**Climate Change Impacts and Women's Livelihood** Salim Momtaz,Muhammad Asaduzzaman,2018-10-08 Very few studies have been conducted to explore the vulnerability of women in the context of climate change. This book addresses this absence by investigating the structure of women's livelihoods and coping capacity in a disaster vulnerable coastal area of Bangladesh. The research findings suggest that the distribution of livelihood capitals of vulnerable women in rural Bangladesh is heavily influenced by several climatic events, such as cyclones, floods and seasonal droughts that periodically affect the region. Women face several challenges in their livelihoods, including vulnerability to their income, household assets, lives and health, food security, education, water sources, sanitation and transportation systems, because of ongoing climate change impacts. The findings have important policy relevance for all involved in disaster and risk management, both within Bangladesh and the developing countries facing climate change impacts. Based on the research findings, the book also provides recommendations to improving the livelihoods of women in the coastal communities. This book will appeal to academics, researchers and professionals in environmental management, gender and development, and climate change governance looking at the effects of and adaptation to climate change, gender issues and natural disaster management strategies.

**Physically Based Rendering** Matt Pharr,Wenzel Jakob,Greg Humphreys,2016-09-30 Physically Based Rendering: From Theory to Implementation, Third Edition, describes both the mathematical theory behind a modern photorealistic rendering system and its practical implementation. Through a method known as 'literate programming', the authors combine human-readable documentation and source code into a single reference that is specifically designed to aid comprehension. The result is a stunning achievement in graphics education. Through the ideas and software in this book, users will learn to design and employ a fully-featured rendering system for creating stunning imagery. This completely updated and revised edition includes new coverage on ray-tracing hair and curves primitives, numerical precision issues with ray tracing, LBVHs, realistic camera models, the measurement equation, and much more. It is a must-have, full color resource on physically-based rendering. Presents up-to-date revisions of the seminal reference on rendering, including new sections on bidirectional path tracing, numerical robustness issues in ray tracing, realistic camera models, and subsurface scattering Provides the source code for a complete rendering system allowing readers to get up and running fast Includes a unique indexing feature, literate programming, that lists the locations of each function, variable, and method on the page where they are first described Serves as an essential resource on physically-based rendering

Hidden Lives and Human Rights in the United States [3 volumes] Lois Ann Lorentzen,2014-07-23 The most comprehensive collection of essays on undocumented immigration to date, covering issues not generally found anywhere else on the subject. Three fascinating volumes feature the latest research from the country's top immigration scholars. In the United States, the crisis of undocumented immigrants draws strong opinions from both sides of the debate. For those who immigrate, concerns over safety, incorporation, and fair treatment arise upon arrival. For others, the perceived economic, political, and cultural impact of newcomers can feel threatening. In this informative three-volume set, top immigration scholars explain perspectives from every angle, examining facts and seeking solutions to counter the controversies often brought on by the current state of undocumented immigrant affairs. Immigration expert and set editor Lois Lorentzen leads a stellar team of contributors, laying out history, theories, and legislation in the first book; human rights, sexuality, and health in the

second; and economics, politics, and morality in the final volume. From family separation, to human trafficking, to notions of citizenship, this provocative study captures the human costs associated with this type of immigration in the United States, questions policies intended to protect the American way of life, and offers strategies for easing tensions between immigrants and natural-born citizens in everyday life.

**Translanguaging in Higher Education** Catherine M. Mazak, Kevin S. Carroll, 2016-12-09 This book examines translanguaging in higher education and provides clear examples of what translanguaging looks like in practice in particular contexts around the world. While higher education has historically been seen as a monolingual space, the case studies from the international contexts included in this collection show us that institutions of higher education are often translingual spaces that reflect the multilingual environments in which they exist. Chapters demonstrate how the use of translanguaging practices within the context of global higher education, where English plays an increasingly important role, allows students and professors to build on their linguistic repertoires to more efficiently and effectively learn content. The documentation of such practices within the context of higher education will further legitimize translanguaging practices and may lead to their increased use not only in higher education but also in both primary and secondary schools.

**Physically Based Rendering, fourth edition** Matt Pharr, Wenzel Jakob, Greg Humphreys, 2023-05-30 A comprehensive update of the leading-edge computer graphics textbook that sets the standard for physically-based rendering in the industry and the field, with new material on GPU ray tracing. Photorealistic computer graphics are ubiquitous in today's world, widely used in movies and video games as well as product design and architecture. Physically-based approaches to rendering, where an accurate modeling of the physics of light scattering is at the heart of image synthesis, offer both visual realism and predictability. Now in a comprehensively updated new edition, this best-selling computer graphics textbook sets the standard for physically-based rendering in the industry and the field. Physically Based Rendering describes both the mathematical theory behind a modern photorealistic rendering system as well as its practical implementation. A method known as literate programming combines human-readable documentation and source code into a single reference that is specifically designed to aid comprehension. The book's leading-edge algorithms, software, and ideas—including new material on GPU ray tracing—equip the reader to design and employ a full-featured rendering system capable of creating stunning imagery. This essential text represents the future of real-time graphics. Detailed and rigorous but accessible approach guides readers all the way from theory to practical software implementation. Fourth edition features new chapter on GPU ray tracing essential for game developers. The premier reference for professionals learning about and working in the field. Won its authors a 2014 Academy Award for Scientific and Technical Achievement. Includes a companion site complete with source code.

**Electing Peace** Aila M. Matanock, 2017-07-25 This book examines the causes and consequences of post-conflict elections in securing and stabilizing peace agreements without the need to send troops. It will interest scholars and advanced students of civil war and peacebuilding in comparative politics, political sociology, and peace and conflict studies.

**Gender, Climate Change and Livelihoods** Joshua Eastin, Kendra Dupuy, 2021-07-26 This book applies a gendered lens to evaluate the dynamic linkages between climate change and livelihoods in developing countries. It examines how climate change affects women and men in distinct ways, and what the implications are for earning income and accessing the natural, social, economic, and political resources required to survive and thrive. The book's contributing authors analyze the gendered impact of climate change on different types of livelihoods, in distinct contexts, including urban and rural, and in diverse

geographic locations, including Asia, Africa and the Caribbean. It focuses on understanding how public policies and power dynamics shape gendered vulnerabilities and impacts, how gender influences coping and adaptation mechanisms, and how civil society organizations incorporate gender into their climate advocacy strategies.

**American Slavery on Film** Caron Knauer,2023-02-14 A comprehensive and timely resource on the depictions in film of enslaved African Americans and slavery from the Antebellum Period to Emancipation. *American Slavery on Film* highlights historical and contemporary depictions in film of the resistance, rebellion, and resilience of enslaved African Americans in the United States from the Antebellum period to Emancipation. In her study of such films as *Uncle Tom's Cabin* (1914), a silent movie adaptation of Harriet Beecher Stowe's novel; the groundbreaking and successful television miniseries *Roots* (1977); and the Harriet Tubman biopic *Harriet* (2019), Caron Knauer analyzes how African American slavery has been and continues to be portrayed in major studio blockbusters and independent films alike. Separating the romanticized and unrealistic depictions of slavery from the more accurate but often unflinching portrayals of its horrors, the author covers a wide range of topics, including the impact of slavery on popular culture, the Underground Railroad, Maroon communities, and the Los Angeles Film Rebellion of the 1960s. As a result, this book delivers a comprehensive, readable, and timely examination of enslaved African Americans and slavery in America's film history.

*Climate Change, Hazards and Adaptation Options* Walter Leal Filho,Gustavo J. Nagy,Marco Borga,Pastor David Chávez Muñoz,Artur Magnuszewski,2020-02-14 This book addresses the issue of climate change risks and hazards holistically. Climate change adaptation aims at managing climate risks and hazards to an acceptable level, taking advantage of any positive opportunities that may arise. At the same time, developing suitable responses to hazards for communities and users of climate services is important in ensuring the success of adaptation measures. But despite this, knowledge about adaptation options, including possible actions that can be implemented to improve adaptation and reduce the impacts of climate change hazards, is still limited. Addressing this need, the book presents studies and research findings and offers a catalogue of potential adaptation options that can be explored. It also includes case studies providing illustrative and inspiring examples of how we can adapt to a changing climate.

*Climate Change and Gendered Livelihoods in Bangladesh* Sajal Roy,2021-11-07 Globally climate-induced disasters have been impacting marginalised communities' lives, livelihood and gendered relations. This book explores the effects of Cyclone Aila (as a result of climate change) in 2009 on the rural livelihoods and gendered relations of two ethnically distinct forest communities – Munda, an indigenous group, and Shora, a Muslim group – dwelling near the Sundarbans Forest in Bangladesh. Examining the cyclone's medium- to long-term impacts on livelihoods and comparative aspects of gendered relations between these two contrasting communities, this book addresses a gap in current critical development studies. It adopts an ethnographic research design and analyses the alterations to livelihood activities and reconfiguration of gender relations within the Munda and Shora communities since 2009. The study primarily contends that post-Aila, livelihoods and gendered relations have been substantially transformed in both communities, making the case that the improvement of local infrastructure, as an important part of the geographical location, has noticeably progressed the living conditions and livelihoods of some members of the Munda and Shora communities. Connecting climate-induced changes with the construction and alteration of gendered livelihood patterns, the

book will be of interest to a wide range of academics in the fields of Asian Studies, Sociology of Environment, Social Anthropology, Human Geography, Gender and Cultural Studies, Human Geography, Disaster Management and Forestry and Environmental Science.

*The Statebuilder's Dilemma* David A. Lake, 2016-06-10 The central task of all statebuilding is to create a state that is regarded as legitimate by the people over whom it exercises authority. This is a necessary condition for stable, effective governance. States sufficiently motivated to bear the costs of building a state in some distant land are likely to have interests in the future policies of that country, and will therefore seek to promote loyal leaders who are sympathetic to their interests and willing to implement their preferred policies. In *The Statebuilder's Dilemma*, David A. Lake addresses the key tradeoff between legitimacy and loyalty common to all international statebuilding attempts. Except in rare cases where the policy preferences of the statebuilder and the population of the country whose state is to be built coincide, as in the famous success cases of West Germany and Japan after 1945, promoting a leader who will remain loyal to the statebuilder undermines that leader's legitimacy at home. In Iraq, thrust into a statebuilding role it neither anticipated nor wanted, the United States eventually backed Nouri al-Malaki as the most favorable of a bad lot of alternative leaders. Malaki then used the support of the Bush administration to govern as a Shiite partisan, undermining the statebuilding effort and ultimately leading to the second failure of the Iraqi state in 2014. Ethiopia faced the same tradeoff in Somalia after the rise of a promising but irredentist government in 2006, invading to put its own puppet in power in Mogadishu. But the resulting government has not been able to build significant local support and legitimacy. Lake uses these cases to demonstrate that the greater the interests of the statebuilder in the target country, the more difficult it is to build a legitimate state that can survive on its own.

*Soul Catcher* Marjo Ojalammi, Elena Lindström, 2022-01-12 *Soul Catcher* consists of Elena's story and its analysis. A non-fiction book on psychic and spiritual misconduct that is very concealed and on which there is little information so far. The book deals with spiritual violence performed by religious leaders towards an adult person. Their authoritarian position can enable versatile abuse, also sexual. There is no exact term for this phenomenon in Finnish. We use the term *kietominen* in Finnish edition. Religious and spiritual dimension empowers the abuser to have such control and power, which is not possible in other mental and sexual abuse forms. Although the victim is an adult, it is very hard for her to recognize the fact that the relationship, she has been driven to, is not one of love and companionship between two equals. *Kietominen* (or seduction) works mainly in the same way as grooming: a manipulative process performed by an adult as a preparation for the sexual abuse of a child. An adult person is carefully and skilfully manipulated in spiritual context.

**Canadian Science Fiction, Fantasy, and Horror** Amy J. Ransom, Dominick Grace, 2019-05-27 *Canadian Science Fiction, Fantasy, and Horror: Bridging the Solitudes* exposes the limitations of the solitudes concept so often applied uncritically to the Canadian experience. This volume examines Canadian and Québécois literature of the fantastic across its genres—such as science fiction, fantasy, horror, indigenous futurism, and others—and considers how its interrogation of colonialism, nationalism, race, and gender works to bridge multiple solitudes. Utilizing a transnational lens, this volume reveals how the fantastic is ready-made for exploring, in non-literal terms, the complex and problematic nature of intercultural engagement.

**Why Diets Make Us Fat** Sandra Aamodt, 2016-06-07 “If diets worked, we'd all be thin by now. Instead, we have enlisted hundreds of millions of people into a war we can't win. What's the secret to losing weight? If you're like most of us, you've tried cutting calories, sipping weird smoothies, avoiding fats, and

swapping out sugar for Splenda. The real secret is that all of those things are likely to make you weigh more in a few years, not less. In fact, a good predictor of who will gain weight is who says they plan to lose some. Last year, 108 million Americans went on diets, to the applause of doctors, family, and friends. But long-term studies of dieters consistently find that they're more likely to end up gaining weight in the next two to fifteen years than people who don't diet. Neuroscientist Sandra Aamodt spent three decades in her own punishing cycle of starving and regaining before turning her scientific eye to the research on weight and health. What she found defies the conventional wisdom about dieting: 'Telling children that they're overweight makes them more likely to gain weight over the next few years. Weight shaming has the same effect on adults. 'The calories you absorb from a slice of pizza depend on your genes and on your gut bacteria. So does the number of calories you're burning right now. 'Most people who lose a lot of weight suffer from obsessive thoughts, binge eating, depression, and anxiety. They also burn less energy and find eating much more rewarding than it was before they lost weight. 'Fighting against your body's set point—a central tenet of most diet plans—is exhausting, psychologically damaging, and ultimately counterproductive. If dieting makes us fat, what should we do instead to stay healthy and reduce the risks of diabetes, heart disease, and other obesity-related conditions? With clarity and candor, Aamodt makes a spirited case for abandoning diets in favor of behaviors that will truly improve and extend our lives.

*Faith-Based Health Justice* Ville Päävänsalo, Ayesha Ahmad, George Zachariah, Mari Stenlund, 2021-02-16 In *Faith-Based Health Justice*, a stellar assembly of scholars mines critical insights into the promotion of health justice across Christian and Islamic faith traditions and beyond. Contributors to the volume consider what health justice might mean today, if developed in accordance with faith traditions whose commandment to care for the poor, ill, and marginalized lies at the core of their theology. And what kind of transformation of both faith traditions and public policies would be needed in the face of the health justice challenges in our turbulent time? Contributors to the volume come from a wide range of backgrounds, and the result will be of interest to scholars and students in social ethics, development studies, global theology, interreligious studies, and global health as well as experts, practitioners, and policy-makers in health and development work.

**Religious and Ethical Perspectives on Global Migration** Elizabeth W. Collier, Charles R. Strain, 2014-06-05 *Religious and Ethical Perspectives on Global Migration* examines the complicated social ethics of migration in today's world. Editors Elizabeth W. Collier and Charles R. Strain bring the perspectives of an international group of scholars toward a theory of justice and ethical understanding for the nearly two hundred million migrants who have left their homes seeking asylum from political persecution, greater freedom and safety, economic opportunity, or reunion with family members.
