Watch Me Play T.L. Taylor, 2018-10-16 A look at the revolution in game live streaming and esports broadcasting Every day thousands of people broadcast their gaming live to audiences over the internet using popular sites such as Twitch, which reaches more than one hundred million viewers a month. In these new platforms for interactive entertainment, big esports events featuring digital game competitors live stream globally, and audiences can interact with broadcasters—and each other—through chat in real time. What are the ramifications of this exploding online industry? Taking readers inside home studios and backstage at large esports events, Watch Me Play investigates the rise of game live streaming and how it is poised to alter how we understand media and audiences. Through extensive interviews and immersion in this gaming scene, T. L. Taylor delves into the inner workings of the live streaming platform Twitch. From branding to business practices, she shows the pleasures and work involved in this broadcasting activity, as well as the management and governance of game live streaming and its hosting communities. At a time when gaming is being reinvented through social media, the potential of an ever-growing audience is transforming user-generated content and alternative distribution methods. These changes will challenge the meaning of ownership and intellectual property and open the way to new forms of creativity. The first book to explore the online phenomenon Twitch and live streaming games, Watch Me Play offers a vibrant look at the melding

of private play and public entertainment.

Media and New Religions in Japan Erica Baffelli, 2016-02-05 The Open Access version of this book, available at www.taylorfrancis.com/books/9781135117849, has been made available under a Creative Commons Attribution-Non Commercial-No Derivative 4.0 license. Japanese new religions (shinshūkyō) have used various media forms for training, communicating with members, presenting their messages, reinforcing or protecting the image of the leader, and, potentially, attracting converts. In this book the complex and dual relationship between media and new religions is investigated by looking at the tensions groups face between the need for visibility and the risks of facing attacks and criticism through media. Indeed media and new technologies have been extensively used by religious groups not only to spread their messages and to try to reach a wider audience, but also to promote themselves as a highly modern and up-to-date form of religion appropriate for a modern technological age. In 1980s and early 1990s some movements, such as Agonshū , Kōfuku no Kagaku, and Aum Shinrikyō came into prominence especially via the use of media (initially publications, but also ritual broadcasts, advertising campaigns, and public media events). This created new modes of ritual engagement and new ways of interactions between leaders and members. The aim of this book is to develop and illustrate particular key issues in the wider new religions and media nexus by using specific movements as examples. In particular, the analysis of the interaction

between media and new religions will focus primarily on three case studies predominantly during the first period of development of the groups.

Language and Identity in Cyberspace Alexandra Cotoc, 2017

New Media and Politics Barrie Axford, Richard Huggins, 2001-01-26 Exploring the theme of the putative transformation of political modernity under the impact of new media, this book adopts a questioning approach to the ways in which cultural and technological factors are affecting the temper of political life, and reflects the variety of normative thinking about and empirical research on the changing character of politics in mediatized cultures. *New Media and Politics* examines: the extent to which commercial populism now dominates electoral and other political discourses; the ways in which the functions of leadership, government and political parties are modified by different forms of both old and new media; the democratic or undemocratic import of such changes; and the ways in which the dominant territorial paradigm of politics is challenged by the space and time devouring capacities of electronic media.

Approaches to the Study of Pre-Modern Arabic Anthologies Nadia Maria El Cheikh, Bilal Orfali, 2021-03-01 The aim of this volume is to raise and discuss questions about the different approaches to the study of pre-modern Arabic anthologies from the perspectives of philology, religion, history, geography, and literature.

The Nether Jennifer Haley, 2014-11-30 *The Nether*, a daring examination of moral responsibility in

virtual worlds, opens with a familiar interrogation scene given a technological twist. As Detective Morris, an online investigator, questions Mr. Sims about his activities in a role-playing realm so realistic it could be life, she finds herself on slippery ethical ground. Sims argues for the freedom to explore even the most deviant corners of our imagination. Morris holds that we cannot flesh out our malign fantasies without consequence. Their clash of wills leads to a consequence neither could have imagined. Suspenseful, ingeniously constructed, and fiercely intelligent, Haley's play forces us to confront deeply disturbing questions about the boundaries of reality.

Religion and Secularity ,2013-05-15 Religion and Secularity assembles studies on the concept of „secularity“ in various cultures, thereby tracing the entangled history of the modern re-configuration of the religious field across the Eurasian continent.

Facts, Values, and Norms Peter Railton,2003-03-17 In our everyday lives we struggle with the notions of why we do what we do and the need to assign values to our actions. Somehow, it seems possible through experience and life to gain knowledge and understanding of such matters. Yet once we start delving deeper into the concepts that underwrite these domains of thought and actions, we face a philosophical disappointment. In contrast to the world of facts, values and morality seem insecure, uncomfortably situated, easily influenced by illusion or ideology. How can we apply this same objectivity

and accuracy to the spheres of value and morality? In the essays included in this collection, Peter Railton shows how a fairly sober, naturalistically informed view of the world might nonetheless incorporate objective values and moral knowledge. This book will be of interest to professionals and students working in philosophy and ethics.

A Woman's Place Edwina Currie, 2012-07-05 As the rumours subside and the cheering stops, Elaine Stalker MP watches with a pang of regret as Roger Dickson takes up the reins of government as Prime Minister. She has intimate knowledge of just how competent and decent her ex-lover is, but his new role of necessity curtails their close friendship. Yet Roger recognises Elaine's drive and quickly appoints her Junior Minister in a newly created government department. It is a political hot seat, and one that finds Elaine ruefully concluding that in the corridors of power, a woman's place is usually in the wrong... A powerful sequel to *A Parliamentary Affair*.

Neuroethics Judy Illes, 2006 Recent advances in the brain sciences have dramatically improved our understanding of brain function. As we find out more and more about what makes us tick, we must stop and consider the ethical implications of this new found knowledge. Will having a new biology of the brain through imaging make us less responsible for our behavior and lose our free will? Should certain brain scan studies be disallowed on the basis of moral grounds? Why is the media so interested in reporting results of brain imaging studies? What ethical lessons from the past can best inform the future of brain imaging? These

compelling questions and many more are tackled by a distinguished group of contributors to this volume on neuroethics. The wide range of disciplinary backgrounds that the authors represent, from neuroscience, bioethics and philosophy, to law, social and health care policy, education, religion and film, allow for profoundly insightful and provocative answers to these questions, and open up the door to a host of new ones. The contributions highlight the timeliness of modern neuroethics today, and assure the longevity and importance of neuroethics for generations to come.

Everyday Sectarianism in Urban Lebanon Joanne Randa Nucho, 2016-11-22 What causes violent conflicts around the Middle East? All too often, the answer is sectarianism—popularly viewed as a timeless and intractable force that leads religious groups to conflict. In *Everyday Sectarianism in Urban Lebanon*, Joanne Nucho shows how wrong this perspective can be. Through in-depth research with local governments, NGOs, and political parties in Beirut, she demonstrates how sectarianism is actually recalibrated on a daily basis through the provision of essential services and infrastructures, such as electricity, medical care, credit, and the planning of bridges and roads. Taking readers to a working-class, predominantly Armenian suburb in northeast Beirut called Bourj Hammoud, Nucho conducts extensive interviews and observations in medical clinics, social service centers, shops, banking coops, and municipal offices. She explores how group and individual access to services depends on making

claims to membership in the dominant sectarian community, and she examines how sectarianism is not just tied to ethnoreligious identity, but also class, gender, and geography. Life in Bourj Hammoud makes visible a broader pattern in which the relationships that develop while procuring basic needs become a way for people to see themselves as part of the greater public.

Illustrating how sectarianism in Lebanon is not simply about religious identity, as is commonly thought, *Everyday Sectarianism in Urban Lebanon* offers a new look at how everyday social exchanges define and redefine communities and conflicts.

Disruptive Fixation Christo Sims, 2017-03-28 In New York City in 2009, a new kind of public school opened its doors to its inaugural class of middle schoolers. Conceived by a team of game designers and progressive educational reformers and backed by prominent philanthropic foundations, it promised to reinvent the classroom for the digital age. Ethnographer Christo Sims documented the life of the school from its planning stages to the graduation of its first eighth-grade class.

Disruptive Fixation is his account of how this school for digital kids, heralded as a model of tech-driven educational reform, reverted to a more conventional type of schooling with rote learning, an emphasis on discipline, and traditional hierarchies of authority. Troubling gender and racialized class divisions also emerged. Sims shows how the philanthropic possibilities of new media technologies are repeatedly idealized even though actual interventions routinely fall short of the desired outcomes—often dramatically so. He

traces the complex processes by which idealistic tech-reform perennially takes root, unsettles the worlds into which it intervenes, and eventually stabilizes in ways that remake and extend many of the social predicaments reformers hope to fix. Sims offers a nuanced look at the roles that powerful elites, experts, the media, and the intended beneficiaries of reform—in this case, the students and their parents—play in perpetuating the cycle. *Disruptive Fixation* offers a timely examination of techno-philanthropism and the yearnings and dilemmas it seeks to address, revealing what failed interventions do manage to accomplish—and for whom.

Sounding the Limits of Life Stefan

Helmreich, 2015-10-27 What is life? What is water? What is sound? In *Sounding the Limits of Life*, anthropologist Stefan Helmreich investigates how contemporary scientists—biologists, oceanographers, and audio engineers—are redefining these crucial concepts. Life, water, and sound are phenomena at once empirical and abstract, material and formal, scientific and social. In the age of synthetic biology, rising sea levels, and new technologies of listening, these phenomena stretch toward their conceptual snapping points, breaching the boundaries between the natural, cultural, and virtual. Through examinations of the computational life sciences, marine biology, astrobiology, acoustics, and more, Helmreich follows scientists to the limits of these categories. Along the way, he offers critical accounts of such other-than-human entities as digital life forms, microbes, coral reefs, whales, seawater, extraterrestrials,

tsunamis, seashells, and bionic cochlea. He develops a new notion of sounding—as investigating, fathoming, listening—to describe the form of inquiry appropriate for tracking meanings and practices of the biological, aquatic, and sonic in a time of global change and climate crisis. *Sounding the Limits of Life* shows that life, water, and sound no longer mean what they once did, and that what count as their essential natures are under dynamic revision.

Democracy's Infrastructure Antina von Schnitzler, 2016-11-08 In the past decade, South Africa's miracle transition has been interrupted by waves of protests in relation to basic services such as water and electricity. Less visibly, the post-apartheid period has witnessed widespread illicit acts involving infrastructure, including the nonpayment of service charges, the bypassing of metering devices, and illegal connections to services. *Democracy's Infrastructure* shows how such administrative links to the state became a central political terrain during the antiapartheid struggle and how this terrain persists in the post-apartheid present. Focusing on conflicts surrounding prepaid water meters, Antina von Schnitzler examines the techno-political forms through which democracy takes shape. Von Schnitzler explores a controversial project to install prepaid water meters in Soweto—one of many efforts to curb the nonpayment of service charges that began during the antiapartheid struggle—and she traces how infrastructure, payment, and technical procedures become sites where citizenship is mediated and contested. She follows

engineers, utility officials, and local bureaucrats as they consider ways to prompt Sowetans to pay for water, and she shows how local residents and activists wrestle with the constraints imposed by meters. This investigation of democracy from the perspective of infrastructure reframes the conventional story of South Africa's transition, foregrounding the less visible remainders of apartheid and challenging readers to think in more material terms about citizenship and activism in the postcolonial world. *Democracy's Infrastructure* examines how seemingly mundane technological domains become charged territory for struggles over South Africa's political transformation.

Biomedical Odysseys Priscilla Song, 2017-05-16
Thousands of people from more than eighty countries have traveled to China since 2001 to undergo fetal cell transplantation. Galvanized by the potential of stem and fetal cells to regenerate damaged neurons and restore lost bodily functions, people grappling with paralysis and neurodegenerative disorders have ignored the warnings of doctors and scientists back home in order to stake their futures on a Chinese experiment. *Biomedical Odysseys* looks at why and how these individuals have entrusted their lives to Chinese neurosurgeons operating on the forefront of experimental medicine, in a world where technologies and risks move faster than laws can keep pace. Priscilla Song shows how cutting-edge medicine is not just about the latest advances in biomedical science but also encompasses transformations in online patient

activism, surgical intervention, and borderline experiments in health care bureaucracy. Bringing together a decade of ethnographic research in hospital wards, laboratories, and online patient discussion forums, Song opens up important theoretical and methodological horizons in the anthropology of science, technology, and medicine. She illuminates how poignant journeys in search of fetal cell cures become tangled in complex webs of digital mediation, the entrepreneurial logics of postsocialist medicine, and fraught debates about the ethics of clinical experimentation. Using innovative methods to track the border-crossing quests of Chinese clinicians and their patients from around the world, *Biomedical Odysseys* is the first book to map the transnational life of fetal cell therapies.

Religious Violence in Contemporary Japan Ian Reader, 2013-10-11 The Tokyo subway attack in March 1995 was just one of a series of criminal activities including murder, kidnapping, extortion, and the illegal manufacture of arms and drugs carried out by the Japanese new religious movement Aum Shinrikyo, under the guidance of its leader Asahara Shoko. Reader looks at Aum's claims about itself and asks, why did a religious movement ostensibly focussed on yoga, meditation, asceticism and the pursuit of enlightenment become involved in violent activities? Reader discusses Aum's spiritual roots, placing it in the context of contemporary Japanese religious patterns. Asahara's teaching are examined from his earliest public pronouncements through to his sermons at the time of the attack, and statements he has made

in court. In analysing how Aum not only manufactured nerve gases but constructed its own internal doctrinal justifications for using them Reader focuses on the formation of what made all this possible: Aum's internal thought-world, and on how this was developed. Reader argues that despite the horrors of this particular case, Aum should not be seen as unique, nor as solely a political or criminal terror group. Rather it can best be analysed within the context of religious violence, as an extreme example of a religious movement that has created friction with the wider world that escalated into violence.

The Biblically Defined Process That Brings Fear of the Enemy Into A Person's Life Rachel Little Dove, 2009-03-16 This is Volume Two of The WAR ON FEAR Series. In this book, you will find out what the Bible says about how FEAR originated with mankind. And, you will also see God's foundational solution to FEAR found in the Scriptures. This book was written because we want you learn how to become free from the operation of fear in your life. God Bless you!

Religion and Commodification Vineeta Sinha, 2011-04-13 Sustaining a Hindu universe at an everyday life level requires an extraordinary range of religious specialists and ritual paraphernalia. At the level of practice, devotional Hinduism is an embodied religion and grounded in a materiality, that makes the presence of specific physical objects (which when used in worship also carry immense ritual and symbolic load) an indispensable part of its religious practices. Traditionally, both services and

objects required for worship were provided and produced by occupational communities. The almost sacred connection between caste groups and occupation/profession has been clearly severed in many diasporic locations, but importantly in India itself. As such, skills and expertise required for producing an array of physical objects in order to support Hindu worship have been taken over by clusters of individuals with no traditional, historical connection with caste-related knowledge. Both the transference and disconnect just noted have been crucial for the ultimate commodification of objects used in the act of Hindu worship, and the emergence of an analogous commercial industry as a result. These developments condense highly complex processes that need careful conceptual explication, a task that is exciting and carries enormous potential for theoretical reflections in key fields of study. Using the lens of 'visuality' and 'materiality,' Sinha offers insights into the everyday material religious lives of Hindus as they strive to sustain theistic, devotional Hinduism in diasporic locations--particularly Singapore, Malaysia, and Tamilnadu--where religious objects have become commodified.

Religion in Hip Hop Monica R. Miller, Anthony B. Pinn, Bernard 'Bun B' Freeman, 2015-04-23 Now a global and transnational phenomenon, hip hop culture continues to affect and be affected by the institutional, cultural, religious, social, economic and political landscape of American society and beyond. Over the past two decades, numerous disciplines have taken up hip hop culture

for its intellectual weight and contributions to the cultural life and self-understanding of the United States. More recently, the academic study of religion has given hip hop culture closer and more critical attention, yet this conversation is often limited to discussions of hip hop and traditional understandings of religion and a methodological hyper-focus on lyrical and textual analyses. *Religion in Hip Hop: Mapping the Terrain* provides an important step in advancing and mapping this new field of Religion and Hip Hop Studies. The volume features 14 original contributions representative of this new terrain within three sections representing major thematic issues over the past two decades. The Preface is written by one of the most prolific and founding scholars of this area of study, Michael Eric Dyson, and the inclusion of and collaboration with Bernard 'Bun B' Freeman fosters a perspective internal to Hip Hop and encourages conversation between artists and academics.

Digital Keywords Benjamin Peters, 2016-06-07 How the digital revolution has shaped our language In the age of search, keywords increasingly organize research, teaching, and even thought itself. Inspired by Raymond Williams's 1976 classic *Keywords*, the timely collection *Digital Keywords* gathers pointed, provocative short essays on more than two dozen keywords by leading and rising digital media scholars from the areas of anthropology, digital humanities, history, political science, philosophy, religious studies, rhetoric, science and technology studies, and sociology. *Digital Keywords* examines and critiques

the rich lexicon animating the emerging field of digital studies. This collection broadens our understanding of how we talk about the modern world, particularly of the vocabulary at work in information technologies. Contributors scrutinize each keyword independently: for example, the recent pairing of digital and analog is separated, while classic terms such as community, culture, event, memory, and democracy are treated in light of their historical and intellectual importance. Metaphors of the cloud in cloud computing and the mirror in data mirroring combine with recent and radical uses of terms such as information, sharing, gaming, algorithm, and internet to reveal previously hidden insights into contemporary life. Bookended by a critical introduction and a list of over two hundred other digital keywords, these essays provide concise, compelling arguments about our current mediated condition. Digital Keywords delves into what language does in today's information revolution and why it matters.
