Handbook of Ancient Afro-Eurasian Economies Sitta Reden,2019-12-02 The notion of the “Silk Road” that the German geographer Ferdinand von Richthofen invented in the 19th century has lost attraction to scholars in light of large amounts of new evidence and new approaches. The handbook suggests new conceptual and methodological tools for researching ancient economic exchange in a global perspective with a strong focus on recent debates on the nature of pre-modern empires. The interdisciplinary team of Chinese, Indian and Graeco-Roman historians, archaeologists and anthropologists that has written this handbook compares different forms of economic development in agrarian and steppe regions in a period of accelerated empire formation during 300 BCE and 300 CE. It investigates inter-imperial zones and networks of exchange which were crucial for ancient Eurasian connections. Volume I provides a comparative history of the most important empires forming in Northern Africa, Europe and Asia between 300 BCE and 300 CE. It surveys a wide range of evidence that can be brought to bear on economic development in the these empires, and takes stock of the ways academic traditions have shaped different understandings of economic and imperial development as well as Silk-Road exchange in Russia, China, India and Western Graeco-Roman history.

The Best Book on the Market Eamonn Butler,2009-07-21 The free market makes the world go around. Maybe it’s time we all tried to understand it a little better. Luckily Eamonn Butler is the ideal teacher to get us all up to speed. Markets are everywhere. But how many of us understand how they work, and why? What does a ‘free market’ really mean? Do free markets actually exist? Should we have more or less of them? Most of all – do we really need to know all this? Answer: Yes we do. MAKING ECONOMICS SIMPLE SO THAT EVEN POLITICIANS CAN UNDERSTAND IT If any mention of free markets sends your mind screaming back to your musty old school economics textbook, think again. The Best Book on the Market will keep you gripped, intrigued and well informed. Abandoning complicated mumbo-jumbo, Eamonn Butler, Director of the UK’s leading free market think-tank, demystifies the world of markets, competition, monopolies and cartels, prices and overspills. Using examples from our everyday lives Dr Butler explains how the markets we have, and the many more we need, can work to create a richer, freer and more peaceful world. STOP WORRYING AND LOVE THE FREE ECONOMY He delves into the morality of markets and interrogates important issues such as why feckless rock-stars are paid much more than worthy nurses; whether we should worry about people trading in arms, water, healthcare etc; whether black markets are immoral; and questions of equality; sweatshops, and fair trade. “This book is about the free market and how unfree it can be when there is a lack of belief in freedom itself. Eamonn Butler presents solid arguments against government attempts to ‘perfect’ the markets by regulation, controls, subsidies, or by adopting measures which obstruct competition and private ownership.” Václav Klaus, President of the Czech Republic “Vividly and simply explains competition, entrepreneurship and prices”. John Blundell, Director, Institute of Economic Affairs “A great little book that gets to the heart of how and why markets work, in a very engaging and easily understood way”. Dan Lewis, Research Director, Economic Research Council “I welcome this witty, lucid explanation of how entrepreneurs and business people make a positive contribution to our lives, and why economists often don't”. Andrew Neil , leading journalist and BBC presenter “Anything which educates the public - and politicians - on how the free economy actually works is always welcome. Dr Butler does this in style”. Lord Lawson, former UK Chancellor of the Exchequer “Everyone in business would do well to understand the basic principles of markets which Dr Butler clarifies so well in this short book”. Allister Heath, Editor of The Business and Associate Editor of The Spectator This book does great justice to the vibrancy of markets and what makes them tick Ruth Richardson, former Finance Minister of New Zealand It's refreshing to see an economist who understands the importance of innovation and entrepreneurship in pushing progress forward, and who can explain it in straightforward language. Trevor Baylis OBE (inventor of the wind-up radio) I'm glad to see that Dr Butler stresses the role of innovators – and the importance of market structures that encourage innovation. Sir Clive Sinclair (inventor) Dr Butler's book is a welcome and very readable contribution on the mechanisms and morality of the free economy. Sir John Major KG CH (former UK Prime Minister) “'Market' is one of the first six-letter wor

Ancient Urban Planning in the Mediterranean Samantha L. Martin-McAuliffe,Daniel M. Millette,2017-12-06 New Directions in Urban Planning in the Ancient Mediterranean assembles the most up-to-date research on the design and construction of ancient cities in the wider Mediterranean. In particular, this edited collection reappraises and sheds light on ‘lost’ Classical plans. Whether intentional or not, each ancient plan has the capacity to embody specific messages linked to such notions as heritage and identity. Over millennia, cities may be divested of their buildings and monuments, and can experience periods of dramatic rebuilding, but their plans often have the capacity to endure. As such, this volume focuses on Greek and Roman grid traces - both literal and figurative. This rich selection of innovative studies explores the ways that urban plans can assimilate into the collective memory of cities and smaller settlements. In doing so, it also highlights how collective memory adapts to or is altered by the introduction of re-aligned plans and newly constructed monuments.

The Yehud Coinage Jean-Philippe Fontanille,Haim Gitler,Catharine Lorber,2023-12-31 This volume presents a die study of the provincial silver coinage of Judah in the late Persian, Macedonian, and early Hellenistic periods. It offers correct descriptions of the coins, their designs, and their inscriptions; enumerates the obverse and reverse dies identified for each of the 44 recorded types; and explains the probable sequence of the issues as deduced from iconographic associations and die links. The iconography of the coin types is examined in depth, with comparisons to motifs in Greek, Persian, and ancient Near Eastern art, including other local coinages and sources in Judahite material culture. The monograph also analyzes data relating to the

metrology, metal content, and circulation of the coinage. Overall, the study attempts to place the Yehud coinage in its historical context and to define its role in the economy of the ancient province of Judah.

eBusiness & eCommerce Andreas Meier,Henrik Stormer,2009-03-26 This textbook focuses on the members of the digital value chain of eBusiness and eCommerce and dedicates a separate chapter to each member part: eProducts & eServices, eProcurement, eMarketing, eContracting, eDistribution, ePayment, as well as eCustomer Relationship Management. In addition to business models and business webs, digital procurement and marketing processes are likewise addressed such as electronic negotiation processes, security questions with digital signatures, as well as electronic supplier relationship management and customer relationship management. The topics are described based on explicit procedures and descriptive examples of application. The gradual set-up of an electronic Webshop for DVD's serves as a continuous case study. The book is directed towards students of economics at universities and technical colleges; it is also suitable for executives, project leaders, and company experts who deal with the digital value chain.

The Sale of Misattributed Artworks and Antiques at Auction Anne Laure Bandle,2016-10-28 The glamour and mystery of the art auction, gathering interested buyers from across the globe, makes it one of the most fascinating marketplaces in existence. 'Sleepers', artworks or antiques that have been undervalued and mislabelled due to an expert's oversight and consequently undersold, appear regularly. This fascinating new book provides the first extensive study of the phenomenon of sleepers through an in-depth analysis of the contractual relationships, liability and remedies that arise in the context of auction sales.

The Cambridge Companion to the Ancient Greek Economy Sitta von Reden,2022-08-04 This is the most comprehensive introduction to the ancient Greek economy available in English. A team of specialists provides in non-technical language cutting edge accounts of a wide range of key themes in economic history, explaining how ancient Greek economies functioned and changed, and why they were stable and successful over long periods of time. Through its wide geographical perspective, reaching from the Aegean and the Black Sea to the Near East and Egypt under Greek rule, it reflects on how economic behaviour and institutions were formed and transformed under different political, ecological and social circumstances, and how they interacted and communicated over large distances. With chapters on climate and the environment, market development, inequality and growth, it encourages comparison with other periods of time and cultures, thus being of interest not just to ancient historians but also to readers concerned with economic cultures and global economic issues.

Between Roman Culture and Local Tradition Barbara Zajac,2023-06-08 Offering a detailed analysis of the Roman provincial coinage of Bithynia and Pontus during the reign of Trajan (98-117), this book characterises individual mints, the rhythm of monetary production, iconography and legends, and considers the attribution and dating of individual issues.

Roman Imperial Coinage II.3 Richard Abdy,Peter Mittag,1-01-01 The standard reference work for Roman Imperial coinage of Hadrian now occupies a fully revised and greatly expanded standalone volume to cover the last epoch of what many consider the apogee of Roman coinage - begun with Nero's reform of AD 64 when great effort was taken over their iconographic designs. It is also a long overdue attempt to reconcile our increased 21st century understanding of this otherwise lightly documented reign of one of the key figures in Roman history. The rich symbolism of the reign is also expressed in prodigious issues of Hadrian's medallic pieces, many covered in RIC for the first time.

Regulated Agent-Based Social Systems Gabriela Lindemann,Daniel Moldt,Mario Paolucci,2004-03-06 This book presents selected extended and reviewed versions of the papers accepted for the First International Workshop on Regulated Agent Systems: Theory and Applications, RASTA 2002, held in Bologna, Italy, in July 2002, as part of AAMAS 2002. In addition, several new papers on the workshop theme are included as well; these were submitted and reviewed in response to a further call for contributions. The construction of artificial agent societies deals with questions and problems that are already known from human societies. The 16 papers in this book establish an interdisciplinary community of social scientists and computer scientists devoting their research interests to exploiting social theories for the construction and regulation of multi-agent systems.

Declarative Agent Languages and Technologies João Leite (Informatiker.),Andrea Omicini,Leon Sterling,Paolo Torroni,2004-06-02 The growing complexity of agent systems calls for models and technologies that allow for system predictability and enable feature discovery and verification. Formal methods and declarative technologies have recently attracted a growing interest as a means for dealing with such issues. This book presents revised and extended versions of 11 papers selected for presentation at the First International Workshop on Declarative Agent Languages and Technologies, DALT 2003, held in Melbourne, Australia in July 2003 during AAMAS; also included are 3 invited papers by leading researchers in the area to ensure competent coverage of all relevant topics. The papers are organized in topical sections on - software engineering and MAS prototyping - agent reasoning, BDI logics, and extensions - social aspects of multi-agent systems
