Teleshopping in Deutschland Thomas Kornecki, 2008-11-10 Inhaltsangabe: Gang der Untersuchung: Von Zuhause aus bestellen und die Produkte direkt nach Hause geliefert bekommen - bequemer kann das Einkaufen kaum sein. Bereits in der Weimarer Republik kam mit dem Versandhandel diese besondere Form des Einzelhandels in Deutschland auf. 1925 wurde der Baur Versand gegründet, zuerst als reiner Schuhversender. Über 80 Jahre später, im Jahr 2007, erwirtschaftet dieser Wirtschaftszweig einen Gesamtumsatz von rund 28 Milliarden Euro und trägt damit rund sieben Prozent zum gesamten Einzelhandelsumsatz in Deutschland bei. Neben dem klassischen Katalogversand etabliert sich seit nun knapp 20 Jahren eine neue Art des Distanzhandels - das Teleshopping. Ziel dieser Arbeit soll es sein, einen umfangreichen Überblick über die deutsche Teleshopping-Landschaft zu verschaffen und einen Einblick in die internen Abläufe der Sender zu bieten. Zu Beginn der Arbeit werden die verschiedenen Formen des Teleshoppings vorgestellt und das Verhältnis der Sender zum Vertriebsweg Internet aufgezeigt. In den Kapiteln 2-4 wird eine Situationsanalyse vorgenommen. Hierbei wird nicht nur die geschichtliche Entwicklung in Deutschland beleuchtet, sondern auch die Marktstruktur und die rechtlichen Rahmenbedingungen werden dargestellt. Kapitel 5 befasst sich mit den einzelnen wirtschaftlichen Stufen eines Teleshopping-Senders, angefangen beim Einkauf bis hin zum Kundenmanagement. Anschließend wird in Kapitel 6 eine umfangreiche Programmanalyse auf Wochen-, Tages- und Stundenbasis vorgenommen. In Kapitel 7 werden die Vor- und Nachteile des Teleshoppings vorgestellt, bevor abschließend eine Zusammenfassung und ein Ausblick auf mögliche Trends der nächsten Jahre stattfinden. Survival Is Success Nicola Bruno, Rasmus Kleis Nielsen, 2012 The economics of online news today are as challenging for new entrants as they are for industry incumbents. Though internet use and online advertising is growing rapidly across Europe, it is not clear that this alone will provide the basis for new forms of journalism. Analysis of some of the most promising new journalistic ventures shows that even the most innovative enterprises can find it as difficult to break even online as their most conservative legacy media counterparts do. That is the message of a new RISJ Challenge published today, written by the Italian journalist Nicola Bruno and the Reuters Institute Research Fellow Rasmus Kleis Nielsen. The report is the first to systematically assess how journalistic online start-ups are doing across Western Europe. Based on analysis of nine strategically chosen cases from Germany, France, and Italy - including prominent pure players like Netzeitung, MediaPart, and Lettera43 - it shows that the start-up scene in Europe is still at a stage where survival must be seen as a form of success in itself.

Digital Business Leadership Ralf T. Kreutzer, Tim Neugebauer, Annette Pattloch, 2018-04-27 This book provides specialists and executives with a clear, yet practical set of recommendations to meet the challenges of digital transformation and ensure long-term success as a leader in a primarily digital business world. The authors describe the fundamental principles of digitization and its economic opportunities and risks, integrating them into a framework of classic and new management methods. The book also explores how increasing digitization - not only of communication, but of complete value chains - has led to a need to establish a digital business leadership. Digitization is changing people and markets: it causes the upheaval of entire industries, creates new digital-centric companies, and forces established companies to cope with the transformation activities associated with these digitization processes. New approaches and methods have to be learned, tried and tested patterns of thinking have to be explored, and last but not least, innovation activities have to be understood as continuous necessities. At the same time, digital business offers considerable opportunities for renewing competitive advantages, improving existing process structures and realigning products, services and business models.

Print in Motion Johannes R. Gerstner,2017-12-20 Johannes Gerstner untersucht den Wert des gesamten Onlinevideoangebotes deutscher Tageszeitungen aus der Wertungsperspektive des Publikums und der Produzenten und legt dabei besonderes Augenmerk auf den Nutzen von Onlinevideos für die demokratische Aufgabenerfüllung der Tageszeitungsverlage. Die Publikumperspektive wird aus der Sicht der Staatsbürger und der Konsumenten mit Hilfe eines klassischen Qualitätsforschungsansatzes ergründet, die Produzentenperspektive mittels eines auf einer mikroökologischen Handlungstheorie basierenden Mehrebenenmodells evaluiert, bei dem die Zeitungsverlage als rational handelnde Akteure modelliert werden.

Object-Oriented Analysis and Design Sarnath Ramnath,Brahma Dathan,2010-12-06 Object-oriented analysis and design (OOAD) has over the years, become a vast field, encompassing such diverse topics as design process and principles, documentation tools, refactoring, and design and architectural patterns. For most students the learning experience is incomplete without implementation. This new textbook provides a comprehensive introduction to OOAD. The salient points of its coverage are: • A sound footing on object-oriented concepts such as classes, objects, interfaces, inheritance, polymorphism, dynamic linking, etc. • A good introduction to the stage of requirements analysis. • Use of UML to document user requirements and design. • An extensive treatment of the design process. • Coverage of implementation issues. • Appropriate use of design and architectural patterns. • Introduction to the art and craft of refactoring. • Pointers to resources that further the reader's knowledge. All the main case-studies used for this book have been implemented by the authors using Java. The text is liberally peppered with snippets of code, which are short and fairly self-explanatory and easy to read. Familiarity with a Java-like syntax and a broad understanding of the structure of Java would be helpful in using the book to its full potential.

Privacy Online Sabine Trepte, Leonard Reinecke, 2011-07-21 Communications and personal information that are posted online are usually accessible to a vast number of people. Yet when personal data exist online, they may be searched, reproduced and mined by advertisers, merchants, service providers or even stalkers. Many users know what may happen to their information, while at the same time they act as though their data are private or intimate. They expect their privacy will not be infringed while they willingly share personal information with the world via social network sites, blogs, and in online communities. The chapters collected by Trepte and Reinecke address questions arising from this disparity that has often been referred to as the privacy paradox. Works by renowned researchers from various disciplines including psychology, communication, sociology, and information science, offer new theoretical models on the functioning of online intimacy and public accessibility, and propose novel ideas on the how and why of online privacy. The contributing authors offer intriguing solutions for some of the most pressing issues and problems in the field of online privacy. They investigate how users abandon privacy to enhance social capital and to generate different kinds of benefits. They argue that trust and authenticity characterize the uses of social network sites. They explore how privacy needs affect users' virtual identities. Ethical issues of privacy online are discussed as well as its gratifications and users' concerns. The contributors of this volume focus on the privacy needs and behaviors of a variety of different groups of social media users such as young adults, older users, and genders. They also examine privacy in the context of particular online services such as social network sites, mobile internet access, online journalism, blogs, and micro-blogs. In sum, this book offers researchers and students working on issues related to internet communication not only a thorough and up-to-date treatment of online privacy and the social web. It also presents a glimpse of the future by exploring emergent issues concerning new technological applications and by suggesting theory-based research agendas that can guide inquiry beyond the current forms of social technologies.

Neue Demokratie im Netz? Jan-Felix Schrape, 2014-03-31 Durchbricht das Internet die vielkritisierte Realität der Massenmedien? In aller Regelmäßigkeit wird dem Netz eine demokratisierende Kraft in der gesellschaftlichen Wirklichkeitsbeschreibung zugesprochen. Jan-Felix Schrape hinterfragt diese Visionen aus theoretischer, empirischer und historischer Sicht und unterstreicht die Notwendigkeit übergreifender Auswahlinstanzen in der sozialen Realitätskonstruktion: Die »Weisheit der Vielen« kann die massenmediale Berichterstattung nicht ersetzen. Aus erweiterter systemtheoretischer Perspektive werden mediengeschichtliche Entwicklungen und aktuelle Erhebungsergebnisse miteinander in Beziehung gesetzt, um das Veränderungspotenzial des World Wide Web möglichst unaufgeregt zu taxieren.
