*Windows Registry Forensics* Harlan Carvey, 2011-01-03 *Windows Registry Forensics* provides the background of the Windows Registry to help develop an understanding of the binary structure of Registry hive files. Approaches to live response and analysis are included, and tools and techniques for postmortem analysis are discussed at length. Tools and techniques are presented that take the student and analyst beyond the current use of viewers and into real analysis of data contained in the Registry, demonstrating the forensic value of the Registry. Named a 2011 Best Digital Forensics Book by InfoSec Reviews, this book is packed with real-world examples using freely available open source tools. It also includes case studies and a CD containing code and author-created tools discussed in the book. This book will appeal to computer forensic and incident response professionals, including federal government and commercial/private sector contractors, consultants, etc. Named a 2011 Best Digital Forensics Book by InfoSec Reviews Packed with real-world examples using freely available open source tools Deep explanation and understanding of the Windows Registry – the most difficult part of Windows to analyze forensically Includes a CD containing code and author-created tools discussed in the book

**Playing the Waves** Jan Simons, 2007 *Dogma 95*, the avant-garde filmmaking movement founded by the Danish director Lars von Trier and three of his fellow directors, was launched in 1995 at an elite cinema conference in Paris—when von Trier was called upon to speak about the future of film but instead showered the audience with pamphlets announcing the new movement and its manifesto. A refreshingly original critical commentary on the director and his practice, *Playing the Waves* is a paramount addition to one of new media's most provocative genres: games and gaming. *Playing the Waves* cleverly puns on the title of one of von Trier's most famous features and argues

that Dogma 95, like much of the director's low-budget realist productions, is a game that takes cinema beyond the traditional confines of film aesthetics and dramatic rules. Simons articulates the ways in which von Trier redefines the practice of filmmaking as a rule-bound activity, and stipulates the forms and structures of games von Trier brings to bear on his films, as well as the sobering lessons he draws from economic and evolutionary game theory. Much like the director's films, this fascinating volume takes the traditional point of view of film theory and film aesthetics to the next level and demonstrates we have much to learn from the perspective of game studies and game theory.

**Persuasive Gaming in Context** Teresa De La Hera,Joost Raessens,Jeroen Jansz,Ben Schouten,2021-03-23 The rapid developments of new communication technologies have facilitated the popularization of digital games, which has translated into an exponential growth of the game industry in the last decades. The ubiquitous presence of digital games has resulted in an expansion of the applications of these games from mere entertainment purposes to a great variety of serious purposes. In this edited volume, we narrow the scope of attention by focusing on what game theorist Ian Bogost has called persuasive games, that is, gaming practices that combine the dissemination of information with attempts to engage players in particular attitudes and behaviors. This volume offers a multifaceted reflection on persuasive gaming, that is, on the process of these particular games being played by players. The purpose is to better understand when and how digital games can be used for persuasion, by further exploring persuasive games and some other kinds of persuasive playful interaction as well. The book critically integrates what has been accomplished in separate research traditions to offer a multidisciplinary approach to understanding persuasive

gaming that is closely linked to developments in the industry by including the exploration of relevant case studies.

**Language, Culture, and Society** James Stanlaw, Nobuko Adachi, Zdenek Salzmann, 2018-04-24  
Why should we study language? How do the ways in which we communicate define our identities? And how is this all changing in the digital world? Since 1993, many have turned to *Language, Culture, and Society* for answers to questions like those above because of its comprehensive coverage of all critical aspects of linguistic anthropology. This seventh edition carries on the legacy while addressing some of the newer pressing and exciting challenges of the 21st century, such as issues of language and power, language ideology, and linguistic diasporas. Chapters on gender, race, and class also examine how language helps create - and is created by - identity. New to this edition are enhanced and updated pedagogical features, such as learning objectives, updated resources for continued learning, and the inclusion of a glossary. There is also an expanded discussion of communication online and of social media outlets and how that universe is changing how we interact. The discussion on race and ethnicity has also been expanded to include Latin- and Asian-American English vernacular.

*Consumer Psychology* Brian M. Young, 2018-07-04 This book approaches consumer psychology from a unique perspective - it covers the entire lifespan, from birth to old age. Childhood and youth are not discussed as areas special, different and remote from the rest of consumer research but are integrated into our development as humans. Consumption is viewed as a process by groups and individuals with the cycle continuing through to disposal or ownership and possession. The author discusses how people's natural lifespan influences their relationship to the things they own, how preferences are developed from childhood and how motivations for purchases change throughout

their lives from childhood to old age. This book brings together the most recent findings and theories on child and youth consumption, including children's understanding of advertising and marketing, teen and youth identities and their consumption tastes. Moving through Erikson's life stages chapters continue on to adulthood, the mid-life 'crisis' and possessions and ownership in older consumers. This is a deeply interdisciplinary work that will be of interest to scholars across the fields of psychology, business and marketing, as well as to the more general consumer.

Persuasive Games Ian Bogost, 2010-08-13 An exploration of the way videogames mount arguments and make expressive statements about the world that analyzes their unique persuasive power in terms of their computational properties. Videogames are an expressive medium, and a persuasive medium; they represent how real and imagined systems work, and they invite players to interact with those systems and form judgments about them. In this innovative analysis, Ian Bogost examines the way videogames mount arguments and influence players. Drawing on the 2,500-year history of rhetoric, the study of persuasive expression, Bogost analyzes rhetoric's unique function in software in general and videogames in particular. The field of media studies already analyzes visual rhetoric, the art of using imagery and visual representation persuasively. Bogost argues that videogames, thanks to their basic representational mode of procedurality (rule-based representations and interactions), open a new domain for persuasion; they realize a new form of rhetoric. Bogost calls this new form procedural rhetoric, a type of rhetoric tied to the core affordances of computers: running processes and executing rule-based symbolic manipulation. He argues further that videogames have a unique persuasive power that goes beyond other forms of computational persuasion. Not only can videogames support existing social and cultural positions, but they can also disrupt and change these positions themselves, leading to potentially significant

long-term social change. Bogost looks at three areas in which videogame persuasion has already taken form and shows considerable potential: politics, advertising, and learning.

The Language of Social Media P. Seargeant, C. Tagg, 2014-01-21 This timely book examines language on social media sites including Facebook and Twitter. Studies from leading language researchers, and experts on social media, explore how social media is having an impact on how we relate to each other, the communities we live in, and the way we present a sense of self in twenty-first century society.

**GIS and Spatial Analysis in Veterinary Science** Peter A. Durr, Anthony C. Gatrell, 2004 This book is probably the first to review the subject of geographical information systems (including remote sensing) and spatial analysis as applied to veterinary science. Topics covered include the application of GIS to epidemic disease response, to companion animal epidemiology and to the management of wildlife diseases. There are also chapters on more general issues such as parallels with human health and spatial statistics in the biomedical sciences.

**Hypocretins** Luis De Lecea, J. Gregor Sutcliffe, 2007-04-25 The first report that rapid eye movements occur in sleep in humans was published in 1953. The research journey from this point to the realization that sleep consists of two entirely independent states of being (eventually labeled REM sleep and non-REM sleep) was convoluted, but by 1960 the fundamental duality of sleep was well established including the description of REM sleep in cats associated with “wide awake” EEG patterns and EMG suppression. The first report linking REM sleep to a pathology occurred in 1961 and a clear association of sleep onset REM periods, cataplexy, hypnagogic hallucinations and sleep paralysis was fully established by 1966. When a naïve individual happens to observe a full-blown cataplexy attack, it is both dramatic and unnerving. Usually the observer assumes that the loss of

muscle tone represents syncope or seizure. In order to educate health professionals and the general public, Christian Guilleminault and I made movies of full-blown cataplectic episodes (not an easy task). We showed these movies of cataplexy attacks to a number of professional audiences, and were eventually rewarded with the report of a similar abrupt loss of muscle tone in a dog. We were able to bring the dog to Stanford University and with this as the trigger, we were able to develop the Stanford Canine Narcolepsy Colony. Breeding studies revealed the genetic determinants of canine narcolepsy, an autosomal recessive gene we termed *canarc1*. Emmanuel Mignot took over the colony in 1986 and began sequencing DNA, finally isolating *canarc1* in 1999.

**English in the World** Philip Seargeant, Joan Swann, 2013-03-01 English in the World: History, Diversity, Change examines the English language as it has developed through history and is used across the globe today. The first half of the book outlines the history of the language from its fifth-century roots through its development as a national, a colonial, and now a global language. In the second half, the focus shifts to the diversity of the language today. The book explores varieties of English across the English-speaking world, as well as English-related varieties such as pidgins and creoles. It also examines complex processes of variation, hybridity and change in English, and in the shifting styles of individual speakers. Throughout, the focus is on the international nature of English and its use alongside other languages in a diverse range of communities. Drawing on the latest research and The Open University's wide experience of writing accessible and innovative texts, this book: explains basic concepts and assumes no previous study of English or linguistics contains a range of source material and commissioned readings to supplement chapters includes contributions from leading experts in their fields including Joan Beal, Suresh Canagarajah, David Crystal, Jonathan Hope, Kay McCormick, Miriam Meyerhoff, Rajend Mesthrie, Robert Podesva and Jennifer Smith has

a truly international scope, encompassing examples and case studies from the UK and North America, Australia and New Zealand, Europe, Asia, and Africa is illustrated in full colour to bring the fascinating study of the English language alive includes a comprehensive index as well as useful appendices showing the historical timeline of English and a brief introduction to the description of linguistic features English in the World: History, Diversity, Change is essential reading for all students of English language studies.

**Transformative Learning and Identity** Knud Illeris, 2013-09-05 In the current ever changing world – the liquid modernity – the most pressing psychological challenge to all of us is to create and maintain a personal balance between mental stability and mental flexibility. In *Transformative Learning and Identity* Knud Illeris, one of the leading thinkers on the way people learn, explores, updates and re-defines the concept and understanding of transformative learning while linking the concept of transformative learning to the concept of identity. He thoroughly discusses what transformative learning is or could be in a broader learning theoretical perspective, including various concepts of learning by change, as opposed to learning by addition, and ends up with a new, short and distinct definition. He also explores and discusses the concept of identity and presents a general model depicting the complexity of identities today. Building on the work of Mezirow, various perspectives of transformative learning are analysed and discussed, including; transformative learning in different life ages; progressive and regressive transformations; motivation and identity defence; development of identity; personality and competence, and transformative learning in school, education, working life, and in relation to current and future life conditions. This vital new book by one of the leading learning theorists of our time will prove of lasting interest to academics, teachers, instructors, leaders and researchers in the field of adult learning and education. It will also

appeal to many students and researchers of psychology and sociology in general.

Race in America Matthew Desmond, Mustafa Emirbayer, 2019-11 Every chapter of *Race in America* examines how racism intersects with other forms of social division—those based on gender, class, sexuality, ability, religion, and nationhood—as well as how whiteness surrounds us in unnamed ways that produce and reproduce a multitude of privileges for white people. In the revised second edition, students will find relevant examples drawn from the headlines and from their own experiences. Each chapter is updated to include references to recent social movements and popular culture, making the book a more helpful tool for navigating society's critical conversations about race, racism, ethnicity, and white privilege. And throughout the book, students will find updated scholarship and data figures, reflecting the most cutting-edge sociological research--

*Rape in the Nordic Countries* Marie Bruvik Heinskou, May-Len Skilbrei, Kari Stefansen, 2019-10-29 The Open Access version of this book, available at <http://www.taylorfrancis.com/books/e/9780429467608>, has been made available under a Creative Commons Attribution-NonCommercial-No Derivatives 4.0 license. While the Nordic countries are listed at the top in most international rankings of gender equality and citizens' feelings of security, studies on the prevalence of sexual victimisation present a different picture, suggesting that the very countries that have invested much in establishing gender equality actually see a high prevalence of sexual violence. This book sheds light on the phenomenon and construction of rape and other forms of sexual violence within the Nordic region, exploring the ways in which rape and sexual violence are dealt with through criminal law and considering governmental policies aimed at combatting it, with a special focus on legal regulations and developments. Thematically organised, it offers new research on perpetrators, victimhood, criminal justice and prevention. Multi-disciplinary in

approach, it brings together the latest work from a range of scholars to offer insights into the situation in the five Nordic countries, asking how and why rape and other forms of sexual violence occur, whilst also addressing the timely issues of online sexual cultures, BDSM and the grey areas of sexual offences. As such, it will appeal to scholars of sociology, criminology and law with interests in gender and sexual violence.

*Dangerous Multilingualism* J. Blommaert, S. Leppänen, P. Pahta, T. Virkkula, Tiina Räisänen, 2012-11-14 Focuses on the endangering effects of language-ideological processes. This book looks at the challenges imposed by globalization and super-diversity on the nation state and its language situations and ideologies, and demonstrates how many of its problems rise from the tension between late-modern diversity and the (pre-)modernist responses to it.

Media and Democracy James Curran, 2011-03-31 Media and Democracy addresses key topics and themes in relation to democratic theory, media and technology, comparative media studies, media and history, and the evolution of media research. For example: How does TV entertainment contribute to the democratic life of society? Why are Americans less informed about politics and international affairs than Europeans? How should new communications technology and globalisation change our understanding of the democratic role of the media? What does the rise of internationalazines reveal about the limits of the internet? What is the future of journalism? Does advertising influence the media? Is American media independence from government a myth? How have the media influenced the development of modern society? Professor Curran's response to these questions provides both a clear introduction to media research, written for university undergraduates studying in different countries, and an innovative analysis written by one of the field's leading scholars.

**Approaches to the Study of Pre-Modern Arabic Anthologies** Nadia Maria El Cheikh, Bilal Orfali, 2021-03-01 The aim of this volume is to raise and discuss questions about the different approaches to the study of pre-modern Arabic anthologies from the perspectives of philology, religion, history, geography, and literature.

*Three Dialogues on Knowledge* Paul K. Feyerabend, 1991-08-26 The Socratic, or dialog, form is central to the history of philosophy and has been the discipline's canonical genre ever since. Paul Feyerabend's *Three Dialogues on Knowledge* resurrects the form to provide an astonishingly flexible and invigorating analysis of epistemological, ethical and metaphysical problems. He uses literary strategies - of irony, voice and distance - to make profoundly philosophical points about the epistemic, existential and political aspects of common sense and scientific knowledge. He writes about ancient and modern relativism; the authority of science; the ignorance of scientists; the nature of being; and true and false enlightenment. Throughout *Three Dialogues on Knowledge* is provocative, controversial and inspiring. It is, unlike most current philosophical writing, written for readers with a keen sense of what matters and why.

**New Media and Politics** Barrie Axford, Richard Huggins, 2001-01-26 Exploring the theme of the putative transformation of political modernity under the impact of new media, this book adopts a questioning approach to the ways in which cultural and technological factors are affecting the temper of political life, and reflects the variety of normative thinking about and empirical research on the changing character of politics in mediatized cultures. *New Media and Politics* examines: the extent to which commercial populism now dominates electoral and other political discourses; the ways in which the functions of leadership, government and political parties are modified by different forms of both old and new media; the democratic or undemocratic import of such changes; and the

ways in which the dominant territorial paradigm of politics is challenged by the space and time devouring capacities of electronic media.

**Advances in Behavioral Economics** Colin F. Camerer, George Loewenstein, Matthew Rabin, 2011-12-12 Twenty years ago, behavioral economics did not exist as a field. Most economists were deeply skeptical—even antagonistic—toward the idea of importing insights from psychology into their field. Today, behavioral economics has become virtually mainstream. It is well represented in prominent journals and top economics departments, and behavioral economists, including several contributors to this volume, have garnered some of the most prestigious awards in the profession. This book assembles the most important papers on behavioral economics published since around 1990. Among the 25 articles are many that update and extend earlier foundational contributions, as well as cutting-edge papers that break new theoretical and empirical ground. *Advances in Behavioral Economics* will serve as the definitive one-volume resource for those who want to familiarize themselves with the new field or keep up-to-date with the latest developments. It will not only be a core text for students, but will be consulted widely by professional economists, as well as psychologists and social scientists with an interest in how behavioral insights are being applied in economics. The articles, which follow Colin Camerer and George Loewenstein's introduction, are by the editors, George A. Akerlof, Linda Babcock, Shlomo Benartzi, Vincent P. Crawford, Peter Diamond, Ernst Fehr, Robert H. Frank, Shane Frederick, Simon Gächter, David Genesove, Itzhak Gilboa, Uri Gneezy, Robert M. Hutchens, Daniel Kahneman, Jack L. Knetsch, David Laibson, Christopher Mayer, Terrance Odean, Ted O'Donoghue, Aldo Rustichini, David Schmeidler, Klaus M. Schmidt, Eldar Shafir, Hersch M. Shefrin, Chris Starmer, Richard H. web 1 for a 45 degree bend the  
deduction is  $d/4$  bend in steel  
for example if the length of the  
bar is 12 m assume the  
diameter is 25 mm so for one  
bend it is deducted by  $d/4$  i.e.  
cutting length  $12 - d/4 = 12 - 0.025/4 = 11.9375$  m

975 m therefore only 11 975 m  
bar is necessary to get a bar of
