Bitcoin and Cryptocurrency Technologies Arvind Narayanan, Joseph Bonneau, Edward Felten, Andrew Miller, Steven Goldfeder, 2016-07-19 An authoritative introduction to the exciting new technologies of digital money Bitcoin and Cryptocurrency Technologies provides a comprehensive introduction to the revolutionary yet often misunderstood new technologies of digital currency. Whether you are a student, software developer, tech entrepreneur, or researcher in computer science, this authoritative and self-contained book tells you everything you need to know about the new global money for the Internet age. How do Bitcoin and its block chain actually work? How secure are your bitcoins? How anonymous are their users? Can cryptocurrencies be regulated? These are some of the many questions this book answers. It begins by tracing the history and development of Bitcoin and cryptocurrencies, and then gives the conceptual and practical foundations you need to engineer secure software that interacts with the Bitcoin network as well as to integrate ideas from Bitcoin into your own projects. Topics include decentralization, mining, the politics of Bitcoin, altcoins and the cryptocurrency ecosystem, the future of Bitcoin, and more. An essential introduction to the new technologies of digital currency Covers the history and mechanics of Bitcoin and the block chain, security, decentralization, anonymity, politics and regulation, altcoins, and much more Features an accompanying website that includes instructional videos for each chapter, homework problems, programming assignments, and lecture slides Also suitable for use with the authors' Coursera online course Electronic solutions manual (available only to professors)

Hanging Out in the Virtual Pub Lori Kendall, 2002-06-27 In this ethnography, Lori Kendall examines how men and women negotiate their gender roles on an online forum she calls BlueSky.

The result is an analysis of the emerging social phenomenon of Internet-mediated communication and a study of the social and cultural effects of a medium that allows participants to assume identities of their own choosing.

Digital Passages: Migrant Youth 2.0 Koen Leurs, 2016-12-15 Increasingly, young people live online, with the vast majority of their social and cultural interactions conducted through means other than face-to-face conversation. How does this transition impact the ways in which young migrants understand, negotiate, and perform identity? That's the question taken up by *Digital Passages: Migrant Youth 2.0*, a ground-breaking analysis of the ways that youth culture online interacts with issues of diaspora, gender, and belonging. Drawing on surveys, in-depth interviews, and ethnography, Koen Leurs builds an interdisciplinary portrait of online youth culture and the spaces it opens up for migrant youth to negotiate power relations and to promote intercultural understanding.

Watch Me Play T.L. Taylor, 2018-10-16 A look at the revolution in game live streaming and esports broadcasting Every day thousands of people broadcast their gaming live to audiences over the internet using popular sites such as Twitch, which reaches more than one hundred million viewers a month. In these new platforms for interactive entertainment, big esports events featuring digital game competitors live stream globally, and audiences can interact with broadcasters—and each other—through chat in real time. What are the ramifications of this exploding online industry? Taking readers inside home studios and backstage at large esports events, *Watch Me Play* investigates the rise of game live streaming and how it is poised to alter how we understand media and audiences. Through extensive interviews and immersion in this gaming scene, T. L. Taylor delves into the inner workings of the live streaming platform Twitch. From branding to business

practices, she shows the pleasures and work involved in this broadcasting activity, as well as the management and governance of game live streaming and its hosting communities. At a time when gaming is being reinvented through social media, the potential of an ever-growing audience is transforming user-generated content and alternative distribution methods. These changes will challenge the meaning of ownership and intellectual property and open the way to new forms of creativity. The first book to explore the online phenomenon Twitch and live streaming games, *Watch Me Play* offers a vibrant look at the melding of private play and public entertainment.

Craft and the Creative Economy S. Luckman, 2015-03-04 *Craft and the Creative Economy* examines the place of craft and making in the contemporary cultural economy, with a distinctive focus on the ways in which this creative sector is growing exponentially as a result of online shopfronts and home-based micro-enterprise, 'mumpreneurialism' and downshifting, and renewed demand for the handmade.

Democracy and Fake News Serena Giusti, Elisa Piras, 2020-12-29 This book explores the challenges that disinformation, fake news, and post-truth politics pose to democracy from a multidisciplinary perspective. The authors analyse and interpret how the use of technology and social media as well as the emergence of new political narratives has been progressively changing the information landscape, undermining some of the pillars of democracy. The volume sheds light on some topical questions connected to fake news, thereby contributing to a fuller understanding of its impact on democracy. In the Introduction, the editors offer some orientating definitions of post-truth politics, building a theoretical framework where various different aspects of fake news can be understood. The book is then divided into three parts: Part I helps to contextualise the phenomena

investigated, offering definitions and discussing key concepts as well as aspects linked to the manipulation of information systems, especially considering its reverberation on democracy. Part II considers the phenomena of disinformation, fake news, and post-truth politics in the context of Russia, which emerges as a laboratory where the phases of creation and diffusion of fake news can be broken down and analysed; consequently, Part II also reflects on the ways to counteract disinformation and fake news. Part III moves from case studies in Western and Central Europe to reflect on the methodological difficulty of investigating disinformation, as well as tackling the very delicate question of detection, combat, and prevention of fake news. This book will be of great interest to students and scholars of political science, law, political philosophy, journalism, media studies, and computer science, since it provides a multidisciplinary approach to the analysis of post-truth politics.

Ethics of Media N. Couldry, M. Madianou, A. Pinchevski, 2013-06-21 Ethics of Media reopens the question of media ethics. Taking an exploratory rather than prescriptive approach, an esteemed collection of contributors tackle the diverse areas of moral questioning at work within various broadcasting practices, accommodating the plurality and complexity of present-day ethical challenges posed by the world of media.

Having Your Say J. R. Shackleton, David S. Oderberg, Philip Booth, Nick Cowen, Stephen Davies, Claire Fox, Dennis Hayes, Victoria Hewson, Leo Kears, Jacob Mchangama, 2021-07 Today should be a Golden Age for free speech – with technology providing more ways of communicating ideas and opinions than ever before. Yet we’re actually witnessing a growing wave of restrictions on freedom of thought and expression. In Having Your Say a variety of authors – academics, philosophers, comedians and more – stress the fundamental importance of free speech, one of the

cornerstones of classical liberalism. And they provide informed and incisive insights on this worrying trend, which threatens to usher in a new, intolerant and censorious era.

Hanging Out, Messing Around, and Geeking Out, Tenth Anniversary Edition Mizuko Ito, Sonja Baumer, Matteo Bittanti, Danah Boyd, Rachel Cody, 2019-09-24 The tenth-anniversary edition of a foundational text in digital media and learning, examining new media practices that range from podcasting to online romantic breakups. *Hanging Out, Messing Around, and Geeking Out*, first published in 2009, has become a foundational text in the field of digital media and learning. Reporting on an ambitious three-year ethnographic investigation into how young people live and learn with new media in varied settings—at home, in after-school programs, and in online spaces—it presents a flexible and useful framework for understanding the ways that young people engage with and through online platforms: hanging out, messing around, and geeking out, otherwise known as HOMAGO. Integrating twenty-three case studies—which include Harry Potter podcasting, video-game playing, music sharing, and online romantic breakups—in a unique collaborative authorship style, *Hanging Out, Messing Around, and Geeking Out* combines in-depth descriptions of specific group dynamics with conceptual analysis. Since its original publication, digital learning labs in libraries and museums around the country have been designed around the HOMAGO mode and educators have created HOMAGO guidebooks and toolkits. This tenth-anniversary edition features a new introduction by Mizuko Ito and Heather Horst that discusses how digital youth culture evolved in the intervening decade, and looks at how HOMAGO has been put into practice. This book was written as a collaborative effort by members of the Digital Youth Project, a three-year research effort funded by the John D. and Catherine T. MacArthur Foundation and conducted at the University of California, Berkeley, and the University of Southern California.

Hypocretins Luis De Lecea, J. Gregor Sutcliffe, 2007-04-25 The first report that rapid eye movements occur in sleep in humans was published in 1953. The research journey from this point to the realization that sleep consists of two entirely independent states of being (eventually labeled REM sleep and non-REM sleep) was convoluted, but by 1960 the fundamental duality of sleep was well established including the description of REM sleep in cats associated with “wide awake” EEG patterns and EMG suppression. The first report linking REM sleep to a pathology occurred in 1961 and a clear association of sleep onset REM periods, cataplexy, hypnagogic hallucinations and sleep paralysis was fully established by 1966. When a naïve individual happens to observe a full-blown cataplexy attack, it is both dramatic and unnerving. Usually the observer assumes that the loss of muscle tone represents syncope or seizure. In order to educate health professionals and the general public, Christian Guilleminault and I made movies of full-blown cataplectic episodes (not an easy task). We showed these movies of cataplexy attacks to a number of professional audiences, and were eventually rewarded with the report of a similar abrupt loss of muscle tone in a dog. We were able to bring the dog to Stanford University and with this as the trigger, we were able to develop the Stanford Canine Narcolepsy Colony. Breeding studies revealed the genetic determinants of canine narcolepsy, an autosomal recessive gene we termed canarc1. Emmanuel Mignot took over the colony in 1986 and began sequencing DNA, finally isolating canarc1 in 1999.

Compensated Dating Cassini Sai Kwan Chu, 2018-01-16 This book considers a burgeoning social phenomenon, compensated dating in Hong Kong, that facilitates direct commercial sex exchange between consenting females from their mid-teens through the late 20s and males from their early 20s to mid-adulthood. Informed by the transformation of intimacy, the breakdown of institutional constraints, the emergence of a new female sexual autonomy and the advancement of

information technology, this book moves beyond stereotypes of sex work to look at the complexities of compensated dating. The phenomenon of compensated dating is distinctive from most other sex trades in that it involves intense emotional interactions and often extends beyond the commercial boundary. Given the dynamic, flexible and ambiguous nature of compensated dating, it has become more of a space for sexual explorations and less of a rigid model of commercial sex, at least in the eye of the participants. This book walks through how men become involved in compensated dating and also sheds lights on how gender relations are negotiated, with important implications on what it means to be a man and a woman in contemporary Hong Kong society. It also speaks to the broader transformations of some of the key social structures and elements, particularly gender and sexualities, in the era of late modernity.

Distrusting Educational Technology Neil Selwyn, 2013-11-26 Distrusting Educational Technology critically explores the optimistic consensus that has arisen around the use of digital technology in education. Drawing on a variety of theoretical and empirical perspectives, this book shows how apparently neutral forms of educational technology have actually served to align educational provision and practices with neo-liberal values, thereby eroding the nature of education as a public good and moving it instead toward the individualistic tendencies of twenty-first century capitalism. Following a wide-ranging interrogation of the ideological dimensions of educational technology, this book examines in detail specific types of digital technology in use in education today, including virtual education, 'open' courses, digital games, and social media. It then concludes with specific recommendations for fairer forms of educational technology. An ideal read for anyone interested in the fast-changing nature of contemporary education, Distrusting Educational Technology comprises an ambitious and much-needed critique.

Anthropology and Nostalgia Olivia Angé, David Berliner, 2014-10-01 Nostalgia is intimately connected to the history of the social sciences in general and anthropology in particular, though finely grained ethnographies of nostalgia and loss are still scarce. Today, anthropologists have realized that nostalgia constitutes a fascinating object of study for exploring contemporary issues of the formation of identity in politics and history. Contributors to this volume consider the fabric of nostalgia in the fields of heritage and tourism, exile and diasporas, postcolonialism and postsocialism, business and economic exchange, social, ecological and religious movements, and nation building. They contribute to a better understanding of how individuals and groups commemorate their pasts, and how nostalgia plays a role in the process of remembering.

Body Studies: The Basics Niall Richardson, Adam Locks, 2014-07-25 Consideration of the body as a subject for study has increased in recent years with new technologies, forms of modification, debates about obesity and issues of age being brought into focus by the media. Drawing on contemporary culture, *Body Studies: The Basics* introduces readers to the key concerns and debates surrounding the study of the sociological body, cutting across disciplines to cover topics which include: Nature vs. Culture: how we 'build' and transform our bodies Conformity and resistance in bodily practice Issues of body image - beauty, diet, exercise and age Sporting bodies and the pursuit of ideals Enfreakment, disability and monstrosity Cyborgs and virtual online bodies With further reading signposted throughout, this accessible book is essential reading for anyone studying the body through the lens of sociology, cultural studies, sports studies, media studies and gender studies; and all those with an interest in how the physical body can be a social construct.

Of Games and God Kevin Schut, 2013-01-15 Video games are big business, generating billions of

dollars annually. The long-held stereotype of the gamer as a solitary teen hunched in front of his computer screen for hours is inconsistent with the current makeup of a diverse and vibrant gaming community. The rise of this cultural phenomenon raises a host of questions: Are some games too violent? Do they hurt or help our learning? Do they encourage escapism? How do games portray gender? Such questions have generated lots of talk, but missing from much of the discussion has been a Christian perspective. Kevin Schut, a communications expert and an enthusiastic gamer himself, offers a lively, balanced, and informed Christian evaluation of video games and video game culture. He expertly engages a variety of issues, encouraging readers to consider both the perils and the promise of this major cultural phenomenon. The book includes a foreword by Quentin J. Schultze.

Photography and Collaboration Daniel Palmer, 2020-09-14 *Photography and Collaboration* offers a fresh perspective on existing debates in art photography and on the act of photography in general. Unlike conventional accounts that celebrate individual photographers and their personal visions, this book investigates the idea that authorship in photography is often more complex and multiple than we imagine – involving not only various forms of partnership between photographers, but also an astonishing array of relationships with photographed subjects and viewers. Thematic chapters explore the increasing prevalence of collaborative approaches to photography among a broad range of international artists – from conceptual practices in the 1960s to the most recent digital manifestations. Positioning contemporary work in a broader historical and theoretical context, the book reveals that collaboration is an overlooked but essential dimension of the medium's development and potential.

Mobile e-Health Hannah R. Marston, Shannon Freeman, Charles Musselwhite, 2018-09-05 This

multi-disciplinary collection of essays captures discussion, thinking and research surrounding the recent surge of interest in how technology can help us as we age. A wide range of topics are covered, from investigations in the use of technology to improve health and well-being, to examinations of digital gaming, mobile health apps and the quantified self in relation to an ageing population. From multi-disciplinary perspectives, this collection highlights the role of a more social approach to technology. As such, a variety of social research methods are used throughout the chapters. The benefits and issues with different approaches are highlighted both in terms of further research, but also so the reader can judge the value of the research for themselves. This collection brings together the latest thinking and cutting edge contemporary research from leading thinkers and academics in the field of human computer interaction, health and gerontology. In taking a social approach, it highlights how technological practices fit within wider gerontological, political and cultural perspectives. It therefore has potential to influence those working in human computer interaction, digital humanities, sociology, psychology and gerontology. It can help change the practice of people working in the health and social care field, in computer and product design, and in the digital and creative industries.

Political Judgement (Routledge Library Editions: Political Science Volume 20) Ronald Beiner, 2013-06-17 Originally published in 1983. One of the basic capacities of man as a political being is his faculty of judgement. Yet for all the books on concepts like freedom, equality and authority, surprisingly little attention has been given to this topic in the tradition of Western political thought. What is the nature of political judgement? What endows us, as human beings, with the ability to make reasonable judgements about human affairs and to judge the common world we share with others? By what means do we secure validity for our judgements? What are the

underlying conditions of this human capacity, and what implications does it have the understanding of politics? These questions, central as they are to any reflection on politics have rarely been addressed in a systematic way. This book examines Kant's concept of taste and Aristotle's concept of prudence, as well as recent works of political philosophy by Arendt, Gadamer and Habermas, all crucially influenced by Kant and Aristotle.
