Minority and Cross-Cultural Aspects of Neuropsychological Assessment F. Richard

Ferraro,2015-07-16 Minority and cross-cultural psychology is more relevant now than ever in our diverse world. Given the dramatic local and global changes occurring daily with regard to demographics, population changes, and immigration issues, minority and cross-cultural psychology is fast becoming a respected and critical area of scientific study. Pair that with the fact that people of all cultures and racial groups are living longer and experiencing age-related diseases and disorders, one can easily see the need for additional work on issues related to neuropsychological assessment. This new edition brings to the forefront recent developments by seasoned experts in the field. They offer up their newest projects in minority and cross-cultural aspects of neuropsychological assessment and are joined by new, up-and-coming professionals across a wide array of disciplines including psychology, medicine, and neuropsychology. Like the first edition, this updated collection sheds light on the ever-growing need for adequate neuropsychological assessment to a wider subset of individuals, crossing many cultural and minority barriers in the process. Continuously pushing the boundaries of neuropsychological assessment, this collection is essential reading for cognitive and clinical psychologists, and neuropsychologists, and a model text for advanced courses dealing with minority and cross-cultural issues.

Psychological Assessment in South Africa Sumaya Laher,Kate Cockcroft,2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa. The thirty-six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. Psychological Assessment in South Africa provides in-depth coverage of a range of areas within the broad field of psychological assessment, including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students, as well as a specialist resource for professionals, including psychologists, psychometrists, remedial teachers and human resource practitioners.

Ordinary Whites in Apartheid Society Neil Roos,2024-02-06 How were whites implicated in and shaped by apartheid culture and society, and how did they contribute to it? In *Ordinary Whites in Apartheid Society*, historian Neil Roos traces the lives of ordinary white people in South Africa during the apartheid years, beginning in 1948 when the National Party swept into power on the back of its catchall apartheid slogan. Drawing on his own family's story and others, Roos explores how working-class whites frequently defied particular aspects of the apartheid state but seldom opposed or even acknowledged the idea of racial supremacy, which lay at the heart of the apartheid society. This cognitive dissonance afforded them a way to simultaneously accommodate and oppose apartheid and allowed them to later claim they never supported the apartheid system. *Ordinary Whites in Apartheid Society* offers a telling reminder that the politics and practice of race, in this case apartheid-era whiteness, derive not only from the top, but also from the bottom.

Handbook of Speech-Language Therapy in Sub-Saharan Africa Ulrike M. Lüdtke, Edward Kija, Mathew Kinyua Karia, 2023-02-03 This book synthesizes research on language development and communication disability in Sub-Saharan Africa and highlights best practices for providing speech and language therapy services to individuals with language, communication, and hearing disorders across the lifespan. The book brings together a wide range of international contributions from various disciplines, such as speech-language pathology, audiology, developmental psychology, language education, social work, neurology, neuropsychology, pediatrics, linguistics, pedagogy, and phonetics to provide perspectives on problems, challenges, ideas, concepts, and models to serve the people in Sub-Saharan Africa. Key areas of coverage include: Challenges for speech-language therapists in the health sector. Community awareness and the sustainable delivery of services. Culture-specific support of communication and language development in early childhood. Malnutrition, dysphagia, feeding difficulties, pediatric HIV, and related issues. Communication disability treatments, including assessment and intervention, augmentative and alternative communication (AAC), and issues specific to bilingualism and biliteracy. Inclusive education of children with communication disorders with case studies from Rwanda, Tanzania, Kenya, and South Africa. The Handbook of Speech-Language Therapy in Sub-Saharan Africa is an essential reference for researchers, professors, and graduate students as well as clinicians, therapists, and other professionals in developmental psychology, speech-language pathology and therapy, social work, neuropsychology, pediatrics, special education, community based rehabilitation, and all related disciplines.

The Split IP Parameter in Second Language Learning Adela Simoiu, 2014-05-02 The book addresses some important issues in second language acquisition research, such as access to Universal Grammar, the factors that account for success or failure in L2 learning, as well as parameter (re)setting, within the generative framework. The empirical data against which the research hypothesis is tested come from two main studies: a longitudinal one, involving beginner learners, and an experimental one, with elementary and advanced learners; all subjects are adults learning English in a formal instruction setting, with Romanian as L1. Starting from Chomsky's (2005) account of first language acquisition in terms of three factors, namely genetic endowment, experience and non-linguistic principles, the first chapter of the book explores the question of whether the same three factors may be operating in second language learning. The rest of the book focuses on more specific research issues related to access to Universal Grammar and parameter (re)setting. Since L1 acquisition is defined mainly as the process of parameter setting on the basis of the input, parameter setting is expected to be at the core of L2 learning as well. However, in the literature, it has often been argued that one of the most important differences between L1 and L2 acquisition is related precisely to this process. The parameter which the book focuses on is the split IP parameter (Bobaljik and Thráinsson, 1998), in the case of Romanian L1 learners of English as L2. Romanian is (+ split IP) while English is (- split IP). In this case, the learners would need to move from the positive (+) value of the parameter to the negative (-) one, i.e. from a wider set of property values to a more restrictive one. There are three possible scenarios: (i) the L2 learners set the negative (-) value from the target language from the very beginning, on the basis of input alone; (ii) the learners first transfer the positive (+) value from their L1 and reset this value to the L2 negative (-) one as they progress in acquiring the L2; the final state is L2-like; (iii) the learners first transfer the positive (+) value from their L1 but resetting is impossible; the L2 underlying representations are different from those of native speakers even with advanced speakers, and what may account for final L2 state is parameter learning. These scenarios are explored with the help of the data provided by longitudinal and experimental studies.

English-Medium Instruction at Universities Aintzane Doiz, David Lasagabaster, Juan Manuel Sierra, 2012-10-12 This book provides critical insights into the English-medium instruction (EMI) experiences which have been implemented at a number of universities in countries such as China, Finland, Israel, the Netherlands, South Africa, Spain and the USA, which are characterised by differing political, cultural and sociolinguistic situations. In particular, it reflects on the

consequences of implementing EMI as an attempt to gain visibility and as a strategy in response to the need to become competitive in both national and international markets. The pitfalls and challenges specific to each setting are analysed, and the pedagogical issues and methodological implications that arise from the implementation of these programmes are also discussed. This volume will serve to advance our awareness about the strategies and tools needed to improve EMI at tertiary level.

Human Abilities in Cultural Context S. H. Irvine, John W. Berry, 1988-09-30 Originally published in 1988, *Human Abilities in Cultural Context* constituted a major development in conceptualising and studying human abilities. It formed a unique reference frame. This study offers a re-evaluation of ability theory by the editors, S. H. Irvine and J. W. Berry, and strong individual statements by H. J. Eysenck, Arthur R. Jensen, Joseph R. Royce, and Robert J. Sternberg, who represent markedly different approaches to the measurement of intelligence. It also focuses on contexts in which the limits of assessment by psychological tests are defined: in minority native groups in North America, in migrants to Britain, in lower-caste enclaves in India, among African minorities, and among Australian Aborigines. Written by long-term residents of the regions in question, these chapters presented a wealth of fresh data in relation to Western formulations of theory and practice.

Multilingual Learning Colin Reilly, Feliciano Chimbutane, John Clegg, Casmir

Rubagumya, Elizabeth J. Erling, 2023-11-30 This edited volume provides the follow up to Erling et al.'s (2021) *Multilingual Learning and Language Supportive Pedagogies in Sub-Saharan Africa*. The strategies put forward in Volume 1 included multilingual pedagogies that allow students to draw on their full linguistic repertoires, translanguaging and other language supportive pedagogies. While there is great traction in the pedagogical strategies proposed in Volume 1, limited progress has been made in terms of multilingual education in SSA. Thus, the main focus of this follow-up volume is to explore the question of why former colonial languages and monolingual approaches continue to be used as the dominant languages of education, even when we have multilingual pedagogies and materials that could and do work and despite substantial evidence that learners have difficulties when taught in a language they do not understand. This book offers perspectives to answer this question through focusing on the internal and external pressures which impact the capacity for implementing multilingual strategies in educational contexts at regional, national, and community levels. Chapters provide insights into how to better understand and work within these contemporary constraints and challenge dominant monoglossic discourses which inhibit the implementation of multilingual education in SSA. The volume focuses on three main areas which have proven to be stumbling blocks to the effective implementation of multilingual education to date, namely: Assessment, Ideology and Policy. An insightful collection that will be of great interest to academics, researchers, and practitioners in the fields of language education, language-in-education policy and educational assessments in the wide range of multilingual contexts in Africa.

Speak Not James Griffiths, 2021-10-21 As globalisation continues languages are disappearing faster than ever, leaving our planet's linguistic diversity leaping towards extinction. The science of how languages are acquired is becoming more advanced and the internet is bringing us new ways of teaching the next generation, however it is increasingly challenging for minority languages to survive in the face of a handful of hegemonic 'super-tongues'. In *Speak Not*, James Griffiths reports from the frontlines of the battle to preserve minority languages, from his native Wales, Hawaii and indigenous American nations, to southern China and Hong Kong. He explores the revival of the Welsh language as a blueprint for how to ensure new generations are not robbed of their linguistic heritage, outlines how loss of indigenous languages is the direct result of colonialism and

globalisation and examines how technology is both hindering and aiding the fight to prevent linguistic extinction. Introducing readers to compelling characters and examining how indigenous communities are fighting for their languages, Griffiths ultimately explores how languages hang on, what happens when they don't, and how indigenous tongues can be preserved and brought back from the brink.

Plurilingualism in Teaching and Learning Julie Choi, Sue Ollerhead, 2018-01-09 Assembling a rich and diverse range of research studies on the role of plurilingualism across a wide variety of teaching and learning settings, this book supports teacher reflection and action in practical ways and illustrates how researchers tease out and analyze the complex realities of their educational environments. With a focus on education policies, teaching practices, training, and resourcing, this volume addresses a range of mainstream and specialized contexts and examines the position of learners and teachers as users of plurilingual repertoires. Providing a close look into the possibilities and constraints of plurilingual education, this book helps researchers and educators clarify and strengthen their understandings of the links between language and literacy and offers them new ways to think more rigorously and critically about the language ideologies that shape their own beliefs and approaches in language teaching and learning.

Focus on South Africa Vivian de Klerk, 1996-02-23 This volume brings together a range of studies on various aspects of English and its use in Southern Africa. Experts in their field have written chapters on topics including the history and development of English in South Africa, the characteristics of particular pan-ethnic varieties of English which have evolved in South Africa (including black, Indian and colored varieties) as well as the unique features of the English of South Africa's southern neighbours: Swaziland, Zimbabwe, Zambia and Malawi. Other contributions focus on English in relation to issues such as standardisation, lexicography, education, language planning, language attitudes and interaction patterns. The book will be of primary interest to students of linguistics and language, but should also be relevant to educationists, sociologists and historians.

Language in South Africa Victor N. Webb, 2002-01-01 A discussion of the role which language, or, more properly, languages, can perform in the reconstruction and development of South Africa. The approach followed in this book is characterised by a number of features - its aim is to be factually based and theoretically informed.

Receptive Multilingualism Jan D. ten Thije, Ludger Zeevaert, 2007-06-05 Receptive multilingualism refers to the language constellation in which interlocutors use their respective mother tongue while speaking to each other. Since the mid-nineties receptive multilingualism is promoted by the European commission on par with other possibilities of increasing the mobility of the European citizens. Throughout the last ten years a marked increase in the research on this topic has been observable. This volume reveals new perspectives from different theoretical frameworks on linguistic analyses of receptive multilingualism in Europe. Case studies are presented from contemporary settings, along with analyses of historical examples, theoretical considerations and, finally, descriptions of didactical concepts established in order to transfer and disseminate receptive multilingual competence. The book contains results from research carried out at the Research Center on Multilingualism at the University of Hamburg as well as contributions by various international scholars working in the field of receptive multilingualism.
