Twitter and Tear Gas Zeynep Tufekci, 2017-05-16 A firsthand account and incisive analysis of modern protest, revealing internet-fueled social movements' greatest strengths and frequent challenges To understand a thwarted Turkish coup, an anti-Wall Street encampment, and a packed Tahrir Square, we must first comprehend the power and the weaknesses of using new technologies to mobilize large numbers of people. An incisive observer, writer, and participant in today's social movements, Zeynep Tufekci explains in this accessible and compelling book the nuanced trajectories of modern protests—how they form, how they operate differently from past protests, and why they have difficulty persisting in their long-term quests for change. Tufekci speaks from direct experience, combining on-the-ground interviews with insightful analysis. She describes how the internet helped the Zapatista uprisings in Mexico, the necessity of remote Twitter users to organize medical supplies during Arab Spring, the refusal to use bullhorns in the Occupy Movement that started in New York, and the empowering effect of tear gas in Istanbul's Gezi Park. These details from life inside social movements complete a moving investigation of authority, technology, and culture—and offer essential insights into the future of governance.

Digital Passages: Migrant Youth 2.0 Koen Leurs, 2016-12-15 Increasingly, young people live online, with the vast majority of their social and cultural interactions conducted through means other than face-to-face conversation. How does this transition impact the ways in which young migrants understand, negotiate, and perform identity? That's the question taken up by Digital Passages: Migrant Youth 2.0, a ground-breaking analysis of the ways that youth culture online interacts with issues of diaspora, gender, and belonging. Drawing on surveys, in-depth interviews, and ethnography, Koen Leurs builds an interdisciplinary portrait of online youth culture and the spaces it opens up for migrant youth to negotiate power relations and to promote intercultural understanding.

Social Media Is Bullshit B. J. Mendelson, 2012-09-04 A provocative look at social media that dispels the hype and tells you all you need to know about using the Web to expand your business If you listen to the pundits, Internet gurus, marketing consultants, and even the mainstream media, you could think social media was the second coming. When it comes to business, they declare that it's revolutionizing advertising, PR, customer relations—everything. And they all agree: it is here to stay. In this lively, insightful guide, journalist and social critic B.J. Mendelson skillfully debunks the myths of social media. He illustrates how the notion of social media first came to prominence, why it has become such a powerful presence in the marketing field, and who stands to benefit each time it's touted in the press. He shows you why all the Facebook friends and Twitter followers in the world mean nothing to you and your business without old-fashioned, real-world connections. He examines popular tales of social media success, and reveals some unsettling truths behind the surface. And he tells you how to best harness the potential of the Internet—without spending a fortune in the process. Social media is bullshit. This book gives the knowledge and tools you really need to connect with customers and grow your brand.

Hanging Out in the Virtual Pub Lori Kendall, 2002-06-27 In this ethnography, Lori Kendall examines how men and women negotiate their gender roles on an online forum she calls BlueSky. The result is an analysis of the emerging social phenomenon of Internet-mediated communication and a study of the social and cultural effects of a medium that allows participants to assume identities of their own choosing.

There's No Such Thing as "The Economy" Samuel A. Chambers, 2018 Every Economics textbook today teaches that questions of values and morality lie outside of, are in fact excluded from, the field of Economics and its proper domain of study, the economy. Yet the dominant cultural and media narrative in response to major economic crisis is almost always one of moral outrage. How do we reconcile this tension or explain this paradox by which Economics seems to have both everything and nothing to do with values? The discipline of modern economics hypostatizes and continually reifies a domain it calls the economy; only this epistemic practice makes it possible to falsely separate the question of value from the broader inquiry into the economic. And only if we have first eliminated value from the domain of economics can we then transform stories of financial crisis or massive corporate corruption into simple tales of ethics. But if economic forces establish, transform, and maintain relations of value then it proves impossible to separate economics from questions of value, because value relations only come to be in the world by way of economic logics. This means that the positive economics spoken of so fondly in the textbooks is nothing more than a contradiction in terms, and as this book demonstrates, there's no such thing as the economy. To grasp the basic logic of capital is to bring into view the unbreakable link between economics and value.

Hanging Out, Messing Around, and Geeking Out, Tenth Anniversary Edition Mizuko Ito, Sonja Baumer, Matteo Bittanti, Danah Boyd, Rachel Cody, 2019-09-24 The tenth-anniversary edition of a foundational text in digital media and learning, examining new media practices that range from podcasting to online romantic breakups. Hanging Out, Messing Around, and Geeking Out, first published in 2009, has become a foundational text in the field of digital media and learning. Reporting on an ambitious three-year ethnographic investigation into how young people live and learn with new media in varied settings—at home, in after-school programs, and in online spaces—it presents a flexible and useful framework for understanding the ways that young people engage with and through online platforms: hanging out, messing around, and geeking out, otherwise known as HOMAGO. Integrating twenty-three case studies—which include Harry Potter podcasting, video-game playing, music sharing, and online romantic breakups—in a unique collaborative authorship style, Hanging Out, Messing Around, and Geeking Out combines in-depth descriptions of specific group dynamics with conceptual analysis. Since its original publication, digital learning labs in libraries and museums around the country have been designed around the HOMAGO mode and educators have created HOMAGO guidebooks and toolkits. This tenth-anniversary edition features a new introduction by Mizuko Ito and Heather Horst that discusses how digital youth culture evolved in the intervening decade, and looks at how HOMAGO has been put into practice. This book was written as a collaborative effort by members of the Digital Youth Project, a three-year research effort funded by the John D. and Catherine T. MacArthur Foundation and conducted at the University of California, Berkeley, and the University of Southern California.

Watch Me Play T.L. Taylor, 2018-10-16 A look at the revolution in game live streaming and esports broadcasting Every day thousands of people broadcast their gaming live to audiences over the internet using popular sites such as Twitch, which reaches more than one hundred million viewers a month. In these new platforms for interactive entertainment, big esports events featuring digital game competitors live stream globally, and audiences

can interact with broadcasters—and each other—through chat in real time. What are the ramifications of this exploding online industry? Taking readers inside home studios and backstage at large esports events, *Watch Me Play* investigates the rise of game live streaming and how it is poised to alter how we understand media and audiences. Through extensive interviews and immersion in this gaming scene, T. L. Taylor delves into the inner workings of the live streaming platform Twitch. From branding to business practices, she shows the pleasures and work involved in this broadcasting activity, as well as the management and governance of game live streaming and its hosting communities. At a time when gaming is being reinvented through social media, the potential of an ever-growing audience is transforming user-generated content and alternative distribution methods. These changes will challenge the meaning of ownership and intellectual property and open the way to new forms of creativity. The first book to explore the online phenomenon Twitch and live streaming games, *Watch Me Play* offers a vibrant look at the melding of private play and public entertainment.

Emerging identities in virtual exchange Francesca Helm,2018-07-08 This book explores how identities emerge and are negotiated by young people in online facilitated dialogue, a form of virtual exchange. It offers a framework for this type of exploration based on the assumption that both the situated context and the technologies mediating online interactions influence, but do not necessarily determine, the interactions taking place and the participants' identity orientations. Identity is viewed not as fixed and static, but rather multiple and fluid as interactants position themselves in relation to one another. This framework is then applied to the analysis of one specific virtual exchange context, and the interactions over several weeks of a group of participants from a wide range of backgrounds.

Playing the Waves Jan Simons,2007 *Dogma 95*, the avant-garde filmmaking movement founded by the Danish director Lars von Trier and three of his fellow directors, was launched in 1995 at an elite cinema conference in Paris—when von Trier was called upon to speak about the future of film but instead showered the audience with pamphlets announcing the new movement and its manifesto. A refreshingly original critical commentary on the director and his practice, *Playing the Waves* is a paramount addition to one of new media's most provocative genres: games and gaming. *Playing the Waves* cleverly puns on the title of one of von Trier's most famous features and argues that *Dogma 95*, like much of the director's low-budget realist productions, is a game that takes cinema beyond the traditional confines of film aesthetics and dramatic rules. Simons articulates the ways in which von Trier redefines the practice of filmmaking as a rule-bound activity, and stipulates the forms and structures of games von Trier brings to bear on his films, as well as the sobering lessons he draws from economic and evolutionary game theory. Much like the director's films, this fascinating volume takes the traditional point of view of film theory and film aesthetics to the next level and demonstrates we have much to learn from the perspective of game studies and game theory.

Shift Jeremiah Desmarais,2017-06-09 Insurance agents and financial advisors are being taught outdated marketing and sales strategies to grow their businesses. Cold calling, seminars, online leads, networking groups and display ads are showing less returns. At the same time, according to Google, every 5 seconds someone is searching for a financial or insurance product to meet their needs, yet most agents are unaware of how to reach this growing market. *Shift* is a compilation of exclusive, rarely-before-seen techniques, strategies and best practices used right now to increase sales exponentially using digital marketing. These are not taught in magazines, books or courses today simply because most people won't share them. Jeremiah has used these concepts to train over 100,000 agents in over 51 countries including the US, Canada, Japan, Switzerland, the Caribbean and South Africa. Using his years of success stories and behind-the-scenes access to the frontlines of what's working now, Jeremiah has been part of teams that have generated over two million leads in the insurance space, leading to over \$300,000,000 in commissions paid out. He has documented the most inspiring, entertaining and duplicatable techniques his teams and front line advisors are using TODAY to SHIFT industry thinking to solve these problems.

DIY U Anya Kamenetz,2010-04-01 The price of college tuition has increased more than any other major good or service for the last twenty years. Nine out of ten American high school seniors aspire to go to college, yet the United States has fallen from world leader to only the tenth most educated nation. Almost half of college students don't graduate; those who do have unprecedented levels of federal and private student loan debt, which constitutes a credit bubble similar to the mortgage crisis. The system particularly fails the first-generation, the low-income, and students of color who predominate in coming generations. What we need to know is changing more quickly than ever, and a rising tide of information threatens to swamp knowledge and wisdom. America cannot regain its economic and cultural leadership with an increasingly ignorant population. Our choice is clear: Radically change the way higher education is delivered, or resign ourselves to never having enough of it. The roots of the words university and college both mean community. In the age of constant connectedness and social media, it's time for the monolithic, millennium-old, ivy-covered walls to undergo a phase change into something much lighter, more permeable, and fluid. The future lies in personal learning networks and paths, learning that blends experiential and digital approaches, and free and open-source educational models. Increasingly, you will decide what, when, where, and with whom you want to learn, and you will learn by doing. The university is the cathedral of modernity and rationality, and with our whole civilization in crisis, we are poised on the brink of Reformation.

Mistrust Florian Mühlfried,2018-03-31 Scholars have long seen trust as a foundational social good. We therefore have ample studies on building trust in free markets, on cultivating trust in the state, and on rebuilding trust through civil society. The contributors to this volume, instead, take a step back. They ask: Can mistrust ever be more than the flip side of trust, more than the sign of an absence or failure? By looking ethnographically at what a variety of actors actually do when they express mistrust, this volume offers a richly empirical trove of the social life of mistrust across a range of settings.

Creating Value with Knowledge Eric L. Lesser,Laurence Prusak,2004 This text examines a variety of important knowledge-related topics, such as the use of informal networks, communities of practice, the impact of knowledge on successful alliances, and social capital and trust.

Craft and the Creative Economy S. Luckman,2015-03-04 *Craft and the Creative Economy* examines the place of craft and making in the contemporary cultural economy, with a distinctive focus on the ways in which this creative sector is growing exponentially as a result of online shopfronts and home-based micro-enterprise, 'mumpreneurialism' and downshifting, and renewed demand for the handmade.

Qualitative Methods in Management Research Evert Gummesson,2000 This edition explores and explains the use of this methodological tool. Evert Gummesson refines the basic ideas from the first edition with conceptual developments, updated literature references and current examples from research and practice.

Legal Ethics and Social Media Jan L. Jacobowitz,John G. Browning,2022 As technology impacts what we do as a profession and arguably improves how we do it, lawyers need to know that our existing rules of ethics still apply in a brave new world of status updates, tweets, Instagram followings, YouTube uploads, and since the first edition-Zoom and other video platforms. And as our book details, the tension between the inexorable advance of technology and the comparatively slow pace of the law translates to a world in which we need all the guidance we can get in shaping our digital communications to our ethical responsibilities--
