Digital excellence in agriculture in Europe and Central Asia Food and Agriculture Organization of the United Nations,International Telecommunication Union,2021-10-26 The present report is the outcome of the joint call on good practices on Digital Excellence in Agriculture, organized by the International Telecommunication Union (ITU) Office for Europe and Office for CIS and the Food and Agriculture Organization (FAO) of the United Nations Office for Europe and Central Asia. The document presents a summary version of the 171 eligible submissions of good practices and innovative solutions advancing the digital transformation of agriculture in Europe and Central Asia. This call complements the joint FAO-ITU review on the Status of Digital Agriculture in 18 countries of Europe and Central Asia (ITU-FAO, 2020)¹ and provides evidence on how Information and Communication Technologies (ICTs) play an emerging role in the agriculture landscapes of the regions, acting as an engine for agricultural development. However, the adoption of digital technologies in agriculture differs from country to country, and from region to region. The review in the 18 countries highlighted that smallholder farmers have yet to experience the widespread benefits of this digital transformation, and they are lagging behind when it comes to the adoption of digital agriculture solutions and innovations due to lack of trust in the potential of ICTs, limited digital skills, connectivity issues and restricted availability of ICT-based solutions to utilize and scale up. Realizing the full potential of digital agriculture transformation requires identifying, sharing and implementing best practices and proven solutions across countries, involving all actors in participatory processes.

The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

George Soros Peter L. W. Osnos,2022-03-08 A compelling new picture of one of the most important, complex, and misunderstood figures of our time. The name George Soros is recognized around the world. Universally known for his decades of philanthropy, progressive politics, and investment success, he is equally well known as the nemesis of the far right—the target of sustained attacks from nationalists, populists, authoritarian regimes, and anti-Semites—because of his commitment to open society, freedom of the press, and liberal democracy. At age 91, Soros still looms large on the global stage, and yet the man himself is surprisingly little understood. Asking people to describe Soros is likely to elicit different and seemingly contradictory answers. Who is George Soros, really? And why does this question matter? Biographers have attempted to tell the story of George Soros, but no single account of his life can capture his extraordinary, multifaceted character. Now, in this ambitious and revealing new book, Soros's longtime publisher, Peter L. W. Osnos, has assembled an intriguing set of contributors from a variety of different perspectives—public intellectuals (Eva Hoffman, Michael Ignatieff), journalists (Sebastian Mallaby, Orville Schell), scholars (Leon Botstein, Ivan Krastev), and nonprofit leaders (Gara LaMarche, Darren Walker)—to paint a full picture of the man beyond the media portrayals. Some have worked closely with Soros, while others have wrestled with issues and quandaries similar to his in their own endeavors. Their collective expertise shines a new light on Soros's activities and passions and, to the extent possible, the motivation for them and the outcomes that resulted. Through this kaleidoscope of viewpoints emerges a vivid and compelling portrait of this remarkable man's unique and consequential impact. It has truly been a life in full.

Social Learning in Environmental Management Rob Dyball,Meg Keen,2012-04-27 Social Learning in Environmental Management explores and expands the approaches to collective learning most needed to help individuals, communities, experts and governments work together to achieve greater social and ecological sustainability. It provides practical frameworks and case studies to assist environmental managers in building partnerships that can support learning and action on issues arising from human impacts on the life-support systems of our planet. In this book, social learning frameworks and case studies address the three areas of collaboration, community, government and professional, in some detail. The resulting guidelines and their practical applications provide key source material for undergraduate and postgraduate professional education in the fields of social and environmental sciences, political science, planning, geography and urban studies, and also for professionals in environmental management.

Springer Handbook of Robotics Bruno Siciliano,Oussama Khatib,2016-07-27 The second edition of this handbook provides a state-of-the-art overview on the various aspects in the rapidly developing field of robotics. Reaching for the human frontier, robotics is vigorously engaged in the growing challenges of new emerging domains. Interacting, exploring, and working with humans, the new generation of robots will

increasingly touch people and their lives. The credible prospect of practical robots among humans is the result of the scientific endeavour of a half a century of robotic developments that established robotics as a modern scientific discipline. The ongoing vibrant expansion and strong growth of the field during the last decade has fueled this second edition of the Springer Handbook of Robotics. The first edition of the handbook soon became a landmark in robotics publishing and won the American Association of Publishers PROSE Award for Excellence in Physical Sciences & Mathematics as well as the organization’s Award for Engineering & Technology. The second edition of the handbook, edited by two internationally renowned scientists with the support of an outstanding team of seven part editors and more than 200 authors, continues to be an authoritative reference for robotics researchers, newcomers to the field, and scholars from related disciplines. The contents have been restructured to achieve four main objectives: the enlargement of foundational topics for robotics, the enlightenment of design of various types of robotic systems, the extension of the treatment on robots moving in the environment, and the enrichment of advanced robotics applications. Further to an extensive update, fifteen new chapters have been introduced on emerging topics, and a new generation of authors have joined the handbook’s team. A novel addition to the second edition is a comprehensive collection of multimedia references to more than 700 videos, which bring valuable insight into the contents. The videos can be viewed directly augmented into the text with a smartphone or tablet using a unique and specially designed app. Springer Handbook of Robotics Multimedia Extension Portal: <http://handbookofrobotics.org/>

Communicating Science to the Public Leo Tan Wee Hin,R. Subramaniam,2014-07-24 This book explores effective approaches for communicating science to the public in developing countries. Offering multiple perspectives on this important topic, it features 17 chapters that represent the efforts of 23 authors from eight countries: Australia, Bangladesh, India, Ireland, New Zealand, USA, Singapore and South Africa. Inside, readers will find a diversity of approaches to communicate science to the public. The book also highlights some of the challenges that science communicators, science policy makers, science teachers, university academics in the sciences and even entrepreneurs may face in their attempts to boost science literacy levels in their countries. In addition, it shares several best practices from the developed world that may help readers create communication initiatives that can lead to increased engagement with science in communities in the Asia Pacific region and beyond. Given the pervasive influence of science and technology in today’s society, their impact will only increase in the years to come as the world becomes more globalized and the economies of countries become more inter-linked. This book will be a useful source of reference for developing countries looking to tap into the potential of science for nation building and effectively engage their communities to better understand science and technology. Supported by the Pacific Science Association, Hawaii.

Manage Weeds on Your Farm Charles L. Mohler,John R. Teasdale,Antonio DiTommaso,2021 Manage Weeds on Your Farm: A Guide to Ecological Strategies provides you with in-depth information about dozens of agricultural weeds found throughout the country and the best ways of managing them. In Part One, the book begins with a general discussion of weeds: their biology, behavior and the characteristics that influence how to best control their populations. It then describes the strengths and limitations of the most common cultural management practices, physical practices and cultivation tools. Part Two is a reference section that describes the identification, ecology and management of 63 of the most common and difficult-to-control weed species found in the United States.

Innovation in agri-food systems W.M.F. Jongen,M.T.G. Meulenberg,2023-09-04 This is a fully rewritten and extended version of the successful first edition of a textbook which focuses on consumer-driven food product innovation using a systems-oriented approach. It integrates marketing and consumer sciences with technological aspects such as processing, logistics and information technology, and presents an integrated view of how new food product development is to be situated in a chain-oriented approach. Attention is also paid to the impact of changes in the environment of the agri-food system on food innovation, such as the changing consumer, the growing concern about food safety and new insights in human nutrition. Topics covered include changing markets, consumer perception of product quality, quality function deployment, the use of new and improved technology in food production, logistics and information technology, the role of regulation and legislation, quality management and control systems such as HACCP and TQM. The chapters of the first edition have been updated and extended. New chapters have been added, on consumer behaviour, corporate strategy, food safety and nutritional aspects of food innovation. Researchers and professionals in the food industry as well as students of food science, food technology and management will find this publication provides valuable information on the latest developments in the product innovation by agri-food systems.

Handbook of Water Resources Management: Discourses, Concepts and Examples Janos J. Bogardi,Joyeeta Gupta,K. D. Wasantha Nandalal,Léna Salamé,Ronald R.P. van Nooijen,Navneet Kumar,Tawatchai Tingsanchali,Anik Bhaduri,Alla G. Kolechkina,2021-06-12 This book provides an overview of facts, theories and methods from hydrology, geology, geophysics, law, ethics, economics, ecology, engineering, sociology, diplomacy and many other disciplines with relevance for concepts and practice of water resources management. It provides comprehensive, but also critical reading material for all communities involved in the ongoing water discourses and debates. The book refers to case studies in the form of boxes, sections, or as entire chapters. They illustrate success stories, but also lessons to be remembered, to avoid repeating the same mistakes. Based on consolidated state-of-the-art knowledge, it has been conceived and written to attract a multidisciplinary audience. The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi-level decision making processes. Knowing more about water, but also about concepts, methods and aspirations of different professional, disciplinary communities and stakeholders professionalizes the debate and enhances the decision making.
