Frontiers in Oncology: Quarterly Highlights.

Quarter 1 2019 Giuseppe Giaccone, 2019-07-01

Foreword from the Field Chief Editor, Giuseppe Giaccone Once again Frontiers in Oncology has started the year on a positive note, breaking previous records for submissions and publications, as well as the number of Research Topic article collections posted. The journal continues to grow in size, adding an 18th section focusing on Cancer Metabolism, led by Michael Lisanti and Ubaldo Martinez-Outschoorn, and has brought on a total of five new Chief Editors. Here, introducing Frontiers in Oncology: Quarterly Highlights, we feature a collection of carefully selected articles published during the first quarter of 2019 across the different sections. With a record number of papers to choose from, the papers enclosed in this Special Edition highlight some of the recent advances across the different disciplines. With an array of papers looking at everything from translational research to association studies and clinical trial results, Frontiers in Oncology continues to publish high-quality research from researchers around the world. Many of the recently posted Research Topics in the journal focus on early diagnosis and prevention, as well as the importance of survivorship studies and outcomes of cancer treatment. Consideration of such aspects of cancer research and treatment is pivotal in the global effort towards increased survival rates and improved quality of life. With ASCO 2019 marking the end of Q1 and the transition into Q2, the

journal looks forward to the rest of the year, and continuing to play an active role in the research community. Giuseppe Giaccone

Rigor and Reproducibility in Genetics and Genomics, 2023-11-24 *Rigor and Reproducibility in Genetics and Genomics: Peer-reviewed, Published, Cited* provides a full methodological and statistical overview for researchers, clinicians, students, and post-doctoral fellows conducting genetic and genomic research. Here, active geneticists, clinicians, and bioinformaticists offer practical solutions for a variety of challenges associated with several modern approaches in genetics and genomics, including genotyping, gene expression analysis, epigenetic analysis, GWAS, EWAS, genomic sequencing, and gene editing. Emphasis is placed on rigor and reproducibility throughout, with each section containing laboratory case-studies and classroom activities covering step-by-step protocols, best practices, and common pitfalls. Specific genetic and genomic technologies discussed include microarray analysis, DNA-seq, RNA-seq, Chip-Seq, methyl-seq, CRISPR gene editing, and CRISPR-based genetic analysis. Training exercises, supporting data, and in-depth discussions of rigor, reproducibility, and ethics in research together deliver a solid foundation in research standards for the next generation of genetic and genomic scientists. Provides practical approaches and step-by-step protocols to strengthen genetic and genomic research conducted in the laboratory or classroom Presents illustrative case studies and training exercises, discussing common pitfalls and

solutions for genotyping, gene expression analysis, epigenetic analysis, GWAS, genomic sequencing, and gene editing, among other genetic and genomic approaches Examines best practices for microarray analysis, DNA-seq, RNA-seq, gene expression validation, Chip-Seq, methyl-seq, CRISPR gene editing, and CRISPR-based genetic analysis Written to provide trainees and educators with highly applicable tools and strategies to learn or refine a method toward identifying meaningful results with high confidence in their reproducibility

Data Mining and Statistical Methods for Knowledge Discovery in Diseases Based on Multimodal Omics Jiajie Peng,Tao Wang,Miguel E. Renteria,2022-06-06

Integrative Multi-Omics for Diagnosis, Treatments, and Drug Discovery of Aging-Related Neuronal Diseases Min Tang,Tao Huang,Jialiang Yang,Cheng Guo,2022-11-23 As the cost of high-throughput sequencing goes down, huge volumes of biological and medical data have been produced from various sequencing platforms at multiple molecular levels including genome, transcriptome, proteome, epigenome, metabolome, and so on. For a long time, data analysis on single molecular levels has paved the way to answer many important research questions. However, many Aging-Related Neuronal Diseases (ARNDs) and Central Nervous System (CNS) aging involve interactions of molecules from multiple molecular levels, in which conclusions based on single molecular levels are usually incomplete and sometimes misleading. In these scenarios, multi-omics data analysis has

unprecedentedly helped capture much more useful information for the diagnosis, treatment, prognosis, and drug discovery of ARNDs. The first step towards a multi-omics analysis is to establish reliable and robust multi-omics datasets. In the past years, a few important ARNDs-associated multi-omics databases like Allen Brain have been constructed, which raised immediate needs like data curation, normalization, interpretation, and visualization for integrative multi-omics explorations. Though there have been several well-established multi-omics databases for ARNDs like Alzheimer's disease, similar databases for other ARNDs are still in urgent need. After the databases establish, many computational tools and experiential strategies should be developed specifically for them. First, the multi-omics data are usually extremely noisy, complex, heterogeneous and in high dimension, which presents the need for appropriate denoising and dimension reduction methods. Second, since the multi-omics and non-omics data like pathological and clinical data are usually in different data spaces, a useful algorithm to mapping them into the same data space and integrate them is nontrivial. In the multi-omics era, there are numerous data-centric tools for the integration of multi-omics datasets, which could be generally divided into three categories: unsupervised, supervised, and semi-supervised methods. Commonly used algorithms include but not limited to Bayesian-based methods, Network-based methods, multi-step analysis methods, and multiple kernel learning methods. Third, methods are needed in

studying and verifying the association between two or more levels of multi-omics data and non-omics data. For example, expression quantitative trait loci (eQTL) analysis is widely used to infer the association between a single nucleotide polymorphism (SNP) and the expression of a gene. Recently, the association between omics data and more complex data like pathological and clinical imaging data has been a hot research topic. The outcomes may reveal the underlying molecular mechanism and promote de novo drug design as well as drug repurposing for ARNDs. Here, we welcome investigators to share their Original Research, Review, Mini Review, Hypothesis and Theory, Perspective, Conceptual Analysis, Data Report, Brief Research Report, Code related to multi-omics studies of ARNDs, which can be applied for better diagnosis, treatment, prognosis and drug discovery of human diseases in the future era of precision medicine. Potential contents include but are not limited to the following: ■ Methods for integrating, interpreting, or visualizing two or more omics data. ■ Methods for identifying interactions between different data modalities. ■ Methods for disease subtyping, biomarker prediction. ■ Machine learning or deep learning methods on dimensional reduction and feature selection for big noisy data. ■ Methods for studying the association among different omics data or between omics and non-omics data like clinical, pathological, and imaging data. ■ Review of multi-omics resource about ARNDs and/or CNS aging. ■ Experimental validation of biomarkers identified from multi-omics data analysis. ■

Disease diagnosis and prognosis prediction from imaging and non-imaging data analysis, or both. ■ Clinical applications or validations of findings from multi-omics data analysis.

Advances in Eating Disorders Zaida Agüera, Susana Jiménez-Murcia, 2021-09-02 Eating disorders (ED) are a group of mental disorders characterized by an altered food intake and the presence of inappropriate behaviors and thoughts about weight and shape. All EDs lead to physical and psychosocial functioning impairments in the patients which, in turn, may contribute to the persistence of the disease. The severity of EDs has been highlighted by their chronicity, medical complications, comorbidity, and high rates of mortality. Therefore, to address this important health issue, the current Special Issue collected 21 articles (i.e., three reviews and 18 research articles) focusing on the most recent and relevant scientific findings regarding advances in ED, such as genetic and epigenetic factors, biomarkers, comorbidity, clinical phenotypes, neurocognition, treatment predictors, and treatment models and therapeutic targets. Altogether, we believe that the articles contained in this Special Issue have largely achieved the initial objective of providing increased knowledge about the pathogenesis, the risk factors, the maintenance factors, and the most appropriate treatments tools for ED.

Model Rules of Professional Conduct American Bar
Association. House of Delegates,Center for
Professional Responsibility (American Bar
Association),2007 The Model Rules of Professional
Conduct provides an up-to-date resource for
information on legal ethics. Federal, state and
local courts in all jurisdictions look to the
Rules for guidance in solving lawyer malpractice
cases, disciplinary actions, disqualification
issues, sanctions questions and much more. In this
volume, black-letter Rules of Professional Conduct
are followed by numbered Comments that explain
each Rule's purpose and provide suggestions for
its practical application. The Rules will help you
identify proper conduct in a variety of given
situations, review those instances where
discretionary action is possible, and define the
nature of the relationship between you and your
clients, colleagues and the courts.

Vital statistics - E-Book Stephen

McKenzie, 2014-03-18 *Vital Statistics: an introduction to health science statistics e-book* is a new Australian publication. This textbook draws on real world, health-related and local examples, with a broad appeal to the Health Sciences student. It demonstrates how an understanding of statistics is useful in the real world, as well as in statistics exams. *Vital Statistics: an introduction to health science statistics e-book* is a relatively easy-to-read book that will painlessly introduce or re-introduce you to the statistical basics before guiding you through more demanding statistical challenges. Written in recognition of Health Sciences courses which require knowledge of statistical literacy, this book guides the reader to an understanding of why, as well as how and when to use statistics. It explores: How data relates to information, and how information relates to knowledge How to use statistics to distinguish information from disinformation The importance of probability, in statistics and in life That inferential statistics allow us to infer from samples to populations, and how useful such inferences can be How to appropriately apply and interpret statistical measures of difference and association How qualitative and quantitative methods differ, and when it's appropriate to use each The special statistical needs of the health sciences, and some especially health science relevant statistics The vital importance of computers in the statistical analysis of data, and gives an overview of the most commonly used

analyses Real-life local examples of health statistics are presented, e.g. A study conducted at the Department of Obstetrics and Gynecology, University of Utah School of Medicine, explored whether there might be a systematic bias affecting the results of genetic specimen tests, which could affect their generalizability. Reader-friendly writing style t-tests/ ANOVA family of inferential statistics all use variants of the same basic formula Learning Objectives at the start of each chapter and Quick Reference Summaries at the end of each chapter provide the reader with a scope of the content within each chapter.

Women in Surgical Oncology: 2021 Alba Di Leone, Lidia Castagneto-Gissey, 2022-10-11

Madness and Creativity: Yes, No or Maybe? Anna Abraham, 2015-11-23 The pervasive idea that madness and creativity are intricately linked is one that holds tremendous fascination for both scientists and the general public alike. Although this view was at first largely driven by anecdotal evidence showcasing the manifestation of mental illness in individuals who exhibited extraordinary levels of creativity in various spheres of life, it initiated a strong impetus to empirically investigate the association between mental health and creativity. A variety of approaches (and combinations of approaches) have been adopted to address this association including clinical, personality, psychometric, behavioral, cognitive, historiometric and neuroscientific. Despite the ever accumulating body of evidence over the past six decades investigating this link, what is lacking is a comprehensive overview of the

disparate findings from these different approaches that will enable us to address the question of whether there is an empirically founded relationship between creativity and mental illness. And if such a link does exist, what is the nature of this association? The purpose of this Research Topic was to motivate theorists and researchers to answer this question (or at least attempt to do so) given the available evidence thus far. The themes of interest that were open to exploration in view of this topic included: (a) Which mental disorders are positively associated with creativity? (b) Which mental disorders are negatively associated with creativity? (c) The dynamics of information processing biases (positive versus negative) associated with psychiatric and high-risk populations (d) Theories regarding the madness-creativity link (e) Personality-based studies on creativity (f) Creativity, mental illness and the brain (g) Genes and creativity (h) How can studies on neurological populations inform this debate? (i) What are the areas of impact with regard to real world applications and practice? (j) Historical timeline of this question (k) Evolutionary perspectives on the madness-creativity link (l) Methodological problems associated with this field (m) Philosophical issues to bear in mind when investigating this domain (n) The usefulness of the “troubled genius” concept The invitation to contribute was open to all interested academics regardless of whether they were seasoned explorers within this field of study or just beginning to get their feet wet in its murky waters. As a

result of adopting this inclusive approach, the contributions showcase a wide variety of perspectives from academic departments and institutions the world over. What is most encouraging is that so many were willing to openly take on the challenge of tackling this difficult question head on. We hope future discussions that follow through as a result of this collective effort will prove to be just as fruitful.

Towards Precision Medicine for Immune-Mediated Disorders: Advances in Using Big Data and Artificial Intelligence to Understand

Heterogeneity in Inflammatory Responses Xu-jie Zhou, Lam Cheung Tsoi, Amanda S. MacLeod, 2022-08-16
Topic Editor Dr. MacLeod is employed by Janssen. All other Topic Editors declare no competing interests with regards to the Research Topic subject.

Coronavirus Disease (COVID-19): Pathophysiology, Epidemiology, Clinical Management and Public Health Response, 2023-01-25 Volume I.A An outbreak of a respiratory disease first reported in Wuhan, China in December 2019 and the causative agent was discovered in January 2020 to be a novel betacoronavirus of the same subgenus as SARS-CoV and named severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Coronavirus disease 2019 (COVID-19) has rapidly disseminated worldwide, with clinical manifestations ranging from mild respiratory symptoms to severe pneumonia and a fatality rate estimated around 2%. Person to person transmission is occurring both in the community and healthcare settings. The World Health Organization (WHO) has recently declared

the COVID-19 epidemic a public health emergency of international concern. The ongoing outbreak presents many clinical and public health management challenges due to limited understanding of viral pathogenesis, risk factors for infection, natural history of disease including clinical presentation and outcomes, prognostic factors for severe illness, period of infectivity, modes and extent of virus inter-human transmission, as well as effective preventive measures and public health response and containment interventions. There are no antiviral treatment nor vaccine available but fast track research and development efforts including clinical therapeutic trials are ongoing across the world. Managing this serious epidemic requires the appropriate deployment of limited human resources across all cadres of health care and public health staff, including clinical, laboratory, managerial and epidemiological data analysis and risk assessment experts. It presents challenges around public communication and messaging around risk, with the potential for misinformation and disinformation. Therefore, integrated operational research and intervention, learning from experiences across different fields and settings should contribute towards better understanding and managing COVID-19. This Research Topic aims to highlight interdisciplinary research approaches deployed during the COVID-19 epidemic, addressing knowledge gaps and generating evidence for its improved management and control. It will incorporate critical, theoretically informed and empirically grounded original research contributions using diverse approaches,

experimental, observational and intervention studies, conceptual framing, expert opinions and reviews from across the world. The Research Topic proposes a multi-dimensional approach to improving the management of COVID-19 with scientific contributions from all areas of virology, immunology, clinical microbiology, epidemiology, therapeutics, communications as well as infection prevention and public health risk assessment and management studies.

Preclinical Biomarkers and Functional Compensation in Brain Aging Panteleimon Giannakopoulos, Robert Perneczky, Gabriel Gold, 2020-08-10

Hepatocellular Carcinoma: From Basic Research to Clinical Trials Xin Chen, 2022-12-07

Liver Diseases Florentina Radu-Ionita, Nikolaos T. Pyrsopoulos, Mariana Jinga, Ion C. Tintoiu, Zhonghua Sun, Ecaterina Bontas, 2020-01-10
This book provides an in-depth coverage not only of liver pathology but also of diagnosis of the numerous types of liver disease, placing specific emphasis on current treatments of liver pathology including the most up-to-date information on liver transplantation. The first part provides an in-depth account of the liver pathology in different conditions such as Hepatitis, liver ischaemia reperfusion injury, Lyme disease, cirrhotic cardiomyopathy and hepatocellular carcinoma. The second part provides a comprehensive overview of diagnostic methods. Of particular interest are chapters on the latest techniques in Patient-specific 3D printing and transient elastography (FibroScan). The final part focuses on treatment

and provides a step-by step guide to the therapeutic management of liver diseases starting with pharmacological treatment and techniques including surgery and liver transplantation. This is an invaluable book for clinicians, practitioners including academics, scientists/researchers and postgraduates to provide the newest knowledge in the field of liver pathogenesis. It is written by a multidisciplinary team of experts in hepathology, gastroenterology, and surgery especially from liver transplantation.

Age Of Discovery Score Calculator Book Review: Unveiling the Power of Words

In a global driven by information and connectivity, the power of words has be more evident than ever. They have the capability to inspire, provoke, and ignite change. Such may be the essence of the book **Age Of Discovery Score Calculator**, a literary masterpiece that delves deep to the significance of words and their affect our lives. Published by a renowned author, this captivating work takes readers on a transformative journey, unraveling the secrets and potential behind every word. In this review, we shall explore the book is key themes, examine its writing style, and analyze its overall affect readers.

blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Age Of Discovery Score Calculator, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Age Of Discovery Score Calculator books or magazines might include. Look for these in online stores or libraries. Remember that while Age Of Discovery Score Calculator,

sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Age Of Discovery Score Calculator eBooks for free, including popular titles. Online Retailers: Websites like

Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Age Of Discovery Score Calculator full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer

subscription-based access to a wide range of Age Of Discovery Score Calculator eBooks, including some popular titles.

FAQs About Age Of Discovery Score Calculator Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore

their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer webbased readers or mobile apps that allow you to read eBooks on your computer, tablet, or

smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Age

Age Of Discovery Score Calculator

Of Discovery Score Calculator is one of the best book in our library for free trial. We provide copy of Age Of Discovery Score Calculator in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Age Of Discovery Score Calculator. Where to download Age Of Discovery Score Calculator online for free? Are you looking for Age Of Discovery Score Calculator PDF? This is definitely

going to save you time and cash in something you should think about. If you trying to find then search around for online. Without a doubt there are numerous these available and many of them have the freedom. However without doubt you receive whatever you purchase. An alternate way to get ideas is always to check another Age Of Discovery Score Calculator. This method for see exactly what may be included and adopt these ideas to your book. This site

will almost certainly help you save time and effort, money and stress. If you are looking for free books then you really should consider finding to assist you try this. Several of Age Of Discovery Score Calculator are for sale to free while some are payable. If you arent sure if the books you would like to download works with for usage along with your computer, it is possible to download free trials. The free guides make it easy for someone to free access

how mountain boarding works

mapquest travel
 - Aug 03 2022
 web oct 5 2009
 gravity is
 the engine that
 drives mountain
 boarding if you
 place a
 mountain board
 on a slope the
 force of
 gravity will
 pull the board
 down the hill
 at a prescribed
 rate of
 acceleration
 the steeper the
 slope the
 faster the
 acceleration is
 friction is the
 force that
 keeps
 acceleration
 under control
