Mr. Penumbra's 24-Hour Bookstore Robin Sloan,2012-10-02 The Great Recession has shuffled Clay Jannon out of his life as a web-design drone, and serendipity, sheer curiosity and the ability to climb a ladder like a monkey have landed him a new gig working the night shift at Mr. Penumbra's 24-Hour Bookstore. But Clay begins to realize that this store is even more curious than its name suggests. There are only a few customers, but they come in repeatedly and never seem to actually buy anything. Instead they "check out" impossibly obscure volumes from strange corners of the store, all according to some elaborate, long-standing arrangement with the gnomish Mr. Penumbra. The store must be a front for something larger, Clay concludes, and soon he has embarked on a complex analysis of the customers' behaviour and roped his friends into helping him figure out just what's going on. But once they take their findings to Mr. Penumbra, they discover the secrets extend far beyond the walls of the bookstore. Evoking both the fairy-tale charm of Haruki Murakami and the enthusiastic novel-of-ideas wizardry of Neal Stephenson or Umberto Eco, Mr. Penumbra's 24-Hour Bookstore is exactly what it sounds like—an establishment you have to enter and will never want to leave.

**Jackie Ormes** Nancy Goldstein,2008 In the United States at mid-century, in an era when there were few opportunities for women in general and even fewer for African American women, Jackie Ormes blazed a trail as a popular artist with the major black newspapers of the day. Jackie Ormes chronicles the life of this multiply talented, fascinating woman who became a successful commercial artist and cartoonist. Ormes's cartoon characters (including Torchy Brown, Candy, and Patty-Jo 'n' Ginger) delighted readers of newspapers such as the Pittsburgh Courier and Chicago Defender, and spawned other products, including fashionable paper dolls in the Sunday papers and a black doll with her own extensive and stylish wardrobe. Ormes was a member of Chicago's Black elite in the postwar era, and her social circle included the leading political figures and entertainers of the day. Her politics, which fell decidedly to the left and were apparent to even a casual reader of her cartoons and comic strips, eventually led to her investigation by the FBI. The book includes a generous selection of Ormes's cartoons and comic strips, which provide an invaluable glimpse into U.S. culture and history of the 1937-56 era as interpreted by Ormes. Her topics include racial segregation, cold war politics, educational equality, the atom bomb, and environmental pollution, among other pressing issues of the times. I am so delighted to see an entire book about the great Jackie Ormes! This is a book that will appeal to multiple audiences: comics scholars, feminists, African Americans, and doll collectors. . . . ---Trina Robbins, author of A Century of Women Cartoonists and The Great Women Cartoonists Nancy Goldstein became fascinated in the story of Jackie Ormes while doing research on the Patty-Jo Doll. She has published a number of articles on the history of dolls in the United States and is an avid collector.

**White Noise** Don DeLillo,1999-06-01 A brilliant satire of mass culture and the numbing effects of technology, White Noise tells the story of Jack Gladney, a teacher of Hitler studies at a liberal arts college in Middle America. Jack and his fourth wife, Babette, bound by their love, fear of death, and four ultramodern offspring, navigate the rocky passages of family life to the background babble of brand-name consumerism. Then a lethal black chemical cloud, unleashed by an industrial accident, floats over their lives, an airborne toxic event that is a more urgent and visible version of the white noise engulfing the Gladneys—the radio transmissions, sirens, microwaves, and TV murmurings that constitute the music of American magic and dread.

Designing Information Joel Katz,2012-08-20 The book itself is a diagram of clarification, containing hundredsof examples of work by those who favor the communication ofinformation over style and academic postulation—and those whodon't. Many blurbs such as this are written without a thoroughreading of the book. Not so in this case. I read it and love it. Isuggest you do the same. —Richard Saul Wurman This handsome, clearly organized book is itself a prime exampleof the effective presentation of complex visual information. —eg magazine It is a dream book, we were waiting for...on the field ofinformation. On top of the incredible amount of presented knowledgethis is also a beautifully designed piece, very easy tofollow... —Krzysztof Lenk, author of Mapping Websites:Digital Media Design Making complicated information understandable is becoming thecrucial task facing designers in the 21st century. WithDesigning Information, Joel Katz has created what willsurely be an indispensable textbook on the subject. —Michael Bierut Having had the pleasure of a sneak preview, I can only say thatthis is a magnificent achievement: a combination of intelligenttext, fascinating insights and - oh yes - graphics. Congratulationsto Joel. —Judith Harris, author of Pompeii Awakened: A Storyof Rediscovery Designing Information shows designers in all fields -from user-interface design to architecture and engineering - how todesign complex data and information for meaning, relevance, andclarity. Written by a worldwide authority on the visualization ofcomplex information, this full-color, heavily illustrated guideprovides real-life problems and examples as well as hypotheticaland historical examples, demonstrating the conceptual and pragmaticaspects of human factors-driven information design. Both successfuland failed design examples are included to help readers understandthe principles under discussion.

**This Book Is a Camera** Kelli Anderson,2015-11-20 This is a working camera that pops up from the pages of a book..The book concisely explains--and actively demonstrates--how a structure as humble as a folded piece of paper can tap into the intrinsic properties of light to produce a photograph.The book includes:- a piece of paper folded into a working 4x5 camera- a lightproof bag- 5 sheets of photo-paper film- development instructions (from complete DIY to outsource it)- a foil-stamped cover- a satisfying demonstration of the connection between design & science / structures & functions

Human - Space - Machine Torsten Blume,Christian Hiller (Curator),Stiftung Bauhaus Dessau,2014 Edition Bauhaus 38 In 1921, Walter Gropius founded a theater workshop at the Bauhaus. It conducted new research and experiments on the relationship between humans and technology. The central protagonists Lothar Schreyer, Oskar Schlemmer, and László Moholy-Nagy investigated the issues of mechanization, machine industrialization, and rationalization. They sought a new, meaningful relationship with the dynamized, increasingly technically animated environment. In their stage laboratory, they developed abstract motion studies, designed atmosphere machines, and built theater apparatus. They also organized the famous Bauhaus celebrations, where they staged themselves as a collective of new humans. For the first time, an exhibition and a catalog with sketches, drawings, photographs as well as films, figurines, costumes, models, and apparatus are now devoted to the experiments and concepts of the legendary Bauhaus stage.

**The Art of the B Movie Poster** Adam Newell,2024-08-13 Exploding off the page with over 1,000of the best examples of exploitation, grindhouse, and pulp film poster

design comes *The Art of the B-Movie Poster*, a collection of incredible posters from low-budget films from the 1940s, 50s, 60s, and 70s. Once relegated to the underground and midnight movie circuit, these films and their bombastic advertisements are experiencing a surge of mainstream popularity driven by fans appreciative of the artistic skill, distinctive aesthetic, and unabashed sensationalism they relied on to make a profit, with the quality of the poster often far surpassing that of the film itself. The book celebrates this tradition with sections divided into moral panic films, action, horror, sci-fi, and of course, sex, each introduced with short essays by genre experts such as Kim Newman, Eric Schaffer, Simon Sheridan, Vern, and author Stephen Jones, winner of the Horror Writer's Association 2015 Bram Stoker Award for Non-Fiction. Edited by Adam Newell and featuring an introduction by author and filmmaker Pete Tombs, *The Art of the B-Movie Poster* is a loving tribute to the artwork and artists that brought biker gangs, jungle girls, James Bond rip-offs and reefer heads to life for audiences around the world.

**Meaningful Stuff** Jonathan Chapman, 2021-08-03 An argument for a design philosophy of better, not more. Never have we wanted, owned, and wasted so much stuff. Our consumptive path through modern life leaves a wake of social and ecological destruction--sneakers worn only once, bicycles barely even ridden, and forgotten smartphones languishing in drawers. By what perverse alchemy do our newest, coolest things so readily transform into meaningless junk? In *Meaningful Stuff*, Jonathan Chapman investigates why we throw away things that still work, and shows how we can design products, services, and systems that last. Obsolescence is an economically driven design decision--a plan to hasten a product's functional or psychological undesirability. Many electronic devices, for example, are intentionally impossible to dismantle for repair or recycling, their brief use-career proceeding inexorably to a landfill. A sustainable design specialist who serves as a consultant to global businesses and governmental organizations, Chapman calls for the decoupling of economic activity from mindless material consumption and shows how to do it. Chapman shares his vision for an experience heavy, material light design sensibility. This vital and timely new design philosophy reveals how meaning emerges from designed encounters between people and things, explores ways to increase the quality and longevity of our relationships with objects and the systems behind them, and ultimately demonstrates why design can--and must--lead the transition to a sustainable future.

**Fake Love Letters, Forged Telegrams, and Prison Escape Maps** Annie Atkins, 2020-02-26 A behind-the-scenes look at the extraordinary and meticulous design of graphic objects for film sets. Although graphic props such as invitations, letters, tickets, and packaging are rarely seen close-up by a cinema audience, they are designed in painstaking detail. Dublin-based designer Annie Atkins invites readers into the creative process behind her intricately designed, rigorously researched, and visually stunning graphic props. These objects may be given just a fleeting moment of screen time, but their authenticity is vital and their role is crucial: to nudge both the actors on set and the audience just that much further into the fictional world of the film.

**The Sketchbook Project World Tour** Steven Peterman, Sara Elands Peterman, 2015-05-05 Destined to go down as one of the era's most astonishing global art projects, the Brooklyn Art Library's Sketchbook Project has, in less than a decade, amassed more than thirty thousand sketchbooks submitted by people of all ages and artistic abilities from more than 130 countries. Bursting with color, vivid imagery, and bouts of whimsy mixed with deeply intimate insights, the sketchbooks capture the texture of personal experience in a dizzying variety of illustrative styles and layouts that run the gamut from street portraits to stream-of-consciousness doodles, comics, and pop-ups. The Sketchbook Project World Tour presents the most compelling, surprising, and visually stunning examples from this one-of-a-kind artistic treasury.

**Graphic Design Rules** Tony Seddon, Sean Adams, Peter Dawson, John Foster, 2020-04-07 DON'T use comic sans (except ironically!) but DO worship the classic typefaces like Helvetica and Garamond. *Graphic Design Rules* is a handy guide for professional graphic designers, students, and laymen who incorporate graphic design into their job or small business. Packed with practical advice, this spirited collection of design dos and don'ts takes readers through 365 rules like knowing when to use a modular grid--and when to throw the grid out the window. All designers will appreciate tips and lessons from these highly accomplished authors, who draw on years of experience to help you create good design.

**Metaskills** Marty Neumeier, 2012-12-20 In a sweeping vision for the future of work, Neumeier shows that the massive problems of the 21st century are largely the consequence of a paradigm shift--a shuddering gear-change from the familiar Industrial Age to the unfamiliar "Robotic Age," an era of increasing man-machine collaboration. This change is creating the "Robot Curve," an accelerating waterfall of obsolescence and opportunity that is currently reshuffling the fortunes of workers, companies, and national economies. It demonstrates how the cost and value of a unit of work go down as it moves from creative to skilled to rote, and, finally, to robotic. While the Robot Curve is dangerous to those with brittle or limited skills, it offers unlimited potential to those with metaskills--master skills that enable other skills. Neumeier believes that the metaskills we need in a post-industrial economy are feeling (intuition and empathy), seeing (systems thinking), dreaming (applied imagination), making (design), and learning (autodidactics). These are not the skills we were taught in school. Yet they're the skills we'll need to harness the curve. In explaining each of the metaskills, he offers encouragement and concrete advice for mastering their intricacies. At the end of the book he lays out seven changes that education can make to foster these important talents. This is a rich, exciting book for forward-thinking educators, entrepreneurs, designers, artists, scientists, and future leaders in every field. It comes illustrated with clear diagrams and a 16-page color photo essay. Those who enjoy this book may be interested in its slimmer companion, *The 46 Rules of Genius*, also by Marty Neumeier. Things you'll learn in *Metaskills*: - How to stay ahead of the "robot curve" - How to account for "latency" in your predictions - The 9 most common traps of systems behavior - How to distinguish among 4 types of originality - The 3 key steps in generating innovative solutions - 6 ways to think like Steve Jobs - How to recognize the 3 essential qualities of beauty - 24 aesthetic tools you can apply to any kind of work - 10 strategies to trigger breakthrough ideas - Why every team needs an X-shaped person - How to overcome the 5 forces arrayed against simplicity - 6 tests for measuring the freshness of a concept - How to deploy the 5 principles of "unclinging" - The 10 tests for measuring great work - How to sell an innovative concept to an organization - 12 principles for constructing a theory of learning - How to choose a personal mission for the real world - The 4 levels of professional achievement - 7 steps for revolutionizing education. From the back cover Help! A robot ate my job! If you haven't heard this complaint yet, you will. Today's widespread unemployment is not a jobs crisis. It's a talent crisis. Technology is taking every job that doesn't need a high degree of creativity, humanity, or

leadership. The solution? Stay on top of the Robot Curve--a constant waterfall of obsolescence and opportunity fed by competition and innovation. Neumeier presents five metaskills--feeling, seeing, dreaming, making, and learning--that will accelerate your success in the Robotic Age.

**The Art of Looking Sideways** Alan Fletcher,2001-08-20 A primer in visual intelligence and an exploration of the workings of the eye, the hand, the brain and the imagination is comprised of an inexhaustible mine of anecdotes, quotations, images, trivia, oddities, serious science, jokes and memories, all concerned with the limitless resources of the human mind.

*Adolf Dehn's Manhattan* Philip Eliasoph,2017-08-31 \*A major monograph on this prolific artist and his love for Manhattan, featuring a never-before-seen presentation of paintings, prints, and drawings\*This book is for lovers of New York city and beyond, celebrating its golden age with a fresh, new appreciation for its urban design, parks, and the eternal romance of artAdolf Dehn (1895-1968), an American lithographer and watercolorist, left his hometown in Minnesota after formal training at the Minneapolis Art Institute to study at the Art Students League in New York. In the early 1920s, he traveled to the cosmopolitan cities of Paris, Vienna, and Berlin, where he focused on lithography and printmaking, and soon found success as a magazine illustrator. As he toured Europe, Dehn quickly acclimated to the continental lifestyle and was adept at depicting its nuances and idiosyncrasies through his prolific lithographs and sketches. His critical and satirical renderings of the political movements, social conventions, and governmental policies in pre-World War II Europe gave the Midwestern artist ample material for his growing body of work. Returning to the United States in 1930, Dehn exhibited his prints in several solo shows at the Weyhe Gallery in New York, starting in 1935. As an artist during the era of the Great Depression, Dehn did commercial artwork and contributed to popular magazines such as The New Yorker, Vogue, and Vanity Fair. In fact, his clever drawings that reflected the culture and fashionable society during the Jazz Age, made Dehn a favourite of Frank Crowninshield, Vanity Fair's renowned editor.During this time, while Dehn captured the heyday of burlesque theaters, lively Harlem nightclubs, the impressive skyline, and busy harbour, he was continuously drawn to Manhattan's Central Park his predilection for the city's magnificent green space was a sustaining source of inspiration and subject matter. Adolf Dehn: Midcentury Manhattan candidly examines the life and work of this exceptional, adventurous, and intrepid artist as he moved skillfully and capably between lithography, ink-wash drawings, gouache, casein painting, and in the late 1930s, watercolours. Combining numerous vintage photographs from the archives of the New York Historical Society, the Museum of the City of New York, and the New York Public Library with newly discovered, Manhattan-inspired prints and drawings from the collections of, among others, the Whitney Museum of American Art, MoMA, and The Metropolitan Museum of Art, Adolf Dehn: Midcentury Manhattan traces how Dehn's art reflected the spirit, pulse, and uniquely American tonalities captured in composer George Gershwin's popular Rhapsody in Blue. This is a book for lovers of New York City and beyond, celebrating its golden age with a fresh, new appreciation for its urban design, parks, and the eternal romance of art.

**The Designful Company** Marty Neumeier,2009-03-30 Part manifesto, part handbook, THE DESIGNFUL COMPANY provides a lively overview of a growing trend in management--design thinking as a business competence. According to the author, traditional managers have relied on a two-step process to make decisions, which he calls "knowing" and "doing." Yet in today's innovation-driven marketplace, managers need to insert a middle step, called "making." Making is a phase in which assumptions are questioned, futures are imagined, and prototypes are tested, producing a wide range of options that didn't exist before. The reader is challenged to consider the author's bold assertion: There can be no real innovation without design. Those who are new to Marty Neumeier's "whiteboard" series may want to ramp up with the first two books, THE BRAND GAP and ZAG. Both are easy reads. Covered in THE DESIGNFUL COMPANY: - the top 10 "wicked problems" that only design can solve - a new, broader definition of design - why designing trumps deciding in an era of change - how to harness the "organic drivetrain" of value creation - how aesthetics add nuance to managing - 16 levers to transform your company - why you should bring design management inside - how to assemble an innovation metateam - how to recognize and reward talent From the back cover: The complex business problems we face today can't be solved with the same thinking that created them. Instead, we need to start from a place outside traditional management. Forget total quality. Forget top-down strategy. In an era of fast-moving markets and leap-frogging innovations, we can no longer "decide" the way forward. Today we have to "design" the way forward--or risk ending up in the fossil layers of history. Marty Neumeier, author of THE BRAND GAP and ZAG, presents the new management engine that can transform your company into a powerhouse of nonstop innovation.

**Making Ideas Happen: Overcoming the Obstacles Between Vision and Reality** Scott Belsky,2011-06-02 Thomas Edison famously said that genius is 1% inspiration and 99% perspiration. Every day, new solutions, revolutionary cures, and artistic breakthroughs are conceived and squandered by smart people. Along with the gift of creativity come the obstacles to making ideas happen: lack of organisation, lack of accountability and a lack of community support.Scott Belsky has interviewed hundreds of the most productive creative people and teams in the world, revealing a common trait: a carefully trained capacity for ideas execution. Implementing your ideas is a skill that can be taught, and Belsky distils the core principles in this book.While many of us obsess about discovering great new ideas, Belsky shows why it is better to develop the capacity to make ideas happen - using old-fashioned passion and perspiration. Making Ideas Happen reveals the practical yet counterintuitive techniques of serial creatives - those few who make their visions a reality.
