. Volume 1 covers demographic trends, immigration, racial attitudes, and the geography of opportunity. Volume 2 deals with the criminal justice system, the labor market, welfare, and health trends, Both books will be of great interest to educators, scholars, researchers, students, social scientists, and policymakers.

**The History of Black Business in America** Juliet E. K. Walker,2009 In this wide-ranging study Stephen Foster explores Puritanism in England and America from its roots in the Elizabethan era to the end of the seventeenth century. Focusing on Puritanism as a cultural and political phenomenon as well as a religious movement, Foster addresses parallel developments on both sides of the Atlantic and firmly embeds New England Puritanism within its English context. He provides not only an elaborate critique of current interpretations of Puritan ideology but also an original and insightful portrayal of its dynamism. According to Foster, Puritanism represented a loose and incomplete alliance of progressive Protestants, lay and clerical, aristocratic and humble, who never decided whether they were the vanguard or the remnant. Indeed, in Foster's analysis, changes in New England Puritanism after the first decades of settlement did not indicate secularization and decline but instead were part of a pattern of change, conflict, and accomodation that had

begun in England. He views the Puritans' own claims of declension as partisan propositions in an internal controversy as old as the Puritan movement itself. The result of these stresses and adaptations, he argues, was continued vitality in American Puritanism during the second half of the seventeenth century. Foster draws insights from a broad range of sources in England and America, including sermons, diaries, spiritual autobiographies, and colony, town, and court records. Moreover, his presentation of the history of the English and American Puritan movements in tandem brings out the fatal flaws of the former as well as the modest but essential strengths of the latter.

**Encyclopedia of African American Business History** Juliet E. K. Walker, 1999-11-30 Black business activity has been sustained in America for almost four centuries. From the marketing and trading activities of African slaves in Colonial America to the rise of 20th-century black corporate America, African American participation in self-employed economic activities has been a persistent theme in the black experience. Yet, unlike other topics in African American history, the study of black business has been limited. General reference sources on the black experience—with their emphasis on social, cultural, and political life—provide little information on topics related to the history of black business. This invaluable encyclopedia is the only reference source providing information on the broad range of topics that illuminate black business history. Providing readily accessible information on the black business experience, the encyclopedia provides an overview of black business activities, and underscores the existence of a historic tradition of black American business participation. Entries range from biographies of black business people to overview surveys of business activities from the 1600s to the 1990s, including slave and free black business activities and the Black Wallstreet to coverage of black women's business activities, and discussions of such African American specific industries as catering, funeral enterprises, insurance, and hair care and cosmetic products. Also, there are entries on blacks in the automotive parts industry, black investment banks, black companies listed on the stock market, blacks and corporate America, civil rights and black business, and black athletes and business activities.

**Race and Entrepreneurial Success** Robert W. Fairlie, Alicia M. Robb, 2010-08-13 A comprehensive analysis of racial disparities and the determinants of entrepreneurial performance—in particular, why Asian-owned businesses on average perform relatively well and why black-owned businesses typically do not. Thirteen million people in the United States—roughly one in ten workers—own a business. And yet rates of business ownership among African Americans are much lower and have been so throughout the twentieth century. In addition, and perhaps more importantly, businesses owned by African Americans tend to have lower sales, fewer employees and smaller payrolls, lower profits, and higher closure rates. In contrast, Asian American-owned businesses tend to be more successful. In *Race and Entrepreneurial Success*, minority entrepreneurship authorities Robert Fairlie and Alicia Robb examine racial disparities in business performance. Drawing on the rarely used, restricted-access Characteristics of Business Owners (CBO) dataset compiled by the U.S. Census Bureau, Fairlie and Robb examine in particular why Asian-owned firms perform well in comparison to white-owned businesses and black-owned firms typically do not. They also explore the broader question of why some entrepreneurs are successful and others are not. After providing new comprehensive estimates of recent trends in minority business ownership and performance, the authors examine the importance of human capital, financial capital, and family business background in successful business ownership. They find that a high level of startup capital is the most important factor contributing to the success of Asian-owned businesses, and that the lack of startup money for black businesses (attributable to the fact that nearly half of all black families have less than \$6,000 in total wealth) contributes to their relative lack of success. In addition, higher education levels among Asian business owners explain much of their success relative to both white- and African American-owned businesses. Finally, Fairlie and Robb find that black entrepreneurs have fewer opportunities than white entrepreneurs to acquire valuable pre-business work experience through working in family businesses.

**Madison Avenue and the Color Line** Jason Chambers,2011-08-24 Until now, most works on the history of African Americans in advertising have focused on the depiction of blacks in advertisements. As the first comprehensive examination of African American participation in the industry, Madison Avenue and the Color Line breaks new ground by examining the history of black advertising employees and agency owners. For much of the twentieth century, even as advertisers chased African American consumer dollars, the doors to most advertising agencies were firmly closed to African American professionals. Over time, black participation in the industry resulted from the combined efforts of black media, civil rights groups, black consumers, government organizations, and black advertising and marketing professionals working outside white agencies. Blacks positioned themselves for jobs within the advertising industry, especially as experts on the black consumer market, and then used their status to alter stereotypical perceptions of black consumers. By doing so, they became part of the broader effort to build an African American professional and entrepreneurial class and to challenge the negative portrayals of blacks in American culture. Using an extensive review of advertising trade journals, government documents, and organizational papers, as well as personal interviews and the advertisements themselves, Jason Chambers weaves individual biographies together with broader events in U.S. history to tell how blacks struggled to bring equality to the advertising industry.

**African Americans in Business** Tish Davidson,2014-09-02 Many people dream of owning their own business or making it to the top of the corporate ladder. In the pages of this book, you'll meet African Americans who overcame obstacles and stereotypes to make their dreams a reality. Madam C. J. Walker was orphaned at age 7, married at 14, became a mother at 18, and was widowed at 20. She went on make a million dollars selling hair care products. Berry Gordy loved music but went broke after opening a record store. He didn't give up, though. Gordy eventually started Motown Records, which became one of the country's most successful record labels and introduced a host of talented black artists to mainstream American audiences. Stanley O'Neal grew up on a farm without running water or indoor toilets. Through intelligence and hard work he became the head of a \$50 billion investment bank. Read about these and other inspiring figures in this book.

**In the Black** Gregory S. Bell,2002-10-01 The never-before-told story of five decades of African Americans onWall Street Here, for the first time, is the fascinating history of the AfricanAmerican experience on Wall Street as told by Gregory Bell, the sonof the man who founded the first black-owned member firm of the NewYork Stock Exchange. A successful finance professional in his ownright with close ties to leading figures in both the blackfinancial and civil rights communities, Bell tells the stories ofthe pioneers who broke down the ancient social and politicalbarriers to African American participation in the nation sfinancial industry. With the help of profiles of many importantblack leaders of the past fifty years including everyone from JesseJackson and Maynard Jackson, former mayor of Atlanta, to E. StanleyO Neal, COO and President of Merrill Lynch, and Russell Goings,founder of First Harlem Securities and cofounder of First HarlemSecurities he shows how in the years following World War II thegrowing social, political, and financial powers of AfricanAmericans converged on Wall Street. Set to publish during BlackHistory Month, In the Black will be warmly received by AfricanAmerican business readers and general readers alike.

**Building the Black Metropolis** Robert Weems Jr.,Jason Chambers,2017-08-10 From Jean Baptiste Point DuSable to Oprah Winfrey, black entrepreneurship has helped define Chicago. Robert E. Weems Jr. and Jason P. Chambers curate a collection of essays that place the city as the center of the black business world in the United States. Ranging from titans like Anthony Overton and Jesse Binga to McDonald's operators to black organized crime, the scholars shed light on the long overlooked history of African American work and entrepreneurship since the Great Migration. Together they examine how factors like the influx of southern migrants and the city's unique segregation patterns made Chicago a prolific incubator of productive business development "and made building a black metropolis as much a necessity as an opportunity. Contributors: Jason P. Chambers, Marcia Chatelain, Will Cooley, Robert Howard, Christopher Robert Reed, Myiti Sengstacke Rice, Clovis E. Semmes, Juliet E. K. Walker, and Robert E. Weems Jr.

**Black Fortunes** Shomari Wills,2018-01-30 "By telling the little-known stories of six pioneering African American entrepreneurs, Black Fortunes makes a worthy contribution to black history, to business history, and to American history."—Margot Lee Shetterly, New York Times Bestselling author of

Hidden Figures Between the years of 1830 and 1927, as the last generation of blacks born into slavery was reaching maturity, a small group of industrious, tenacious, and daring men and women broke new ground to attain the highest levels of financial success. Mary Ellen Pleasant, used her Gold Rush wealth to further the cause of abolitionist John Brown. Robert Reed Church, became the largest landowner in Tennessee. Hannah Elias, the mistress of a New York City millionaire, used the land her lover gave her to build an empire in Harlem. Orphan and self-taught chemist Annie Turnbo-Malone, developed the first national brand of hair care products. Mississippi school teacher O. W. Gurley, developed a piece of Tulsa, Oklahoma, into a “town” for wealthy black professionals and craftsmen that would become known as “the Black Wall Street.” Although Madam C. J Walker was given the title of America’s first female black millionaire, she was not. She was the first, however, to flaunt and openly claim her wealth—a dangerous and revolutionary act. Nearly all the unforgettable personalities in this amazing collection were often attacked, demonized, or swindled out of their wealth. Black Fortunes illuminates as never before the birth of the black business titan.

Factors That Affect Succession in African-American Family-Owned Business Charles W. Hunt,2012-03 A great deal of literature confirms the fact that small family-owned businesses rarely extend beyond the founder of the business. This study explored and identified factors that helped to create a successful family business transition for two African American family-owned businesses in the San Antonio area. One family experienced working through a well thought-out succession plan that successfully passed the mantel from one generation to the next, while the other family experienced going through an unexpected, unplanned business succession that was also successful. Understanding the factors that help create a successful family business transition is difficult because there is very little scholarly research that has an in-depth focus on the African American family business. The research design used was a Phenomenological Qualitative Historical Case Study. The findings revealed that both families' success may be attributed to factors such as being raised by both of their parents and being taught family values, hard work, responsibility, and accountability. Self-preservation, the first law of nature, was taught to make them aware of the importance of taking care of self first, so they could take care of others. As children, they watched their parents at work, which gave them the opportunity to shape and mold their own work ethic with a strong family influence. Most of the children in both families were socialized into the family business and never worked elsewhere. Both families were very active in church and made the church the center of their social life. All of the family members had mentors and/or role models as a child, at school, and at work. The researcher concludes that it is important to note a plan for succession should consist of three elements, all of which must precede the actual succession by a few months. A plan for succession occurred in one case; however, in the second case, it occurred several months after succession took place.
