Twitter and Tear Gas Zeynep Tufekci,2017-05-16 A firsthand account and incisive analysis of modern protest, revealing internet-fueled social movements' greatest strengths and frequent challenges To understand a thwarted Turkish coup, an anti–Wall Street encampment, and a packed Tahrir Square, we must first comprehend the power and the weaknesses of using new technologies to mobilize large numbers of people. An incisive observer, writer, and participant in today's social movements, Zeynep Tufekci explains in this accessible and compelling book the nuanced trajectories of modern protests—how they form, how they operate differently from past protests, and why they have difficulty persisting in their long-term quests for change. Tufekci speaks from direct experience, combining on-the-ground interviews with insightful analysis. She describes how the internet helped the Zapatista uprisings in Mexico, the necessity of remote Twitter users to organize medical supplies during Arab Spring, the refusal to use bullhorns in the Occupy Movement that started in New York, and the empowering effect of tear gas in Istanbul's Gezi Park. These details from life inside social movements complete a moving investigation of authority, technology, and culture—and offer essential insights into the future of governance.

Digital Passages: Migrant Youth 2.0 Koen Leurs,2016-12-15 Increasingly, young people live online, with the vast majority of their social and cultural interactions conducted through means other than face-to-face conversation. How does this transition impact the ways in which young migrants understand, negotiate, and perform identity? That's the question taken up by Digital Passages: Migrant Youth 2.0, a ground-breaking analysis of the ways that youth culture online interacts with issues of diaspora, gender, and belonging. Drawing on surveys, in-depth interviews, and ethnography, Koen Leurs builds an interdisciplinary portrait of online youth culture and the spaces it opens up for migrant youth to negotiate power relations and to promote intercultural understanding.

Mistrust Florian Mühlfried,2018-03-31 Scholars have long seen trust as a foundational social good. We therefore have ample studies on building trust in free markets, on cultivating trust in the state, and on rebuilding trust through civil society. The contributors to this volume, instead, take a step back. They ask: Can mistrust ever be more than the flip side of trust, more than the sign of an absence or failure? By looking ethnographically at what a variety of actors actually do when they express mistrust, this volume offers a richly empirical trove of the social life of mistrust across a range of settings.

Medieval Saints and Modern Screens Alicia Spencer-Hall,2018-01-23 This ground-breaking book brings theoretical perspectives from twenty-first century media, film, and cultural studies to medieval hagiography. Medieval Saints and Modern Screens stakes the claim for a provocative new methodological intervention: consideration of hagiography as media. More precisely, hagiography is most productively understood as cinematic media. Medieval mystical episodes are made intelligible to modern audiences through reference to the filmic - the language, form, and lived experience of cinema. Similarly, reference to the realm of the mystical affords a means to express the disconcerting physical and emotional effects of watching cinema. Moreover, cinematic spectatorship affords, at times, a (more or less) secular experience of visionary transcendence: an 'agape-ic encounter'. The medieval saint's visions of God are but one pole of a spectrum of visual experience which extends into our present multi-media moment. We too conjure godly visions: on our smartphones, on the silver screen, and on our TVs and laptops. This book places contemporary pop-culture media - such as blockbuster movie The Dark Knight, Kim Kardashian West's social media feeds, and the outputs of online role-players in Second Life - in dialogue with a corpus of thirteenth-century Latin biographies, 'Holy Women of Liège'. In these texts, holy women see God, and see God often. Their experiences fundamentally orient their life, and offer the women new routes to knowledge, agency, and belonging. For the holy visionaries of Liège, as with us modern 'seers', visions are physically intimate, ideologically overloaded spaces. Through theoretically informed close readings, Medieval Saints and Modern Screens reveals the interconnection of decidedly 'old' media - medieval textualities - and artefacts of our 'new media' ecology, which all serve as spaces in which

altogether human concerns are brought before the contemporary culture's eyes.

Ethics of Media N. Couldry,M. Madianou,A. Pinchevski,2013-06-21 Ethics of Media reopens the question of media ethics. Taking an exploratory rather than prescriptive approach, an esteemed collection of contributors tackle the diverse areas of moral questioning at work within various broadcasting practices, accommodating the plurality and complexity of present-day ethical challenges posed by the world of media.

Libraries: A Design Manual Nolan Lushington,Wolfgang Rudorf,Liliane Wong,2016-04-25 Libraries as a building type have been subjected to substantial changes in particular in the past ten years. Milestones such as Rem Koolhaas' Seattle Central Library from 2004 reinvented the typology completely and reflected a development from elitist temple of learning to a public living room. Hybrids between library and department store or theater were conceived. Today, the ubiquity of electronic devices and media needs to be taken into account by the designer: every new library has areas without any books now. This work of reference explains systematically all technological and planning requirements of library design. Special features such as RFID, signage, acoustics or specific structural load issues are explained in texts by experts from the fields of architecture and library science. Finally, approximately 40 best-practice case studies of contemporary library design are documented extensively. They are organized in four categories – national libraries, large public libraries, small public libraries, university libraries – and comprise high-profile examples such as Jo Coenen's Openbare Bibliotheek Amsterdam, Alvaro Siza's Public Library Viana do Castelo in Portugal or Mecanoo's Library of Birmingham from 2013.

Between Page and Screen Kiene Brillenburg Wurth,2012 The contributors to this volume re-assess literary practice at the edges of paper, electronic media, and film. They show how the emergence of a new medium reinvigorates the book and the page as literary media, rather than announcing their impending death.

Hypocretins Luis De Lecea,J. Gregor Sutcliffe,2007-04-25 The first report that rapid eye movements occur in sleep in humans was published in 1953. The research journey from this point to the realization that sleep consists of two entirely independent states of being (eventually labeled REM sleep and non-REM sleep) was convoluted, but by 1960 the fundamental duality of sleep was well established including the description of REM sleep in cats associated with "wide awake" EEG patterns and EMG suppression. The first report linking REM sleep to a pathology occurred in 1961 and a clear association of sleep onset REM periods, cataplexy, hypnagogic hallucinations and sleep paralysis was fully established by 1966. When a naïve individual happens to observe a full-blown cataplexy attack, it is both dramatic and unnerving. Usually the observer assumes that the loss of muscle tone represents syncope or seizure. In order to educate health professionals and the general public, Christian Guilleminault and I made movies of full-blown cataplectic episodes (not an easy task). We showed these movies of cataplexy attacks to a number of professional audiences, and were eventually rewarded with the report of a similar abrupt loss of muscle tone in a dog. We were able to bring the dog to Stanford University and with this as the trigger, we were able to develop the Stanford Canine Narcolepsy Colony. Breeding studies revealed the genetic determinants of canine narcolepsy, an autosomal recessive gene we termed canarc1. Emmanuel Mignot took over the colony in 1986 and began sequencing DNA, finally isolating canarc1 in 1999.

Mobile e-Health Hannah R. Marston,Shannon Freeman,Charles Musselwhite,2018-09-05 This multi-disciplinary collection of essays captures discussion, thinking and research surrounding the recent surge of interest in how technology can help us as we age. A wide range of topics are covered, from investigations in the use of technology to improve health and well-being, to examinations of digital gaming, mobile health apps and the quantified self in relation to an ageing population. From multi-disciplinary perspectives, this collection highlights the role of a more social approach to technology. As such, a variety of social research methods are used throughout the chapters. The benefits and issues with different approaches are highlighted both in terms of further research, but also so the reader can judge the value of the research for themselves. This collection

brings together the latest thinking and cutting edge contemporary research from leading thinkers and academics in the field of human computer interaction, health and gerontology. In taking a social approach, it highlights how technological practices fit within wider gerontological, political and cultural perspectives. It therefore has potential to influence those working in human computer interaction, digital humanities, sociology, psychology and gerontology. It can help change the practice of people working in the health and social care field, in computer and product design, and in the digital and creative industries.

Digital and Social Media Marketing Aleksej Heinze,Gordon Fletcher,Tahir Rashid,Ana Cruz,2016-11-18 Digital and Social Media Marketing: A Results-Driven Approach is an exciting new industry-led, research-informed and results-driven guide to digital commerce. Its examples draw from SMEs and from Europe to offer a unique perspective for those learning about digital marketing and, having been developed in close collaboration with the Search Engine Marketing Trade Association (SEMTA), it is a reliable source of prevailing industry standards for practitioners at the cutting edge of their trade. Unlike other digital marketing texts, this accessible textbook gives special consideration to the ethical challenges raised by an increasingly digital world. Equally unique is the book's Digital Business Maturity Model, which offers organisations a clear roadmap for understanding their relative levels of technology adoption. Embracing the true spirit of Digital and Social Media Marketing, the book will be the first of its kind in this field with digital learning materials, case studies and exercises available in a supporting Massive Open Online Course (MOOC). The MOOC will enhance learners' experience and create an interactive international learning community. This book will provide a hands on, accessible and user friendly platform to turn skills and knowledge into strategic advantage. Ideal for postgraduate learners, instructors interested in providing a unique and up-to-date learning experience and for SMEs and practitioners aiming to be at the cutting edge of Digital and Social Media Marketing.

Campaigning Online Bruce Bimber,Richard Davis,2003-09-11 After a self-assured John F. Kennedy bested a visibly shaky Richard Nixon in their famous 1960 debates, political television, it was said, would henceforth determine elections. Today, many claim the Internet will be the latest medium to revolutionize electoral politics. Candidates invest heavily in web and email campaigns to reach prospective voters, as well as to communicate with journalists, potential donors, and political activists. Do these efforts influence voters, expand democracy, increase the coverage of political issues, or mobilize a shrinking and apathetic electorate? Campaigning Online answers these questions by looking at how candidates present themselves online and how voters respond to their efforts-including whether voters learn from candidates' websites and whether voters' views are affected by what they see. Although the Internet will not lead to a revolution in democracy, it will, Bimber and Davis argue, have consequences: reinforcing messages, mobilizing activists, and strengthening partisans' views. Reporting on a wealth of new data drawn from national and state-wide surveys, laboratory experiments, interviews with campaign staff, and analysis of web sites themselves, Campaigning Online draws the most complete picture of the role of campaign websites in American elections to date.

Approaches to the Study of Pre-Modern Arabic Anthologies Nadia Maria El Cheikh,Bilal Orfali,2021-03-01 The aim of this volume is to raise and discuss questions about the different approaches to the study of pre-modern Arabic anthologies from the perspectives of philology, religion, history, geography, and literature.

Digital Influence Joel Backaler,2018-08-22 This book brings order to the chaotic and rapidly evolving world of influencer marketing by providing readers with much needed context, frameworks, and best practices. Written for busy marketing professionals working in both domestic and international markets, it addresses these topics in a highly actionable and engaging manner. Digital Influence covers everything from how to identify the right influencers and determine "level of

influence" to collaborating with influencers and measuring ROI. It turns out, it's not all about paying online celebrities outrageous sums to post sponsored content. Backaler also provides much-needed context for why influencer marketing is flourishing today, and perspective into what a more technologically-enabled, globally-connected future will look like. Ultimately, people want to learn from trusted peers, not faceless companies. Better than any corporate marketing function, influencers understand how to make best use of social media platforms and tailor content for their respective cultures to engage consumers in their home markets. Business leaders should arm themselves with Backaler's book to ensure they're not left behind.

APA Handbook of Sexuality and Psychology Deborah L. Tolman,2013 Sexuality is a fundamental component of human psychological experience, and yet it remains relatively underrepresented in the history of the psychological sciences. The APA Handbook on Sexuality and Psychology marks a turning point in the status of sexuality within the discipline of psychology. This comprehensive, two-volume handbook provides an overarching review of current empirical research on sexuality and a synthesis of the dominant theoretical perspectives that have guided both research and clinical practice. An organizing current throughout the volume is the integration of individual experience and social/cultural context across every domain of sexuality. This dual emphasis on person and context is reflected in the structure of the handbook itself. Volume 1 presents foundational information on the history, theoretical and methodological development and current practices in the field, and then moves on to address foundational aspects of sexuality, including desire, orientation, behavior and practices, individual lifespan development, and biological substrates. Volume 2 broadens the analytical frame to emphasize the core contextual factors known to influence the development, expression and interpretation of sexuality and its expression in and through all of the key social institutions of our society, including marginalized populations, education, sexual rights and communities, globalization, religion and the media. The APA Handbook on Sexuality and Psychology will become a defining resource of this increasingly central topic across the sub-disciplines of psychology.

Fear of Small Numbers Arjun Appadurai,2006-05-24 The period since 1989 has been marked by the global endorsement of open markets, the free flow of finance capital and liberal ideas of constitutional rule, and the active expansion of human rights. Why, then, in this era of intense globalization, has there been a proliferation of violence, of ethnic cleansing on the one hand and extreme forms of political violence against civilian populations on the other? Fear of Small Numbers is Arjun Appadurai's answer to that question. A leading theorist of globalization, Appadurai turns his attention to the complex dynamics fueling large-scale, culturally motivated violence, from the genocides that racked Eastern Europe, Rwanda, and India in the early 1990s to the contemporary "war on terror." Providing a conceptually innovative framework for understanding sources of global violence, he describes how the nation-state has grown ambivalent about minorities at the same time that minorities, because of global communication technologies and migration flows, increasingly see themselves as parts of powerful global majorities. By exacerbating the inequalities produced by globalization, the volatile, slippery relationship between majorities and minorities foments the desire to eradicate cultural difference. Appadurai analyzes the darker side of globalization: suicide bombings; anti-Americanism; the surplus of rage manifest in televised beheadings; the clash of global ideologies; and the difficulties that flexible, cellular organizations such as Al-Qaeda present to centralized, "vertebrate" structures such as national governments. Powerful, provocative, and timely, Fear of Small Numbers is a thoughtful invitation to rethink what violence is in an age of globalization.

The Ecological Native Astrid Ulloa,2013-09-13 This text analyzes indigenous peoples' processes of identity construction as ecological natives. It opens space for reconstructing all the different networks, conditions of emergence, and implications (political, cultural, social and economic) of one specific event: the consolidation of the relationship between indigenous peoples and environmentalism. This text is based on ethnographic information and focused on the historical process of the emergence of indigenous peoples' movements in Latin America, in general, and

indigenous peoples of the Sierra Nevada de Santa Marta do Columbia (SNSM), in particular. It demonstrates the process of the construction of indigenous peoples' environmental identities as an interplay of local, national and transnational dynamics among indigenous peoples and environmental movements and discourses in relation to global environmental policies.

Internet Politics Andrew Chadwick,2006 Providing an overview of Internet politics, this work examines the impact of communication technologies on political parties and elections, pressure groups, social movements, public bureaucracies, and global governance.
