Zombie Politics and Culture in the Age of Casino Capitalism Henry A. Giroux,2011 Zombie Politics and Culture in the Age of Casino Capitalism capitalizes upon the popularity of zombies, exploring the relevance of the metaphor they provide for examining the political and pedagogical conditions that have produced a growing culture of sadism, cruelty, disposability, and death in America. The zombie metaphor may seem extreme, but it is particularly apt for drawing attention to the ways in which political culture and power in American society now operate on a level of mere survival. This

book uses the metaphor not only to suggest the symbolic face of power: beginning and ending with an analysis of authoritarianism, it attempts to mark and chart the visible registers of a kind of zombie politics, including the emergence of right-wing teaching machines, a growing politics of disposability, the emergence of a culture of cruelty, and the ongoing war being waged on young people, especially on youth of color. By drawing attention to zombie politics and authoritarianism, this book aims to break through the poisonous common sense that often masks zombie politicians, anti-public intellectuals, politics, institutions, and social relations, and bring into focus a new language, pedagogy, and politics in which the living dead will be moved decisively to the margins rather than occupying the very center of politics and everyday life.

The Mammoth Book of Zombies Stephen Jones,2013-04-18 The zombie - a soulless corpse raised from the grave to do its master's bidding - may have had its factual basis in the voodoo ceremonies of the West Indies, but it is in fiction, movies, video games and comics that the walking dead have flourished. What makes a zombie? This Twentieth Anniversary Edition of one of the first and most influential zombie anthologies answers that question with 26 tales of rot and resurrection from classic authors such as Edgar Allan Poe, H. P. Lovecraft, M. R. James and J. Sheridan Le Fanu, along with modern masters of the macabre Clive Barker, Robert Bloch, Ramsey Campbell, Hugh B. Cave, Joe R. Lansdale, Brian Lumley, Graham Masterton, Kim Newman, Michael Marshall Smith, Lisa Tuttle, Karl Edward Wagner and many more. From Caribbean rituals to ancient magic, mesmerism to modern science, these terrifying tales depict a wide range of nefarious methods and questionable reasons for bringing the dead back to life again.

Z: Zombie Stories J. M. Lassen,2011-09-01 When the zombie apocalypse comes, it's not just those crusty old folks who will struggle against the undead, it's the young people. What happens when you come of age during the zombie apocalypse? Z: Zombie Stories has the answer to that question. Z: Zombie Stories gathers together some of the hottest zombie fiction of the last two decades, from authors including Kelly Link, Jonathan Maberry, and Catherynne M. Valente. These stories focus on those who will inherit a world overrun with the living dead: a young man who takes up the family business of dealing with the undead, a girl struggling with her abusive father...who has become a zombie, a poet who digs up the wrong grave, and a Viking maiden imprisoned with the living dead... Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

Age of Anxiety Anthony M. Wachs,Jon D. Schaff,2019-11-29 Age of Anxiety: Meaning, Identity, and Politics in 21st Century Film and Literature analyzes literature and films that speak to our age of anxiety resulting from the decline of narratives that provided individuals with a meaningful human life. The authors argue that the twentieth-century sought to free individuals from the constraints of authoritative cultural traditions and institutions, liberating the autonomous self. Yet this has given rise to anxiety rather than liberation. Instead of deriving one's sense of purpose from one's role and place within a community, the consumer has been deceived into thinking that their identity can be purchased through the meaning represented by the conspicuous consumption of a brand. The same phenomenon manifests itself in politics within recent populist revolts against globalist politics. In addition, the rapid pace of technological development is driving an unprecedented faith in the malleability of human beings, raises doubts as to what it means to be a person. Utilizing paradigms from the fields of Communication/Rhetoric and Political Philosophy the book shows how the self has been displaced from its natural habitat of the local community. The book traces the origins of modern anxiety as well as possible remedies. Considered in the book are such popular culture artifacts as Downton Abbey, WALL-E, Hacksaw Ridge, Westworld, and Lord of the Rings and zombie films.

Exploding Stars, Dead Dinosaurs, and Zombies Andrew Root,2018-01-01 Many things threaten the faith of youth today, but none more than science. The commitments of science and Christianity seem to be at odds—science makes truth claims based on experiments and proofs, while religion asks for belief and trust. But Andrew Root demonstrates that, in fact, the two are not incompatible. Root, a renowned expert on adolescent spirituality, shows how science overstates its claims on truth, while faith often understates its own claims. Both faith and science frame the experience and reality of teenagers, and both have something valuable to offer as adolescents develop. Drawing on a fictional account of a youth pastor and the various students he encounters, Root paints a compelling picture of how faith can flourish, even in our scientific age.

Going Viral Dahlia Schweitzer,2018-03-09 Outbreak narratives have proliferated for the past quarter century, and now they have reached epidemic proportions. From 28 Days Later to 24 to The Walking Dead, movies, TV shows, and books are filled with zombie viruses, bioengineered plagues, and disease-ravaged bands of survivors. Even news reports indulge in thrilling scenarios about potential global pandemics like SARS and Ebola. Why have outbreak narratives infected our public discourse, and how have they affected the way Americans view the world? In *Going Viral*, Dahlia Schweitzer probes outbreak narratives in film, television, and a variety of other media, putting them in conversation with rhetoric from government authorities and news organizations that have capitalized on public fears about our changing world. She identifies three distinct types of outbreak narrative, each corresponding to a specific contemporary anxiety: globalization, terrorism, and the end of civilization. Schweitzer considers how these fears, stoked by both fictional outbreak narratives and official sources, have influenced the ways Americans relate to their neighbors, perceive foreigners, and regard social institutions. Looking at everything from I Am Legend to The X Files to World War Z, this book examines how outbreak narratives both excite and horrify us, conjuring our nightmares while letting us indulge in fantasies about fighting infected Others. *Going Viral* thus raises provocative questions about the cost of public paranoia and the power brokers who profit from it.
