Digital Passages: Migrant Youth 2.0 Koen Leurs, 2016-12-15 Increasingly, young people live online, with the vast majority of their social and cultural interactions conducted through means other than face-to-face conversation. How does this transition impact the ways in which young migrants understand, negotiate, and perform identity? That's the question taken up by Digital Passages: Migrant Youth 2.0, a ground-breaking analysis of the ways that youth culture online interacts with issues of diaspora, gender, and belonging. Drawing on surveys, in-depth interviews, and ethnography, Koen Leurs builds an interdisciplinary portrait of online youth culture and the spaces it opens up for migrant youth to negotiate power relations and to promote intercultural understanding.

The Digitalization of Public Diplomacy Ilan Manor, 2019-01-14 This book addresses how digitalization has influenced the institutions, practitioners and audiences of diplomacy. Throughout, the author argues that terms such as 'digitalized public diplomacy' or 'digital public diplomacy' are misleading, as they suggest that Ministries of Foreign Affairs (MFAs) are either digital or non-digital, when in fact digitalization should be conceptualized as a long-term process in which the values, norms, working procedures and goals of public diplomacy are challenged and re-defined. Subsequently, through case study examination, this book also argues that different MFAs are at different stages of the digitalization process. By adopting the term 'the digitalization of public diplomacy', this book will offer a new conceptual framework for investigating the impact of digitalization on the practice of public diplomacy.

Libraries: A Design Manual Nolan Lushington,Wolfgang Rudolf,Liliane Wong,2016-04-25 Libraries as a building type have been subjected to substantial changes in particular in the past ten years. Milestones such as Rem Koolhaas' Seattle Central Library from 2004 reinvented the typology completely and reflected a development from elitist temple of learning to a public living room. Hybrids between library and department store or theater were conceived. Today, the ubiquity of electronic devices and media needs to be taken into account by the designer: every new library has areas without any books now. This work of reference explains systematically all technological and planning requirements of library design. Special features such as RFID, signage, acoustics or specific structural load issues are explained in texts by experts from the fields of architecture and library science. Finally, approximately 40 best-practice case studies of contemporary library design are documented extensively. They are organized in four categories - national libraries, large public libraries, small public libraries, university libraries - and comprise high-profile examples such as Jo Coenen's Openbare Bibliotheek Amsterdam, Alvaro Siza's Public Library Viana do Castelo in Portugal or Mecanoo's Library of Birmingham from 2013.

Consumer Psychology Brian M. Young,2018-07-04 This book approaches consumer psychology from a unique perspective - it covers the entire lifespan, from birth to old age. Childhood and youth are not discussed as areas special, different and remote from the rest of consumer research but are integrated into our development as humans. Consumption is viewed as a process by groups and individuals with the cycle continuing through to disposal or ownership and possession. The author discusses how people's natural lifespan influences their relationship to the things they own, how preferences are developed from childhood and how motivations for purchases change throughout their lives from childhood to old age. This book brings together the most recent findings and theories on child and youth consumption, including children's understanding of advertising and marketing, teen and youth identities and their consumption tastes. Moving through Erikson's life stages chapters continue on to adulthood, the mid-life 'crisis' and possessions and ownership in older consumers. This is a deeply interdisciplinary work that will be of interest to scholars across the fields of psychology, business and marketing, as well as to the more general consumer.

Hate Crimes in Cyberspace Danielle Keats Citron,2014-09-22 The author examines the controversies surrounding cyber-harassment, arguing that it should be considered a matter for civil rights law and that social norms of decency and civility must be leveraged to stop it.

Compensated Dating Cassini Sai Kwan Chu,2018-01-16 This book considers a burgeoning social phenomenon, compensated dating in Hong Kong, that facilitates direct commercial sex exchange between consenting females from their mid-teens through the late 20s and males from their early 20s to mid-adulthood. Informed by the transformation of intimacy, the breakdown of institutional constraints, the emergence of a new female sexual autonomy and the advancement of information technology, this book moves beyond stereotypes of sex work to look at the complexities of compensated dating. The phenomenon of compensated dating is distinctive from most other sex trades in that it involves intense emotional interactions and often extends beyond the commercial boundary. Given the dynamic, flexible and ambiguous nature of compensated dating, it has become more of a space for sexual explorations and less of a rigid model of commercial sex, at least in the eye of the participants. This book walks through how men become involved in compensated dating and also sheds lights on how gender relations are negotiated, with important implications on what it means to be a man and a woman in contemporary Hong Kong society. It also speaks to the broader transformations of some of the key social structures and elements, particularly gender and sexualities, in the era of late modernity.

Epistemic Fluency and Professional Education Lina Markauskaite,Peter Goodyear,2016-09-21 This book, by combining sociocultural, material, cognitive and embodied perspectives on human

knowing, offers a new and powerful conceptualisation of epistemic fluency – a capacity that underpins knowledgeable professional action and innovation. Using results from empirical studies of professional education programs, the book sheds light on practical ways in which the development of epistemic fluency can be recognised and supported - in higher education and in the transition to work. The book provides a broader and deeper conception of epistemic fluency than previously available in the literature. Epistemic fluency involves a set of capabilities that allow people to recognize and participate in different ways of knowing. Such people are adept at combining different kinds of specialised and context-dependent knowledge and at reconfiguring their work environment to see problems and solutions anew. In practical terms, the book addresses the following kinds of questions. What does it take to be a productive member of a multidisciplinary team working on a complex problem? What enables a person to integrate different types and fields of knowledge, indeed different ways of knowing, in order to make some well-founded decisions and take actions in the world? What personal knowledge resources are entailed in analysing a problem and describing an innovative solution, such that the innovation can be shared in an organization or professional community? How do people get better at these things; and how can teachers in higher education help students develop these valued capacities? The answers to these questions are central to a thorough understanding of what it means to become an effective knowledge worker and resourceful professional.

Political Public Relations Jesper Stromback, Spiro Kioussis, 2019-07-30 The second edition of Political Public Relations offers an interdisciplinary overview of the latest theory and research in the still emerging field of political public relations. The book continues its international orientation in order to fully contextualize the field amidst the various political and communication systems today. Existing chapters have been updated and new chapters added to reflect evolving trends such as the rise of digital and social media, increasing political polarization, and the growth of political populism. As a singular contribution to scholarship in public relations and political communication, this volume serves as an important catalyst for future theory and research. This volume is ideal for researchers and courses at the intersection of public relations, political communication, and political science. Chapter 7 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license available at <http://www.taylorfrancis.com>.

Expressing Islam Greg Fealy, Sally White, 2008 As the forces of globalisation and modernisation buffet Islam and other world religions, Indonesia's 200 million Muslims are expressing their faith in ever more complex ways. This book examines some of the ways in which Islam is expressed in contemporary Indonesian life and politics. Editors from Australian National University.

Hypocretins Luis De Lecea, J. Gregor Sutcliffe, 2007-04-25 The first report that rapid eye movements occur in sleep in humans was published in 1953. The research journey from this point to the realization that sleep consists of two entirely independent states of being (eventually labeled REM sleep and non-REM sleep) was convoluted, but by 1960 the fundamental duality of sleep was well established including the description of REM sleep in cats associated with “wide awake” EEG patterns and EMG suppression. The first report linking REM sleep to a pathology occurred in 1961 and a clear association of sleep onset REM periods, cataplexy, hypnagogic hallucinations and sleep paralysis was fully established by 1966. When a naïve individual happens to observe a full-blown cataplexy attack, it is both dramatic and unnerving. Usually the observer assumes that the loss of muscle tone represents syncope or seizure. In order to educate health professionals and the general public, Christian Guilleminault and I made movies of full-blown cataplectic episodes (not an easy task). We showed these movies of cataplexy attacks to a number of professional audiences, and were eventually rewarded with the report of a similar abrupt loss of muscle tone in a dog. We were able to bring the dog to Stanford University and with this as the trigger, we were able to develop the Stanford Canine Narcolepsy Colony. Breeding studies revealed the genetic determinants of canine narcolepsy, an autosomal recessive gene we termed canarc1. Emmanuel Mignot took over the colony in 1986 and began sequencing DNA, finally isolating canarc1 in 1999.

Persuasive Gaming in Context Teresa De La Hera, Joost Raessens, Jeroen Jansz, Ben Schouten, 2021-03-23 The rapid developments of new communication technologies have facilitated the popularization of digital games, which has translated into an exponential growth of the game industry in the last decades. The ubiquitous presence of digital games has resulted in an expansion of the applications of these games from mere entertainment purposes to a great variety of serious purposes. In this edited volume, we narrow the scope of attention by focusing on what game theorist Ian Bogost has called persuasive games, that is, gaming practices that combine the dissemination of information with attempts to engage players in particular attitudes and behaviors. This volume offers a multifaceted reflection on persuasive gaming, that is, on the process of these particular games being played by players. The purpose is to better understand when and how digital games can be used for persuasion, by further exploring persuasive games and some other kinds of persuasive playful interaction as well. The book critically integrates what has been accomplished in separate research traditions to offer a multidisciplinary approach to understanding persuasive gaming that is closely linked to developments in the industry by including the exploration of relevant case studies.

Persuasive Games Ian Bogost, 2010-08-13 An exploration of the way videogames mount arguments and make expressive statements about the world that analyzes their unique persuasive power in terms of their computational properties. Videogames are an expressive medium, and a persuasive medium; they represent how real and imagined systems work, and they invite players to interact with those systems and form judgments about them. In this innovative analysis, Ian Bogost examines the way videogames mount arguments and influence players. Drawing on the 2,500-year history of rhetoric, the study of persuasive expression, Bogost analyzes rhetoric's unique function in software in general and videogames in particular. The field of media studies already analyzes visual rhetoric, the art of using imagery and visual representation persuasively. Bogost argues that videogames, thanks to their basic representational mode of procedurality (rule-based representations and interactions), open a new domain for persuasion; they realize a new form of rhetoric. Bogost calls this new form procedural rhetoric, a type of rhetoric tied to the core affordances of computers: running processes and executing rule-based symbolic manipulation. He argues further that videogames have a unique persuasive power that goes beyond other forms of computational persuasion. Not only can videogames support existing social and cultural positions, but they can also disrupt and change these positions themselves, leading to potentially significant long-term social change. Bogost looks at three areas in which videogame persuasion has already taken form and shows considerable potential: politics, advertising, and learning.
