International Review of the Science and Practice of Agriculture ,1917

Monthly Bulletin of Agriculture Intelligence and of Plant-diseases International Institute of Agriculture. AGRICULTURAL INTELLIGENCE AND PLANT DISEASES, BUREAU OF,1911

The Oil Palm R. H. V. Corley,P. B. H. Tinker,2015-10-06 The oil palm is the world's most valuable oil crop. Its production has increased over the decades, reaching 56 million tons in 2013, and it gives the highest yields per hectare of all oil crops. Remarkably, oil palm has remained profitable through periods of low prices. Demand for palm oil is also expanding, with the edible demand now complemented by added demand from biodiesel producers. The Oil Palm is the definitive reference work on this important crop. This fifth edition features new topics - including the conversion of palm oil to biodiesel, and discussions about the impacts of palm oil production on the environment and effects of climate change - alongside comprehensively revised chapters, with updated references throughout. The Oil Palm, Fifth Edition will be useful to researchers, plantation and mill managers who wish to understand the science underlying recommended practices. It is an indispensable reference for agriculture students and all those working in the oil palm industry worldwide.

Sustaining Agriculture and the Rural Environment Floor Brouwer,2004-01-01 Apart from food and raw materials, agriculture can also provide ancillary benefits such as landscapes, biodiversity, cultural heritage and thriving rural communities. This book offers a state-of-the-art overview of strategies for sustainable management practices and their implementation through the adoption of suitable instruments. Such practices aim to sustain and support the multiple functions provided by agriculture and natural resources in the rural countryside. The authors explore the value of alternative governance structures and examine the design of policy models and institutional mechanisms for a range of different countries and agricultural methods. The empirical results allow them to identify successful examples as well as recognize practices which have failed. They can then transfer positive policies to geographical areas or production systems where effective and efficient strategies for the sustainable management of natural resources are urgently needed. In doing so, the authors hope to improve the design, identification and implementation of appropriate policy instruments to help sustain the rural economy in the future. They also aim to strengthen the establishment of markets for nature which overcome institutional constraints. This timely new book explores emerging perspectives on multifunctionality in agriculture and the rural environment. It will be widely read by academics, researchers and policymakers with an interest in agricultural and resource economics, environmental governance and sustainable development.
