Reports of Overseas Private Investment Corporation Determinations Michael D. Nolan,2011 This comprehensive two-volume work is a collection of determinations from OPIC, the US governmental political risk insurance provider, in the form of its Memoranda of Determinations from 1966 through to 2010. An important part of international investment law and policy is the political risk insurance coverage provided to international investors by their home states and multilateral organizations such as the World Bank. These programs are of crucial importance to the growth of international investment flows and the development of international investment law. The insurance claim decisions and as a result this area of international law has received disproportionately little attention. This reference work is the first to make the underlying primary material available to the investment law, political risk and academic communities. The authors have made the claims determinations more accessible with the inclusion of headnote summaries for all determinations. The determinations reflect the decisions of OPIC under US and international law and therefore have a significant impact on its future claims determinations. They reveal what types of claims have been honored for expropriation, political violence or convertibility/transferability restrictions. Users of political risk insurance worldwide will find this collection invaluable in understanding what events are and are not in fact covered, and deciding whether to obtain insurance coverage. These OPIC determinations will also contribute to the development of arbitral jurisprudence regarding government actions that are alleged to be in violation of investment protections found in investment treaties and investment law. They are additionally of interest in the context of the presentation and determination of future OPIC claims and decision making by other political risk insurance providers.

The Palestinian National Revival Moshe Shemesh,2018-09-12 A former Israeli intelligence officer offers a fresh understanding of the complex history and politics of the Middle East in this new analysis. In this book, Moshe Shemesh looks at the formative years of the Palestinian national movement that emerged following the 1948 War and traces the leaders, their objectives, and their weaknesses, fragmentation, and conflicts with their neighbors. He follows the formation of the Sons of Nakba, the establishment of Fatah, the reframing of Jordan as analogous with the Palestinian cause, and the creation of the Palestine Liberation Organization and its new expression of nationalism until the 1967 War. With unprecedented access to Arabic sources, Shemesh provides new perspectives on inter-Arab politics and the history of the intractable Arab-Israeli conflict.

Clinical and Research Uses of an Adolescent Mental Health Intake Questionnaire Irwin Epstein,Ken Peake,Daniel Medeiros,2014-04-23 Learn how to better clinically serve “risky” adolescents—from the clients themselves! Clinical and Research Uses of an Adolescent Mental Health Intake Questionnaire: What Kids Need to Talk About explores the research on adolescent behavior culled from the answers to a clinician-designed intake questionnaire given to adolescent clients asking how they view their own risks, what they worry about, and what they wish to talk about. Respected authorities discuss the enlightening findings and present ways to reshape services, taking into account customer preference, risk and worry, and youth development (YD) perspectives while presenting practical clinical strategies to engage at-risk adolescents in mental health treatment. Clinical and Research Uses of an Adolescent Mental Health Intake Questionnaire: What Kids Need to Talk About provides conceptual models that practitioners and organizations can use to develop reflective practices and to understand better how to engage adolescent clients in treatment. The book includes three case studies that illustrate an organization’s experience in developing ways for organizational learning, including the clinicians’ own accounts of their experience in conducting practice-based research. Two chapters describe the development and the clinical uses of the intake questionnaire and offer guidelines for other practitioners to develop their own. The book discusses specific findings about adolescent risk, worries, and desire to talk across a wide range of psychosocial domains such as education and work, sex and sexuality, safety, substance abuse, and family and friends. Other research examines adolescent risk and vulnerability profiles of lesbians, gays, and bisexuals, as well as the impact of racism. Finally, the book builds upon this empirical analysis to address the clinical challenge of engaging “risky” adolescents in counseling. Clinical and Research Uses of an Adolescent Mental Health Intake Questionnaire: What Kids Need to Talk About analyzes: adolescent risks, worries, and coping adolescent help seeking and desire to talk in counseling youth development (YD) and adolescent vulnerability urban adolescents’ health and mental health concerns effectively engaging adolescents in counseling collaborative strategies for clinicians and managers reflectivity and learning in human service organizations Clinical and Research Uses of an Adolescent Mental Health Intake Questionnaire: What Kids Need to Talk About presents essential information for social workers, mental health professionals who work with adolescents, adolescent researchers, pediatricians and adolescent medicine practitioners, teachers, students, and youth workers.

The Man who Loved Jane Austen Ray Smith,1999 After fictional excursions abroad to Germany, France, Scotland, Italy, Africa, and Australia, and back to the 1920s, the nineteenth century, and the Middle Ages, Ray Smith has come home to English Montreal in the 1990s. The Man Who Loved Jane Austen is a penetrating story of a Montreal with only the lingering effervescence of its past, a Montreal of loss, or regret, of sadness. A Montreal where nationalism corrodes every event, every relationship, every soul. A Montreal of lies and betrayal. Smith's work combines astonishing inventiveness with a warm and gregarious humanity. His first book, Cape Breton is the Thought Control Centre of Canada (1969, reissued by The Porcupine's Quill in 1989), burst upon a largely uncomprehending world in an explosion of post-modernist experimentation and whimsy. The novel, Lord Nelson Tavern (1974) is an odyssey of love and friendship; it conceals its equally innovative structures behind a surface reality of poignant characters and memorable incidents. Smith again extended his range with Century (1986), a novel which explores the horrors and beauties of the modern world. His most recent book, A Night at the Opera (The Porcupine's Quill, 1992), is an exploration of the preposterous German city of Waltherrott, a delightful cavalcade of fools and knaves, gourmets and maniacs, frumps and tarts, heroes and clowns.

Suppose and Tell Timothy Williamson, 2020-07-03 What does 'if' mean? It is one of the most commonly used words in the English language, in itself a sign to the importance of conditional thinking to human cognitive life. We make conditional statements, ask conditional questions, and issue conditional orders. We need to think and talk conditionally for many purposes, from everyday decision-making to mathematical proof. Yet the meaning of conditionals has been debated for thousands of years. *Suppose and Tell* brings together ideas from philosophy, linguistics, and psychology to present a controversial new approach to understanding conditionals. It argues that in using 'if' we rely on psychological heuristics, methods which are fast and frugal and mostly, but not always, reliable. As a result philosophers and linguists have been led astray in theorizing about conditionals through trusting faulty data generated by such methods and prematurely rejecting simple theories on the basis of merely apparent counterexamples. This book shows how one such simple theory of conditionals can explain the data, and draws wider implications for the nature of meaning and its non-transparency to native speakers, vagueness in thought and language, and the need for semantics to attend to the unreliable heuristics underlying our judgments.
